

CONSUMER EXPENDITURE SURVEY

Family-Level Extracts, 1980:1 -1998:2

Ed Harris
John Sabelhaus*

(September 2000)

Abstract

This document describes an on-going data set extraction effort initiated by John Sabelhaus and continued by Ed Harris, both of the Congressional Budget Office. The annual “family-level” data files described here (available on the National Bureau of Economic Research (NBER) web site, www.nber.org) are the result of linking the four quarterly interviews for each Consumer Expenditure Survey (CE) respondent family. The processed data also collapses the hundreds of spending, income, and wealth categories into a consistent set of categories across all the years, so the data is useful for studying changes in household spending over time. These categories are cross-referenced with comparable National Income and Product Account (NIPA) values, so users of the data can assess the extent to which aggregate trends and cycles are captured in the micro CE data. Finally, there is a brief description of the FORTRAN 90 programs used to process the data for users who wish to create their own category decomposition over time.

I. Overview

This document describes two sets of Consumer Expenditure Survey (CE) extract data sets for the survey cohorts that entered their first interview in the quarters 1980:1 through 1998:2. The first set of seventy files (FFILE801, FFILE802,..., FFILE982) contains consumer unit information on expenditures, income, wealth, and basic household demographics. The second set of seventy files (MFILE801, MFILE802,..., MFILE982) contains additional consumer unit member earnings and demographic information. Files are not available for the quarters 1985:3, 1985:4, 1995:3, 1995:4. The CE sampling frame was changed in 1986 and 1996, and families that entered the survey in the two quarters preceding the change cannot be tracked across a full year.

The data extracts here use information from all four of the main public-use files available for each quarter: the family (FMLY) file, member (MEMB) file, detailed expenditure (MTAB) file, and detailed income (ITAB) file. The goal of producing these extracts is to have condensed versions of the original data where the organization is consistent over time. The data sets have been used for studying trends in saving over time, the distributional implications of consumption taxes, and other research involving the joint distribution of expenditures and income.¹

Several adjustments are made to the raw CE data in creating the extract data sets. There are approximately 600 detailed spending, income and wealth items (identified by "UCC codes")

For a general assessment about using the CE data for studying the joint distribution of consumption and income, see John Sabelhaus (1998) "Using the Consumer Expenditure Survey to Study Saving

in the interview survey. These are aggregated into 109 income, expenditure, and wealth categories (See Section V.) in the extract files, so some of the original detail is sacrificed for manageability. The aggregation is aimed at (1) calibrating the data to National Income Account (NIA) aggregates, and (2) measuring household saving using both residual and change in net worth methods (See Sections IV and VI). The change in UCC codes over time is reflected in the aggregation procedure, i.e., the 109 categories are consistent over all seventy data sets.

CE Interview data is collected and processed on a quarterly basis. Any Consumer Unit (CU) can be in the CE for up to four consecutive quarters. The four possible quarterly records for each family are matched to create one annual record for the household -- this is the basic sampling unit in the extract data sets. Households who show up in only one quarter have the same "family record" structure as one that responds all four quarters. The variable FULLYR is used to distinguish households who respond in all four quarters from those who do not.

The annual structure for the extract files leads to a slightly different presentation of the income data than on the original CE data files. Families are asked about their income "over the last twelve months" in their first and last interview, and asked about expenditures "over the last three months" in each of their four interviews. The income answers which chronologically correspond to the expenditures are those from the fourth interview: because of its quarterly processing approach, BLS actually puts the first interview income answers on the first three sets of quarterly files. On the extract files, the first-survey income answers are retained in the LAGINC array.

There are two sample sizes for each quarter reported in Section VII. The first entry is the number who begin the interview process in that quarter, generally about 1,500. The second entry

and Wealth Accumulation," Congressional Budget Office (May).

is the usable sample, who have to meet three other criteria. First, the respondents must have met the BLS "complete income reporter" requirement. Second, the household must have completed all four quarterly interviews (see description above, variable FULLYR). Finally, student households are dropped. Excluding households using the above criteria (about half) introduces substantial attrition bias, most notably, young renters tend not to complete the survey. Therefore, an attrition adjustment based on six age groups and renter/homeowner status is used to reweight the sample. These ratios are reported along with the sample sizes in Section VII.

II. Extract Data Sets Record Layout

This section shows the fixed-format layout for both data sets. The notation is from FORTRAN; "I" means integer, "A" means character, and "F" means a real variable with decimal places indicated by the number to the right of the decimal point.

III. Matched Data Set Variable Descriptions and Possible Values

A. Family Records

1. Original CE ID Number (NEWID)

Beginning Record Position: 1
Type of Variable: I7
Possible Values: Unique 1986:1+

2. Urban Household Identifier (BLSURBN)

Beginning Record Position: 8
Type of Variable: A1
Possible Values: 1=urban, 2=rural.

3. Region of Country (REGION)

Beginning Record Position: 9
Type of Variable: A1
Possible Values: 1=northeast, 2=midwest, 3=south, 4=west, blank for rural.

4. Housing Tenure Indicator (CUTENUR)

Beginning Record Position: 10
Type of Variable: A1
Possible Values: 1=homeowner w/ mortgage, 2=homeowner w/o mortgage, 3=homeowner, mortgage unknown, 4=renter, 5=occupied w/o payment, 6=student.

5. Government Housing Support Indicator (GOVHOUS)

Beginning Record Position: 11
Type of Variable: A1
Possible Values: 1=yes, govt is paying part of housing cost, 2=no, govt is not paying part of cost.

6. Public Housing Indicator (PUBHOUS)

Beginning Record Position: 12
Type of Variable: A1
Possible Values: 1=yes, public housing, 2=no, not public housing.

7. Income Response Status (REPSTAT)

Beginning Record Position: 13
Type of Variable: A1
Possible Values: 1=complete income reporter, 2=incomplete income reporter.

8. "Super" Income Response Status (SREPSTAT)

Beginning Record Position: 14
Type of Variable: A1
Possible Values: 1=complete income reporter, 2=incomplete income reporter.

This variable was created to assign a complete income reporting status in the 1980s which is more stringent than that set by BLS. If REPSTAT=2, then SREPSTAT=2. In addition, each of the 21 income and tax variables (in VAR(109) list; see REPFLAG(109) below) was checked to see how it was flagged on the FMLY record. If any of the four quarterly values for any income variable is B=invalid non-response or C=don't know, refusal, then SREPSTAT=2.

9. Month of Beginning Interview (INTMO)

Beginning Record Position: 15
Type of Variable: A2
Possible Values: 01 through 12

10. Year of Beginning Interview (INTYR)

Beginning Record Position: 17
Type of Variable: A2
Possible Values: 80 through 92

11. Consumer Unit Sampling Weight (TOTWT)

Beginning Record Position: 19
Type of Variable: F11.3

This variable is the result of summing the original quarterly weights.

12. Sample Weight, Attrition Adjusted (ADJWT)

Beginning Record Position: 30
Type of Variable: F11.3

This variable is an adjusted version of TOTWT, reflecting differences in attrition (leaving sample or not answering income questions) across age and homeownership status. The attrition factors are shown in Appendix 3.

The relationship between TOTWT and ADJWT is this. Using TOTWT to weight the entire sample and ADJWT to weight the (FULLYR=1/REPSTAT=1) sample will yield the same overall population estimates.

13. Full Year Indicator (FULLYR)

Beginning Record Position: 41
Type of Variable: II
Possible Values: 1=in sample four quarters, 0=missing one or more

14. Number of Full/Part Time Earners in Consumer Unit (NUMEARN)

Beginning Record Position: 42
Type of Variable: F4.1

NOTE: Non-integer because averaged over the four quarters.

15. Number of Automobiles Owned By Consumer Unit (NUMAUTO)

Beginning Record Position: 46
Type of Variable: F4.1

NOTE: Non-integer because averaged over the four quarters.

16. Number of Vehicles Owned By Consumer Unit (VEHQ)

Beginning Record Position: 50

Type of Variable: F4.1

NOTE: Non-integer because averaged over the four quarters.

17. Consumer Unit Size (FAMSIZE)

Beginning Record Position: 54

Type of Variable: F4.1

NOTE: Non-integer because averaged over the four quarters.

18. Total Number of Members At Least Part Year in Consumer Unit (MEMBCNT)

Beginning Record Position: 58

Type of Variable: I2

NOTE: Inspection limits MEMBCNT to 20.

19. Annual 109 Category Income/Consumption/Wealth Variables (VAR(109))

Beginning Record Position: 60

Type of Variable: 109F10.2

The following is a list of the 109 categories, UCC code mapping is in Section V:

1. Wages and Salaries
2. Proprietor's Accounting Profit
3. Farm Accounting Profit
4. Rental Accounting Profit
5. Dividends Received
6. Interest Received
7. Government/Private Pensions
8. Social Security Benefits
9. Supplemental Security Income
10. Unemployment Compensation
11. Worker's Comp/Veteran's Benefits
12. Public Assistance/Welfare
13. Scholarships, Foster Children
14. Food Stamp Benefits
15. Deductions For Government Retirement
16. Deductions For Railroad Retirement
17. Deductions For Social Security
18. Federal Income Taxes

19. State and Local Income Taxes
20. Personal Property Taxes
21. Other Taxes
22. Nontaxes
23. Food Off-Premise
24. Food On-Premise
25. Food Furnished Employees
26. Tobacco Products
27. Alcohol Off-Premise
28. Alcohol On-Premise
29. Clothing and Shoes
30. Clothing Services
31. Jewelry and Watches
32. Toilet Articles and Preparations
33. Barbershops, Beauty Parlors, Health Clubs
34. Tenant-Occupied Nonfarm Dwellings--Rent
35. Other Rented Lodging
36. Furniture and Durable Household Equipment
37. Nondurable Household Supplies and Equipment
38. Electricity
39. Gas
40. Water and Other Sanitary Services
41. Fuel Oil and Coal
42. Telephone and Telegraph
43. Domestic Service, Other Household Operation
44. Drug Preparations
45. Ophthalmic Products and Orthopedic Appliances
46. Physicians, Dentists, Other Medical Professionals
47. Hospitals
48. Nursing Homes
49. Health Insurance
50. Business Services
51. Expense of Handling Life Insurance
52. New and Used Motor Vehicles
53. Tires, Tubes, Accessories, and Other Parts
54. Repair, Greasing, Washing, Parking, Storage, Rental
55. Gasoline and Oil
56. Bridge, Tunnel, Ferry, and Road Tolls
57. Auto Insurance
58. Mass Transit Systems
59. Taxicab, Railway, Bus, and Other Travel Expenses
60. Airline Fares
61. Books and Maps
62. Magazines, Newspapers, Other Nondurable Toys, etc.
63. Recreation and Sports Equipment
64. Other Recreation Services

65. Pari-Mutuel Net Receipts
66. Higher Education
67. Nursery, Elementary, and Secondary Education
68. Other Education Services
69. Religious and Welfare Activities
70. Insurance Refunds (Negative)
71. Interest Paid By Consumers - Vehicles
72. Interest Paid By Consumers - Other
73. Rent Received as Pay
74. Market Value of Owned Home
75. Rental Equivalence of Owned Home
76. Owned Housing Interest Payments
77. Owned Housing Property Taxes
78. Owned Housing Intermediate Goods/Services
79. Owned Housing Mortgage Principal
80. Owned Housing Lump Sum Mortgage Payments
81. Owned Housing Properties Sold
82. Owned Housing Properties Purchased
83. Owned Housing, Mortgages Originated
84. Owned Housing Mortgage Held By Seller
85. Owned Housing Transactions Costs
86. Housing Additions and Alterations
87. Checking, Brokerage Accounts
88. Change In Checking, Brokerage Accounts
89. Savings Accounts
90. Change in Savings Account
91. Market Value of Stocks and Bonds
92. Change in Stocks and Bonds
93. Amount Borrowed Vehicle Loan
94. Trade In Allowance For Vehicles
95. Vehicles Sold or Reimbursed
96. Reduction of Principle On Vehicle Loan
97. Net Assets Invested in Farm or Business
98. Contributions to Private Pensions
99. Contributions to Self Employed Retirement
100. Change in Money Owed to Consumer Unit
101. Amount Owed First Interview
102. Amount Owed First Interview, Q1 Only
103. Amount Owed Fifth Interview
104. Amount Owed Fifth Interview, Q1 Only
105. Contributions Paid to Others, With Alimony/Child Support
106. Contributions Received from Others, With Alimony/Child Support
107. Contributions Paid: Measured on Expenditure File (1982-89 On
108. Lump Sum Receipts from Estates, Bequests, Inheritances, Etc.
109. Other Net Cash Inflow

20. Lagged Income Variables (LAGINC(22))

Beginning Record Position: 1150
Type of Variable: 22F10.2

NOTE: These measures replace the first twenty-one elements of VAR(109) with 4*first quarter value. The 22nd element of LAGINC is the lagged 99th element of VAR(109), contributions to IRA/KEO accounts, which was also asked at 2nd and 5th interviews.

21. Reporting Flags (REPFLAG(109))

Beginning Record Position: 1370
Type of Variable: 109A1
Possible Values: Annual flag value based on quarterly values. If any quarterly value='B' (invalid, non-response), then annual value='B'; else if any quarterly value='C' (don't know, refusal) then annual value='C'; else if any quarterly value='T' (top-coded), the annual value='T'; else if any quarterly value='D' (valid or good data), then annual value='D'; else if any quarterly value='A' (valid blank), then annual value='A'.

B. Member Records

1. Identification Number (NEWID)

Beginning Record Position: 1
Type of Variable: I7

2. Age of Consumer Unit Members (AGE)

Beginning Record Position: 8
Type of Variable: I3

NOTE: AGE is last reported age for each member in 1980s.

3. Relation of Consumer Unit Members to Head of Household (RELATION)

Beginning Record Position: 11
Type of Variable: A1
Possible Values: 1=head of household, 2=spouse, 3=child or adopted child of head, 4=grandchild of head, 5=in-law of head, 6=brother/sister of head, 7=mother/father of head, 8=other relatives, 9=unrelated individual, 0=na

NOTE: First person in household is not always head.

4. Education Level of Consumer Unit Members (EDUC)

Beginning Record Position: 12
Type of Variable: A2
Possible Values: **Prior to 1996:** 00=never attended, 01 through 12=year completed through high school, 21=first year of college or equivalent, 22=2nd year of college or equivalent, 23=3rd year of college or equivalent, 24=4th year of college or equivalent, 31=1st year graduate school or equivalent, 32=2nd year of graduate school or more.
1996 and later: 00=Never attended school, 1-11 1st grade through 11th grade, 38=Twelfth grade no degree, 39=High school graduate, 40=Some college no degree, 41=Associate's degree,

(occupational/vocational), 42=Associate's degree (academic), 43=Bachelor's degree, 44=Master's degree, 45 =Professional degree, 46=Doctorate degree

5. Race of Member (RACE)

Beginning Record Position: 14
Type of Variable: A1
Possible Values: 1=white, 2=black, 3=american indian or aleut eskimo, 4=asian or pacific islander, 5=other

6. Sex of Member (SEX)

Beginning Record Position: 15
Type of Variable: A1
Possible Values: 1=male, 2=female

7. Number of Weeks Member in Household (WEEKSIN)

Beginning Record Position: 16
Type of Variable: I2
Possible Values: 13, 26, 39, or 52

8. Did Employer Contribute to Member's Private Pension Fund? (EMPLCONT)

Beginning Record Position: 18
Type of Variable: A1
Possible Values: 1=yes, 2=no

9. Is Member Currently in College? (INCOLL)

Beginning Record Position: 19
Type of Variable: A1
Possible Values: 1=full time, 2=part time, 3=not at all

10. Reason Member is Not Working (NONWORK)

Beginning Record Position: 20
Type of Variable: A1
Possible Values: 1=ill, disabled, 2=taking care of home/family,
3=going to school, 4=could not find work,
5=retired, 6=doing something else

11. Marital Status of Each Member (MARITAL)

Beginning Record Position: 21
Type of Variable: A1
Possible Values: 1=married, 2=widowed, 3=divorced, 4=separated,
5=never married

12. Employment Status of Members (EMPSTAT)

Beginning Record Position: 22
Type of Variable: A1
Possible Values: 1=member worked full time for a full year,
2=member worked part time for a full year,
3=member worked full time for part of year,
4=member worked part time for part of year, blank
if member did not work.

13. Type of Employee (EMPTYTYPE)

Beginning Record Position: 23
Type of Variable: A1
Possible Values: 1=private company, 2=government employee,
3=self-employed, 4=working without pay.

14. Number of Hours Member Worked Per Week (HRSWKD)

Beginning Record Position: 24
Type of Variable: I3

15. Number of Weeks Member Worked (WKSWKD)

Beginning Record Position: 27
Type of Variable: I2
Possible Values: 00 through 52=actual number.

16. Occupation of Member (OCCUP)

Beginning Record Position: 29
Type of Variable: A2
Possible Values: 01=managerial and professional specialty occupation, 02=technical, sales, and administrative support occupations, 03=service occupations, 04=farming, forestry, and fishing occupations, 05=precision production, craft, and repair occupations, 06=operators, fabricators, and laborers, 07=armed forces, 08=self employed, 09=not working, 10=retired, 11=other, including not reported.

17. Industry of Member (INDUST)

Beginning Record Position: 31
Type of Variable: A2
Possible Values: 01=agriculture, forestry, fisheries, and mining, 02=construction, 03=-manufacturing, 04=transportation, communications, public utilities, 05=wholesale and retail trade, 06=finance, insurance, real estate, 07=professional and related services, 08=other services, 09=public administration, 10=industry nor reported or nonresponse.

18. Member Income and Tax Variables (MEMBINC(12))

Beginning Record Position: 33
Type of Variable: 12F10.2

The twelve elements of the array are:

1. Annual Federal Tax Paid
2. Annual Government Retirement Deducted
3. Annual Private Pension Contributions Deducted

4. Annual Railroad Retirement Deducted
5. Annual State/Local Tax Paid
6. Annual Farm Income
7. Annual IRA/KEOGH Contributions
8. Annual Social Security Paid
9. Annual Non-Farm Business Income
10. Annual Wage and Salary Income
11. Annual Social Security Income
12. Annual Supplemental Security Income

19. Lagged Member Income and Tax Variables (LMEMBINC(12))

Beginning Record Position: 153
Type of Variable: 12F10.2

The twelve elements of the array are the same as MEMBINC(12), these are first quarter values.

V. UCC Code Mapping

This section shows how the several hundred UCC codes are allocated across the 109 income, consumption, and wealth change categories listed above. It is important to note that not all UCC codes are used in every year, but BLS has not “re-used” any UCC codes, so this list applies to every year of the data. In most cases, UCCs were added or dropped when categories are split or collapsed, and so long as those splits stay within any given aggregated category there is no impact on the 109 variables.

VI. Cross-Reference of CE/NIA

This cross-reference is used for aligning aggregated CE expenditures to National Income Accounts (NIA) values for each year. Each VAR(109) element is listed followed by the NIA table and line numbers it should match. For example, Wages and Salaries (VAR(1)) should match NIA Table 2.1 line 2 minus Table 2.4 lines 5 and 16 and Table 8.21 line 145.³

1. Wages and Salaries

-204005

-204016

³Note that there have been many changes to the NIPA saving concept in recent years, and this cross-reference reflects the version of the NIA tables as of September 2000. For a useful discussion of how NIA saving measures are constructed and how they relate to the cash-based saving here, see William Gale and John Sabelhaus (1999), "Perspectives on the Household *Brookings Papers on Economic Activity, 1:1999*, pp 181-224.

VIII. Programs Used To Create These Datasets

The Fortran programs used to create the described CE data files, as well as several small input files needed for these programs to run, are also available on the NBER web site. These programs were compiled and executed on a Windows 98 Compaq Fortran 90 compiler; each is a subroutine called by the program cexmain.f90.

Program Files:

Doccex.f90. This program reads the mapping of UCC codes into the 109 income, expenditure and wealth categories (in the text files INC22, Con47, and Oth40), and produces a crosswalk file (CEXUCC) used by subsequent programs.

Cexqtr.f90. This program reads the raw CEX files (MTAByrq, ITAByrq, MEMByrq, and FMLYyrq) and aggregates the expenditure items into the 109 collapsed categories.

Cexfam.f90. This program takes the files created by Cexqtr and creates a unified family record, with expenditures from all quarters aggregated into an annual amount.

create_ffile.F90. This program takes the files created by Cexfam, applies the attrition adjustment factors, and writes out the final ffile and memb files.

Input Files (necessary for processing):

Inc22, Con47, Oth40. Text files which contain the mapping of UCC codes into the 109 income, expenditure and wealth categories, similar to section V of this document.

mapwtv2.txt. Text file that contains a mapping of CE interviews into calendar years.

cextitle Text file containing the titles for the 109 CE expenditure and income categories.
