*Relation of the Directors to the Work and Publications
of the
National Bureau of Economic Research*

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No report shall be published until the Director or Directors of Research shall have submitted to the Board a summary drawing attention to the character of the data and their utilization in the report, the nature and treatment of the problems involved, the main conclusions and such other information as in their opinion would serve to determine the suitability of the report for publication in accordance with the principles of the Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. For each manuscript to be so submitted a special committee shall be appointed by the President, or at his designation by the Executive Director, consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the summary and report described in paragraph (4) are sent to him. It shall be the duty of each member of the committee to read the manuscript. If each member of the special committee signifies his approval within thirty days, the manuscript may be published. If each member of the special committee has not signified his approval within thirty days of the transmittal of the report and manuscript, the Director of Research shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty additional days shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board and a two-thirds majority of those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed shall have approved.

6. No manuscript may be published, though approved by each member of the special committee, until forty-five days have elapsed from the transmittal of the summary and report. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general, or of the special committee, have passed upon its validity in every detail.

7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every National Bureau Book.

(Resolution adopted October 25, 1926 and revised February 6, 1933 and February 24, 1941)

ACKNOWLEDGMENTS

THE STUDIES in this volume could not have been undertaken without the initial support and continuing interest of the members of the Executive Committee of the Conference. Not only were they helpful in creating favorable circumstances for the necessary work, but their comments and suggestions on preliminary and revised plans were helpful in pointing out fruitful avenues of investigation. The suggestions of Simon Kuznets, Robert R. Nathan, Milton Friedman, and Morris A. Copeland deserve special mention.

The development, progress, and preliminary results of each study were subjected to the critical scrutiny of a University of Wisconsin faculty committee on Wisconsin income, consisting of Harold M. Groves, Chairman, Don Anderson, James S. Earley, E. A. Gaumnitz, and L. E. Pfankuchen. This group, in a series of meetings, discussed these studies with the authors at every stage. While the more direct results of these discussions, which we each vividly recall, were substantial, these studies were probably improved even more by the hints and suggestions whose value was not immediately appreciated. During his stay at the University of Wisconsin, Milton Friedman was a consultant and helped us all with many technical problems.

The interest of Simon Kuznets and Harold M. Groves from the time of starting the tabulations of Wisconsin income tax returns through every phase of the study was always a source of inspiration. Without their continuing interest and support these studies would never have been completed.

We are indebted, also, to W. L. Crum, Solomon Fabricant, C. Lowell Harriss, Frederick C. Mills, and Geoffrey H. Moore for

uncovering many ambiguities in the manuscript and for other valuable suggestions.

We are grateful to Martha Anderson for her careful editing of the manuscript and to H. Irving Forman for preparing the excellent charts.

CONTENTS

Acknowledgments	vii
Foreword by Milton Friedman	1

Part I

INCOME RECEIVED IN WISCONSIN, 1936

FRANK A. HANNA, JOSEPH A. PECHMAN, AND SIDNEY M. LERNER

A	Income of Farmers	23
1	Net Farm Income	23
2	Nonfarm Income of Farmers	26
	Value of produce consumed on the farm	26
	Number receiving wages and wages received	26
	Other sources of income	28
	Interest paid by farmers as a business expense	28
B	Income of Nonagricultural Entrepreneurs	29
1	Number of Entrepreneurs	29
	Census data	30
	Filers and nonfilers	33
2	Entrepreneurial Income	33
3	Other Income of Nonagricultural Entrepreneurs not Filing Returns	34
4	Interest Paid or Payable by Entrepreneurs	34
C	Income of Wage Earners	35
1	Number of Wage Earners	35
	Covered industries	35
	Noncovered industries	37
2	Wages	40
	Covered industries	40
	Noncovered industries	40
3	Total Income of Wage Earners	42

D Method of Combining Estimates	44
E Reliability of Estimates	45
1 Amount of Income	45
Comparison with 'Income Payments'	48
2 Number of Recipients	49
Appendix	50
1 Definition of Terms	50
Income	50
Deductions	55
Aggregates	57
2 Filing Requirements	58

Part II

PATTERNS OF INCOME

JOSEPH A. PECHMAN

CHAPTER	
1 Summary	61
A Composition and Size of Individual Incomes	63
B Patterns of Income	64
C Stability of Income Composition	66
D Relation between Income Composition and its Size Distribution	67
Changes in income composition associated with changes in its absolute distribution	69
Changes in income composition associated with changes in its relative distribution	70
E Changes in the Relative Distribution of Income	71
Size distributions of types of receipt	71
Effect of changes in the relative distribution of receipts on that of total income	72
Effect of changes in aggregate receipts on the size distribution of total income	73
Changes in the relative distribution of total income over time	73
F Conclusion	74
2 Composition and Patterns of Income	76
A Composition of Income in Each Income Group	76
B The Heterogeneity of Incomes at Specific Income Levels	79

CHAPTER

C	A Functional Classification of Income Recipients	83
D	Homogeneity of Functional Categories	86
	Number of receipts	87
	Secondary receipts	87
	Composition of the income of wage earners, entrepreneurs, and investors	90
	Relative distributions	91
E	Evaluation of a Functional Classification of Income Re- cipients	92
3	Stability of Composition and Patterns of Income	94
	A Stability of an Individual's Income Pattern	95
	B Stability of Income Patterns at Specific Income Levels	97
	C Stability of Income Composition at Specific Income Levels	98
4	Composition and Distribution of Income	106
	A Effect of Changes in the Aggregate and Distribution of In- come on its Composition	111
5	Distribution of Income by Size	117
	A Size Distributions of Income Receipts	117
	B Effect of Changes in the Size Distribution of Receipts on the Size Distribution of Total Income	124
	C Effect of Changes in Aggregate Receipts on the Size Dis- tribution of Total Income	128
	D Changes in the Relative Distribution of Total Income	130
APPENDIX		
A	Basic Tables	132
B	Methods Used to Determine Effects of Changes in the Ab- solute and Relative Distributions of Total Income upon Its Composition	140
	1 Calculating the Basic Frequency Distribution	140
	Interpolation below \$3,000	142
	Interpolation above \$3,000	143
	2 Transforming the Basic Frequency Distribution	143
	Proportionate increase in aggregate income	143
	Moving the Lorenz curve toward the line of equal dis- tribution	145
C	Methods Used to Determine Effects of Changes in the Size Distributions of Receipts upon the Size Distribution of Total Income	147

Part III

THE ACCOUNTING PERIOD AND THE
DISTRIBUTION OF INCOME

FRANK A. HANNA

CHAPTER

1	The Question and a Partial Answer	155
	A Characteristics of the Sample	157
	B Annual Variations in the Distributions of Each Receipt	159
	C Distribution based on Annual and on Longer Accounting Periods	161
	D Relation Between Annual Accounting Periods	163
2	Families in the Sample of Identical Taxpayers	165
	A How the Families were Selected	165
	B The Basic Tabulations	166
	C Average Income Reported	168
	D Distribution of Incomes	168
	E Composition of Income	174
	F Patterns of Income	179
	G Marital Status	182
	H Geographic Distribution	184
3	The Seven Annual Accounting Periods	186
	A The Concept of the Annual Accounting Period	186
	B Volume of Income	187
	C Average Receipts	188
	D Composition of Income	191
	E Distribution of Net Taxable Income	191
	F Distributions by Economic Income	196
	G Distribution of Receipts by Size	198
4	Relation of Annual to Longer Accounting Periods	203
	A The 'Average' Distribution of 'Annual' Income	204
	A method of averaging Lorenz curves	205
	Characteristics of average Lorenz curves	207
	B The Distribution of Income for Longer Accounting Periods	209
	Net taxable income	209
	Capital gains	216
	C Relation of the Two- to the Three-Year Distributions of Net Taxable Income	224

CHAPTER

5 Relations between Annual Accounting Periods	229
A Coefficients of Correlation	230
Correlation with 1929	234
Correlation with 1935	236
Correlations of pairs of consecutive years	238
Capital gains and capital losses	240
B Is the Regression Linear?	241
The problem of groups	248
C Coefficients of Partial Correlation	250
D Coefficients of Variation	253

TABLES

Part I

TABLE

1 Estimated Income Received, Wisconsin, 1936	21
2 Estimated Number of Farmers and their Income, Wisconsin, 1936	24
3 Characteristics of Farms Covered by Sample Survey, Census of Agriculture, and Consumer Purchases Study	27
4 Nonagricultural Entrepreneurs, by Number, Source of Data, and Industry, Wisconsin, 1936	30
5 Entrepreneurs in Selected Industries, Census and State Data	32
6 Estimated Wage Earners and Cash Wages, Wisconsin, 1936	36

Part II

1 Percentage Composition of Income by Income Groups, 1936	77
2 Percentage of Returns in Each Income Group Reporting Selected Receipts, 1936	81
3 Average Receipts by Income Groups, 1936	81
4 Relative Interquartile Differences of Receipts in Four Income Groups, 1936	82

TABLE

5	Distribution of Returns by Largest Receipt, 1936	85
6	Percentage Distribution of Returns in Each Income Group by Largest Receipt, 1936	86
7	Percentage Distribution of Wage Earners, Entrepreneurs, and Investors in Each Income Group by Number of Receipts, 1936	88
8	Wage Earners and Entrepreneurs Classified by Second Largest Receipt, 1936	89
9	Receipts Most Frequently Reported as Second Largest Receipt by Wage Earners and Entrepreneurs in Each Income Group, 1936	90
10	Number in Sample of 13,184 Families that Received Selected Receipts in Two Successive Years, 1929-1935	96
11	Ranks of the Share of Wages in Total Income by Economic Income Bracket, 1929, 1934-36	105
12	Economic Income Reported on Tax Returns and Aggregate Income Payments to all Individuals, 1929, 1934-36	107
13	Distribution of Total Income by Economic Income Bracket, 1935-1936	108
14	Analysis of the Change in the Composition of Income, 1935-1936	109
15	Computed Changes in the 1936 Composition of Income as Total Income is Increased Proportionately 25 and 50 Percent	114
16	Computed Changes in the 1936 Composition of Income due to Shifting the Lorenz Curve for Total Income 25 and 50 Percent Closer to the Line of Equal Distribution	115
17	Variability of Receipts, 1929, 1935, and 1936	120
18	Cumulative Percentage Distribution of Wages and Business Profits, All Wisconsin Recipients, 1936	121
A 1	Frequency Distribution of Individuals by Largest Receipt, by Number of Receipts, by Second Largest Receipt, and by Income Group, 1936	134
A 2	Percentage Composition of Income by Income Groups, Returns Classified by Largest Receipt, 1936	138
A 3	The Actual and Basic Distribution of Income, 1936	141

Part III

TABLE

1 Average Receipt and Deduction, Sample of Identical Taxpayers and All Returns, 1929, 1934, and 1935	169
2 Average Size of Selected Receipts on Individual and Family Basis, Sample of Identical Taxpayers, 1929, 1934, and 1935	173
3 Composition of Income, Sample of Identical Taxpayers and All Returns, 1929, 1934, and 1935	175
4 Income from Earnings as Percentage of Total Income, Classified by Economic Income, Sample of Identical Taxpayers and All Returns, 1929, 1934, and 1935	176
5 Composition of Income in Each Economic Income Group, Sample of Identical Taxpayers and All Returns, 1929 and 1935	178
6 Percentage of Filers Reporting Selected Receipts, Sample of Identical Taxpayers and All Returns, 1929, 1934, and 1935	179
7 Percentage of Total Returns Reporting Specified Receipts, Sample of Identical Taxpayers and All Returns, 1929 and 1935	180
8 Receipts and Deductions by Years, Sample of Identical Taxpayers, 1929-1935	188
9 Number of Families Reporting Selected Receipts by Year, Sample of Identical Taxpayers, 1929-1935	188
10 Equality of Distribution of Selected Receipts Ranked by Years, Sample of Identical Taxpayers, 1929-1935	199
11 Method of Averaging Lorenz Curves, Net Taxable Income, 1929-1930, Sample of Identical Taxpayers, 1929-1935	206
12 Distribution of Net Taxable Income for 2- and 3-Year Accounting Periods, Sample of Identical Taxpayers, 1929-1931	210
13 Cumulative Percentage Distribution of Capital Gains by 2- to 7-Year Accounting Periods, 1,482 Families Reporting Capital Gains, Sample of Identical Taxpayers, 1929-1935	222
14 Coefficient of Variation of 3-Year Net Taxable Income in Each 2-Year Group, Sample of Identical Taxpayers, 1929-1931	227
15 Coefficients of Correlation Between Incomes for Various Years, Sample of Identical Taxpayers, 1929-1935	232

TABLE

16	Coefficients of Partial Correlation, Sample of Identical Taxpayers, 1929-1935	251
17	Signs of the Coefficients of Partial Correlation, Sample of Identical Taxpayers, 1929-1935	252
18	Coefficients of Variation for 1-, 2-, and 3-Year Accounting Periods, Sample of Identical Taxpayers, 1929-1935	254

CHARTS

Part I

CHART

1	Lorenz Curves for the Distribution of Total Income among Individuals, Wisconsin, 1936	22
---	---	----

Part II

1	Lorenz Curves for the Distribution of Total Income, Wage Earners, Entrepreneurs, and Investors, Individual Income Tax Returns, 1936	91
2	Composition of Total Income by Economic Income Bracket, Individual Income Tax Returns, 1929 and 1934-1936	100
3	Lorenz Curves for Selected Receipts by Their Own Size, Individual Income Tax Returns, 1929, 1935, 1936	118
4	Changes in the Lorenz Curves for Specified Receipts by Their Own Size, Individual Income Tax Returns, 1929, 1935, 1936	119
5	Segments of the Lorenz Curves for Wages and Business Income Received by all Recipients and of Rents Received by Filers, 1936	122
6	Probable Effects on the Distribution of Total Income of Moving the Lorenz Curve for Wages and Dividends 25 Percent Closer to the Line of Equal Distribution, Individual Income Tax Returns, 1936	127

CHART

7	Probable Effects on the Distribution of Total Income of Reducing Each Wage or Each Dividend Receipt 50 Percent, Individual Income Tax Returns, 1936	129
A 1	Reranking of Individuals when the Lorenz Curve for Wages is Moved 25 Percent Closer to the Line of Equal Distribution	148
A 2	Reranking of Individuals with \$500–999 Wages and \$3,000–3,999 Total Income when the Lorenz Curve for Wages is Moved 25 Percent Closer to the Line of Equal Distribution	149

Part III

1	Lorenz Curves for the Distribution of Net Taxable Income, Sample of Identical Taxpayers and All Returns, 1929, 1934, and 1935	170
2	Cumulative Percentage Distribution of Returns by Size of Economic Income, Sample of Identical Taxpayers and All Returns, 1929 and 1935	171
3	Selected Receipts, by Type, as Percentage of 1929 Receipts, Sample of Identical Taxpayers, 1929–1935	189
4	Average Selected Receipts, Sample of Identical Taxpayers, 1929–1935	190
5	Selected Items as Percentages of Total Income, Sample of Identical Taxpayers, 1929–1935	192
6	Net Taxable Income, Sample of Identical Taxpayers, 1929–1935	194
7	Cumulative Percentage Distribution of Families by Size of Economic Income, Sample of Identical Taxpayers, 1929–1935	197
8	Lorenz Curves for the Distribution of Selected Family Receipts by Their Own Size, Sample of Identical Taxpayers, 1929–1935	200
9	Lorenz Curves for the Distribution of Net Taxable Income, 2- and 3-Year Accounting Periods, Sample of Identical Taxpayers, 1929–1931	211
10	Lorenz Curves for the Distribution of Capital Gains among Families Reporting Capital Gains in at Least One of the Seven Years, 1929–1935, 2- to 7-Year Accounting Periods, Sample of Identical Taxpayers	218

CHART

11	Regression of Net Taxable Income for the 3-Year Accounting Period, 1929-1931, on that for the 2-Year Accounting Period, 1929-1930, Sample of Identical Taxpayers	225
12	Correlation of 1929 Incomes with 1930-1935 Incomes, Sample of Identical Taxpayers	235
13	Correlation of 1935 Incomes with 1929-1934 Incomes, Sample of Identical Taxpayers	237
14	Correlation of Incomes in Pairs of Consecutive Years, Sample of Identical Taxpayers, 1929-1935	239
15	Relation of Group Averages to Regression Line, Sample of Identical Taxpayers, 1929-1935	244
