
Subject Index

- Ability to pay for college, student perceptions of, 385–87
- Adjusted gross income (AGI), 108, 108n12
- Attendance margins, 2–3
- BA completion, by year of birth, 24, 24f
- Basic Opportunity Grants. *See* Pell Grant program
- Bennett, William, 6, 142, 143, 310
- Boston COACH program. *See* College Opportunity and Career Help (COACH) program
- Clinton, Bill, 101–2
- COACH program. *See* College Opportunity and Career Help (COACH) program
- College: attending, 1–2; capture behavior of, 6–7; student perceptions of payoff to, 380–85. *See also* Higher education; State universities
- College Admissions Project: description of students in, 247–48t; exceptional measurement variables for, 252–54; survey design of, 245–49; typical student in, 249–52, 250–51t
- College attainment: college enrollment and, 16–26; type of institution and, 41–42
- College attendance: by age, 20, 23; effect of Georgia HOPE Scholarships on, 74–78; elimination of SSSB program and, 130; low-income and minority students and, 10–11; rates of, 4–5; widening gaps in, by income and race, 357–58
- College choices: in absence of aid, 284–88; aid variables that students should ignore for, 274–76; basic determinants of, 260–63; college prices and, 130–31; for early decision students, 263–65; effect of Georgia HOPE Scholarships on, 78–79; effect of merit aid programs in states other than Georgia, 86–87; effects of scholarships and aid on, by high-aptitude students, 239–41; empirical strategy for, 254–60; evidence on how students respond to aid variables they should ignore for, 276–79; evidence on whether students are too attracted or not sufficiently attracted by aid for, 280–88; evidence that students' responses to aid variables that should not matter depends on their backgrounds, 279–80; students from different family incomes and, 265–68; students from public and private secondary schools and, 270–72; students whose parents attended more- and less-selective colleges and, 268–70; summary of differences in, among students from different backgrounds, 272–74

- College completion, 13–16; by age, 20, 23f; average annual rates of increase in, 24–26, 25t; demographic subgroups and, 20, 21f; enrollment rates and, 20; explaining extended time to degree and, 27–33; family income and background and, 33–34, 34f; maternal educational attainment and, 34f, 36–37; by race, 20, 22f; rates of, 4–5, 15–16, 42; summary of evidence potentially explaining reduction in rates of, 51t; undergraduate employment and, 35, 35f
- College enrollment: college attainment and, 16–26; conclusions about effects of tax credits on, 137–42; effect of merit aid programs on, 130; possible policy interventions to reducing gap in, 378–89; potential effects of tax credits on, 131–32; predicting effect of tax credits on, 132–33; rates of, and college completion, 20; shift in distribution of undergraduate, 41–42, 41f; among women with children, 37–38, 38t
- College Opportunity and Career Help (COACH) program: educational plans of students in, 364–67; explanations for discrepancy in students who want to go to college and students who don't, 376–78; giving head starts to students in, 387–89; hurdles in college application process for students in, 367–73; overview of, 361–64
- College participation. *See* College attendance
- College preparedness, 39; of GED recipients, 40–41
- College prices, and school choice, 130–31
- College pricing: effects of tax credits on, 155–58; impact of tax credits on, 142–55; literature review of, 307–11. *See also* Out-of-state tuition
- Community colleges, 41; state support of, 43
- Conditional logit, 254–55
- Coverdell Education Savings Accounts, 7, 173–76; example of saving for, 175–76, 175t; key features of, 174t. *See also* 529 plans
- Current Population Survey (CPS), 71–72; weaknesses of, 72–74
- Demographic groups, college completion for, 20, 21f
- Dropout behavior, modeling, with multi-stage investment models, 210–14. *See also* College completion
- Early decision students, 257–59, 263–65
- Education savings accounts, 7; effect of, on household savings, 182–88; examples of saving for, 175–76, 175t; federal, 7; saver heterogeneity and, 182–88; state, 7; study results for saver heterogeneity and, 188–98
- Education savings programs, 170–71; TIAA-CREFF Survey of Participant Finances (SPF) of, 176–82. *See also* Coverdell Education Savings Accounts; 529 plans
- Employment, undergraduate, and college completion, 35, 35f
- Enrollment. *See* College enrollment; Student enrollment decisions; Undergraduate enrollment
- Enrollment strategies, use of nonresidents in, 305–6
- Ethnicity. *See* Race
- Extensive margins, 3
- Family income and background, college completion and, 33–34
- Federal education savings accounts. *See* Coverdell Education Savings Accounts; Education savings accounts
- Federal expenditures: for HTC, 102–3, 103f; for LLTC, 102–3, 103f
- Federal policy, effect of, on student enrollment and completion, 46–49
- Federal tax credits. *See* Tax credits
- Financial aid packages: conflicting evidence on impact of, 358–61; student estimates of, 379–80; student responses to, 129–31; students responses to, 8–9. *See also* Helping Outstanding Pupils Educationally (HOPE) Scholarships; Merit aid programs; Pell Grant program
- 529 plans, 7, 171–73; example of saving for, 175–76, 175t; key features of, 174t; minimum and maximum account balance limits in, 201–3. *See also* Coverdell Education Savings Accounts; Education savings accounts
- 401(k) plans, 183–84, 185

- General Education Development (GED) recipients, college preparedness and, 40–41, 231
- Georgia HOPE Scholarships. *See* Helping Outstanding Pupils Educationally (HOPE) Scholarships
- G.I. Bill, 46, 49, 49n37
- Graduation rates. *See* College completion
- Grants. *See* Financial aid packages
- Helping Outstanding Pupils Educationally (HOPE) Scholarships, 5, 68–70, 102, 102n2, 317, 360–61; college attendance rates and, 74–78; differential impact, by race and ethnicity, of, 81–82; effect of, on migration to college, 79–80; effect of, on school choice, 78–79; impact of, on individuals, 91; impact of, on institutions, 91–92. *See also* Merit aid programs
- Higher education: effects of tax credits on state support of, 151–55; under investigated topics in, 2; stratification in market for, 41–42, 41f. *See also* College; State universities
- Higher Education Act, 46n34. *See also* Title IV, of Higher Education Act
- Hope Learning Credit (HTC), 6; analysis of enrollment effects of, 136–37; creation of, 102; effects of, 158–62; empirical evidence on enrollment effects of, 133–36; federal expenditures for, 102–3, 103f. *See also* Lifetime Learning Tax Credit (LLTC); Tax credits
- HOPE Scholarships. *See* Helping Outstanding Pupils Educationally (HOPE) Scholarships
- HTC. *See* Hope Learning Credit (HTC)
- Human capital investment: measuring, at college, 282–84; standard model of, 241–44
- Human capital investment model, 241–45
- Income: college-going and, 357–58; of families, and college completion, 33–34
- Individual Retirement Accounts (IRAs), 183–84, 187, 189t; differences in owners vs. nonowners of, 188–90; using, to identify savers, 188–92
- Inflation, college tuition and, 169
- Inner-city students, college attendance and, 10–11
- In-state tuition, 9–10, 304
- Intensive margins, 3
- IRAs. *See* Individual Retirement Accounts (IRAs)
- Lifetime Learning Tax Credit (LLTC), 6; analysis of enrollment effects of, 136–37; creation of, 102; effects of, 158–62; empirical evidence on enrollment effects of, 133–36; federal expenditures for, 102–3, 103f. *See also* Hope Learning Credit (HTC); Tax credits
- LLTC. *See* Lifetime Learning Tax Credit (LLTC)
- Loans. *See* Financial aid packages
- Lottery Success Scholarship (New Mexico), 104
- Low-income students, college attendance and, 10–11
- Maternal educational attainment, college completion and, 34f, 36–37
- Merit aid programs, 5–6; broad-based state, 65–68; characteristics of state, 67; distributional impact of, vs. HOPE Scholarships, 87–89; effect of, on college choice, in states other than Georgia, 86–87; effect of, on college enrollments, 130; effect of broad-based, in states other than Georgia, 82–86; funding of, 92–93; impact of, on individuals, 90–91; impact of, on institutions, 91–92; new style vs. old style, 64–65; overview of, 63–65; political popularity of, 93–94; standardized tests for, 66–68. *See also* Helping Outstanding Pupils Educationally (HOPE) Scholarships
- Miller, Zell, 68, 102
- Minority students, college attendance and, 10–11
- Multistage investment models, 210–14
- National Longitudinal Surveys (NLSs) of Youth, 71
- National Merit Scholarship program, 63
- National Postsecondary Student Aid Survey (NPSAS), 70–71
- Nonresident students: average share of first-time freshmen as, 306f; data sources for, 311–21; in state university enrollment strategies, 9–10, 305–7. *See also* Out-of-state tuition; State universities

- Ohio Board of Regents (OBR), 209; data from, 214–18
- Out-of-state tuition, 9–10, 304; data sources for, 311–21; literature review of, 310; multivariate analysis of, 321–33; panel data for, 333–36; policy simulations for, 336–38. *See also* Nonresident students; State universities; Tuition
- Payoffs, student perceptions of attending college and, 380–85
- Peer effects, 11–12; data for, 406–7; economic anomalies in higher education and, 397–99; in economics of higher education, 396–97; efficiency and asymmetry of, 400–401; empirical results for, 407–18; empirical strategy for estimating, 405–6; estimating, 396; evidence of, 401–4; existence of, 399–400; role of, in studies of primary and secondary education, 395–96
- Pell Grant program, 6, 7–8, 46, 63, 101, 109, 361; college participation by nontraditional students and, 47–48; cross-sectional identification for identifying effects of, 223–30; effect of, on persistence, 230–32; evidence on impact of, 360; panel identification for identifying effects of, 218–19, 220–23; studying effects of, 207–10; time series identification for identifying effects of, 218–20
- Perkins Loans, 101
- Persistence: economic model for, 210–14 (*see also* Pell Grant program); effect of Pell Grants on, 230–32
- Pricing. *See* College pricing
- Psychological explanations, for college attrition, 32–33
- Race: college-going and, 357–58; college participation and completion and, 22f; impact of Georgia HOPE Scholarships and, 74–78
- Reciprocity agreements, tuition, 317–20
- Registered Education Savings Plans (RESPs, Canada), 176
- Resident students, 9–10
- Saving programs. *See* Coverdell Education Savings Accounts; Education savings accounts; Education savings programs; 529 plans
- Scholarships. *See* Financial aid packages
- School choice. *See* College choices
- Social Security Student Benefit (SSSB) program, 46, 49, 360–61; elimination of, and college attendance, 130
- Stafford Student Loans, 46, 63, 101
- Standardized tests, for merit aid programs, 66–68
- State-sponsored education savings accounts. *See* Education savings accounts; 529 plans
- State support, of higher education, 43–44
- State universities: data for resident and nonresident enrollment and tuition for, 311–21; literature review on pricing and access of, 307–11; model specification for understanding tuition and enrollment at, 321–27; nonresident enrollment policies at, 305–7; panel data results for tuition and enrollment at, 333–36; policy simulations for, 336–38; state appropriations to, 303–4; strategies for resident vs. nonresident enrollment by, 9–10, 305–6; study findings for tuition and enrollment at, 327–33; undergraduate tuition revenues and, 304–5. *See also* College; Higher education
- Stopping out, 208, 208n1, 234
- Student achievement, 39–41
- Student enrollment decisions: federal policy and, 46–49; tuition and, 44–46. *See also* College enrollment; Enrollment
- Supplemental Retirement Annuities/Group Supplemental Retirement Annuities (SRA/GSRA), 187; using, to identify savers, 192–95
- Survey of Participant Finances (SPF), TIAA-CREFF, 176–82
- Tax codes, 7
- Tax credits, 46, 101–2; analysis of enrollment effects of, 136–37, 138–39t; beneficiaries of, by income, 112–19; conclusions on effects of, on enrollment, 137–42; distribution of, across states, 119, 120–21t; effects of, 158–62; effects of, on college pricing, 155–58; effects of, on state support for higher education, 151–55; eligible families, and claiming of, 122–28; empirical evidence on effects of, on states and colleges, 146–51; empirical evidence on enrollment

- effects of, 133–36; factors that influence distribution of, 109–12; general description of, 105–9; impact of, on college pricing, 142–58; institutional reactions to, 143–46; likelihood of attending four-year institution and, 137, 140; *vs.* other forms of college assistance, 103–5; potential effects of, on college enrollment behavior, 131–32; predicting college enrollment and, 132–33; student responses to, 129–31; summary of distribution of benefits and, 128–29; summary of federal, 107t. *See also* Hope Learning Credit (HTC); Lifetime Learning Tax Credit (LLTC)
- Tax Relief Act of 1997, 101
- TIAA-CREFF Survey of Participant Finances (SPF), 176–82
- Time to degree, summary of evidence potentially explaining increasing rates of, 51t
- Title IV, of Higher Education Act, 46–47
- Tuition, 303–4; conflicting evidence on impact of, 358–61; determining in-state *vs.* out-of-state, 9–10; enrollment decisions and, 44–46; inflation and, 169; student estimates of, 378–79; students reaction to increases in, 10. *See also* Out-of-state tuition
