This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Annals of Economic and Social Measurement, Volume 5, number 4

Volume Author/Editor: Sanford V. Berg, editor

Volume Publisher: NBER

Volume URL: http://www.nber.org/books/aesm76-4

Publication Date: October 1976

Chapter Title: Authors' Index, Annals of Economic and Social Measurement, 5/4, 1976

Chapter Author: NBER

Chapter URL: http://www.nber.org/chapters/c10498

Chapter pages in book: (p. 569 - 570)

AUTHORS' INDEX

Volume 5—Year 1976

Bar-Shalom, Yaakov and Tse, Edison. Caution, Probing and the Value of Information in the Control of Uncertain Systems, 323.

Barta, Steven and Varaiya, Pravin. Stochastic Models of Price Adjustment, 267.

Beach, Charles. Cyclical Impacts on the Personal Distribution of Income, 29.

Chow, Gregory C. An Approach to the Feedback Control of Nonlinear Econometric Systems, 297.

Corbo, Vittorio. Second Order Approximations for Estimating Production Functions, 65.

Craine, Roger, Havenner, Arthur and Tinsley, Peter. Optimal Macroeconomic Control Policies, 191.

Cruz, J. B. Jr. See *under* Walsh, Peter.

Dutt, J. E. Numerical Aspects of Multivariate Normal Probabilities in Econometric Models.

Engle, Robert F. Interpreting Spectral Analyses in Terms of Time Domain Models, 89.

Faden, Arnold M. and Rausser, Gordon C. Econometric Policy Model Construction: The Post-Bayesian Approach, 349.

Fenoaltea, Stefano. Real Value Added and the Measurement of Industrial Production, 111.

Friedman, Benjamin. A Note on Uncertainties in Control Applications, 223.

Fromm, Gary and Klein, Lawrence R. The NBER/NSF Model Comparison Seminar: An Analysis of Results, 1.

Haseman, William D. and Whinston, Andrew B. Information Systems for Public Sector Management, 139.

Hausman, Jerry A. and Wise, David A. The Evaluation of Results from Truncated Samples: The New Jersey Income Maintenance Experiment.

Havenner, Arthur. See *under* Craine, Roger.

Heckman, James R. Introduction.

Heckman, James R. The Common Structure of Statistical Models of Truncation, Sample Selection, and Limited Dependent Variables and a Simple Estimator of Dynamic Economic Relations from a Time Series of Cross Sections, 153.

Hymans, Saul H. Reply, 161.

Jayatissa, W. A. Criteria for Evaluation of Econometric Models: A Correction, 161.

Kendrick, David A. Applications of Control Theory to Macroeconomics, 171.

Kendrick, David A. and Tse, Edison. Introduction, i.

Klein, Lawrence R. See *under* Fromm, Gary.

Kohn, Meir G., Manski, Charles F. and Mundel, David S. An Empirical Analysis of Factors which Influence College-Going Behavior.

Kwack, Sung Y. A Data Base Improvement for Analysis of U.S. Imports and Exports: Price Indices by End-Use, 1958:1–1974:4, 157.

Kydland, Finn. Decentralized Stabilization Policies: Optimization and the Assignment Problem, 249.
Lee, Lung-Fei. See *under* Maddala, G. S.
Maddala, G. S. and Lee, Lung-Fei. Recursive Models with Qualitative Endogenous Variables.
Manski, Charles F. See *under* Kohn, Meir G.
McDonald, John F. See *under* Henry, Neil W.
McFadden, Daniel. Quantal Choice Analysis: A Survey.
McFadden, Daniel. A Comment on Discriminant Analysis "Versus" Logit Analysis.
Mundel, David S. See *under* Kohn, Meir G.
Nelson, Forrest, D. On a General Computer Algorithm for the Analysis of Models with Limited Dependent Variables.
Norman, Alfred L. First Order Dual control, 311.
Osborn, Denise. Maximum Likelihood Estimation of Moving Average Processes, 75.
Oudet, B. A. Use of the Linear Quadratic Approach to Study the Dynamic Policy Responses of a Nonlinear model of the French Economy, 205.
Pindyck, Robert S. The Cost of Conflicting Objectives in Policy Formulation, 239.
Rausser, Gordon C. See *under* Faden, Arnold M.
Shupp, Franklin R. Uncertainty and Opitimal Policy Intensity in Fiscal and Incomes Policies, 225.
Siljak, D. D. Competitive Analysis of the Arms Race, 283.
Singer, Burton and Spilerman, Seymore Some Methodological Issues in the Analysis of Longitudinal Surveys.
Spilerman, Seymore. See *under* Singer, Burton.
Stokes, Houstan H. See *under* Henry, Neil W.
Taylor, John B. Methods of Efficient Parameter Estimation in Control Problems, 339.
Tinsley, Peter. See *under* Craine, Roger.
Tse, Edison. See *under* Bar-Shalom, Yaakov and Kendrick, David.
Varaiya, Pravin. See *under* Barta, Steven.
Wall, Kent D. FIML Estimation of Rational Distributed Lag Structural Form Models, 53.
Walsh, Peter and Cruz, J. B. Jr. Neighboring Stochastic Control of an Econometric Model, 211.
Whinston, Andrew B. See *under* Haseman, WIlliam D.
Wise, David A. See *under* Hausman, Jerry A.

National Bureau of Economic Research is a private, nonprofit organization founded in 1920 as a center for independent and impartial economic research. In the belief that such research can contribute significantly to the sound treatment of economic problems, it has sought to conduct its activities under conditions that safeguard the scientific nature of the findings and that help make them authoritative and acceptable to persons of different interests and opinions. The National Bureau is supported in part by grants from philanthropic foundations, business associations, and various government agencies for particular studies; in part by investment income on capital-sum grants; and in part by unrestricted contributions and subscriptions from companies, banks, labor organizations, foundations, and individuals.

Further information regarding contributions can be obtained from the office of Harvey J. McMains, Vice President, National Bureau of Economic Research, 261 Madison Avenue, New York, N.Y. 10016.

The purpose of the *Annals of Economic and Social Measurement* is to promote the exchange of ideas in quantitative research. The journal will contain articles generated in the research program of the National Bureau of Economic Research or relevant to this program, mainly but not solely dealing with data generation, computer applications, and methodological problems. Participants in workshops held by the NBER'S *Conference on the Computer in Economic and Social Research* and researchers affiliated with the NBER'S *Computer Research Center for Economics and Management Science* will be encouraged to contribute papers.

We hope that the *Annals* will serve a catalytic role in improving techniques for economic and social measurement. Although research methodology will be stressed, descriptions of computer programs, information retrieval techniques, and data sets will also be published. Such an emphasis means that scientists can benefit from work in fields outside their immediate range of research. The objective is to provide rapid and wide dissemination of advances in the state of the art—resulting, it is hoped, in more effective use of the computer in quantitative analysis.
