

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Topics in Empirical International Economics: A Festschrift in Honor of Robert E. Lipsey

Volume Author/Editor: Magnus Blomstrom and Linda S. Goldberg, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-06083-7

Volume URL: <http://www.nber.org/books/blom01-1>

Conference Date: December 3-4, 1998

Publication Date: January 2001

Chapter Title: Contributors, Indexes

Chapter Author: Magnus Blomstr m, Linda S. Goldberg

Chapter URL: <http://www.nber.org/chapters/c10585>

Chapter pages in book: (p. 263 - 272)

# Subject Index

---

- Capital: intensity in Swedish MNCs at home and abroad (1986, 1990, 1994), 146–47; Lipsey's contribution to analysis of formation of, 3. *See also* Knowledge capital
- Capital mobility: in choice of exchange rate regimes, 163; under different exchange rate regimes, 163; within MNCs, 3; in model of exchange rate regime optimization, 164
- Child labor: children in bonded labor, 235–36; defined, 234; estimates worldwide, 234, 258; possible effects of policies to reduce, 244–54, 258–59; sources of information about, 234–35; U.S. policies and programs to reduce, 236–44, 258
- Clinton administration: initiatives related to child labor, 238; trade policy related to foreign child labor, 240
- Coefficient of variation (CV): in comparison of national relative prices, 27–30; defined, 23; in deviations from law of one price, 22–27
- Comparative advantage: analysis of MNC foreign affiliate producer decisions, 6; Lipsey's analyses of, 2–3; of RCA by regions in United States, 201–4; regional variation in United States, 196; revealed by RCAs, 230–32; signaled by RCA indexes based on import data, 226–27; of Sweden as production location, 122; of United States in producer and consumer goods, 196–97; of United States in rest of the world (one-digit SITCs), 200–201; of United States in rest of world (two-digit SITCs), 205–7; of United States in rest of world (three-digit SITCs), 216–26. *See also* Regional revealed comparative advantage (RRCA) indexes; Revealed comparative advantage (RCA)
- Competitive advantage: of a country, 104–5; determinants of countries', 119; of a home country, 105–6; of Swedish MNCs, 103–5
- Competitiveness: Lipsey's contribution to study of, 2–3, 5–6; RCA numbers as measures of, 231
- Consumer model: prices and price setting in, 166–67
- Data sets: Lipsey's contribution to price and income elasticity, 2; Lipsey's contributions to trade data, 2; Lipsey's creation and development of, 3–4, 7; time series trends in trade-thickness measures, 32–34, 36–37; time series trends in world production dispersion, 40–41
- Data sources: about foreign operations of Swedish MNCs, 100, 138–39; for analysis of home-country effects of FDI, 138, 144; in analysis of Swedish MNC growth, 124, 131–33; International

Data sources (*cont.*)

- Comparisons Program (ICP), 2, 19, 27; NBER World Trade Flows Database, 19; and variable construction for knowledge-capital model of MNCs, 82–83; World Trade Data Base of Statistics Canada, 199
- Deardorff-Staiger model, 57–62
- Economic growth, national: Lipsey's contribution to study of, 3
- Economic integration: direct evidence of barriers to measure, 17–18; equilibrium outcomes to measure, 18–19; in market economy, 17
- Employment: effect of Swedish FDI on home country, 139–43; effect of Swedish MNC foreign production on parent, 152–54; in Swedish manufacturing sector and in MNCs, 101–2; in Swedish MNC plants and industries at home and abroad, 150–51, 158; in Swedish MNCs at home and abroad, 144–46, 157; in Swedish MNCs in EFTA and EU countries, 146. *See also* Labor
- European Free Trade Association (EFTA) countries, 146
- European Union (EU) countries, 16, 146
- Exchange rate model: currency in fixed, 167; prices and price setting in fixed, 166–67
- Exchange rate regime: choice in pricing-to-market model, 166–73; model of optimization under uncertainty, 164; price setting role in choice of, 164
- Exchange rates: in pricing-to-market and producer-currency models, 166–75; relative prices move with, 164
- Exchange rates, fixed: in pricing-to-market model, 171–79
- Exchange rates, floating: preferences for, 7–8; with pricing-to-market, 165; relative prices under, 163
- Exports: RRCA, 230; of Swedish MNCs to individual countries, 112–19; total exports of Swedish MNCs, 106–12; U.S. RCA compared to other countries, 200–205; U.S. RCA for machinery and equipment, 216–26, 231; U.S. RCA for manufactures, 205–16
- Factors of production: changes in proportions within and among industries in trade theory, 54–57; Deardorff-Staiger model to infer factor price and content changes, 57–62; implications in trade theory of changes in content of, 48–54. *See also* Employment; Labor
- Foreign direct investment (FDI): effect on Swedish domestic activities, 138–43; Lipsey's contribution to study of home-country effects of, 3, 6; Lipsey's work on pattern of multinationals', 71–72; outflow of Swedish (1981–90), 137–38; relation to country and industry characteristics, 73; studies focusing on Swedish-FDI trade relationship, 141–43
- General Agreement on Tariffs and Trade (GATT): rules related to child labor, 260–61; tariff reductions under, 16
- Generalized System of Preferences: mechanisms to reduce child labor under, 238
- Globalization, 15–16
- Heckscher-Ohlin (HO) model: of alternative measures to reduce child labor, 8, 244–54, 258–59; fragmentation model to outline equilibrium outcome changes, 20–21; plus production fragmentation, 20; revealed comparative advantage in, 230; standard model to outline equilibrium outcome changes, 20; with two-factor, two-country, two-good, 55–57, 62
- Herfindahl indexes of production, 37–40, 45
- Home country: competitive advantage of production location, 105–6; effect of MNC growth for, 122; effects in Sweden of FDI, 137–38; employment in Swedish MNCs (1986–94), 144–45; exports and employment with FDI in Sweden, 139–43; labor productivity in Swedish MNCs, 146–47; Lipsey's contribution to FDI effects on, 3, 6; in pricing-to-market and producer-currency models, 167–74; relationship between FDI and exports of, 138
- HO model. *See* Heckscher-Ohlin (HO) model
- Integration: factors driving, 16–17; in HO models, 19–26; product markets (1970–92), 41–42, 44. *See also* Economic integration; Market integration
- International Labour Organisation (ILO):

- focus on exploitative child labor through IPEC, 8, 238, 240; International Programme for the Elimination of Child Labor (IPEC), 238–40, 255
- Investment, international: Lipsey's contribution to research in, 2–3. *See also* Foreign direct investment (FDI)
- Knowledge advantage: of Swedish MNCs, 103–4
- Knowledge capital: jointness, 75; model of, 6, 74–91; skilled labor intensive, 75; transportability or fragmentation of, 75
- Labor: demand in trade for more or less educated, 48–54; demand in trade for skilled and unskilled, 54–57; inferences of change in wages of, 48–68; in knowledge-capital model of MNCs, 74–91; wage gap of more or less educated with changes in trade, 60–62. *See also* Child labor
- Labor productivity: of Swedish MNC plants, 149–51; in Swedish MNCs at home and abroad (1986, 1990, 1994), 146–47
- Labor standards: role of ILO in, 240; for U.S. child labor, 260–61; in U.S. trade policy legislation, 236–38
- Law of one price (LOP): as benchmark to assess market integration, 22; deviations from, 22–27; prices in destination markets under, 20–21; in pricing-to-market model, 169, 172; in producer-currency model, 183–84
- Manufacturing sector: employment in Swedish, 101–2; firm size in Swedish, 119–21; internationalization of Swedish, 102; U.S. RCA for manufactures, 205–16; world trade thickness for all, 33–35
- Market integration: definition of increased, 22–23; effect of regional, 137; in financial markets, 15–16; in goods markets, 16; outcome-based, 19; product market, 16; relation to price dispersion, 22–26
- Market integration measures: geographic dispersion of product, 37–40; LOP as benchmark for, 22; market thickness from trade flows, 30–37; with production fragmentation, 41
- Multifiber Arrangement (MFA), 16
- Multinational companies (MNCs): choice between exports and foreign production, 104; exports from U.S. foreign affiliates, 165; horizontal MNCs under knowledge-capital approach, 75; knowledge-capital model of, 6, 74–82; Lipsey's contribution to study of competitiveness of, 3, 5–6; results of regression of knowledge-capital model of, 83–91; rise of horizontal, 76; structural change in large Swedish, 144–52; vertical MNCs under knowledge-capital approach, 75. *See also* Manufacturing sector; Market integration
- Multinational companies (MNCs), Swedish: changes in number at home and abroad (1986, 1990, 1994), 147–49, 158; contribution to Swedish economy, 138; effect of foreign-affiliate production on parent firm employment, 152–54, 158–59; employment growth, 101–2, 146, 150–54; internationalization of, 102–3; location of foreign production, 103; in manufacturing sector, 101–2; structural change in, 144
- New Open Economy Macroeconomics approach, 7
- North American Free Trade Agreement (NAFTA), 16
- Outcomes: defined, 18; to measure market integration, 18–20
- Output. *See* Production
- Price discrimination: conditions across markets for, 22–23; in trade, 164
- Prices: convergence in market integration of relative, 27–30; dispersion in national relative, 28–29; with integration in HO-fragmentation model, 20–21; with integration in standard HO model, 20–21; Lipsey's contribution to international comparisons of quantities and, 2, 4, 229; relation of price dispersion to integration, 22–26; as signals of market integration, 19–20. *See also* Law of one price (LOP)
- Price setting: as determinant of exchange rate regime, 191; pricing-to-market model, 165–73; of producers in producer-currency model, 166–73; role in choice of exchange rate regime, 164

- Price stickiness: *See* Price setting
- Price structure, relative: with integration in HO-fragmentation model, 21; with integration in standard HO model, 21
- Production: Herfindahl indexes to measure world concentration of, 37–40, 45; increase in U.S. firm multinational, 165; with integration in HO-fragmentation model, 21; with integration in standard HO model, 21; Lipsey's contribution to international comparisons of, 2, 4; world dispersion, 37–41
- Production, foreign: analysis of Swedish MNCs' exports and, 106–19; effect on parent MNC employment, 152–54; of MNC affiliates interacting with domestic variables, 158–60; Swedish MNCs' decisions related to, 103–12; Swedish MNCs' firm size related to, 119–21; of Swedish MNCs to individual countries, 112–19; Swedish MNCs' total, 106–12
- Production, home-country: FDI effect on, 138–39
- Production, internationalized: growth of, 165; Lipsey's contribution to study of, 3, 99; in models of fixed and floating exchange rates, 180–81; in pricing-to-market model, 166–73
- Product markets: factors driving integration in, 16; factors inhibiting, 16; integration (1970–92), 41–42, 44; measuring integration of, 17; trade-thickness measurement, 30–32
- RCA. *See* Revealed comparative advantage (RCA) indexes
- Regional revealed comparative advantage (RRCA) indexes: defined, 229–30; export-based, 199; of United States (two-digit SITCs), 207–16; used to detect trade diversion, 204–5
- Research and development (R&D): in Swedish MNCs, 119–23
- Revealed comparative advantage (RCA): calculations of Lipsey and Kravis for, 229
- Revealed comparative advantage (RCA) indexes, 195–97, 229; based on U.S. import data, 226–27; export-based, 198–99; to measure comparative advantage, 198; theoretical background of, 230–32; U.S. export-based by region, 201–4
- RRCA. *See* Regional revealed comparative advantage (RRCA) indexes
- Rybczynski theorem, 50
- Stolper-Samuelson theorem, 41, 50, 52, 55, 67–68, 246
- Trade: effect of factor content on relative factor prices, 48–68; factor content of, 48; industrial-organization approach to, 72; relationship of FDI to, 71–72
- Trade, international: antidumping laws, 16; changes in world trade thickness (1970–92), 37; declining U.S. tariff rates and transport costs, 17–18; demand for skilled and unskilled labor within and among industries, 54–57; determinant in HO model, 20; inferring factor price changes in factor content of, 57–64; Lipsey's work on prices and quantities in, 2; price discrimination in, 164; tariffs and nontariff barriers, 16; time series trends in trade-thickness measures, 32–34; trade-thickness measures by industry, 31–33; world trade thickness, 33–35
- Trade barriers: in HO models, 20; nontariff barriers (NTBs), 16, 18; tariff reductions, 16–18
- Trade flows: to identify and measure market/trade thickness, 30–37; in standard HO and HO-fragmentation models, 21
- Trade policy: to deter employment of children, 254–55; of United States to reduce foreign child labor, 236–44; U.S. assistance to ILO policies related to child labor, 238–40
- Trade theory: changes in factor content of trade in, 48–54; changes in factor proportion within and among industries, 54–57
- Welfare: comparison of models for exchange rate regime choice, 173–79; in policies focused on reducing child labor, 254–56, 258–59
