RELATION OF THE DIRECTORS TO THE
WORK AND PUBLICATIONS OF THE
NATIONAL BUREAU OF ECONOMIC RESEARCH

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.
2. To this end the Board of Directors shall appoint one or more Directors of Research.
3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.
4. No report shall be published until the Director or Directors of Research shall have submitted to the Board a summary drawing attention to the character of the data and their utilization in the report, the nature and treatment of the problems involved, the main conclusions, and such other information as in their opinion would serve to determine the suitability of the report for publication in accordance with the principles of the National Bureau.
5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. For each manuscript to be so submitted a special committee shall be appointed by the President, or at his designation by the Executive Director, consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the summary and report described in paragraph (4) are sent to him. It shall be the duty of each member of the committee to read the manuscript. If each member of the special committee signifies his approval within thirty days, the manuscript may be published. If each member of the special committee has not signified his approval within thirty days of the transmittal of the report and manuscript, the Director of Research shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty additional days shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board and a two-thirds majority of those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed shall have approved.
6. No manuscript may be published, though approved by each member of the special committee, until forty-five days have elapsed from the transmittal of the summary and report. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general, or of the special committee, have passed upon its validity in every detail.
7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every National Bureau book.

*(Resolution adopted October 25, 1926,
as revised February 6, 1933, and February 24, 1941)*

F-2. Total Estimated Pension and Annuity Benefit Payments Reportable, 1964	138

ACKNOWLEDGMENTS

This monograph is the seventh in the National Bureau's series of studies of the federal individual income tax under the direction of Lawrence Seltzer. The previous studies include: *The Nature and Tax Treatment of Capital Gains and Losses*, by Lawrence H. Seltzer (1951); *Interest as a Source of Personal Income and Tax Revenue*, by Seltzer (1955); *The Income-Tax Burden on Stockholders*, by Daniel M. Holland (1958); *Personal Deductions in the Federal Income Tax*, by Kahn (1960); *Dividends Under the Income Tax*, by Holland (1962); and *Business and Professional Income Under the Personal Income Tax*, by Kahn (1964). This report is not only a companion to the earlier ones but it also makes frequent use of data and methodology generated in the course of these studies.

As in previous studies, much is owed to the Internal Revenue Service's annual tabulations, published in *Statistics of Income*, and the Commerce Department's national income estimates.

The staff reading committee, consisting of Victor R. Fuchs, Lawrence H. Seltzer, and Norman F. Ture, made many useful comments and suggestions for an improved manuscript. Joseph A. Pechman also read the first draft and commented critically on various aspects of it. In addition, help relating to parts of the study was received from Daniel M. Holland, Hal B. Lary, Robert E. Lipsey, Geoffrey H. Moore, and Richard A. Musgrave. The review by Nathaniel Goldfinger, Harold M. Groves, and Douglas Hartle, members of the National Bureau Board of Directors' reading committee, also helped to improve the manuscript at various points.

The manuscript was edited by James F. McRee, Jr.

Statistical assistance as well as many astute comments came at different times from Mary H. Faden, Phillis Lusher, Erla Alexander, Gilbert Guarino, Gerald White, and Bettina Gibson.

For all comments, including those I did not heed, I am grateful. The responsibility for remaining faults is of course mine.

*EMPLOYEE COMPENSATION
UNDER THE INCOME TAX*
