

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Social Protection versus Economic Flexibility: Is There a Trade-Off?

Volume Author/Editor: Rebecca M. Blank

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-05678-3

Volume URL: <http://www.nber.org/books/blan94-1>

Conference Date: December 14-15, 1992

Publication Date: January 1994

Chapter Title: List of Contributors, Indexes

Chapter Author: Rebecca M. Blank

Chapter URL: <http://www.nber.org/chapters/c11264>

Chapter pages in book: (p. 363 - 378)

employ “difference-in-difference” estimators, through which economic changes in a country that has undergone policy changes can be compared to economic changes in a country in which policy has remained constant.

An in-depth look at the impact of various welfare programs on labor market change, this book demonstrates how social protection policies have affected employment around the globe.

Rebecca M. Blank is professor of economics at Northwestern University and a research associate of the National Bureau of Economic Research.

## Training and the Private Sector

### International Comparisons

*Edited by* Lisa M. Lynch

This volume compares new evidence on the returns from worker training in the United States, Germany, France, Britain, Japan, Norway, and the Netherlands. The authors focus on Germany's formal apprenticeship programs; the U.S. system of learning-by-doing; Japan's low employee turnover and extensive company training; and Britain's government-led and school-based training schemes.

## Small Differences That Matter

### Labor Markets and Income Maintenance in

### Canada and the United States

*Edited by* David Card and Richard B. Freeman

The authors provide a revealing examination of social and labor market policies in Canada and the United States during the 1980s. They show that subtle differences in unemployment compensation, unionization, immigration policies, and income maintenance programs have significantly affected the levels of poverty, unemployment, and income inequality in the two countries.
