Subject Index

- "Adjusted" nominal GNP growth, 13
Anti-inflation policy, 16–18, 224–27; "cold turkey," 17–18, 30; costs of, 17–18; gradualist, 18, 119; U.S. experience with, 19–27
Asset market theory, 195–200
Balance of payments mechanism, 103–4
Baseline inflation, 263, 274–76
Bimetallism, 106
Bond yields, 102. *See also* Corporate bond rate; Interest rates
"Bracket creep," 183
Bretton Woods regime, 103, 201
Budget balancing, 53, 63, 72, 82
Budget surplus, high-employment, 213
Business cycle, 13
Capital, real rate of return on, 160
Capital gains taxation, 154–55
"Cold turkey" policies, 17–18, 30
Commodity markets, 121
Commodity-reserve currency, 106–8
Commodity standard, 106–7, 112–13; adjustable, 117–20; basket of goods as, 114–15; and price stability, 115–17
Constant-growth rule, 107
Consumer Price Index (CPI), 116, 158, 179, 242, 274–76
Contract structures, 142
Corporate bond rate, 100–101, 131, 161. *See also* Interest rates
Cost-of-living-adjustment (COLA), 179–81
Cost of Living Council (COLC), 268
"Credibility hypothesis," 38
Currency: debasement of, 104, 200; paper, 113–14; private issue, 113–14; reform, 52–54; unbacked, 43–46
Dawes Plan, 84
Debt, government, 45–46; changing maturity of, 177–78
Debt planning, 177–78
Deficit, government, 49, 53, 57–61
Deficit financing, 21, 43–46
Demand for money, and interest rates, 100
Demand management policies, 11–12
Depository Institutions Deregulation and Monetary Control Act (DIDMCA) of 1980, 172, 176–77
Depreciation allowance, 235–36, 244; historic cost, 157–58, 163, 236, 242, 249; straight-line, 236
Devaluation, 104, 200
Discount policy, 49
Disintermediation, 163, 176
Dollar, resource definition of, 114–15
Effective tax rate, 154–56, 218
Elasticity of political support, 222–24
Employee Retirement Income Security Act of 1974 (ERISA), 128, 135
Equity capital, cost of, 156–59
Exchange controls, 49–50, 70, 82; and balance of payments, 104
Exchange rate: as an asset price, 196–200; fixed, 105; flexible, 35–36; policies on, 204–5; predictability of, 190–94; variability of, 201–8

- Exchange rate targets, 206
- Expectations, and exchange rates, 198-200; inflationary, 42, 109, 236; rational, 109
- Federal Reserve: creation of, 113-14; and monetary stabilization, 107-8; and Treasury accord (1951), 161
- Fiat money, 113, 121
- Financial Accounting Standards Board (FASB), 233, 241
- Firm: pension liability of, 128, 130; size of, 144-47
- Fiscal policy, 45
- Fixed exchange rates, and the money supply, 105
- Fixed price contracts, 148
- Flexible exchange rates, 35, 104
- Food prices, and inflation, 26, 265-66, 269-70
- Foreign exchange, forward premium on, 190
- Foreign exchange markets, turbulence in, 190-94, 207
- Futures markets, 146; effect of inflation on, 149-51
- Gold, demonetization of, 104
- Gold convertibility, and fiscal policy, 45-46, 72
- Gold market, turbulence in, 114
- Gold standard, and inflation, 43-48, 103-5, 113-14
- Government debt, 45-46. *See also* Deficit, government; Deficit financing
- Gradualist policy, 18, 119
- Graduated payment mortgage, 174
- Great Depression, 21-22, 108
- Gross national product deflator, 99
- Haig-Simons definition of income, 235, 237, 239, 244-45
- High-employment budget surplus, 213
- High-powered money, increases in, 45-50, 54, 61, 92, 94
- Hyperinflation: Austrian (1919-25), 48-56; Hungarian (1921-25), 56-65; Polish (1921-25), 65-73; German (1919-25), 73-75
- Illiquid markets, 140; and inflation, 147-51; transactions costs in, 145. *See also* Price rigidity
- Income, Haig-Simons definition of, 235, 237, 239, 244-45
- Income shares, struggle over, 31-34
- Incomes policy, 226. *See also* Price controls; Wage-price controls
- Income tax, 154-56
- Indexation: consequences of, 185-86; of contracts, 148-49, 181; of pension benefits, 124, 136; of social security, 182; of taxes, 181; of wages, 33-35
- Inflation: baseline, 263, 274-76; created by government, 173; and debt maturity, 178; defined, 11; and expectations, 42, 109, 236; and gold standard, 43-48, 103-5, 113-14; higher variance in, effect of, 136, 147-51, 170-72, 218; and interest rates, 100-101; investment, effect on, 159-60; long-run, 13; market structure, effect on, 139-52; "momentum" of, 42; and monetary growth, 45-50, 54, 61, 99-100, 185-86; nominal demand growth, response to, 11-12, 26; pension systems, effect on, 124-37; political costs of, 211-27; and savings transfer, 35; and share prices, 156-59; stopping, 16-18, 224-27; tax system, interaction with, 153-66, 218; variability of, 170
- Inflationary accounting, 233-58, 273
- Inflationary expectations, 42, 109, 236; and interest rates, 102; and price movements, 102
- Inflation-demand relation, 19-27, 33
- Information, property rights on, 146
- Inside money, 54
- Interest rates: controls on, 176; and demand for money, 100; and exchange rates, 199-200; fluctuations in, 100-103, 172; as indicator of monetary policy, 203; and inflation, 100-101; long-term, 105; mortgage rates, 271-72; pensions, effect on, 129-30, 134-35; real, 161; and tax rates, 161-63; and velocity, 102
- International Monetary Fund, 35
- Inventory accounting: first-in / first-out (FIFO), 156-57, 237-38, 242; last-in / first-out (LIFO), 235, 237-38
- Investment, and inflation, 156-60
- Investment-GNP ratio, 160
- Labor contracts, long-term effects of, 128-30; indexed, 181
- League of Nations, 52, 61, 91, 94

- Legal tender power, 113
- Liquid markets: defined, 140; and inflation, 147–51; and transactions costs, 144–45
- Marginal product of capital, 157
- Market liquidity, 140–47
- Media of exchange, 110
- “Momentum” model of inflation, 42
- M1, growth in, 100
- M1-B, 105
- M2, growth in, 213–15
- Monetary base, stabilization of, 107
- Monetary constitution, 107–8
- Monetary growth, 105; and inflation, 45–50, 54, 61, 99–100, 185–86; rules for, 107; and savings, 164
- Monetary policy, accommodating, 19, 33; discretionary, 105–6, 116, 119; and exchange rate variability, 207–8; mix with fiscal policy, 164–66; restrictive, 28, 30, 161
- Monetary reform, 82, 100
- Money-commodity base link, 104
- Mortgages, 174–76, 271–72
- National Recovery Act (NRA), 21–22

Wage push, autonomous, 31–35
“Whip Inflation Now” campaign, 213

dollar and that the government role is to define—not create—dollar bills; and Jeremy I. Bulow and John B. Shoven's claim that inflation has not undermined American capitalism in the past decade. They show that true corporate profits have actually been robust over the period.

Robert E. Hall is professor in the Department of Economics and Senior Fellow of the Hoover Institution, Stanford University. He also serves as director of the Research Program on Economic Fluctuations and the Project on Inflation, National Bureau of Economic Research, and as chairman of the NBER's Business Cycle Dating Group.

Other National Bureau of Economic Research Volumes

Monetary Trends in the United States and the United Kingdom

Their Relation to Income, Prices, and Interest Rates, 1867-1975

Milton Friedman and Anna J. Schwartz

The culmination of more than 25 years of research on money and its effects, this is the final installment in a now classic series of books. It extends the authors' study of the money supply to an analysis of long-term movements in a cross-country comparison.

1982

Cloth ISBN: 0-226-26409-2

The American Economy in Transition

Edited by Martin Feldstein

"This book is a good review of American economic history since World War II. Given a sophisticated group of authors—some liberal, some conservative, and some in the middle of the road—the net effect is a rather balanced review of what happened."—Lester C. Thurow

1980

Cloth ISBN: 0-226-24081-9

Paper ISBN: 0-226-24082-7

The International Transmission of Inflation

Michael R. Darby and James R. Lothian

An indispensable reference for international and monetary economists, this volume explores the economic linkages by which inflation spread from country to country in the seventies. The authors have constructed a unique data base for eight countries and have designed a model to test recent theoretical developments.
