

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Agglomeration Economics

Volume Author/Editor: Edward L. Glaeser, editor

Volume Publisher: The University of Chicago Press

Volume ISBN: 0-226-29789-6

Volume URL: <http://www.nber.org/books/glae08-1>

Conference Dates: November 30-December 1, 2007

Publication Date: February 2010

Chapter Title: List of contributors, indexes

Chapter Author: Edward L. Glaeser

Chapter URL: <http://www.nber.org/chapters/c12628>

Chapter pages in book: (355 - 364)

*Page numbers followed by “f” or “t” refer to figures or tables, respectively.*

- Agglomeration: fundamental research question of, 279; identification issues when estimating effects of, 18–22; innovation and, 237–40; measuring, 2–7; organizations and, 280–82; productivity and, 277–79; sources of, 7–9; urban, 339–53; of U.S. ethnic invention, 244–63.  
*See also* Entrepreneurship
- Agglomeration economics: defined, 1; public policy and, 12–13; reduced transportation costs and, 7; understanding, 7
- Annual Respondents Database, 139–40
- Background equations, for six-by-six-mile squares, 114–16
- Bénéfices Réels Normaux (BRN) data set, 47
- CBP. *See* County Business Patterns (CBP)
- Census places, 108–9
- CEX. *See* Consumer Expenditure Survey (CEX)
- Chinitz effect, 279, 281
- Cities: advantages and disadvantages of large vs. small, 339–40; crime levels of, 349–51; evidence of urban growth for, 321–27; greening of, 347–48; inequality within, 327–28; pollution levels of, 347–48; productivity and wages in, 15–16.  
*See also* Six-by-six-mile squares
- Coagglomeration, 9; transport costs and, 164–72; of types of inventors, 257–58
- Communication technology: decline of Detroit and reinvigoration of New York and, 304–6; hypotheses for, 317–20; innovation sector and, 312–14; theoretical model for, 311–12; urban diversity and improvements in, 306–11
- Commute times: city-size relationship over time and, 341–44; within major city, 344–47
- Congestion costs, 12
- Consumer Expenditure Survey (CEX), 182, 185, 186t; mapping, 206–9
- County Business Patterns (CBP), 175
- Crime levels, urban, 349–51
- Déclarations Annuelles des Données Sociales (DADS), 23, 47–48
- Density, employment, 22–23
- Density, population: costs of, 12; high wages and, 3; housing price growth and, 4–5, 5f; per capita gross metropolitan product (GMP) and, 3, 3f
- Detroit, 304
- Diffusion, of innovation, 213–15
- Ellison-Glaeser index of geographical concentration, defined, 142–43, 154n3, 154n4

- Employment areas, in France, 22, 23  
 Employment density, 22–23  
 Endogenous quality of labor problem, 20–21  
 Endogenous quantity of labor problem, 16; approaches to, 21–22  
 Entrepreneurship, 10–11; agglomeration and, 281–82; data description for study of, 286–87; data for, 282–84; empirical literature on impact of small establishments on, 281–82; estimation for, 284–86; results of estimation for, 287–300; theoretical literature on impact of small establishments on, 280–81. *See also* Retail establishments, transport costs and  
 Ethnic invention. *See under* Inventors; *see* Inventors, U.S. ethnic  
 Ethnic inventors. *See under* Inventors; *see* Inventors, U.S. ethnic  
 Ethnic-name matching technique, 240–43; advantages and disadvantages of, 243–44  
 European Soil Database (ESDB), 28–29  
 France: computing wages for, 24–27; density-productivity relationship in, 3–4; employment areas in, 22–23; instruments for estimation of agglomeration economics for, 27–38; population patterns in, 4; soils and population distributions in, 27–35; total factor productivity (TFP) in, 3, 47–57; wage data for, 23–24; wage results for, 38–47  
 Gibrat's law, 6, 107, 125  
 Greening, of cities, 347–48  
 Grid approach, 6  
 Health care: agglomerations in high-value and low-value, 218–26; data for, 215–18; defining geographic areas for, 218; discussion of results, 233–34; hospital and area characteristics and, 217–18; introduction to agglomerations in, 211–13; literature review on diffusion innovation in, 213–15; measuring high-value, 216–17; measuring low-value spending for, 217; role of learning and, 226–33  
 Herfindahl-Hirschman index (HHI), 254–61  
 High-value care, in health care: agglomerations in, 218–26; measuring, 216–17  
 Hospital referral regions (HRRs), 212, 218  
 House price growth: characteristics of superstar markets for, 76–82; by city, 94–101t; classifying superstar cities for, 74–76; data for, 69–72; factors driving, 68; household sorting as explanation for spatial skewing of, 91–93; housing unit growth and, 73–74; income distribution and, 82–88; MSA summary statistics for, 102t; overview of, 67–69; population density and, 5f; superstar cities for, 74–76; supply constraints as explanation for spatial skewing of, 91–93; urban productivity differences and differences in, 88–91  
 Human capital, urbanization and, 8–9  
 Industrial concentrations: importance of labor pooling for, 140–43; natural advantage and, 5  
 Industrial organizations: agglomeration and, 280; empirical literature on impact of, entrepreneurial growth, 281–82  
 Industry definitions, 179–80  
 Information technology (IT), location decisions and, 163–64  
 Innovation: agglomeration and, 237–40; agglomeration of U.S. ethnic, 244–63; ethnic-name matching technique for study of, 240–44; literature on diffusion of, 213–15  
 Input-output (IO) accounts, 176–78  
 Intellectual spillovers. *See* Knowledge spillovers  
 Inventors, 10; residing in foreign countries and regions, 242–43  
 Inventors, U.S. ethnic, 10; agglomeration of, 244–63; ethnic composition of, 244–46; institutional concentration of, 262–63; most common surnames for, 269–73; spatial concentration of, 254–58; spatial locations of, 246–54; technology concentration of, 258–61  
 Knowledge spillovers, 9–12, 211, 237; literature review of, 213  
 Labor market pooling, 7–8; data for, 139–40; importance of, for industry concentration, 140–43; introduction, 133–35; measuring potential of sectors for, 141–42; measuring spatial concentration of sectors and, 142–43; results of study of,

- 143–49; theoretical advantages of, 135–39
