

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Health at Older Ages: The Causes and Consequences of Declining Disability among the Elderly

Volume Author/Editor: David M. Cutler and David A. Wise, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-13231-5

Volume URL: <http://www.nber.org/books/cutl08-1>

Conference Date: October 8-11, 2004

Publication Date: January 2009

Chapter Title: List of contributors, indexes

Chapter Authors: David M. Cutler, David A. Wise

Chapter URL: <http://www.nber.org/chapters/c12682>

Chapter pages in book: (479 - 495)

Contributors

Emily M. Agree
Population, Family, and Reproductive
Health
Bloomberg School of Public Health
Johns Hopkins University
615 North Wolfe Street
Baltimore, MD 21205

Paul D. Allison
Department of Sociology
University of Pennsylvania
3718 Locust Walk
Philadelphia, PA 19104

James Banks
Institute for Fiscal Studies
7 Ridgmount Street
London WC1E 7AE England

Ernst R. Berndt
Sloan School of Management, E52-452
Massachusetts Institute of Technology
50 Memorial Drive
Cambridge, MA 02142

Axel Börsch-Supan
Mannheim Research Institute for
Economics of Aging
University of Mannheim
Building L13, 17
D-68131 Mannheim, Germany

Paula Canavese
Deloitte Tax LLP
111 S Wacker Drive
Chicago, IL 60606

Amitabh Chandra
John F. Kennedy School of
Government

BOOKS OF RELATED INTEREST

The Analysis of Firms and Employees

Quantitative and Qualitative Approaches

Edited by Stefan Bender, Julia Lane, Kathryn L. Shaw, Fredrik Andersson, and Till von Wachter

The long-term impact of globalization, outsourcing, and technological change on workers is increasingly being studied by economists. At the nexus of labor economics, industry studies, and industrial organization, *The Analysis of Firms and Employees* presents new findings about these influences by examining the interaction between the internal workings of businesses and outside influences from the market using data from countries around the globe.

AN NBER CONFERENCE REPORT

Asset Prices and Monetary Policy

Edited by John Y. Campbell

In *Asset Prices and Monetary Policy*, leading scholars and practitioners probe the interaction of central banks, asset markets, and the general economy to forge a new understanding of the challenges facing policy makers as they manage an increasingly complex economic system. At a time when the public is more involved than ever in stocks, retirement funds, and real estate investment, this insightful book will be useful to all those concerned with the current state of the economy.

AN NBER CONFERENCE REPORT

Financial Markets Volatility and Performance in Emerging Markets

Edited by Sebastian Edwards and Márcio G. P. Garcia

Capital mobility is a double-edged sword for emerging economies, as governments must weigh the benefits of investment against the potential economic costs and political consequences of currency crises, devaluations, and instability. This volume addresses the delicate balance between capital mobility and capital controls as developing countries navigate the convoluted global network of private investors, hedge funds, large corporations, and international institutions such as the International Monetary Fund.
