

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: The Economics of Climate Change: Adaptations Past and Present

Volume Author/Editor: Gary D. Libecap and Richard H. Steckel, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-47988-9

ISBN13: 978-0-226-47988-0

Volume URL: <http://www.nber.org/books/libe10-1>

Conference Date: May 30-31, 2009

Publication Date: May 2011

Chapter Title: Indexes

Chapter Authors: Gary D. Libecap, Richard H. Steckel

Chapter URL: <http://www.nber.org/chapters/c12875>

Chapter pages in book: (343 - 353)

Contributors

Anin Aroonruengsawat
Faculty of Economics
Thammasat University
2 Prachan Road
Bangkok 10200, Thailand

Subject Index

Page numbers followed by the letters *f* and *t* indicate figures and tables, respectively.

- adaptation, 254; Californian residential electricity consumption and, 338–41
- adverse weather. *See* droughts; extreme weather
- agriculture: climate change and, 225–26; economic historians on how weather affects, 73–76; historical data for, 259–62; weather, financial markets, and, 15; western water supplies and, 254–55; western water supply infrastructure and, 254–55
- American agricultural development, hallmarks of, 171–72
- Andrew, A. Piatt, 75
- anticyclones, London fogs and, 285
- bank equity: drought and, 15; effect of drought on rates of return to, 89–95
- bank failures: drought and, 15; national, in Kansas (1875–1910), 79–80t
- banking systems, local: effect of extreme weather on, 84–87, 89–95
- BAU (business as usual) scenarios, 49
- birth rates, infant mortality and, 152
- Bogart, Ernest Ludlow, 75
- bovine tuberculosis (BTB), infant mortality and, 152
- branch banking, weather-related agricultural shocks and, 75
- Brodie, Frederick J., 281–82
- BTB. *See* bovine tuberculosis (BTB), infant mortality and
- Burman, Erik, 8
- business as usual (BAU) scenarios, 49
- California: residential electricity consumption of, 311–12; total electricity consumption in, 311. *See also* electricity consumption; residential electricity consumption
- California Alternate Rates for Energy (CARE), 318, 334–35
- cap and trade systems, 2
- carbon dioxide levels, 29
- carbon taxes, 2
- CARE. *See* California Alternate Rates for Energy (CARE)
- Celsius, Anders, 8
- climate: literature on weather, mortality and, 133–39; weather, noninfant mortality rates, and, 152–55
- climate change, 253–54; adaptability of American economy to, 12–13; agriculture production and, 225–26; capacity to adapt to, 5; challenges of representing damages from, 23–24; costs of, 14–17; crises and dealing with, 2; economics of, 31–32; effects of, on North America by end of twenty-first century, 169–70; impact of, on mortality rates,

- climate change (*continued*)
 16–17; impact of, on residential electricity consumption, 20–21; implications of study for understanding, 283; importance of international collective action to address, 2; industrialization and, 283; methods of discounting disutilities of, 39–42; modeling impact of warming in, 14; reasons for unpredictability of, 32–35; uncertain economic implications of, 13–14
- climate change policy: damages model for, 47–50; multiplicative vs. additive net utility function and, 25–29
- climate extremes, structural uncertainty about, 29–32
- climate feedback, defined, 35
- climate forcing, defined, 35
- climate sensitivity, 24–25, 30; “dismal proposition” for fat-tailed infinite-variance, 42–44; reasons for unpredictability of, 32–35
- climatic challenges, evidence of adaptation to, 17–19
- climatic conditions, variable: government policy and adaptation to, 19–21
- coal consumption, London fogs and, 283–88; illustration of (1700–1910), 283f
- Coman, Katherine, 74
- constant relative risk aversion (CRRA) utility function, 49, 57–58
- corn. *See* hybrid corn; maize
- Corn Belt: corn production in, during 1930s, 196, 196f
- cotton: adaptation and, 185; changing distribution of U.S. production of, 184–88; distribution of U.S. production of, 189–90t; Mexican stocks of, 186–87; types of, in antebellum period, 186
- Crookes, Sir William, 171n4
- crop harvests: causes of, 100–101, 102t; data for, 103–6; droughts and, 101–2; global warming and, 245–46
- crop prices, weather shocks and, 16
- CRRA. *See* constant relative risk aversion (CRRA) utility function
- death rates. *See* mortality rates
- dendochronology, 10–11
- DICE. *See* Dynamic Integrated model of Climate and the Economy (DICE)
- displaced gamma distribution, 50–51
- droughts: bank equity and, 15; bank failures and, 15; defined, 102n3; development of ideas for measuring, 9–10; effect of, on farm income, 87–88; effects of, on crop harvests, 100; impact of, on adoption of hybrid corn, 217–19; local weather and, 100–102. *See also* Dust Bowl; extreme weather
- dry-farming techniques: for wheat, 178–79
- Dust Bowl, 195, 195n1; weather-driven financial distress during, 81–84. *See also* droughts
- Dynamic Integrated model of Climate and the Economy (DICE), 28, 52
- economic development, mortality rates and, 139–40
- electricity consumption: economics literature on, 313–14; engineering literature on, 313; impacts of climate change on residential, 20–21; literature review of forecasting, 312; panel data-based approach to estimating, 314–15; time series studies of, 314; total, in California, 311. *See also* residential electricity consumption
- environmentalism, Victorian, 282, 288–94. *See also* London fogs
- environmental Kuznets curve (EKC), 20, 282
- evapotranspiration, 9
- exponential loss function, 52
- extreme weather: effect of, on farm income, 84–88; effect of, on farm mortgage foreclosures, 88–89; effect of, on local banking systems, 84–87, 89–95; empirical model of farm commodity prices and, 109–12; results of, model and farm commodity prices, 112–27. *See also* droughts
- Fahrenheit, Daniel, 8
- farm commodity prices: data for, 103–6; empirical model of adverse weather and, 109–12; results of model of extreme weather and, 112–27; transportation costs and, 106–9
- farm income: effect of drought on, 87–88; effect of extreme weather on, 84–87
- farm mortgage foreclosures: effect of drought on, 88–89; effect of extreme weather on, 84–87
- Federal Reclamation Act (1902), 256

- feedbacks, climate: defined, 30n4, 35
 financial markets, agriculture, and weather, 15
 flies, mortality and, 135
 fog-related events: defined, 296–97
 fogs. *See* London fogs
 forcings, climate, 35
 Friedman, Milton, 74, 75
- global warming, 131; crop yields and, 245–46; dynamic aggregative model of, 35–39; London fogs and, 283; modeling impact of, 52–57. *See also* climate change
- Gore, Al, 131
 government policies, adaption to climate conditions and, 19–21
- Great Depression: data and estimation for impact of temperature on mortality rates during, 141–46; impact of climate change and weather on mortality rates during, 16–17; mortality rates during, 132–33
- greenhouse gases (GHG), 2; levels of, and climate sensitivity, 29–31; overall weather response to, and challenges to American economy, 11
- greenhouse gases (GHG) abatement policy, case for, 60
- Green Revolution, 230
- growth rates: impact of global warming on, 53–55; willingness to pay and, 59–60
- harvests, factors contributing to good or bad, 101–2
- heat-tolerant corn: discussion of results for yields of, 243–45; regression model for yields of, 235–36; results of model for yields of, 236–43. *See also* hybrid corn; maize
- Hi-Bred Seed Company, 210–12
- Horsely, Reverend, 8
- hybrid corn: adoption of, 18; adoption of, during 1930s, 199–204; depressed prices of corn during Great Depression and adoption of, 209–10; drought of 1930s and, 214–15; Dust Bowl and, 195–99; Henry A. Wallace and, 210–14; history of development of, 208–10; illustration of impact of drought on adoption of, 217–19; inventors of, 199; Iowa corn yield tests and superiority of, 204–6; role of research and success in adoption of, 215–17; vigor of, 206–10. *See also* heat-tolerant corn; Indiana; maize; Wallace, Henry Agard
- IAMs. *See* integrated assessment models (IAMs)
- ice core drilling, 29
- Indiana: data for corn yields and weather in, 230–35, 247–50; discussion of results of model for heat tolerance of corn yields in, 243–45; regression model for heat tolerance of corn yields in, 235–36; results of model for heat tolerance of corn yields in, 236–43. *See also* hybrid corn; maize
- industrialization, climate change and, 283
- infant mortality: annual fluctuations in temperature, precipitation, and, 146–50; birth rates and, 152; bovine tuberculosis and, 152; economic activity and, 151; influence of public health education and prevention on temperature and, 140–41; temperature changes and, 134–35. *See also* mortality rates
- information, mortality rates and, 139–40
- instrument readings, for measuring weather, 6–8
- integrated assessment models (IAMs), 28–29, 49, 55n4, 56
- Intergovernmental Panel on Climate Change (IPCC), 3
- Iowa corn yield tests, 204–6, 207t, 211–12
- Jevons, William Stanley, 73–74
- Jones, Donald F., 199
- Kansas: early production of wheat in, 178; national bank failures in (1875–1910), 79–80t; weather-driven financial distress in nineteenth century, 76–81
- Keynes, John Maynard, 74
- Klippart, John, 170–71, 170n3, 171n4
- Kuznets curve. *See* environmental Kuznets curve (EKC)
- Lempfert, R. G. K., 284, 286–88, 288n5
- Leonardo da Vinci, 10
- local weather, drought and, 100–102
- London fogs, 20; adoption of gas and reduction of, 289, 293–94; adoption of hard coal and, 292–93; anticyclones and, 285; coal consumption (1700–1910)

- London fogs (*continued*)
 and, 283–88, 283f; effects of laws and changing technologies on, 291–94; evaluation of evidence on, 281–82; evaluation of mortality data and, 282; famous, 294–95; global warming and, 283; history of, 295–97; identification of, 297–98; plotting deaths from, 298–306; population redistribution and reduction of, 288, 289–91; production of coal smoke and, 281; Public Health Act and reduction of, 288–89; reasons economists and economic historians should be interested in, 282–83; Victorian environmentalism and, 288–94
- maize: changing distribution of U.S. production of, 180–84; distribution of U.S. production of, 182–83t; evolution of heat-tolerant, 18–19, 227–29; growing of, 206–7. *See also* heat-tolerant corn; hybrid corn; Indiana
- malaria, mortality and, 135
- Marquis wheat, 176–78
- mercury thermometer, 8
- methane levels, 29
- Mitchell, Wesley Clair, 74–75
- Moore, Henry Ludwell, 74
- mortality rates: climate, weather, and non-infant, 152–55; data and estimation for impact of temperature on, during Great Depression, 141–46; economic development and, 139–40; flies and, 135; during Great Depression, 132–33; impact of climate and weather on, 16–17; information and, 139–40; literature on climate, weather, and, 133–39; malaria and, 135; mosquitoes and, 135; rainfall and, 139; respiratory diseases and, 136; typhoid and, 135; water-borne diseases and, 134–35; weather and, 139–41. *See also* infant mortality
- mosquitoes, mortality and, 135
- national meteorological services, 8
- National Smoke Abatement Institution (NSAI), 291–92
- North American Drought Atlas, The*, 11
- Oklahoma, weather-driven financial distress during Dust Bowl in, 81–84. *See also* Dust Bowl
- Palmer Drought Severity Index (PDSI), 9–10, 255; rates of return and, 15–16
- Pigou, A. C., 74
- Pioneer Hi-Bred Seed Company, 18, 210–14

- price effects, transportation costs and, 106–9
- probability density function (PDF), 24–25, 30
- Public Health Act (UK), 20, 288–89
- public health education, influence of, on temperature and infant mortality, 140–41
- public health technologies, mortality rates and, 141
- rainfall, mortality and, 139
- rain gauge (pluviometer), 8
- rates of return, Palmer Drought Severity Index and, 15–16
- Reclamation Fund, 256
- Red Fife wheat, 176–77
- residential electricity consumption, 20–21; adaptation and, 338–41; alternative data sources for, 322–23; of California, 311–12; econometric estimation of, 324–28; household data for, 315–19; simulations of, 328–35; temperature and population growth and, 337–38; temperature and price simulations of, 335–37; weather data for, 319–22. *See also* electricity consumption
- respiratory diseases, mortality and, 136
- Russell, Rollo, 284
- Schwartz, Anna J., 74, 75
- seed types, new: adoption of, 18
- smoke abatement technologies, 282
- Sprague, O. M., 75
- sunspot theory, 73–74
- temperature changes, 3–5; data and estimation for impact of, on death rates during Great Depression, 141–46; infant mortality and, 134–35; influence of public health education and prevention on infant mortality and, 140–41; model of, 50–52; mortality and, 134–39
- temperature damages, 25–29
- transportation costs, price effects and, 106–9

- tree rings, study of, 10–11
Turkey-type wheat, 177
typhoid, mortality and, 135
- United States: adaptability of economy of, to climate change, 12–13; agricultural production of, 225–26; meteorological services of, 8
- U.S. Climate Division Dataset (USCDD), 255, 262
- Victorian environmentalism, 282. *See also* London fogs
- Wallace, Henry Agard, 18, 199, 210–14, 210n20, 210n21
- warming. *See* global warming
- water-borne diseases, mortality and, 134–35
- weather: agriculture, financial markets, and, 15; climate, noninfant mortality rates, and, 152–55; impact of, on mortality rates, 16–17; literature on climate, mortality, and, 133–39; local, and drought, 100–102; methods of measuring, 6–11; mortality rates and, 139–40
- weather patterns: changes in, 3–5; systematic study of, 8
- weather shocks, crop prices and, 16
- western water supplies, agriculture and, 254–55
- western water supply infrastructure: agriculture and, 254–55; climate data for, 262–63; data for, 257–61; econometric model of, 264–67; historical agriculture data for, 259–62; origins and impact of, 255–56; results of model of, 267–78; state attempts of, 256; topography and soil quality data for, 264
- wheat: changing U.S. geographic production of, 172–76; distribution of U.S. production of, 174–75t; dry-farming techniques for, 178–79; early production of, in Kansas, 178; innovations, 176–77; Marquis, 176–78; production of winter vs. spring, 179–80; Red Fife, 176–77; Turkey-type, 177; U.S. production of, 172
- wheat culture, 170–71; westward movement of, 176
- willingness to pay (WTP), 48–49, 59n7; direct impact of, 58–59; growth rate impact of, 59–60; as measure of demand side of policy, 60; modeling, 57–58; modeling implication for, 67–68; modeling results for, 60–66; policy implications for, 68–69
