RELATION OF THE DIRECTORS TO THE WORK AND PUBLICATIONS
OF THE NATIONAL BUREAU OF ECONOMIC RESEARCH

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No report shall be published until the Director or Directors of Research shall have submitted to the Board a summary drawing attention to the character of the data and their utilization in the report, the nature and treatment of the problems involved, the main conclusions, and such other information as in their opinion would serve to determine the suitability of the report for publication in accordance with the principles of the National Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. For each manuscript to be so submitted a special committee shall be appointed by the President, or at his designation by the Executive Director, consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the summary and report described in paragraph (4) are sent to him. It shall be the duty of each member of the committee to read the manuscript. If each member of the special committee signifies his approval within thirty days, the manuscript may be published. If each member of the special committee has not signified his approval within thirty days of the transmittal of the report and manuscript, the Director of Research shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty additional days shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board and a two-thirds majority of those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed shall have approved.

6. No manuscript may be published, though approved by each member of the special committee, until forty-five days have elapsed from the transmittal of the summary and report. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general, or of the special committee, have passed upon its validity in every detail.

7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every National Bureau book.

(Resolution adopted October 25, 1926 and revised February 6, 1933 and February 24, 1941)

NATIONAL BUREAU OF ECONOMIC RESEARCH

Committee on Research in Finance

In the planning and conduct of its studies in finance the National Bureau benefits from the advice and guidance of its Committee on Research in Finance. The members of the Committee are:

Ralph A. Young, *Chairman—Adviser to Board of Governors of the Federal Reserve System*

William J. Carson, *Secretary—University of Pennsylvania; Executive Director, National Bureau of Economic Research*

Benjamin Haggott Beckhart, *Graduate School of Business, Columbia University*

George W. Coleman, *Economist, Mercantile Trust Company*

Edison H. Cramer, *Chief, Division of Research and Statistics, Federal Deposit Insurance Corporation*

Ernest M. Fisher, *Graduate School of Business, Columbia University*

F. Cyril James, *Principal and Vice-Chancellor, McGill University*

Walter Lichtenstein, *Vice-President (retired), First National Bank of Chicago*

Walter Mitchell, Jr., *Case Institute of Technology*

Shepard Morgan

James J. O'Leary, *Director of Investment Research, Life Insurance Association of America*

George Bassett Roberts, *Chairman, National Bureau of Economic Research*

Raymond J. Saulnier, *Chairman, Council of Economic Advisers*

Casimir A. Sienkiewicz, *President, Central-Penn National Bank of Philadelphia*

Woodlief Thomas, *Adviser to Board of Governors of the Federal Reserve System*

Donald S. Thompson, *First Vice-President, Federal Reserve Bank of Cleveland*

John H. Williams, *Nathaniel Ropes Professor Emeritus, Harvard University*

John H. Wills, *Vice-President and Economist, Northern Trust Company*

Leo Wolman, *Research Staff, National Bureau of Economic Research*

Donald B. Woodward, *Director, Vick Chemical Company*

〈 PREFACE 〉

THIS is the last of a series of three reports prepared by the National Bureau's corporate bond research project:

The Volume of Corporate Bond Financing since 1900
(published 1953)

Corporate Bond Quality and Investor Experience
(published 1958)

Statistical Measures of Corporate Bond Financing since 1900

The third report contains basic statistics on which the analyses of the second report are founded, supplementary tables on topics not covered in that report, and a description of estimating procedures and notes on coverage and suggested uses.

As were the other two reports of the series, the present report is based largely on extensive materials compiled by the Corporate Bond Project, a Work Projects Administration project, sponsored by the Federal Deposit Insurance Corporation and directed by the National Bureau of Economic Research with the active cooperation of several public agencies and private investment services. The data sheets and tabulating card records of the Corporate Bond Project originally covered the period from January 1900 to January 1939, and were subsequently edited by the National Bureau and extended to January 1944.

The present project, which was initiated by the National Bureau in mid-1946, has a twofold purpose: first, to provide basic statistical series on corporate bond financing in a form that we hope will prove useful to investors, to government agencies, and to students generally; and second, to analyze and interpret the behavior of these series for what light they may throw on the workings of the economy. The first report presents and analyzes the broad aggregates, and the second report deals with detailed breakdowns covering the characteristics and investment behavior of the securities included in the aggregates.

The original records were compiled under the supervision of the National Bureau's Committee on the Corporate Bond Project, which was composed of the following members: Winfield W. Rieffer, chairman, William J. Carson, vice chairman, Raymond W. Goldsmith, William R. Leonard, Harold V. Roelse, Raymond J. Saulnier, Woodlief Thomas, Donald S. Thompson, Donald B. Woodward, and Ralph A. Young. Technical consultants to the committee included Henry Bodwell, Leslie L. Drew, Erling C. Olsen, and E. L. Vogelius. The project was staffed by the following members, whose services were contributed by the various cooperating agencies: Melvin W. Brethouwer, administrative director, Harold G. Fraine, technical director, Lewis N. Dembitz, Frederick C. Dirks, David Durand, Rose Director Friedman, William Hayes, W. Braddock Hickman, George P. Hitchings, Harold P. Pfleeger, S. Grant Saunders, and Elizabeth T. Simpson.

The first volume of the series and the basic tabulations were completed with the aid of grants from the following sources: the Life Insurance Association of America; the American Life Convention; the Association of Reserve City Bankers; J. Reed Morss, President, Boston Five Cents Savings Bank; the Savings Banks Trust Company of New York; the Trust Investment Study Committee of the New York State Bankers Association; and with general funds of the National Bureau of Economic Research. The International Business Machines Corporation originally placed at our disposal its elaborate machine installation at the Watson Scientific Computing Laboratory, Columbia University, and later provided and maintained a complete tabulating unit at our Hillside offices. The New York State Banking Department, the American Bankers Association, and the Life Insurance Investment Research Committee also cooperated generously in the work of the project.

The preparation of the second and third volumes of the series was supported by grants from the Merrill Foundation for Advancement of Financial Knowledge.

I have benefited greatly, particularly during the planning stages of the work, from the expert advice of the National Bureau's Technical Committee on Corporate Bond Research. Those who served on the committee as members and alternates are: Winfield W. Riefler, chairman, Arthur F. Burns, Irvin Bussing, William J. Carson, A. J. Casazza, Eleanor Bagley Daniel, J. R. Dunkerley, William E. Dunkman, Harold G. Fraine, Gabriel S. Hauge, Frederick W. McComas, Jr., Fergus J. McDiarmid, Adrian M. Massie, J. Reed Morss, John J. Moynahan, Roger F. Murray, James J. O'Leary, Raymond J. Saulnier, A. Edward Scherr, Jr., Elizabeth T. Simpson, Bascom H. Torrance, Donald B. Woodward, and James W. Wooster, Jr.

It is a pleasure, once again, to acknowledge the assistance of all those who have participated in this undertaking. A preliminary draft of this report was reviewed by the directors' reading committee of the National Bureau of Economic Research and by other friends and associates who have had a long-standing interest in the work. In this connection I am indebted to Melvin G. de Chazeau, Lewis N. Dembitz, Harold G. Fraine, Raymond W. Goldsmith, Murray Shields, Boris Shishkin, and Donald B. Woodward.

I am also indebted to those of the National Bureau staff who participated in one way or another in the preparation of the report. The text and the format of the tables were edited by Mary Phelps and were greatly improved by her helpful suggestions. My deepest debt is to Elizabeth T. Simpson, who assisted in all phases of the investigation, including the supervision of table preparation and checking of the tables here presented. Many able workers had a hand in the computation and processing of the data, among whom Georgette M. Welscher deserves special mention. The I.B.M. tabulations and computations were supervised at different stages by Mario P. Bosso, Charles F. Earley, and Martha S. Jones.

W. Braddock Hickman

January 24, 1959

◀ INTRODUCTION ▶

THE findings of the National Bureau studies in corporate bond financing are presented in a series of three reports. The first of the series, *The Volume of Corporate Bond Financing since 1900*, was published in 1953. It presents and analyzes broad aggregate statistics relating to new corporate bond offerings, extinguishments, and outstandings; and to new defaults, default settlements, and outstandings in default. The second report, which appeared in 1958, is entitled *Corporate Bond Quality and Investor Experience*. It is essentially an analytical study of the detailed characteristics of bond offerings, outstandings, and defaults, and of the experience record of offerings and outstandings in different quality classes over various assumed investment periods. The report in hand, which is the third and concluding volume of the series, contains basic statistics on which the analysis of the second report is founded, supplementary tables on topics not presented in the other reports, and brief descriptive notes on coverage and suggested uses.¹

In locating tabular materials of special interest, it is suggested that the reader refer first to the table of contents of this volume, which includes detailed references, under topical headings, to related materials in each of the three reports of the series. To present maximum information without duplication, the tables contained herein are supplementary rather than comprehensive. For example, extensive tables relating to the broad aggregates of corporate bond offerings, outstandings, and related matters are presented in the first volume and are not repeated here. Similarly, certain data reflecting the experience on defaulted issues classified by legal status for savings bank investment, which are presented in full detail in the second report of the series, are omitted here. The present statistical compilation is therefore not a data book containing all tabulations in the other studies, but, rather, it contains new or more detailed data supplemented by a listing of materials presented in earlier reports. The table of contents will, it is hoped, serve as a guide to the tabular materials of the entire series.

The general structure of the tables presented in the three volumes was determined largely by three considerations: (1) the reliability of the data, (2) the interests of potential users of the materials, and (3) the amount of space available. In other words, the objective was to include meaningful breakdowns, and to exclude tabulations where the data were thin or were believed to be liable to appreciable sampling error. Since the basic records were on I.B.M. punched cards, a larger number of breakdowns and cross-classifications were possible than could be included in a single volume. Some interesting breakdowns have been excluded, but they may be obtained for appropriate uses from the punched cards, which are on file at the National Bureau of Economic Research.

Throughout the studies in corporate bond financing, the usual terminological problems were encountered in attempting to classify mass statistical data in reasonably meaningful ways. All special terms used in describing and classifying the bond data throughout the series of studies are brought together in a glossary at the end of this report. Readers troubled by terminological problems may refer to it for brief definitions, and to the indexes of the first and second reports for more detailed explanations and derivations. Accepted usage in the United States capital markets has been followed as closely as possible, but a few solecisms have undoubtedly crept in, and will perhaps be forgiven in an investigation of this extent.

There is, however, one fundamental definitional matter that must be faced up to at the start, namely, the particular type of corporate bond to which our statistics relate. Roughly expressed, corporate bonds are of four basic types: straight bonds, equipment obligations (usually in serial form), other serial bonds, and income bonds (see Chapter 1 of *Volume of Financing* for detailed descriptions of the different types). Aggregate statistics for each basic type are given in *Volume*

¹ For brevity, the three reports of the series will be referred to hereafter as *Volume of Financing*, *Corporate Bond Quality*, and *Statistical Measures*.

of *Financing*, but the second and third reports, which contain all of the detailed information on bond characteristics and experience, relate only to so-called straight corporate bonds.

A straight bond, in our usage, is a fixed-income, single-maturity obligation (and no such bond was excluded, save the few equipment trust obligations that were not in serial form). Straight bonds are by far the most important type employed by U.S. business corporations, comprising 76 percent of the 28,005 corporate issues of all types outstanding during the period studied (January 1, 1900 to January 1, 1944) and 86 percent of the \$89.9 billion par amount of all corporate bond offerings. Throughout these reports, coverage is further restricted to so-called "domestic corporate bonds," that is, obligations of U.S. business enterprises in the railroad, public utility, and industrial fields held by the United States domestic investing public.

A fundamental sampling problem arose in selecting a group of straight corporate bonds for detailed study of characteristics and experience, since it was clearly impossible within the financial limits imposed upon the project to analyze in detail each of the 21,189 straight issues outstanding during the period covered by the investigation. Much of the broad aggregate data developed and presented in *Volume of Financing* covers the number and par amount of all domestic corporate bonds offered, outstanding, and extinguished in the period January 1, 1900 to January 1, 1944. These data were compiled from a card catalog covering all issues mentioned in the investment manuals (for sources of data and derivations of basic estimates, consult *Volume of Financing*, Appendix B); in the aggregate, therefore, they represent universe totals. The detailed breakdowns presented in the other reports (and to some extent, in the first report as well) are based on sample data adjusted upward annually within major industry group (rails, utilities, and industrials) to sum to the universe totals developed in the first report. The sample used for detailed study is comprised of all large issues (those whose offerings summed to \$5 million or more during their life spans) and a 10 percent sample of the smaller issues (those whose offerings summed to less than \$5 million). The small-issues sample is a controlled sample, selected by drawing every tenth card from a card catalog covering all small issues, after arraying the cards by year of maturity within year of first offering (year the issue first appeared). The characteristics of the issues thus selected were then recorded in detail: at offering date (first and all succeeding offerings); at extinguishment date; at default date, if the issue defaulted; and at selected chronological dates over the life span of each issue studied (quadrennially, for all issues in the sample, and annually, for a large sample of actively traded issues for which reliable market quotations could be obtained). Similarly, in so far as the data would permit, various measures of investment experience were computed for each issue in the sample over selected natural and chronological periods.

The tables of the present volume are arranged under six major headings:

- | | |
|--|---|
| I. Characteristics of Outstanding Issues | IV. Measures of Experience over Chronological Periods |
| II. Characteristics of Offerings and Extinguishments | V. Measures of Experience from Offering to Extinguishment |
| III. Characteristics of Defaulted Issues | VI. Measures of Experience on Defaulted Issues |

As will be explained in greater detail in the notes preceding the tables of the first two sections, estimates for total outstandings, offerings, and extinguishments were obtained by applying annual raising factors to the small issues within industry group so that they summed to the corresponding universe estimates for all small issues, and then combining with the data for the large issues. Since the large issues are so important in the par-amount totals for all straight issues, global estimates of par amounts obtained in this way are believed to be reasonably accurate. (For example, the par amount of offerings of large straight corporate bond issues, for which the data are complete, comprises 79 percent of the par-amount total of all straight bond offerings in the period January 1, 1900–January 1, 1944.) On the other hand, because of the very large volume of small issues (74 percent of the total number of all offerings

represented issues whose offerings summed to less than \$5 million), we cannot be nearly as confident of the breakdowns by number as of those representing par amounts.

An attempt has been made to meet this difficulty in several ways, but primarily by presenting less detail for number than for par amount. For example, most cross-classifications of bond characteristics, such as agency rating by legal status, are presented only for par amounts. In addition, since professional investors are interested primarily in the large issues, for which the data are most complete, detailed estimates for large issues are usually presented separately in the tables of the first two sections, additional to the estimates for all issues (large and small combined). Separate estimates for the small issues may, of course, be obtained by subtraction, but the reader is forewarned that such data are presumed to be less accurate (in the sense that they may contain a larger percentage error) than the figures for the totals or for the large issues. The estimates are particularly liable to error when they relate to number rather than par amount.

There is another source of error in our data, similar to errors of nonresponse in sample surveys. Such errors may be present whenever information on one or more of the distributing variables could not be determined from the basic source materials. Errors of this type presumably do not occur in the tabulations of agency ratings and legal status, since most issues during the period studied were deliberately considered by the rating agencies and the banking authorities, and were either rated or not rated; hence the columns for issues with "no rating" or "not legal." In the case of the market rating and most of the other variables, the requisite information could not always be found in the source materials. Such observations were therefore tabulated under separate column headings labeled "information lacking." When the amount in the information-lacking column of any table is large relative to the total for which information is available, the classified data may be liable to substantial bias or error.

A further difficulty arises when dealing with the small issues in the tables on characteristics of defaulted issues (Section III) and the bond experience tables (Sections IV-VI), owing partly to the inherent thinness of some of the data in these sections, and partly to the lack of information on cash receipts needed to compute some of the experience measures. Generally speaking, less information was available for small issues than for large. The possible bias resulting from this fact is discussed in Chapter 1 of *Corporate Bond Quality*, and more briefly in the notes preceding the tables contained in this volume. Because of possible bias in the selection, the data on default characteristics and on bond experience are presented separately for large issues and for the small-issues sample, but no attempt has been made to combine the two groups into universe estimates for all issues, large and small. Tables showing universe distributions of the number and par amounts of issues falling in the major categories and periods over which the bond experience statistics are distributed are presented at appropriate places, and may be used to obtain rough estimates of aggregate experience, when the small issues are combined with the large. Such data, in conjunction with statistics presented on the number of issues in the various sample cells, should provide the reader with tolerably reliable guides as to whether or not the combination of issues in the two size groups will provide reasonably good universe estimates.

Specific comments on the construction, use, and adjustment of the data in the tables here presented are contained in the notes preceding each main section into which the book is divided.

Introduction	xi
I. CHARACTERISTICS OF OUTSTANDING ISSUES	
Explanatory notes	1
Summary tables in other reports	
See <i>Volume of Financing</i> , Tables 1-3, 5, 13-18, 25-26, 30, A-13, A-14, A-22, A-23, A-24, A-25, and A-26; further, see <i>Corporate Bond Quality</i> , Tables 7 and 8.	
COVERAGE	
See <i>Volume of Financing</i> , Tables A-2, A-6, A-7, and A-8; also Tables A-1, A-3, A-4, and A-5 therein.	
AGENCY RATING	4
1. Par amount of outstanding issues rated high and low by the agencies, classified by major industry group, annually, 1909-44	
2. Number and par amount of outstanding issues, classified by agency rating and by major industry group, quadrennially, 1912-44	
3. Number and par amount of outstanding large issues, classified by agency rating, quadrennially, 1912-44	
4. Par amount of outstanding issues legal in Maine, Massachusetts, and New York, classified by agency rating, quadrennially, 1912-44	
5. Par amount of outstanding issues rated high and low by the market, classified by agency rating, quadrennially, 1912-44	
6. Par amount of outstanding issues in default, classified by agency rating, quadrennially, 1912-44	
(See also Tables 10, 15, 19, 24, 30, 36, herein; and in <i>Corporate Bond Quality</i> , Tables 27, 29, 31, 32, 41, 56, 68, 70, 100, and 102.)	
LEGAL STATUS	13
7. Par amount of outstanding issues, classified by legal status in Maine, Massachusetts, and New York and by major industry group, annually, 1909-44	
8. Number of outstanding issues, classified by legal status in Maine, Massachusetts, and New York and by major industry group, quadrennially, 1912-44	
9. Number and par amount of outstanding large issues, classified by legal status in Maine, Massachusetts, and New York, quadrennially, 1912-44	
10. Par amount of outstanding issues rated high and low by the agencies, classified by legal status in Maine, Massachusetts, and New York, quadrennially, 1912-44	
11. Par amount of outstanding issues rated high and low by the market, classified by legal status in Maine, Massachusetts, and New York, quadrennially, 1912-44	
(See also Tables 4, 16, 20, 25, 31, 37 herein; and in <i>Corporate Bond Quality</i> , Tables 41, 42, 45, 46, 56, 69, 70, 100, and 102.)	
MARKET RATING	21
12. Par amount of outstanding issues rated high and low by the market, classified by major industry group, annually, 1900-1944	

13. Number and par amount of outstanding issues, classified by market rating and by major industry group, quadrennially, 1900-1944
 14. Number and par amount of outstanding large issues, classified by market rating, quadrennially, 1900-1944
 15. Par amount of outstanding issues rated high and low by the agencies, classified by market rating, quadrennially, 1912-44
 16. Par amount of outstanding issues legal in Maine, Massachusetts, and New York, classified by market rating, quadrennially, 1912-44
- (See also Tables 5, 11, 21, 26, 32, 38 herein; and in *Corporate Bond Quality*, Tables 7, 53, 56, 58, 59, 68-70, 100, and 102.)

LIEN POSITION

29

17. Number and par amount of outstanding issues, classified by lien position and by major industry group, quadrennially, 1900-1944
 18. Number and par amount of outstanding large issues, classified by lien position, quadrennially, 1900-1944
 19. Par amount of outstanding issues rated high and low by the agencies, classified by lien position, quadrennially, 1912-44
 20. Par amount of outstanding issues legal in Maine, Massachusetts, and New York, classified by lien position, quadrennially, 1912-44
 21. Par amount of outstanding issues rated high and low by the market, classified by lien position, quadrennially, 1900-1944
 22. Par amount of outstanding issues in default, classified by lien position, quadrennially, 1900-1944
- (See also *Corporate Bond Quality*, Tables 29, 41, 56, 100, and 102.)

AMOUNT OUTSTANDING

37

23. Number and par amount of outstanding issues, classified by amount outstanding and by major industry group, quadrennially, 1900-1944
 24. Par amount of outstanding issues rated high and low by the agencies, classified by amount outstanding, quadrennially, 1912-44
 25. Par amount of outstanding issues legal in Maine, Massachusetts, and New York, classified by amount outstanding, quadrennially, 1912-44
 26. Par amount of outstanding issues rated high and low by the market, classified by amount outstanding, quadrennially, 1900-1944
 27. Par amount of outstanding issues in default, classified by amount outstanding, quadrennially, 1900-1944
- (See also *Corporate Bond Quality*, Tables 29, 41, 56, 99, 100, 102-104, 113, and 116.)

ASSET SIZE OF OBLIGOR

44

28. Number and par amount of outstanding issues, classified by asset size of obligor and by major industry group, quadrennially, 1900-1944
29. Number and par amount of outstanding large issues, classified by asset size of obligor, quadrennially, 1900-1944
30. Par amount of outstanding issues rated high and low by the agencies, classified by asset size of obligor, quadrennially, 1912-44
31. Par amount of outstanding issues legal in Maine, Massachusetts, and New York, classified by asset size of obligor, quadrennially, 1912-44
32. Par amount of outstanding issues rated high and low by the market, classified by asset size of obligor, quadrennially, 1900-1944

33. Par amount of outstanding issues in default, classified by asset size of obligor, quadrennially, 1900-1944

(See also *Corporate Bond Quality*, Tables 29, 41, 56, 100-104, 114, and 115.)

EXCHANGE ON WHICH LISTED

52

34. Number and par amount of outstanding issues, classified by exchange on which listed and by major industry group, quadrennially, 1900-1944
35. Number and par amount of outstanding large issues, classified by exchange on which listed, quadrennially, 1900-1944
36. Par amount of outstanding issues rated high and low by the agencies, classified by exchange on which listed, quadrennially, 1912-44
37. Par amount of outstanding issues legal in Maine, Massachusetts, and New York, classified by exchange on which listed, quadrennially, 1912-44
38. Par amount of outstanding issues rated high and low by the market, classified by exchange on which listed, quadrennially, 1900-1944
39. Par amount of outstanding issues in default, classified by exchange on which listed, quadrennially, 1900-1944

(See also *Corporate Bond Quality*, Tables 29, 41, 56, 100, and 102.)

TERM TO MATURITY

60

40. Number and par amount of outstanding issues, classified by term to maturity and by major industry group, quadrennially, 1900-1944
41. Number and par amount of outstanding large issues, classified by term to maturity, quadrennially, 1900-1944

(See also *Corporate Bond Quality*, Tables 29, 41, 56, 100, and 102.)

MINOR INDUSTRY

64

42. Number and par amount of outstanding railroad and public utility issues, classified by minor industry, quadrennially, 1900-1944
43. Number of outstanding industrial issues, classified by minor industry, quadrennially, 1900-1944
44. Par amount of outstanding industrial issues, classified by minor industry, annually, 1900-1944
45. Number and par amount of outstanding large issues, classified by minor industry, quadrennially, 1900-1944

MARKET PRICE

71

46. Number and par amount of outstanding issues, classified by market price and by major industry group, quadrennially, 1900-1944
47. Number and par amount of outstanding large issues, classified by market price, quadrennially, 1900-1944
48. Par amount of outstanding issues in default, classified by market price, quadrennially, 1900-1944

PROMISED YIELD

75

49. Number and par amount of outstanding issues, classified by promised yield and by major industry group, quadrennially, 1900-1944
50. Number and par amount of outstanding large issues, classified by promised yield, quadrennially, 1900-1944

II. CHARACTERISTICS OF OFFERINGS AND EXTINGUISHMENTS

Explanatory notes

79

Summary tables in other reports

See *Volume of Financing*, Tables 4, 5, 7-18, 25, 28-29, A-10, A-11, A-12, A-15, A-16, A-22, A-26, and A-27.

COVERAGE

See *Volume of Financing*, Tables A-2, A-6, A-7, A-8, and A-9; also Tables A-1, A-3, A-4, and A-5 therein.

AGENCY RATING

81

51. Number of offerings, classified by agency rating at offering, annually, 1900-1943
52. Par amount of offerings, classified by agency rating at offering and by major industry group, annually, 1900-1943
53. Par amount of offerings of large issues, classified by agency rating at offering, annually, 1900-1943
54. Number of final extinguishments, classified by agency rating at extinguishment, annually, 1900-1943
55. Par amount of final extinguishments, classified by agency rating at extinguishment and by major industry group, annually, 1900-1943
56. Par amount of final extinguishments of large issues, classified by agency rating at extinguishment, annually, 1900-1943
57. Number of offerings 1900-1943, classified by agency rating at offering and by agency rating at extinguishment or in first quarter of 1944
58. Par amount of offerings 1900-1943, classified by agency rating at offering, by agency rating at extinguishment or in first quarter of 1944, and by major industry group
59. Par amount of offerings of large issues 1900-1943, classified by agency rating at offering and by agency rating at extinguishment or in first quarter of 1944
(See also *Corporate Bond Quality*, Tables 28, 30, 32, 34, and 55.)

LEGAL STATUS

97

60. Number of offerings, classified by legal status in Maine, Massachusetts, and New York at offering, annually, 1900-1943
61. Par amount of offerings, classified by legal status in Maine, Massachusetts, and New York at offering and by major industry group, annually, 1900-1943
62. Par amount of offerings of large issues, classified by legal status in Maine, Massachusetts, and New York at offering, annually, 1900-1943
63. Number of final extinguishments, classified by legal status in Maine, Massachusetts, and New York at extinguishment, annually, 1900-1943
64. Par amount of final extinguishments, classified by legal status in Maine, Massachusetts, and New York at extinguishment and by major industry group, annually, 1900-1943
65. Par amount of final extinguishments of large issues, classified by legal status in Maine, Massachusetts, and New York at extinguishment, annually, 1900-1943
66. Number of offerings 1900-1943, classified by legal status in Maine, Massachusetts, and New York at offering and by legal status at extinguishment or in first quarter of 1944

67. Par amount of offerings 1900-1943, classified by legal status in Maine, Massachusetts, and New York at offering, by legal status at extinguishment or in first quarter of 1944, and by major industry group
68. Par amount of offerings of large issues 1900-1943, classified by legal status in Maine, Massachusetts, and New York at offering and by legal status at extinguishment or in first quarter of 1944
- (See also *Corporate Bond Quality*, Tables 43, 44, and 46.)

MARKET RATING

112

69. Number of offerings, classified by market rating at offering, annually, 1900-1943
70. Par amount of offerings, classified by market rating at offering and by major industry group, annually, 1900-1943
71. Par amount of offerings of large issues, classified by market rating at offering, annually, 1900-1943
72. Number of offerings 1900-1943, classified by market rating at offering and by agency rating at extinguishment or in first quarter of 1944
73. Par amount of offerings 1900-1943, classified by market rating at offering and by agency rating at extinguishment or in first quarter of 1944, and by major industry group
74. Par amount of offerings of large issues 1900-1943, classified by market rating at offering and by agency rating at extinguishment or in first quarter of 1944
75. Number of offerings 1900-1943, classified by market rating at offering and by legal status at extinguishment or in first quarter of 1944
76. Par amount of offerings 1900-1943, classified by market rating at offering and by legal status at extinguishment or in first quarter of 1944, and by major industry group
77. Par amount of offerings of large issues 1900-1943, classified by market rating at offering and by legal status at extinguishment or in first quarter of 1944
- (See also *Corporate Bond Quality*, Tables 54, 55, 57, and 59.)

TIMES-CHARGES-EARNED RATIO

124

78. Number of offerings, classified by times-charges-earned ratio at offering, annually, 1900-1943
79. Par amount of offerings, classified by times-charges-earned ratio at offering and by major industry group, annually, 1900-1943
80. Par amount of offerings of large issues, classified by times-charges-earned ratio at offering, annually, 1900-1943
- (See also *Corporate Bond Quality*, Tables 81 and 83.)

RATIO OF NET INCOME TO GROSS INCOME

130

81. Number of offerings, classified by ratio of net income to gross income at offering, annually, 1900-1943
82. Par amount of offerings, classified by ratio of net income to gross income at offering and by major industry group, annually, 1900-1943
83. Par amount of offerings of large issues, classified by ratio of net income to gross income at offering, annually, 1900-1943
- (See also *Corporate Bond Quality*, Tables 82 and 83.)

LIEN POSITION

136

84. Number of offerings, classified by lien position at offering, annually, 1900-1943

85. Par amount of offerings, classified by lien position at offering and by major industry group, annually, 1900-1943	
86. Par amount of offerings of large issues, classified by lien position at offering, annually, 1900-1943	
(See also <i>Corporate Bond Quality</i> , Tables 91 and 92.)	
ASSET SIZE OF OBLIGOR	142
87. Number of offerings, classified by asset size of obligor at offering, annually, 1900-1943	
88. Par amount of offerings, classified by asset size of obligor at offering and by major industry group, annually, 1900-1943	
89. Par amount of offerings of large issues, classified by asset size of obligor at offering, annually, 1900-1943	
EXCHANGE ON WHICH LISTED	148
90. Number of offerings, classified by exchange on which listed at offering, annually, 1900-1943	
91. Par amount of offerings, classified by exchange on which listed at offering and by major industry group, annually, 1900-1943	
92. Par amount of offerings of large issues, classified by exchange on which listed at offering, annually, 1900-1943	
TERM TO MATURITY	152
93. Number of offerings, classified by term to maturity, annually, 1900-1943	
94. Par amount of offerings, classified by term to maturity and by major industry group, annually, 1900-1943	
95. Par amount of offerings of large issues, classified by term to maturity, annually, 1900-1943	
(See also <i>Volume of Financing</i> , Table 6.)	
MINOR INDUSTRY	158
96. Number of offerings, classified by minor industry, annually, 1900-1943	
97. Par amount of offerings, classified by minor industry, annually, 1900-1943	
98. Par amount of offerings of large issues, classified by minor industry, annually, 1900-1943	
OFFERING PRICE	167
99. Number of offerings, classified by offering price, annually, 1900-1943	
100. Par amount of offerings, classified by offering price and by major industry group, annually, 1900-1943	
101. Par amount of offerings of large issues, classified by offering price, annually, 1900-1943	
PROMISED YIELD	173
102. Number of offerings, classified by promised yield, annually, 1900-1943	
103. Par amount of offerings, classified by promised yield and by major industry group, annually, 1900-1943	
104. Par amount of offerings of large issues, classified by promised yield, annually, 1900-1943	

SINKING FUND PROVISIONS

179

- 105. Number of offerings, classified by sinking fund provisions, annually, 1900-1943
- 106. Par amount of offerings, classified by sinking fund provisions and by major industry group, annually, 1900-1943
- 107. Par amount of offerings of large issues, classified by sinking fund provisions, annually, 1900-1943

CALL PROVISIONS

191

- 108. Number of offerings, classified by call provisions, annually, 1900-1943
- 109. Par amount of offerings, classified by call provisions and by major industry group, annually, 1900-1943
- 110. Par amount of offerings of large issues, classified by call provisions, annually, 1900-1943

CALL PRICE

197

- 111. Number of offerings, classified by call price, annually, 1900-1943
- 112. Par amount of offerings, classified by call price and by major industry group, annually, 1900-1943
- 113. Par amount of offerings of large issues, classified by call price, annually, 1900-1943

CALL DEFERMENT AND DURATION

203

- 114. Number of offerings, classified by call deferment and duration, annually, 1900-1943
- 115. Par amount of offerings, classified by call deferment and duration and by major industry group, annually, 1900-1943
- 116. Par amount of offerings of large issues, classified by call deferment and duration, annually, 1900-1943

CONVERSION AND WARRANT PROVISIONS

210

- 117. Number of offerings, classified by conversion and warrant provisions, annually, 1900-1943
- 118. Par amount of offerings, classified by conversion and warrant provisions and by major industry group, annually, 1900-1943
- 119. Par amount of offerings of large issues, classified by conversion and warrant provisions, annually, 1900-1943

NATURE OF GUARANTY

216

- 120. Number of offerings, classified by nature of guaranty, annually, 1900-1943
- 121. Par amount of offerings, classified by nature of guaranty and by major industry group, annually, 1900-1943
- 122. Par amount of offerings of large issues, classified by nature of guaranty, annually, 1900-1943

COUPON RATE

222

- 123. Number of offerings, classified by coupon rate, annually, 1900-1943
- 124. Par amount of offerings, classified by coupon rate and by major industry group, annually, 1900-1943
- 125. Par amount of offerings of large issues, classified by coupon rate, annually, 1900-1943

SPREAD BETWEEN GROSS AND NET PROCEEDS		228
126.	Number of offerings, classified by spread between gross and net proceeds, annually, 1900-1943	
127.	Par amount of offerings, classified by spread between gross and net proceeds and by major industry group, annually, 1900-1943	
128.	Par amount of offerings of large issues, classified by spread between gross and net proceeds, annually, 1900-1943	
DEFAULT STATUS AT EXTINGUISHMENT		234
129.	Number of offerings, classified by default status at extinguishment or 1944, annually, 1900-1943	
130.	Par amount of offerings, classified by default status at extinguishment or 1944, and by major industry group, annually, 1900-1943	
131.	Par amount of offerings of large issues, classified by default status at extinguishment or 1944, annually, 1900-1943	
132.	Number of final extinguishments, classified by default status at extinguishment, annually, 1900-1943	
133.	Par amount of final extinguishments, classified by default status at extinguishment and by major industry group, annually, 1900-1943	
134.	Par amount of final extinguishments of large issues, classified by default status at extinguishment, annually, 1900-1943	
III. CHARACTERISTICS OF DEFAULTED ISSUES		
Explanatory notes		247
Summary tables in other reports		
See <i>Volume of Financing</i> , Tables 19-22, 27, A-19, A-20, A-21, and A-25.		
COVERAGE		249
135.	Number of defaulted issues, classified by major industry group, size of issue, and year of default, 1900-1943	
136.	Par amount of defaulted issues, classified by major industry group, size of issue, and year of default, 1900-1943	
(See also <i>Volume of Financing</i> , Tables A-17 and A-18, and <i>Corporate Bond Quality</i> , Table 4; and further, in <i>Volume of Financing</i> , Tables A-2, A-6, A-7, and A-8.)		
AGENCY RATING		251
137.	Number of defaulted issues 1900-1943, classified by agency rating five years before default, size of issue, and selected periods of default	
138.	Par amount of defaulted issues 1900-1943, classified by agency rating five years before default, by size of issue, by major industry group for large issues, and by selected periods of default	
139.	Number of defaulted issues 1900-1943, classified by agency rating two years before default, size of issue, and selected periods of default	
140.	Par amount of defaulted issues 1900-1943, classified by agency rating two years before default, by size of issue, by major industry group for large issues, and by selected periods of default	
141.	Number of defaulted issues 1900-1943, classified by agency rating one year before default, size of issue, and selected periods of default	

142. Par amount of defaulted issues 1900-1943, classified by agency rating one year before default, by size of issue, by major industry group for large issues, and by selected periods of default

CURRENT YIELD

259

143. Number of defaulted issues 1900-1943, classified by current yield five years before default, size of issue, and selected periods of default
144. Par amount of defaulted issues 1900-1943, classified by current yield five years before default, by size of issue, by major industry group for large issues, and by selected periods of default
145. Number of defaulted issues 1900-1943, classified by current yield two years before default, size of issue, and selected periods of default
146. Par amount of defaulted issues 1900-1943, classified by current yield two years before default, by size of issue, by major industry group for large issues, and by selected periods of default
147. Number of defaulted issues 1900-1943, classified by current yield one year before default, size of issue, and selected periods of default
148. Par amount of defaulted issues 1900-1943, classified by current yield one year before default, by size of issue, by major industry group for large issues, and by selected periods of default

DEFAULT PRICE AND RECEIPTS AFTER DEFAULT

267

149. Number of defaulted issues 1900-1943, classified by market price at default, size of issue, and selected periods of default
150. Par amount of defaulted issues 1900-1943, classified by market price at default, by size of issue, by major industry group for large issues, and by selected periods of default
151. Number of defaulted issues 1900-1943, classified by value of receipts after default discounted at 3 percent, size of issue, and selected periods of default
152. Par amount of defaulted issues 1900-1943, classified by value of receipts after default discounted at 3 percent, by size of issue, by major industry group for large issues, and by selected periods of default
153. Number of defaulted issues 1900-1943, classified by value of receipts after default discounted at 6 percent, size of issue, and selected periods of default
154. Par amount of defaulted issues 1900-1943, classified by value of receipts after default discounted at 6 percent, by size of issue, by major industry group for large issues, and by selected periods of default
155. Number of defaulted issues 1900-1943, classified by the difference between price at default and receipts after default discounted at 3 percent, by size of issue, and by selected periods of default
156. Par amount of defaulted issues 1900-1943, classified by the difference between price at default and receipts after default discounted at 3 percent, by size of issue, by major industry group for large issues, and by selected periods of default
157. Number of defaulted issues 1900-1943, classified by the difference between price at default and receipts after default discounted at 6 percent, by size of issue, and by selected periods of default
158. Par amount of defaulted issues 1900-1943, classified by the difference between price at default and receipts after default discounted at 6 percent, by size of issue, by major industry group for large issues, and by selected periods of default

NUMBER OF YEARS FROM OFFERING TO DEFAULT AND DEFAULT TO SETTLEMENT	282
159. Number of defaulted issues 1900-1943, classified by number of years from offering to default, size of issue, and selected periods of default	
160. Par amount of defaulted issues 1900-1943, classified by number of years from offering to default, by size of issue, by major industry group for large issues, and by selected periods of default	
161. Number of defaulted issues 1900-1943, classified by number of years from default to settlement, size of issue, and selected periods of default	
162. Par amount of defaulted issues 1900-1943, classified by number of years from default to settlement, by size of issue, by major industry group for large issues, and by selected periods of default	
(See also <i>Volume of Financing</i> , Tables 23 and 24.)	
IV. MEASURES OF EXPERIENCE OVER CHRONOLOGICAL PERIODS	
Explanatory notes	288
Summary tables in other reports	
See <i>Corporate Bond Quality</i> , Tables 24 and 26; and further, Tables 9 and 25 therein.	
COVERAGE	291
163. Yields over four-year and longer periods of investment 1900-1943, classified by size of issue and major industry group, with number and par amount of issues in each class	
164. Number and par amount of issues outstanding quadrennially 1900-1943, classified by default and extinguishment status during four-year periods and by major industry group	
165. Number and par amount of large issues outstanding quadrennially 1900-1943, classified by default and extinguishment status during four-year periods	
(See also <i>Corporate Bond Quality</i> , Tables 5 and 23.)	
AGENCY RATING	298
166. Yields over four-year and longer periods of investment 1912-43, classified by agency rating at beginning of period, by size of issue, and by major industry group for large issues, with relevant par amounts	
167. Par amount of issues outstanding quadrennially 1912-43 and rated high and low by the agencies, classified by default and extinguishment status during four-year periods and by major industry group	
168. Par amount of large issues outstanding quadrennially 1912-43 and rated high and low by the agencies, classified by default and extinguishment status during four-year periods	
(See also <i>Corporate Bond Quality</i> , Tables 35, 36, 40, 71, 76, 78, and 80.)	
LEGAL STATUS	306
169. Yields over four-year and longer periods of investment 1912-43, classified by legal status in Maine, Massachusetts, and New York at beginning of period, by size of issue, and by major industry group for large issues, with relevant par amounts	
170. Yields over four-year and longer periods of investment 1916-43, classified by legal status in New York within agency rating, by size of issue, and by major industry group for large issues, with relevant par amounts	

171. Par amount of issues outstanding quadrennially 1912-43 and legal in Maine, Massachusetts, and New York, classified by default and extinguishment status during four-year periods and by major industry group
172. Par amount of large issues outstanding quadrennially 1912-43 and legal in Maine, Massachusetts, and New York, classified by default and extinguishment status during four-year periods
(See also *Corporate Bond Quality*, Tables 48, 52, 72, 77, 78, and 80.)
- MARKET RATING 328
173. Yields over four-year and longer periods of investment 1900-1943, classified by market rating at beginning of period, by size of issue and by major industry group for large issues, with relevant par amounts
174. Par amount of issues outstanding quadrennially 1900-1943 and rated high and low by the market, classified by default and extinguishment status during four-year periods and by major industry group
175. Par amount of large issues outstanding quadrennially 1900-1943 and rated high and low by the market, classified by default and extinguishment status during four-year periods
(See also *Corporate Bond Quality*, Tables 61, 62, 67, 71, 72, 76, and 77.)
- LIEN POSITION 340
176. Yields over four-year and longer periods of investment 1900-1943, classified by lien position at first offering, by size of issue, and by major industry group for large issues, with relevant par amounts
- AMOUNT OUTSTANDING 348
177. Yields over four-year and longer periods of investment 1900-1943, classified by amount outstanding at beginning of period, by size of issue, and by major industry group for large issues, with relevant par amounts
(See also *Corporate Bond Quality*, Tables 107 and 110.)
- ASSET SIZE OF OBLIGOR 355
178. Yields over four-year and longer periods of investment 1900-1943, classified by asset size of obligor at beginning of period, by size of issue, and by major industry group for large issues, with relevant par amounts
(See also *Corporate Bond Quality*, Tables 108 and 112.)
- TERM TO MATURITY 363
179. Yields over four-year and longer periods of investment 1900-1943, classified by term to maturity at beginning of period, by size of issue, and by major industry group for large issues, with relevant par amounts
- MINOR INDUSTRY 371
180. Yields over four-year and longer periods of investment 1900-1943, classified by minor industry at beginning of period, and by size of issue, with relevant par amounts

V. MEASURES OF EXPERIENCE FROM OFFERING TO EXTINGUISHMENT

Explanatory notes	380
Summary tables in other reports	
<i>See Corporate Bond Quality, Table 1.</i>	
 COVERAGE	 382
181. Par amount of offerings in the universe from which the offerings experience sample was drawn, classified by major industry group for large and small issues and by selected periods of offering and extinguishment, 1900-1943, for all offerings and for regular offerings	
182. Life-span yields 1900-1943, classified by major industry group for large and small issues, and by selected periods of offering and extinguishment for all offerings, regular offerings, and irregular offerings, with number and par amount of offerings in each class	
<i>(See also Corporate Bond Quality, Tables 3 and 6.)</i>	
 DEFAULT STATUS AND METHOD OF EXTINGUISHMENT	 389
183. Life-span yields on regular offerings 1900-1943, classified by default status and method of extinguishment, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts	
<i>(See also Corporate Bond Quality, Tables 6, 10-13, and 17-19.)</i>	
 AGENCY RATING	 394
184. Life-span yields on all offerings 1900-1943, classified by agency rating at offering, with relevant par amounts (for large and small issues by major industry group)	
185. Life-span yields on regular offerings 1900-1943, classified by agency rating at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts	
186. Default rates on regular offerings 1900-1943, classified by agency rating at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment	
<i>(See also Corporate Bond Quality, Tables 33, 34, 39, 73, 74, and 79.)</i>	
 LEGAL STATUS	 402
187. Life-span yields on all offerings 1900-1943, classified by legal status in Maine, Massachusetts, and New York at offering, with relevant par amounts (for large and small issues by major industry group)	
188. Life-span yields on regular offerings 1900-1943, classified by legal status in Maine, Massachusetts, and New York at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts	
189. Default rates on regular offerings 1900-1943, classified by legal status in Maine, Massachusetts, and New York at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment	
<i>(See also Corporate Bond Quality, Tables 47, 51, 73, 75, and 79.)</i>	

MARKET RATING	410
190. Life-span yields on all offerings 1900-1943, classified by market rating at offering, with relevant par amounts (for large and small issues by major industry group)	
191. Life-span yields on regular offerings 1900-1943, classified by market rating at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts	
192. Default rates on regular offerings 1900-1943, classified by market rating at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment (See also <i>Corporate Bond Quality</i> , Tables 60, 65, 66, and 73-75.)	
TIMES-CHARGES-EARNED RATIO	418
193. Life-span yields on all offerings 1900-1943, classified by times-charges-earned ratio at offering, with relevant par amounts (for large and small issues by major industry group)	
194. Life-span yields on regular offerings 1900-1943, classified by times-charges-earned ratio at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts	
195. Default rates on regular offerings 1900-1943, classified by times-charges-earned ratio at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment (See also <i>Corporate Bond Quality</i> , Tables 84, 86, 89, and 94.)	
RATIO OF NET INCOME TO GROSS INCOME	426
196. Life-span yields on all offerings 1900-1943, classified by ratio of net income to gross income at offering, with relevant par amounts (for large and small issues by major industry group)	
197. Life-span yields on regular offerings 1900-1943, classified by ratio of net income to gross income at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts	
198. Default rates on regular offerings 1900-1943, classified by ratio of net income to gross income at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment (See also <i>Corporate Bond Quality</i> , Tables 85, 86, 90, and 95.)	
LIEN POSITION	434
199. Life-span yields on all offerings 1900-1943, classified by lien position at offering, with relevant par amounts (for large and small issues by major industry group)	
200. Life-span yields on regular offerings 1900-1943, classified by lien position at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts	
201. Default rates on regular offerings 1900-1943, classified by lien position at offering, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment (See also <i>Corporate Bond Quality</i> , Tables 93-95, and 98.)	
SIZE OF ISSUE	442
202. Life-span yields on all offerings 1900-1943, classified by size of issue, with relevant par amounts (by major industry group)	

203. Life-span yields on regular offerings 1900-1943, classified by size of issue, major industry group, and selected periods of offering and extinguishment, with relevant par amounts
204. Default rates on regular offerings 1900-1943, classified by size of issue, major industry group, and selected periods of offering and extinguishment
(See also *Corporate Bond Quality*, Tables 105 and 109.)

ASSET SIZE OF OBLIGOR

449

205. Life-span yields on all offerings 1900-1943, classified by asset size of obligor at offering, with relevant par amounts (for large and small issues by major industry group)
206. Life-span yields on regular offerings 1900-1943, classified by asset size of obligor at offering, by size of issue, by major industry group, and by selected periods of offering and extinguishment, with relevant par amounts
207. Default rates on regular offerings 1900-1943, classified by asset size of obligor at offering, by size of issue, by major industry group, and by selected periods of offering and extinguishment
(See also *Corporate Bond Quality*, Tables 106 and 111.)

TERM TO MATURITY

460

208. Life-span yields on all offerings 1900-1943, classified by term to maturity, with relevant par amounts (for large and small issues by major industry group)
209. Life-span yields on regular offerings 1900-1943, classified by term to maturity, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts
210. Default rates on regular offerings 1900-1943, classified by term to maturity, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment

MINOR INDUSTRY

465

211. Life-span yields on all offerings 1900-1943, classified by minor industry, with relevant par amounts (for large and small issues)
212. Life-span yields on regular offerings 1900-1943, classified by minor industry, by size of issue, and by selected periods of offering and extinguishment, with relevant par amounts
213. Default rates on regular offerings 1900-1943, classified by minor industry, by size of issue, and by selected periods of offering and extinguishment
(See also *Corporate Bond Quality*, Tables 14-16.)

SINKING FUND PROVISIONS

475

214. Life-span yields on all offerings 1900-1943, classified by sinking fund provisions, with relevant par amounts (for large and small issues by major industry group)
215. Life-span yields on regular offerings 1900-1943, classified by sinking fund provisions, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment, with relevant par amounts
216. Default rates on regular offerings 1900-1943, classified by sinking fund provisions, by size of issue, by major industry group for large issues, and by selected periods of offering and extinguishment

VI. MEASURES OF EXPERIENCE ON DEFAULTED ISSUES

Explanatory notes 483

Summary tables in other reports

See *Corporate Bond Quality*, Table 2.

COVERAGE

See Tables 135 and 136 herein, and the table in the explanatory notes of this section, also, in *Volume of Financing*, Table A-18, and in *Corporate Bond Quality*, Tables 4 and 20-22.

AGENCY RATING 486

217. Yields up to default and over life span of defaulted issues, classified by agency rating at offering, by size of issue, by major industry group for large issues, and by selected periods of offering, 1900-1943, with number of issues in each class
218. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by agency rating five years before default, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class
219. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by agency rating two years before default, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class
220. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by agency rating one year before default, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class
(See also *Corporate Bond Quality*, Tables 37 and 38.)

LEGAL STATUS

See *Corporate Bond Quality*, Tables 49 and 50.

MARKET RATING AND CURRENT YIELD 505

221. Yields up to default and over life span of defaulted issues, classified by market rating at offering, by size of issue, by major industry group for large issues, and by selected periods of offering, 1900-1943, with number of issues in each class
222. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by current yield five years before default, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class
223. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by current yield two years before default, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class
224. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by current yield one year before default, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class
(See also *Corporate Bond Quality*, Tables 63 and 64.)

TIMES-CHARGES-EARNED RATIO

See *Corporate Bond Quality*, Tables 87 and 88.

RATIO OF NET INCOME TO GROSS INCOME

See *Corporate Bond Quality*, Tables 87 and 88.

LIEN POSITION

525

225. Yields up to default and over life span of defaulted issues, classified by lien position at offering, by size of issue, by major industry group for large issues, and by selected periods of offering, 1900-1943, with number of issues in each class

226. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by lien position at offering, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class

(See also *Corporate Bond Quality*, Tables 96 and 97.)

ASSET SIZE OF OBLIGOR

535

227. Yields up to default and over life span of defaulted issues, classified by asset size of obligor at default, by size of issue, by major industry group for large issues, and by selected periods of offering, 1900-1943, with number of issues in each class

228. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by asset size of obligor at default, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class

NATURE OF DEFAULT AND SETTLEMENT

545

229. Yields up to default and over life span of defaulted issues, classified by nature of default and settlement, by size of issue, by major industry group for large issues, and by selected periods of offering, 1900-1943, with number of issues in each class

230. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by nature of default and settlement, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class

NUMBER OF YEARS FROM OFFERING TO DEFAULT
AND DEFAULT TO SETTLEMENT

555

231. Yields up to default and over life span of defaulted issues, classified by number of years from offering to default and default to settlement, by size of issue, by major industry group for large issues, and by selected periods of offering, 1900-1943, with number of issues in each class

232. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by number of years from offering to default and default to settlement, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class

NUMBER OF YEARS FROM DEFAULT TO EXTINGUISHMENT

565

233. Market prices at default, discounted values of receipts after default, and realized yields after default, classified by number of years from default to extinguishment, by size of issue, by major industry group for large issues, and by selected periods of default, 1900-1943, with number of issues in each class
