Source: All data are based on Federal Housing Administration summary records except the breakdown of notes payable to banks and others (lines 11 and 12). This breakdown for the years 1952 through 1955 is based on the relationship indicated in the special survey of mortgage companies. For years prior to 1952, the breakdown is assumed to be about the same as in 1952; the assumption is based on general knowledge that the bulk of mortgage company borrowing has always been from commercial banks.

No breakdown is shown for mortgage and construction loans because data available from FHA and from the special survey were not considered good enough to be shown separately by asset size of company.

^aLess than 100 per cent because percentages for each of the 30 states available are based on total mortgage recordings for the country as a whole.

^bNot available.

^cLess than 0.05 per cent.

Data for mortgage companies refer to 1954 and are from records of the Federal Housing Administration.

For FHA and VA loans, data are based on cumulative totals of loan volume from the beginning of each program through 1952. Column 2 is derived from cols. 3 and 4, which are from *VA Loan Guaranty*, December 1954, p. 59, and the 8th Annual Report of the Housing and Home Finance Agency, December 31, 1954, p. 137.

Nonfarm mortgage recordings during 1954 are from *Source Book, Savings and Home Financing, 1955*, Federal Home Loan Bank Board, p. 32.
