## PUBLICATIONS OF RUSSELL SAGE FOUNDATION

*Russell Sage Foundation was established in 1907 by Mrs. Russell Sage for the improvement of social and living conditions in the United States. In carrying out its purpose the Foundation conducts research under the direction of members of the staff or in close collaboration with other institutions, and supports programs designed to improve the utilization of social science knowledge. As an integral part of its operations, the Foundation from time to time publishes books or pamphlets resulting from these activities. Publication under the imprint of the Foundation does not necessarily imply agreement by the Foundation, its Trustees, or its staff with the interpretations or conclusions of the authors.*

RELATION OF THE DIRECTORS  
TO THE WORK AND PUBLICATIONS  
OF THE NATIONAL BUREAU OF ECONOMIC RESEARCH

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. The President of the National Bureau shall submit to the Board of Directors, or to its Executive Committee, for their formal adoption all specific proposals for research to be instituted.

3. No research report shall be published until the President shall have submitted to each member of the Board the manuscript proposed for publication, and such information as will, in his opinion and in the opinion of the author, serve to determine the suitability of the report for publication in accordance with the principles of the National Bureau. Each manuscript shall contain a summary drawing attention to the nature and treatment of the problem studied, the character of the data and their utilization in the report, and the main conclusions reached.

4. For each manuscript so submitted, a special committee of the Board shall be appointed by majority agreement of the President and Vice Presidents (or by the Executive Committee in case of inability to decide on the part of the President and Vice Presidents), consisting of three directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the manuscript is submitted to him. It shall be the duty of each member of the special manuscript committee to read the manuscript. If each member of the manuscript committee signifies his approval within thirty days of the transmittal of the manuscript, the report may be published. If at the end of that period any member of the manuscript committee withholds his approval, the President shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty days additional shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board who shall have voted on the proposal within the time fixed for the receipt of votes shall have approved.

5. No manuscript may be published, though approved by each member of the special manuscript committee, until forty-five days have elapsed from the transmittal of the report in manuscript form. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general or the special committee have passed on its validity in every detail.

6. Publications of the National Bureau issued for informational purposes concerning the work of the Bureau and its staff, or issued to inform the public of activities of Bureau staff, and volumes issued as a result of various conferences involving the National Bureau shall contain a specific disclaimer noting that such publication has not passed through the normal review procedures required in this resolution. The Executive Committee of the Board is charged with review of all such publications from time to time to ensure that they do not take on the character of formal research reports of the National Bureau, requiring formal Board approval.

7. Unless otherwise determined by the Board or exempted by the terms of paragraph 6, a copy of this resolution shall be printed in each National Bureau publication.

*(Resolution adopted October 25, 1926 and revised February 6, 1933,  
February 24, 1941, and April 20, 1968)*

## ADVISORY COMMITTEE ON THE PHILANTHROPY STUDY

In the planning and review of its studies of the role of philanthropy in the American economy, the National Bureau has benefited from the advice and guidance of this committee. The committee's concurrence with the views expressed in this report, however, is not to be assumed. The members of the committee are:

F. Emerson Andrews, *Foundation Library Center, retired*  
Gary S. Becker, *Columbia University*  
Merle Curti, *University of Wisconsin*  
Richard Eells, *Columbia University*  
Lyman Ford, *United Community Funds and Councils of America*

## **ACKNOWLEDGMENTS**

THIS STUDY represents part of the research on the role of philanthropy in the American economy conducted by the National Bureau of Economic Research under a grant from Russell Sage Foundation. This support, reflecting the Foundation's long standing interest in improving our knowledge about, and the effectiveness of, private philanthropy, is most gratefully acknowledged.

The research has benefited from the assistance of a number of persons. In the early stages of the study discussions with the late Frank G. Dickinson, with whom responsibility for the over-all project was divided, helped to lay the groundwork for the research plan. At various stages Natalie Naylor, Rosanne Cole, and Cynthia Norris served as capable research assistants. The editorial skills of Joan Tron added much to the style and clarity of the manuscript. The craftsmanship of H. Irving Forman is apparent in the charts.

The manuscript received very thorough readings from the staff reading committee of Solomon Fabricant and Jacob Mincer. Their comments led to improvements ranging over the whole work. Fabricant read the whole manuscript in several of its revisions. His sustained involvement and interest led me to re-evaluate, and frequently change, its organization and a number of basic conceptual treatments. The result, thanks to him, is one in which I feel much more satisfaction. Mincer and Yoel Haitovsky were of particular assistance in the design and interpretation of the statistical analysis.

Thanks are due the members of the National Bureau's Directors Reading Committee, Erwin D. Canham, Crawford H. Greenewalt, and Willard L. Thorp. Mr. Thorp gave the manuscript a very thorough reading, as did F. Emerson Andrews, Foundation Library Center (*retired*) and John H. Watson III, National Industrial Conference Board. Their penetrating comments, covering every part of the study, added much to its precision and balance.

Thanks are due the research directors of the National Bureau for their forbearance at interruptions in the progress of the study. This was particularly manifest midway in the research when I was generously permitted to postpone work on the Bureau project to undertake and complete a Russell Sage Foundation study of the investment policies of foundations.

A final word of thanks is due my wife, Ann, for her encouragement, patience, and, perhaps most important of all in the uncertain business of research, a much valued sense of perspective.
