## APPENDIX B

### OECD EXPORTS, 1953-64

#### General Note

This appendix contains information on the value of exports by OECD countries in each of the SITC three-digit commodity groups covered in the study and some of the more important four-digit subgroups. The time span differs from one commodity to another, depending on the availability of data and the consistency of commodity classifications over time.

The U.S. export figures for 1962-64 were taken from the previously mentioned unpublished tabulations of the U.S. Department of Commerce (see Appendix A). Those for earlier years were calculated by adding up data for the Schedule B numbers included in the revised tabulations, matched as closely as possible with the 1962-64 classification, in an attempt to achieve comparability in coverage with later years. The earlier-year figures do not, however, represent revisions in the data for individual Schedule B categories, which were included in the later-year ones. The U.S. export data on a Schedule B classification were taken from *United States Exports of Domestic and Foreign Merchandise: Commodity by Country of Destination*, U.S. Dept. of Commerce, Report FT 410, Part II, for 1953, 1957, and 1961. In groups where the revised tabulations were little different from the published ones, some use was made of the sources cited below for other OECD countries.

Japanese data for 1964 were taken from *Trade by Commodities*, OECD Statistical Bulletin, Series C, 1964, Vol. I. Those for 1963 were from the sources mentioned in Appendix A and those for 1962, 1961, 1957, and 1953 from *Commodity Trade Statistics*, United Nations.

For other OECD countries, the 1961-64 data were from various annual volumes of *Trade by Commodities*, Series C, and the 1957

figures were from the OEEC *Trade by Commodity*, Series III, 1957–58, and *Foreign Trade of Selected Commodities*, Series III, 1953, 1954. These figures were supplemented in some cases by information from various issues of *Commodity Trade Statistics*, United Nations.

The basic data for 1953 and 1957 were published in the old SITC classification. We translated these into the new classification but some incomparabilities could not be eliminated.

Note: The data for the Netherlands reported by the OECD in 1961 and 1962 were apparently incomplete, and totals from *Commodity Trade Statistics* for these years were substituted for them. However, the subgroup breakdown for the Netherlands in *Commodity Trade Statistics* was inconsistent from year to year and reported incorrectly at least in 1962. It is clear from the Netherlands trade publications that SITC 724.1 and 724.2 cannot be separated; we have put the combination consistently under SITC 724.2 and left the rest of SITC 724 under 724.9 (*Maandstatistiek van de in-, uit- en doorvoer per goederensoort*, Centraal Bureau voor de Statistiek, 1962, 1963, 1964 annuals).

*Notes to Table B.53*

<sup>a</sup>Excluding Switzerland and Spain (1961 exports of \$5 million and \$7 million, respectively).

<sup>b</sup>The data include SITC 732.1, passenger motor cars (other than buses or special vehicles) whether or not assembled, and 732.6 chassis for 732.1 vehicles with mounted engines. These two categories were combined because separate data for the United States were not available for SITC 732.6. The U.S. data for 1953 and 1957 are incomplete because numbers 79073 and 79078 of Schedule B were not available for these two years.

<sup>c</sup>Excluding Switzerland and Spain (1961 exports of \$0.4 million and \$0.5 million, respectively); Ireland not available.

<sup>d</sup>These categories were combined because separate data were not available for 732.2, 732.3, 732.4 and 732.5 before 1961 and because the United States reported chassis with engines mounted, other than for passenger cars (732.7), in the corresponding vehicle category.

<sup>e</sup>Switzerland, Iceland, and Ireland not available.

<sup>f</sup>Excluding Spain (1961 exports, \$0.4 million) and Switzerland (1963 exports, \$0.3 million).

<sup>g</sup>These figures are not completely comparable with those for later years because Schedule B, 79277, was not available.

<sup>h</sup>Includes SITC 732.9 except in the case of the United States.

<sup>a</sup>U.S. exports, 1962-64, are from unpublished tabulations of the U.S. Department of Commerce, and include corrections of major errors in previously published data (see Note to Table A.7). These corrections have been carried back, as far as possible, to 1953, using the detailed U.S. export statistics in the FT 410 series of the Department of Commerce. Engine parts were not distinguished in the 1953 figures, and we estimated them by assuming they bore the same ratio to total exports of aircraft and parts as in 1957.

<sup>b</sup>Excluding Switzerland (1961 exports, \$3 million) and Spain (1961 exports negligible, \$94,000).

<sup>c</sup>Less than \$500,000.

*Notes to Table B.56*

<sup>a</sup>The 1961 U.S. export data are not entirely comparable to those of later years because Schedule B, 79555, warships, was not available in the Department of Commerce FT 410 report. This item was taken from *Foreign Commerce and Navigation of the United States, 1946-1963*, U.S. Dept. of Commerce, 1965 (SITC 735, special categories).

<sup>b</sup>Excluding Switzerland (1961 exports, less than \$0.5 million) and Spain (1961 exports, \$2 million).
