* On leave.

Relation of the Directors to the Work and Publications of the National Bureau of Economic Research

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. The President of the National Bureau shall submit to the Board of Directors, or to its Executive Committee, for their formal adoption all specific proposals for research to be instituted.

3. No research report shall be published until the President shall have submitted to each member of the Board the manuscript proposed for publication, and such information as will, in his opinion and in the opinion of the author, serve to determine the suitability of the report for publication in accordance with the principles of the National Bureau. Each manuscript shall contain a summary drawing attention to the nature and treatment of the problem studied, the character of the data and their utilization in the report, and the main conclusions reached.

4. For each manuscript so submitted, a special committee of the Board shall be appointed by majority agreement of the President and Vice Presidents (or by the Executive Committee in case of inability to decide on the part of the President and Vice Presidents), consisting of three directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the manuscript is submitted to him. It shall be the duty of each member of the special manuscript committee to read the manuscript. If each member of the manuscript committee signifies his approval within thirty days of the transmittal of the manuscript, the report may be published. If at the end of that period any member of the manuscript committee withholds his approval, the President shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty days additional shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board who shall have voted on the proposal within the time fixed for the receipt of votes shall have approved.

5. No manuscript may be published, though approved by each member of the special manuscript committee, until forty-five days have elapsed from the transmittal of the report in manuscript form. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general or the special committee have passed on its validity in every detail.

6. Publications of the National Bureau issued for informational purposes concerning the work of the Bureau and its staff, or issued to inform the public of activities of Bureau staff, and volumes issued as a result of various conferences involving the National Bureau shall contain a specific disclaimer noting that such publication has not passed through the normal review procedures required in this resolution. The Executive Committee of the Board is charged with review of all such publications from time to time to ensure that they do not take on the character of formal research reports of the National Bureau, requiring formal Board approval.

7. Unless otherwise determined by the Board or exempted by the terms of paragraph 6, a copy of this resolution shall be printed in each National Bureau publication.

*(Resolution adopted October 25, 1926, and revised February 6, 1933,
February 24, 1941, and April 20, 1968)*

This report is one of a series emerging from an investigation of interest rates made possible by a grant to the National Bureau from the Life Insurance Association of America. The Association is not, however, responsible for any of the statements made or views expressed.

Advisory Committee on the Interest Rates Study

In the planning and review of its studies of interest rates, the National Bureau has benefited from the advice and guidance of this committee. The committee's concurrence with the views expressed in this report, however, is not to be assumed. The members of the committee are:

- W. Braddock Hickman (chairman), *Federal Reserve Bank of Cleveland*
Julian D. Anthony, *Hartford Life Insurance Company*
Daniel H. Brill, *Commercial Credit Company*
Lester V. Chandler, *Princeton University*
W. A. Clarke,* *W. A. Clarke Mortgage Company*
George T. Conklin, Jr.,
The Guardian Life Insurance Company of America
Milton Friedman, *The University of Chicago*
Raymond W. Goldsmith, *Yale University*
Sidney Homer, *Salomon Brothers & Hutzler*
Norris O. Johnson, *formerly of First National City Bank of New York*
Robert G. Link, *Federal Reserve Bank of New York*
Roger F. Murray, *Teachers Insurance and Annuity Association*
James J. O'Leary, *United States Trust Company of New York*
Roy L. Reiersen, *Bankers Trust Company*
Eli Shapiro, *Harvard University*
Henry C. Wallich, *Yale University*
Kenneth M. Wright, *Life Insurance Association of America*
C. Richard Youngdahl, *Aubrey G. Lanston & Co., Inc.*

* W. A. Clarke was a member of the Committee until his death on February 8, 1965.

Table of Contents

Acknowledgments

PART I

1. Purpose, Scope, and Findings	3
Need for Data	3
The New Data and Other Series	4
Data-collecting and Data-using	10
Summary of Major Findings	11
2. The New Series	17
Historical Versus Current Series	17
General Procedure in Compiling the New Series	18
Reliability of the Series	19
Representativeness of the Series	20
Homogeneity of the Series over Time	22
Methods of Loan Acquisition	26
Timing of the Series	27
The Concept of Effective Yield	28
3. The Behavior of Mortgage Yields and Bond Yields	31
Cyclical Amplitude	31
Timing at Turning Points	44
Longer-run Changes and the 1961-66 Experience	50
4. The Behavior of Yields and Terms on Conventional, FHA and VA Mortgages	63
Relationship Between FHA and Conventional Yields: The Influence of Risk and Lender Preference	63
Relationship Between FHA and VA Yields: The Influence of Contract Rate	70
Relationship Between Direct, Correspondent and Secondary Market Yields: The Influence of Market Organization	82
Changes in Loan-Value Ratios and Maturities	85

PART II

5. Large Life Insurance Companies in the National Mortgage Market	101
Large Life Insurance Companies as National Lenders	101
Instruments in the National Market	105

Implications for Mortgage-yield Structure	111
Implications for Yield Series	116
6. Method of Loan Acquisition	119
Relationship of Life Insurance Company to Correspondent	119
Variability in Service Fees as an Influence on Gross Yield	122
Comparability of Gross Yield on Correspondent and Direct Loans	124
7. The Timing Problem	129
Meaning of Transaction Date	129
Implications of Commitments Not Taken Down	130
Significance of the Date of Approval of the Mortgagor's Loan Application	131
Timing of Authorization and Disbursement Series	132
Residual Lag in Authorization Series	135
8. The Effective Yield Concept	143
Fees and Charges	144
The Prepayment Assumption	147
The Computation of Effective Yield	155
Appendix: Types of Fees and Charges on Direct Loans	157
9. Reliability and Limitations of the Data	161
Comparison with Benchmarks	161
Comparison of Sample Yields Covering One Company with Yields on All Loans by that Company	164
Comparison with FHLBB Series	168
Comparison with FHA Secondary Market Series	173

APPENDIXES

Appendix A. The Mechanics of Data Collection	189
Selection of Companies	189
Selection of Data	191
Recording and Checking Data	191
Census Spot Checks	192
Sampling Procedure	193
Tabulation Program	198
Weighting	198
Classification of Property Location	199
Loan Coverage	202
Special Problems in Connection with the VA Loan Series	205
Incomplete Data on Fees and Charges	205
Appendix B. Cross-Section Analysis of Loans by Life Insurance Companies in the Time Series	207
Appendix C. Data	221

INDEX

Tables

1-1. Summary of Principal Features of Various Statistical Series on Residential Mortgage Rates and Terms	6
2-1. Characteristics of Conventional First-Mortgage Loans in Eighteen Metropolitan Areas Approved by Major Lender Groups, May–December 1963	21
2-2. Cyclical Changes in Conventional Mortgage Yields With Actual and Fixed Weights, 1951–63	24
2-3. Effect on Conventional Yield of Changes in Loan Characteristics Between 1951 and 1963, Using June 1953 Regression Weights	25
3-1. Changes in Yields During Specific Cycles, Selected Series	32
3-2. Changes in Maturities and Loan-Value Ratios During Periods of Cyclical Rise and Decline in Mortgage Yields, 1953–63	38
3-3. Comparison of Yield Differentials at Reference Cycle Peaks and Troughs	41
3-4. Yield Differential Between Baa and Aaa Bonds and Between Conventional and FHA Mortgages During Business Expansions and Recessions	42
3-5. Lag at Turning Points, Conventional Mortgage Yields Relative to Bond Yields	45
3-6. Changes in Yields on Direct Mortgage Loans and on Bonds Following Turning Points in U.S. Government Bond Yields	46
3-7. Cyclical Turning Points in Loan-Value Ratios and Maturities Corresponding to Turning Points in Yields	48
3-8. Leads and Lags of Loan-Value Ratios, Maturities, and Fees and Changes Relative to Contract Rate at the 1965 Trough, and 1966–67 Peak in Contract Rates in Ten Conventional Home Loan Series	49
3-9. Yield Differentials Between Conventional Mortgages and Bonds, at Cyclical Peaks and Troughs	52
3-10. Measures of Change in Bank Liability Structure During Cycles in Mortgage Interest Rates, 1953–66	55
3-11. Changes in Real Estate Loans and in State and Local Securities of 416 Member Banks, Related to Changes in Deposits, December 1960 to June 1964	56
3-12. Changes in Holdings of One- to Four-Family Mortgages and in Time and Savings Deposits by Commercial Banks and Savings Institutions During Cycles in Mortgage Interest Rates, 1953–66	59
Appendix Table 3-1. Yields on Bonds and Mortgages at Reference Cycle Peaks and Troughs	61
Appendix Table 3-2. Conventional Mortgage Yields on One- to Four-Family Properties Authorized by Life Insurance Companies, 1948–67	62

4-1. Gross Yields on FHA and Conventional Mortgages at Specific Cycle Peaks and Troughs	66
4-2. Yields on FHA and Conventional Home Mortgages in Selected States, 1958 and 1960	69
4-3. Discounts on FHA as Compared to VA Mortgages During Periods of Equal Maximum Contract Rate	71
4-4. Premiums and Yields on Mortgages Authorized by Life Insurance Companies, January 1949–April 1950 and January, 1951–April 1952	75
4-5. Discounts on FHA and VA Mortgages as Reported in NBER and FNMA Series, Selected Periods	77
4-6. Gross Yields on FHA and VA Mortgages as Reported in NBER and FNMA Series, Selected Periods	78
4-7. Prices and Yields on Current and “Old” FHA and VA Home Mortgages, Selected Periods	80
4-8. Lead of Direct Over Correspondent Loans	83
4-9. Turning Points in Effective Yield on FHA Home Mortgages; Secondary Market and Authorization Series, 1951–63	86
4-10. Changes in Yields on FHA Authorization Series Covering Direct and Correspondent Loans, and on FHA Secondary Market Series Following Turning Points in U.S. Government Bond Yields	87
4-11. Average Maturities and Loan-Value Ratios in 1951 and 1963, Life Insurance Companies and All Lenders	89
4-12. Changes in Maturities and Loan-Value Ratios on All Mortgages During Periods of Cyclical Rise and Decline in Mortgage Yields, 1953–63	96
Appendix Table 4-1. Yields on Bonds and Mortgages at Reference Cycle Peaks and Troughs	97
5-1. Distribution of Conventional Mortgage Loans on One-Family Homes Approved by National and Local Lenders in 1961	102
5-2. First-Mortgage Loans on One-Family Homeowner Mortgaged Properties in 1960, by Type of Holder	104
5-3. First-Mortgage Loans on One-Family Homeowner Mortgaged Properties in Selected Metropolitan Areas in 1960	105
5-4. First-Mortgage Loans on One-Family Homeowner Mortgaged Properties in 1960: Per Cent Held Inside Metropolitan Areas and Per Cent Secured by New Properties, by Type of Holder	107
5-5. Per Cent of Outstanding Loans on One- to Four-Family Properties Federally Underwritten, Selected Years	108
5-6. Selected Characteristics of Conventional First Mortgages on One-Family Homeowner Mortgaged Properties, by Type of Lender, 1960	110
5-7. Differences in Gross Yield Between Life Insurance Companies and Other Major Institutional Lenders on Conventional First-Mortgage Loans Approved During May–December 1963	112
5-8. Variability in Gross Yield on Conventional First Mortgages Approved During May–December 1963, by Type of Lender	114
5-9. Differences in Gross Yield Between Company 4 and Company 6, Quarterly, 1951–63	117
6-1. Gross Effective Yield and Service Fee on Conventional Mortgages in California by One Life Insurance Company, February 1960	123

TABLES

xiii

7-1. Turning Points in Effective Yield: Authorization and Disbursement Series of One Company	137
7-2. Cyclical Amplitude of Effective Yield in Authorization and Disbursement Series of One Company	138
7-3. Distributions of Loans in Samples Drawn from Participating Companies by Number of Days Between Finance Committee Meeting Date and Earlier Stages of the Loan Transaction	139
8-1. Effective Yield on 6 Per Cent Contract Rate Mortgages Using Average Life and Distribution of Lives, at Varying Maturities and Discounts	149
8-2. Estimated Life Expectancy of FHA and VA Mortgages, by Maturity	150
8-3. Differences in Effective Yield Between Yield Book and Formula	155
8-4. Deviation in Effective Yield Between Values Calculated in Program and Values Obtained from Yield Book, U.S. Averages for FHA and VA Mortgages, 1951-63	156
9-1. Distribution of Ratios to Standard Errors of Differences Between Census and Sample Values for Selected Loan Items, February 1960 and June 1963 Combined	162
9-2. Comparison of Gross Yield from Census and Sample, by Type of Mortgage and Company	163
9-3. Frequency Distribution of Monthly Differences in Net Effective Yield Between NBER Sample Series and Company Universe Series for One Company, 1954-63	167
9-4. Characteristics of Conventional Loans Authorized by Life Insurance Companies in 1963, NBER and FHLBB Series	170
9-5. Characteristics of Conventional Loans Authorized by Life Insurance Companies, NBER and FHLBB Series, 1963 Annual Averages	172
Appendix Table 9-1. Sample and Total Loans Authorized by Each of Four Life Insurance Companies in February 1960: Comparison of Selected Items, Total United States	178

Acknowledgments

A large number of people have contributed to this study at various stages. A committee consisting of William H. Brown, Jr., Gerhard Bry, William A. Clarke, Joseph W. Conard, George T. Conklin, Jr., Saul Klamman, Jacob Mincer, Geoffrey H. Moore, and James J. O'Leary helped plan the general design of the study. Joseph Conard and James J. O'Leary provided particularly valuable counsel and assistance in the early stages. Among the many university students who helped compile and process data at the participating companies, Herbert Grossman, Jacob DeRooy and William Stellenwerf were particularly helpful. Invaluable technical assistance on many phases was freely given by many mortgage loan specialists at life insurance companies. Fred Avril, J. J. Carney, Lawrence Cortelyou, Thomas J. Maconkey, and Peter Samuelsen saved us from grievous error on numerous occasions. The IBM Corporation was particularly generous in giving us computer time. Most of the programming was done by Juanita Johnson with the assistance of Martha Jones, while Gerhard Bry and Charlotte Boschan counseled us on special programming problems. Extensive clerical operations with the final data were supervised with great skill and dedication by Irene Sampson. H. Irving Forman drew the charts. The manuscript was skillfully edited by Gnomi Schrift Gouldin, who also saw it through production. A committee consisting of Phillip Cagan, Avery Cohan, Robert Moore Fisher, Manuel Gottlieb, and Richard Selden read an early version and made valuable suggestions for revision. Finally, we would like to thank Harold G. Halcrow, Wallace J. Campbell and Willis J. Winn of the NBER Board of Directors reading committee.
