

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Output and Productivity in the Electric and Gas Utilities, 1899-1942

Volume Author/Editor: Gould, Jacob Martin

Volume Publisher: UMI

Volume ISBN: 0-87014-046-9

Volume URL: <http://www.nber.org/books/goul46-1>

Publication Date: 1946

Chapter Title: Front matter to "Output and Productivity in the Electric and Gas Utilities, 1899-1942"

Chapter Author: Jacob Martin Gould

Chapter URL: <http://www.nber.org/chapters/c4270>

Chapter pages in book: (p. -13 - 0)

Output and Productivity
in the
Electric and Gas Utilities
1899-1942

Director's Note

This report is the tenth dealing with the production, employment, and productivity in American industry since the beginning of the twentieth century. The four volumes previously published are *The Output of Manufacturing Industries, 1899-1937*, by Solomon Fabricant (1940); *Employment in Manufacturing, 1899-1939: An Analysis of Its Relation to the Volume of Production*, by Solomon Fabricant (1942); *American Agriculture, 1899-1939: A Study of Output, Employment and Productivity*, by Harold Barger and Hans H. Landsberg (1942); and *The Mining Industries, 1899-1939: A Study of Output, Employment and Productivity*, by Harold Barger and S. H. Schurr (1944).

The five *Occasional Papers* are Manufacturing Output, 1929-1937 (1940), The Relation Between Factory Employment and Output Since 1899 (1941), Productivity of Labor in Peace and War (1942), and Labor Savings in American Industry, 1899-1939 (1945) by Solomon Fabricant; and Domestic Servants in the United States, 1900-1940 (1946) by George J. Stigler.

The study upon which this volume is based was made possible by funds granted by The Maurice and Laura Falk Foundation of Pittsburgh. The Falk Foundation is not, however, the author, publisher or proprietor of this publication, and is not to be understood as approving or disapproving by virtue of its grant any of the statements made or views expressed therein.

LEO WOLMAN

*Relation of the Directors to the Work and Publications
of the
National Bureau of Economic Research*

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No report shall be published until the Director or Directors of Research shall have submitted to the Board a summary drawing attention to the character of the data and their utilization in the report, the nature and treatment of the problems involved, the main conclusions and such other information as in their opinion would serve to determine the suitability of the report for publication in accordance with the principles of the Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. For each manuscript to be so submitted a special committee shall be appointed by the President, or at his designation by the Executive Director, consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the summary and report described in paragraph (4) are sent to him. It shall be the duty of each member of the committee to read the manuscript. If each member of the special committee signifies his approval within thirty days, the manuscript may be published. If each member of the special committee has not signified his approval within thirty days of the transmittal of the report and manuscript, the Director of Research shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty additional days shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board and a two-thirds majority of those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed shall have approved.

6. No manuscript may be published, though approved by each member of the special committee, until forty-five days have elapsed from the transmittal of the summary and report. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general, or of the special committee, have passed upon its validity in every detail.

7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every National Bureau Book.

(Resolution adopted October 25, 1928 and revised February 6, 1933 and February 24, 1941)

31	Manufactured Gas, Census Data, 1899-1935: Materials and Fuels Purchased and Consumed	107
32	Manufactured Gas, Census Data, 1899-1935: Indexes of Out- put, Fuel Input, and Output per Unit of Fuel, including Purchased Gas	111
33	Manufactured Gas, Efficiency of Fuel Consumption, American Gas Association Data, 1929-1942: Indexes of Output per Unit of Fuel, including Purchased Gas	113
34	Manufactured Gas, Selected Years, 1904-1942: Indexes of Fixed Capital Assets	116
35	Manufactured Gas, 1909-1942: Sales per Mile of Gas Main	117
36	Manufactured Gas, Census Data, 1899-1935: Indexes of Em- ployment, Output per Man and per Manhour	118
37	Manufactured Gas, 1899-1942: Indexes of Employment, Weighted Output per Man and per Manhour	120
38	Natural Gas, 1929-1942: Indexes of Output, Employment, and Gas Main Mileage	123
39	Manufactured and Natural Gas, 1899, 1929, 1937, and 1942: Indexes of Total Output, Employment, and Output per Man	124
40	Electric and Gas Utilities, 1899-1942: Indexes of Output	131
41	Electric Light and Power, Manufactured and Natural Gas: Indexes of Weighted Output, Rates of Increase, at Ten- Year Intervals, 1900-1940	132
42	Electric and Gas Utilities, Selected Years, 1902-1942: Output, Employment, and Output per man	136

CHART

1	Changing Composition of Electric Consumption, 1917-1942	32
2	Electric Light and Power, 1917-1942: Trends in Average Reve- nue per Kilowatt Hour	33
3	Electric Light and Power, 1902-1942: Unweighted and Weighted Indexes of Output	38
4	Manufacturing, 1899-1939: Source of Electric Energy	48

5	Electric Light and Power, 1902-1942: Changing Importance of Water Power	57
6	Electric Light and Power, 1902-1942: Fuel-Burning Equipment Only; Annual Indexes of Unweighted Output, Fuel Input, and Unweighted Output per Unit of Fuel	59
7	Electric Light and Power, 1902-1942: Indexes of Output per Unit of Capital Equipment	66
8	Electric Light and Power, 1920-1942: Actual Kilowatt Hours Generated as Percentage of Total Optimum Output in Fuel-Burning and Hydro-electric Plants	66
9	Electric Light and Power, 1902-1942: Indexes of Weighted Output, Employment, and Weighted Output per Man	72
10	Electric Light and Power, 1917-1942: Indexes of Weighted Output, Manhours, and Weighted Output per Manhour	74
11	Manufactured Gas, 1919-1942: Relative Consumption by Domestic and Other Consumer Groups	87
12	Manufactured Gas, 1899-1942: Unweighted and Weighted Indexes of Output	92
13	Natural Gas, 1899-1940: Consumption by Domestic and Other Consumer Groups	97
14	Natural Gas, 1906-1940: Relative Consumption by Domestic and Other Consumer Groups	98
15	Natural Gas, 1899-1942: Unweighted and Weighted Indexes of Output	99
16	Manufactured and Natural Gas, 1899-1942: Weighted Indexes of Output	104
17	Manufactured Gas, 1899-1935: Percentages of Total Btu. Input Contributed by Individual Components of Fuel Input	109
18	Manufactured Gas, 1899-1942: Indexes of Btu. Fuel Input and Btu. Output per Unit of Fuel	112
19	Manufactured Gas, 1899-1942: Indexes of Employment, Manhours, and Output per Unit of Labor	122
20	Electric Light and Power, Manufactured and Natural Gas, 1902-1942: Weighted Indexes of Output	133
21	Electric and Gas, 1902-1942: Unweighted and Weighted Indexes of Output	135
22	Electric and Gas, 1902-1942: Indexes of Employment and Weighted Output per Man	138

ACKNOWLEDGMENTS

The preparation of this report has been greatly facilitated by the advice and criticism of a National Bureau staff committee made up of Thor Hultgren, F. C. Mills, George J. Stigler, and Leo Wolman. To Harold Barger and Solomon Fabricant, out of whose work the present study grew, I owe my greatest debt, for their help and encouragement proved indispensable.

The manuscript was read, and very useful comments were made, by other members of the National Bureau Staff or Board of Directors: Arthur F. Burns, C. C. Balderston, Percival F. Brundage, and E. Wight Bakke; by James E. Bonbright, W. S. Slichter, and Carter Goodrich, of Columbia University; by W. Duane Evans of the Bureau of Labor Statistics; and by Walter E. Caine of the American Gas Association. Both the Edison Electric Institute and the American Gas Association were extremely helpful in answering numerous questions and supplying data not available elsewhere. Similar aid was rendered by officials of the Bureau of the Census and the Federal Power Commission. I am heavily indebted to Irving H. Siegel, now of the Veterans' Administration, not only for comments on the final draft but also for turning over to me data relating to the utilities, originally compiled at the National Bureau under his direction.

I want also to thank Melvin I. White and Robert C. Cohen, who assisted in many helpful ways at successive stages of the study. The charts drawn by H. Irving Forman reveal his usual high standard of craftsmanship. Finally, my appreciation goes to Martha Anderson, whose editorial skill contributed greatly to the improvement of the manuscript.

J. M. G.
