This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Education as an Industry

Volume Author/Editor: Joseph T. Froomkin, Dean T. Jamison and Roy Radner, eds.

Volume Publisher: NBER

Volume ISBN: 0-88410-476-1

Volume URL: http://www.nber.org/books/jami76-1

Publication Date: 1976

Chapter Title: Index

Chapter Author: Joseph T. Froomkin, Dean T. Jamison, Roy Radner

Chapter URL: http://www.nber.org/chapters/c4499

Chapter pages in book: (p. 481 - 490)

Index

Ability, dropout rates by, 458
Absolute inequality aversion-constant, 230
"ACE sample," 420–22
Achievement, 53–93; computer-assisted instruction and, 209–18; decisions governing enrollment in higher education and, 55–66; determinants of, 72–77; higher education demand and, 318–25; implications of analysis of, 77–78; IQ and, 202; output of, 161, 193, 195; standardized, 161–63; teacher experience and, 86–87
Admissions standards, graduate school, 15
Aggregation results on higher education demand: achievement, 318–25; detailed state, 310–18
Aid to Families with Dependent Children (AFDC), 259, 261, 266, 272
Aigner, D. J., 157, 176, 185*n*
Alcaly, Roger, 272
Allocative efficiency, 153–54, 168, 169, 191–92, 195; maximization of, 171
American Council on Education, 429
American Institute for Research, 133*n*, 253, 458
Anderson, Kent, 249*n*
Aptitude influences: on higher education decisions, 65; on higher education rationing, 71
Arithmetic, computer-assisted instruction in, 204–205; differential performance in, 245–46; gains in, 209–13
Armacost, R. L., 377
Army Research Office, U.S., 371*n*
Arrow, Kenneth, 155
Astin, Alexander W., 98, 136–38
Atkinson, A. B., 218, 222–24
Atkinson, Richard C., 201–47
Attrition from Ph.D. programs, 19–27
Average input coefficients, ranking of nonuniversity groups by, 436
Average production isoquants, 165
Averch, Harvey, 249*n*, 251

Baird, Leonard, 136–41
Ball, J., 233, 238*n*
Barro, Stephen, 249*n*
Bartell, Ernest, 53*n*
BASIC, 207–208, 216
Baumol, William J., 150, 197, 361
Bayer, A. E., 137
Becker, Gary, 82*n*
Becker, Howard S., 172, 478
Behavioral assumptions on efficiency, 156–61; incentives and reward structures in, 160; knowledge of production set and, 157; little or no competition and, 158–59; prices of inputs and outputs and, 159–60; signals of success or failure in, 160–61; standardized achievement and, 161–63; substantial management discretion and, 158
Bell, Colin E., 405–408
Bell, Terrel, 149
Berkeley, University of California at, 3–51, 338; Carnegie undergraduate plan and, 401–404; Center for Research and Development in Higher Education of, 307; departmental behavior at, 6–27; differences in departmental performance at, 3–6; instruc-

tional costs at, 371, 406–407, 411–12; student dropout fractions for, 391–92; student enrollment and flow rates for, 390–91; student lifetimes at, 392; teacher-student ratios at, 392; unit chain costs at, 394–96; unit node costs at, 392–94
Berls, Robert H., 363*n*
Binary numbers, 207
Black students, home environment of, 464
Blalock, H. M., Jr., 139
Blaug, Mark, 363*n*, 364*n*
Block, H. D., 304, 345*n*
Bloom, Benjamin S., 184*n*, 460, 466
Boardman, Anthony E., 185*n*
Boneau, C. A., 214*n*, 215*n*
Boston Metropolitan Area, 54, 57, 78–79, 85; statistical characteristics of data on, 79–82
Boston Standard Metropolitan Statistical Area (SMSA), 55, 57, 60, 77, 80
Bouton, Jim, 284
Bowen, William G., 361
Bowles, Samuel S., 92, 150–52, 162, 163, 166, 174, 175, 185*n*, 198, 203, 271
Brandle, John, 282
Brewster-Zacharias Plan, 90
Brian, D., 205
British universities, 364*n*
Brookings Institution, 349*n*, 462
Brown, Byron, 150
Brown, David, 28–29, 39, 40, 367
Brown, Murray D., 137, 185*n*
Burkhead, Jesse, 150
Butler, C., 231

Cain, Glen G., 151, 175, 185*n*
California: computer-assisted instruction in, 209, 210, 220–21, 245–46; compensatory education in, 249–90; Department of Education of, 184; Department of Finance of, 17; Division of Compensatory Education of, 249*n*; higher education demand in, 307, 310–13, 317; University of, 296–97, 306, 371*n*. *See also* Berkeley, University of California at
Callahan, Raymond, 88, 89
Cameroun, primary schools in, 374
Campbell, E. Q., 203
Campbell, Robert, 295–96, 301, 302
Campus Statistics (Office of Institutional Research), 390
Caplow, T., 11, 13
Carlson, Richard C., 186*n*
Carlson, Sune, 184*n*
Carnegie Commission on Future of Higher Education, 293, 373, 349*n*, 415*n*; undergraduate plan of, 396–404, 412
Carnegie Corporation of New York, 249*n*
Carnoy, Martin, 149, 174
Carpenter, Margaret (Polly), 249*n*
Carroll, John B., 466
Carroll, Stephen, 249*n*
Cartter, Allan, 28
Cartter Report, 13, 39, 40, 48, 431
Case, C. Marston, 462
Categories, comprehension, 206
Census, U.S., 457
Chain, definition of, 377
Chain flows, 384
Chalupsky, Albert B., 162
Change, incentives for, 361–63
Chemistry faculty and students, interviews with, 44–46
Chemistry Ph.D. candidates, 4–5, 21–22, 24, 26–27
Chicago, University of, 460
Chickering, A. W., 137
Children and Their Primary Schools (Plowden Report), 476
Chiswick, Barry, 349*n*
Chu, S. F., 157, 176, 185*n*
Classroom instruction, compensatory, 262–63
Cohn, Elchanan, 155
Cohort model, 379–84
Coleman, James S., 93*n*, 152, 159, 185*n*, 203, 209
Coleman Report, 237, 278*n*, 280*n*, 283, 460
Colorado, University of, 371, 401
College aspirations of high school seniors, 457
Colleges, 48, 116–18, 231, 401, 409–10, 413*n*, 460. *See also* Berkeley, University of California at; Higher education (*various entries*); Stanford University
Comanor, W., 157
Compensatory education, 249–90; coordination and leadership variables in, 263–64; data collection on, 258–60; description of process for, 252–53; description of six best projects for, 268–69; diagnosis by psychologists of need for, 264; equipment for, 263; factors associated with successful, 254; gain scores and, 273–74; individual instruction in, 254–56; instructional intensity by type of instructor for, 262; means, standard deviations, and description of variables for, 265–66; meth-

odological considerations for research on, 251–52; model for, 252–54; organization of report on, 250; percentage of instruction in regular classroom for, 262–63; performance measure for, 260–61, 275–76; pooling of grade data on, 274–75; prior findings on, 253–54; program management and coordination for, 256–58; purpose of study of, 250; socioeconomic variables and, 261–62; use of educational materials and equipment in, 263; weighting and, 276–77. *See also* Computer-assisted instruction
Competition among schools, 158–59
Comprehension categories, 206
Comprehension sentences, 206
Computer-assisted instruction (CAI), 194, 201–47; achievement gains from, 209–18; in arithmetic, 204–205, 209–13, 245–46; assessment of differential performance in, 209–26, 245–47; in computer programming, 207–209, 216–18, 246–47; costs of, 227–40; per student cost, 234–36; in reading, 205–207, 213–16, 246; reduction in inequality through, 218–26, 229; in rural areas, 231–36
Computer programming. *See under* Computer-assisted instruction
Constant absolute inequality aversion, 230
Constant relative inequality aversion, 229
Consumer Price Index, 352, 363*n*
COOP (California Cooperative Primary Reading Test), 214–15
Corazzini, Arthur, 53*n*
Cronbach, Lee J., 273
Cross-sectional data, uses of, 384, 426–30
Curriculum: for computer-assisted instruction, 228, 231; graduate school, 16
Cutright, Phillip, 459
Cyert, Richard M., 184*n*, 186*n*

Dahl, R. A., 155
Daniere, Andre, 97
Data collection on compensatory education, 258–60
Demand: exogenous, 378; for higher education, 293–348; for Ph.D.'s, 28–29
Denison, Edward F., 363*n*, 364*n*
Department of Labor, U.S., 28
Departments, graduate school: admissions standards of, 15; curriculum of, 16; differences in attrition patterns of, 23–27; individual faculty members in, 12–15; information available to students from, 16; investment model of graduate student behavior in, 9–12; performance of, 3–6; resources of, 17; success rates of, 19–23
Design, instructional, 255–56
Destination node, definition of, 378
Dispersion of variables, 80
Donaldson, Ted, 249*n*
Downs, Anthony, 184*n*
Dreeben, Robert, 162
Dropout fractions, 458; at Berkeley, 391–92; at Stanford, 386–87
Dugan, Dennis J., 59–93, 183*n*, 462, 471
Duncan, O. D., 139
Dunn, Robert M., Jr., 302

Efficiency in education, 149–90; allocative, 153–54; behavioral assumptions and, 156–61; data availability, 159–60; educational production functions and, 151–53; empirical application of, 175–83; frontier estimates for, 176–83; incentive and reward structures for, 160; lack of knowledge of production set and, 157; lack of substantial management discretion and, 158; little or no competition and, 158–59; sample for, 175–76; scale and, 155; signals of success or failure and, 160–61; social welfare, 154–55; standardized achievement as educational output and, 161–63; technical, 153–54; technical inefficiency in producing achievement and, 163–70
Elashoff, R. M., 214*n*, 215*n*
Elasticities: in cross-sectional analysis of faculty-student ratios, 439–42; of higher education demand, 325–30
Electrical engineering faculty and students, interviews with, 49–50
Elementary and Secondary Education Act (ESEA) (1965), Title I of, 92, 202, 250, 252, 276, 283
England, primary schools in, 476
English department faculty and students, interviews with, 46–49
English Ph.D.'s, 4–5, 32, 41; placement of, 42–43
Enrolled student time per degree, 5
Enrollment: decisions governing, *See* Higher education enrollment decisions; flow rates and, 390–91; representation of, 378
Equal Opportunity Report, 462, 465
Excess demand, ranking of disciplines by, 29
Exogenous demands, 378

Exogenous supplies, 378
Expenditures per pupil, 76
Experience of teachers, 86–87; relative prices and marginal products for, 183

Faculty, graduate school: interviews with, 41; prestige maximization by, 12–15
Faculty-student ratios, 415–50; ACE sample on, 418–20; cross-sectional analysis, 428–44; elasticities of, 439–42; fixed coefficient model for, 420–28; instructional costs and, 389–90, 392; multicollinearity and other specific problems of, 442–43; Office of Education statistics on, 417–18; problems in use of cross-sectional data on, 424–28; problems in use of time series data on, 421–24; recent historical trends in, 417–20; regression analysis for undergraduate and master's level institutions, 431–36; regression analysis for universities, 436–39; sample for, 430–31; variable input coefficient model for, 429–30
Failure, signals of, 160–61
Family: higher education decisions and, 61, 64, 65; income of, 57–58, 77; rationing and, 71; scholastic achievement and, 76–77; size of, 58, 76–77
Farrell, Michael, 153, 157, 185*n*
Far Western Regional Laboratory, 278*n*
Feldman, K. A., 136–38
Fixed-coefficient model: problems in use of cross-sectional data in, 424–28; problems in use of time-series data in, 421–24; simple, 420–21
Flow rate, students', 378; enrollment and, 390–91
Ford Foundation Four-Year Guaranteed Assistance Program in the Humanities and Social Sciences, 387
Fox, K. A., 376
French Ph.D. candidates: annual production of, 33–34; attrition pattern of, 25, 27, 32; success rate of, 21–23
Friedman, Milton, 150, 182*n*
Frontier and average production isoquants, 165
Frontier and average production relations, 179–80
Froomkin, Joseph N., 455–80
Full time equivalent (FTE) faculty, 14; funding for, 17
Furby, Lita, 273

Gain scores, 273–74
Gallup, George, 149, 150, 159
Galper, Harvey, 302
Garner, William, 480*n*
German Ph.D.'s, 32; annual production of, 35–36
GIGO (Garbage In Garbage Out) production function, 198
Gini coefficients, 204, 218–22, 243
Gintis, Herbert, 162, 174, 184*n*, 198
Gittell, Marilyn, 159, 160
Goodrich, H. B., 97
Grabowski, Henry, 53*n*
Grade data, pooling of, 274–75
Graduate Record Examination, 98, 467
Graduate school attendance, investment in college training and, 95–147; data sources on, 99; determinants of, 142–45; empirical results of, 108–24; estimation technique for, 145–46; functional form and estimation procedure for, 101–102; linear model of, 108–16; logit analysis of, 127–33; measures of input for, 102–108; measures of output for, 99–101, 141–42; multicollinearity and the interpretation of empirical results in, 146–47; nonlinearities of, 118–24; other studies of, 96–99; principal component analysis of, 127; production function and, 145; public and private colleges compared, 116–18
Graduate school departments. *See* Departments, graduate school
Graduate students: interviews with, 41–50; investment model of behavior of, 9–12
Greer, Colin, 149
Griliches, Zvi, 153, 162, 172, 352, 363*n*
Guszak, Frank J., 256, 269
Guthrie, James W., 151

Haggstrom, Gus, 447–52
Hall, Lady, 185*n*
Hansen, W. Lee, 53, 289, 478
Hanushek, Eric Alan, 92, 150–52, 159, 161, 183*n*, 191–96, 271, 278*n*
Harris, Seymour E., 361
Hartley, Harry J., 160
Harvard University, 48
Hawkridge, David G., 162, 253–54, 258
Hawthorne effects, 245
Head Start Programs, 290
Health, Education and Welfare Department, U.S., 149, 160

Hedrick, Charles L., 184*n*, 186*n*
Herriott, Robert E., 172
Heyns, Barbara L., 84–89
Higher education, estimation of demand for, 330–38; organization of, 361–363
Higher education demand, 293–348; achievement aggregation results for, 318–25; alternative specifications for, 309–10; data and sampling on, 307–308; detailed state aggregation results on, 310–18; elasticities of, 325–30; models and estimation procedures for, 302–307, 330–38; qualitative information on, 330; review and critique of literature on, 295–302
Higher Education Directory (Office of Economic Opportunity), 450
Higher education enrollment decisions, 55–72; environmental influences, 61, 64, 65; family income and, 57–58; family size and, 58; market and nonmarket rationing in, 66–72; per cent nonwhite in community and, 58; regression analysis of, 59–62; Scholastic Aptitude Test scores and, 58, 63; school environment and, 62–63
Higher Education Facilities Act, 367
Higher Education General Information Survey (HEGIS), 133*n*, 141, 426, 432
Higher education investments, 95–147; determinants of graduation and graduate school attendance and, 142–45; empirical results on, 108–24; estimation technique for, 145–46; logit analysis of, 127–33; measures of educational output and, 141–42; model of, 99–108; multicollinearity and, 146–47; other studies of, 96–99; principal component analysis of, 127; production function and, 145
Higher education output: analysis of unit chain costs in, 394–96; Carnegie undergraduate plan and, 396–404; cohort model of, 379–84; notation and terminology for, 377–79; quality of, 351–53; related work on, 374–77; sources and analysis of institutional data on, 385–96
Higher education output trends, 349–69; defining and measuring inputs for, 354–55; defining and measuring output for, 350–53; organization and incentives for change in, 361–63; tentative estimates of, 356–60
Higher Horizons project, 284
History Ph.D. candidates, 4–5
Hobson, C. J., 203
Hoenack, Stephen A., 296–302, 306–307, 346–48
Holland, J. L., 98
Hollander, T. Edward, 159
Hopkins, David S. P., 371–413
Humphreys, Lloyd, 467
Hunt, Shane, 96–97

Iannacone, Laurence, 159
IBM Corporation, 371*n*
Identification of letters, 206
Illinois: higher education demand in, 307, 310–12, 314, 317; University of, 231
Incentives in education, 160, 361–63
Income: higher education decisions and, 57–58; illustrative contributions of education to, 459; scholastic achievement and, 77
Individualized instruction, 254–56
Industry production surface, approximation of, 170
Inequality: computer-assisted instruction in reduction of, 218–26; Gini coefficient of, 219–22; value explicit measures of, 222–26
Information available to graduate students, 16
Inputs in education production: in higher education, defining and measuring, 102–108, 254–55; management discretion over obtaining, 158; means of, and standard deviations, 103, 104; prices of, 159–60; teacher, 193–94; technical inefficiency and, 167, 168
In-service training, 258
Instructional costs of university outputs, 371–413; Carnegie undergraduate plan and, 396–404; cohort model for, 379–384; notation and terminology for, 377–79; related work on, 374–77; student dropout fractions and, 386–87, 391–92; student enrollment and flow rates and, 385–86, 390–91; student lifetimes and, 387–89, 392; teacher-student ratios and, 389–90, 392; unit chain costs in, 394–96; unit node costs in, 390, 392–94
Intensity, instructional, 255, 262
International Project for the Evaluation of Educational Achievement (International Education Association), 466, 478
Investment model of graduate student behavior, 9–12
Investments in higher education, 95–147; data sources on, 99; determinants of graduation and graduate school attendance and, 142–45; empirical results on, 108–24; estimation

technique for, 145–46; functional form and estimation procedure for, 101–102; linear model of, 108–16; measures of input for, 102–108; measures of output for, 99–101, 141–42; multicollinearity and, 146–47; nonlinearities in, 118–24; other studies of, 96–99; principal component analysis of, 127; production function and, 145; public and private colleges compared, 116–18
IQ, 202
Isoquants, 165

Jackson, Philip W., 162

Merton, R. K., 12
Metropolitan Area Planning Council, 297, 298
Metropolitan Readiness Test (MET), 213
Michelson, Stephan, 150–52, 175, 185*n*, 201*n*, 209, 251
Michigan, public institutions in, 364*n*
Miller, Leonard S., 293–348, 417*n*, 426, 432
Miner, Jerry, 474–78

Mississippi, computer-assisted instruction in, 209–11, 213, 220–21, 245–46
Mobility, 261–62
Model-33 teletypewriter, 232
Mongello, Beatrice O., 184*n*
Mood, Alexander M., 203, 465
Mooney, Joseph, 6
Morningstar, M., 205
Morrison, Donald F., 134*n*
Muller, Jurgen, 185*n*
Multicollinearity, 444–45; investments in higher education and, 146–47
Multiplexing and communication system for computer-assisted instruction, 228, 233, 234, 235
Murnane, Richard, 150
Mushkin, Selma, 160

National Academy of Sciences, 40
National Industrial Conference Board, 470
National Research Council, 32
National Science Foundation, 201*n*, 371*n*, 417*n*, 431
Navy training schools, 362
Nelson, Valerie, 162
Nerlove, Marc, 157
Newberry, D., 218
Newcomb, T. M., 136, 137
Newhouse, Joseph, 280*n*
New York City school system, 184*n*
New York Higher Horizons project, 285
Nonmarket higher education rationing, 66–72
North Carolina, higher education demand in, 307, 310–11, 316–18

Office of Analytical Studies, 296
Office of Economic Opportunity, 288, 290
Office of Education, 133*n*, 162, 173, 363*n*, 364*n*; faculty-student ratio, statistics of, 419–20, 447, 450; National Center for Educational Statistics of, 133*n*; Office of Program Planning of, 462; Survey on Equal Educational Opportunity of, 175
O'Neill, June, 349–69, 447, 451
O'Neill, Dave M., 349*n*, 362
Opportunity costs of computer-assisted instruction, 236–38
Oriental children, educational attainment of, 464
Origin node, definition of, 377
Output, educational, 151–53; choice of combinations of, 156; instructional costs of, 371–415; means of, 103, 104; measures of, 99–101, 141–42; prices of, 159–60; "quality" of, 351–53; standardized achievement as, 161–63

Pace, C. R., 137, 138
Panos, R. J., 137
Peck, Kim, 141*n*
Perl, Lewis J., 95–147, 150
Peterson, R. E., 136
Pfanzagl, J., 224
Pfouts, Ralph W., 184*n*
Ph.D. production process, 3–52; admissions standards and, 15; analysis of objective function of departments in, 17–19; curriculum and, 16; demand for Ph.D.'s and, 28–29; differences in attrition patterns in, 23–27; differences in departmental performance in, 3–6; individual faculty members and, 12–15; information available to students in, 16; interviews with faculty and students on, 41–50; investment model of graduate student behavior and, 9–12; placement of Ph.D.'s and, 32–41; resources and, 17; success rates in, 19–23; supply of Ph.D.'s and, 29–32; theory of departmental behavior in, 9–18
Phonics, 206
Piccariello, Harry, 202, 465
Pincus, John, 184*n*
Pittsburgh, University of, 133*n*
Placement of Ph.D.'s, 32–41
PLATO IV, 231
Plowden Report, 476
Policy analysis, 368–69
Policy issues in education, 77–78, 455–80; concept of equality of educational opportunity in, 456–59; cost-benefit problems of, 465–66; curriculum and, 466–67; economic analysis of, 462–65; effect of organization and, 466; equalizing learning rates as, 459–62; higher education outcomes and, 467–68; production functions and, 462–69; unconventional view of externalities and, 469–70
Policy variables, 384
Political science Ph.D.'s, 4–5, 32, 37–38
Pollak, William, 160
Potter, J., 233
Prestige, departmental, 12–15
Prestige groupings: academic placements in, 41; definition of, 40
Prestige Index of colleges and universities, 39

Prices: input and output, 159–60; relative, 183
Principal component analysis, 127
Private colleges. *See* Colleges
Production functions, educational, 145, 151–53
Production set, lack of management knowledge of, 157
Program management for compensatory education, 256–58
Project on Econometric Models of Higher Education, 293
Project Talent, 133*n*, 137, 141, 147, 307
Psychologists, diagnosis of need for compensatory education by, 264
Public colleges. *See* Colleges

Radner, Roy, 308, 338*n*, 415–50, 426, 432
Rand Corporation, 249*n*, 278*n*, 279*n*
Rapp, Marjorie, 249*n*
Rationing of higher education, 66–72
Reading, computer-assisted instruction in, 205–207, 213–16, 246
Regression analysis: of faculty-student ratios, 431–39; of higher education decisions, 59–62
Relative inequality aversion, constant, 229
Relative prices, 183
Report on Doctoral Programs (National Research Council), 32
Research assistanceship (RA) positions, 14
Resources, departmental, 17
Reward structures, 160
Ribich, Thomas, 249*n*, 272, 282–86
Richards, J. M., Jr., 138
Riew, John, 155
Rivlin, Alice M., 184*n*
Roberts, A. Oscar H., 162
Rock, D. A., 137, 139
Rogers, David, 160
Roose, Kenneth D., 450–52
Rural areas, costs of computer-assisted instruction in, 231–36
Ryder, Gerald, 249*n*

St. John, Nancy H., 172
Saks, Daniel, 150
Salter, W. E. G., 157, 185*n*
Satellite system for computer-assisted instruction, costs of, 234
Scale, efficiency and, 155
Scanlon, William J., 53
Schoenfeldt, L. F., 137
Scholastic achievement, 53–93; computer-assisted instruction and, 209–18; expenditures per pupil and, 76; family income and, 57–58, 77; family size and, 58, 76–77; higher education demand and, 318–25; implications of analysis of, for policy considerations, 77–78; IQ and, 202; market and nonmarket rationing and, 66–72; methodology for study of, 73–74; per cent nonwhite in community and, 58, 76; regression analysis of, 59–62; Scholastic Aptitude Test scores and, 58, 63; school environment and, 62–63
Scholastic Aptitude Test (SAT), 72–78, 80–82, 84, 90, 92, 94, 294, 309, 310, 318, 320, 467; means of, 75
School environment, influences of, 61–64, 71
School to College: Opportunities for Post Secondary Education (SCOPE), 294, 307, 330
Schrag, Peter, 159
Schultz, Theodore W., 361
Schultze, Charles L., 184*n*
Science (magazine), 98
Sen, A., 238*n*
Senegal, primary schools in, 374
Sengupta, J. K., 376
Sentences, comprehension, 206
"Sesame Street" (television show), 209*n*
Sex factors in higher education demand, 299, 301
Shellhammer, Tom, 249*n*
Siegel, B. W., 295–96, 301, 302
Sietsema, John P., 184*n*
Sight-word vocabulary, 206
Silberman, Charles, 149
SIMPER (Simple Instruction Machine for the Purpose of Educational Research), 207–208
Singer, N. M., 219
Size of family: higher education decisions and, 58; scholastic achievement and, 76–77
Slimick, J., 208
SLOGO (Stanford LOGO), 207–208
Smith, Adam, 150, 182*n*
Social mobility, 87
Social Security System, U.S., 459
Social welfare efficiency, 154–55, 156, 191–92
Socioeconomic status: compensatory education and, 261–62; dropout rates by, 458; higher education demand and, 301
South Carolina State College, 425
Snyder, E. E., 137
Spanish Ph.D.'s, 29
Spelling patterns, 206
Standardized achievement, 161–63

Stanford Achievement Test, 210–15; average grade placement scores on, 211, 213
Stanford Reading Test, 259, 260, 274–75, 287
Stanford University, 240; Carnegie undergraduate plan and, 400–404; Institute for Mathematical Studies in the Social Sciences of (IMSSS), 201*n*, 202, 204, 205, 207, 208, 232, 238*n*; instructional costs at, 371, 406–407, 412; student dropout fractions for, 386–87; student enrollment and flow rates for, 385–86; student lifetimes at, 387–89; teacher-student ratios at, 389–90; unit chain costs at, 394–96; unit node costs at, 390
Stark, Rodney, 3, 23, 48
State University of New York (SUNY), at Stony Brook, 409–10, 413*n*
Stifle, J., 231
Stochastic choice theory, 303–307
Stock levels, 384
Stout, Robert T., 151
Strict utility model, 303–304
Student dropout fractions, 458; at Berkeley, 391–92; at Stanford, 386–87
Student enrollment and flow rates: at Berkeley, 390–91; at Stanford, 385–86
Student lifetimes, 378; at Berkeley, 392; at Stanford, 387–89
Success: Ph.D. program rates of, 19–23; signals of, 160–61
Suppes, Patrick, 201–47, 345*n*
Supplies: exogenous, 378; of Ph.D.'s, 29–32
Syracuse University, Educational Policy Research Center of, 477

Taubman, Paul J., 162
Teachers: experience of, 86–87, 183; verbal score of, 183
Teacher-student ratios. *See* Faculty-student ratios
Teaching assistantship (TA) positions, 14
"Teamwork," 256–58
Technical efficiency, 153–54, 191–96
Terminal equipment for computer-assisted instruction, cost of, 227, 232
Thomas, J. Alan, 150, 478, 480
Tiebout, Charles M., 184*n*
Timmer, C. P., 157, 185*n*
Title I. *See* Elementary and Secondary Education Act
Toder, Eric, 185*n*
Triplett, Jack E., 363*n*
