

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Mechanization in Industry

Volume Author/Editor: Harry Jerome

Volume Publisher: NBER

Volume ISBN: 0-87014-026-4

Volume URL: <http://www.nber.org/books/jero34-1>

Publication Date: 1934

Chapter Title: Front matter, table of contents

Chapter Author: Harry Jerome

Chapter URL: <http://www.nber.org/chapters/c5238>

Chapter pages in book: (p. -31 - -12)

PUBLICATIONS OF THE
NATIONAL BUREAU OF ECONOMIC RESEARCH, INC.

NUMBER 27

MECHANIZATION
IN INDUSTRY

The National Bureau of Economic Research was organized in 1920 in response to a growing demand for scientific determination and impartial interpretation of facts bearing upon economic and social problems. Freedom from bias is sought by the constitution of its Board of Directors without whose approval no report may be published. Rigid provisions guard the National Bureau from becoming a source of profit to its members, directors or officers, or from becoming an agency for propaganda.

Officers

| | |
|----------------------------------------------|-------------------------------------|
| OSWALD W. KNAUTH, <i>Chairman</i> | GEORGE SOULE, <i>Vice-President</i> |
| JOSEPH H. WILLITS, <i>President</i> | SHEPARD MORGAN, <i>Treasurer</i> |
| CHARLES A. BLISS, <i>Executive Secretary</i> | |

Research Staff

| | |
|-------------------------------------------------|-----------------------|
| WESLEY C. MITCHELL, <i>Director of Research</i> | |
| ARTHUR F. BURNS | FREDERICK R. MACAULAY |
| SIMON KUZNETS | FREDERICK C. MILLS |
| LEO WOLMAN | |
| EUGEN ALTSCHUL, <i>Associate</i> | |

Directors at Large

| | |
|------------------|----------------|
| OSWALD W. KNAUTH | ELWOOD MEAD |
| H. W. LAIDLER | SHEPARD MORGAN |
| L. C. MARSHALL | GEORGE SOULE |
| GEORGE O. MAY | N. I. STONE |

Directors by University Appointment

| | |
|---------------------------------|----------------------------------------|
| EDWIN F. GAY, <i>Harvard</i> | HARRY ALVIN MILLIS, <i>Chicago</i> |
| WALTON H. HAMILTON, <i>Yale</i> | WESLEY C. MITCHELL, <i>Columbia</i> |
| HARRY JEROME, <i>Wisconsin</i> | JOSEPH H. WILLITS, <i>Pennsylvania</i> |

Directors appointed by other Organizations

| | |
|----------------------------------------|-----------------------------------------|
| DAVID FRIDAY | M. C. RORTY |
| <i>American Economic Association</i> | <i>American Statistical Association</i> |
| LEE GALLOWAY | ARCH W. SHAW |
| <i>American Management Association</i> | <i>National Publishers Association</i> |
| GEORGE E. ROBERTS | ROBERT B. WOLF |
| <i>American Bankers Association</i> | <i>American Engineering Council</i> |

RELATION OF THE DIRECTORS
TO THE WORK OF THE NATIONAL BUREAU
OF ECONOMIC RESEARCH

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No study shall be published until the Director or Directors of Research shall have submitted to the Board a summary report drawing attention to the character of the data and their utilization in the study, the nature and treatment of the problems involved, the main conclusions and such other information as in their opinion will serve to determine the suitability of the study for publication in accordance with the principles of the Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. If publication is approved each member is entitled to have published also a memorandum of any dissent or reservation he may express, together with a brief statement of his reasons. The publication of a volume does not, however, imply that each member of the Board of Directors has read the manuscript and passed upon its validity in every detail.

6. The results of an inquiry shall not be published except with the approval of at least a majority of the entire Board and a two-thirds majority of all those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed. The limit shall be forty-five days from the date of the submission of the synopsis and manuscript of the proposed publication unless the Board extends the limit; upon the request of any member the limit may be extended for not more than thirty days.

7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every Bureau publication.

(Resolution of October 25, 1926, revised February 6, 1933)

ACKNOWLEDGMENTS

AMONG the many organizations and individuals who have contributed to the preparation of this report, I am indebted first to the Social Science Research Council, for its generosity in giving financial aid; to the National Bureau of Economic Research, under whose auspices the survey was conducted; and to the University of Wisconsin, for grant of leave of absence during a portion of the time it was in progress.

In connection with the assembling of that part of the data that was obtained by inspections, interviews and correspondence, much time and information was generously given by several thousand persons engaged in manufacturing and other industrial operations. Although I cannot list the names of those who so cooperated, I wish to express to them my sincere appreciation of their courteous and helpful assistance.

Many persons have served as co-workers in the collection and analysis of material. The major part of the inspections and preliminary drafts of the analysis by industries were made by Mr. Glion T. Benson for several industries, including among others, stevedoring, the brick industry and the New England cotton mills; Mr. W. Richmond Smith, foundries; Dr. Meredith B. Givens, iron and steel; and Mr. R. R. Worsencroft, highways. Inspections were made also by Mr. H. F. Girvin and Professors George W. Barnwell and Russell W. Henninger and by several other investigators who rendered useful service for shorter periods. In preparing reports on the several industries from the schedules and published material assistance was rendered by Professor Russell Bauder, foundries; Dr. Alfred W. Briggs, glass;

Mr. Kenneth H. Parsons, agriculture; and Dr. Miriam E. West, cotton goods. Miss Edith H. Handler conducted some of the paper mill inspections and drafted a report for that industry, and also gave valued assistance in the analysis of material and in the preliminary preparation of many other parts of the manuscript. Among others who aided in the analysis of data and preparation of the manuscript, I must mention particularly Mrs. Edith H. Pearson, Misses Alice B. Cronin, Elizabeth B. Kehler, Marvel Keller and Kathryn Robertson, and Messrs. F. P. Hall, D. W. Hembel, George Mitchell, H. K. Snell, Charles F. Weiler, R. B. Whiting and T. E. Whiting.

I have tried in the text to acknowledge the important contributions which various co-workers have made to the analysis of particular industries, and also the aid received from published material dealing with technological change, notably the several studies of productivity made by Dr. Boris Stern for the Bureau of Labor Statistics, which have proved especially helpful.

In the early stages of the manuscript numerous persons generously read and criticized chapters devoted to the particular industries, including: D. M. Avey, Editor, *The Foundry*; R. E. Kennedy, Technical Secretary, American Foundrymen's Association; J. M. Taylor, Secretary, National Founders Association; W. L. Monro, President and General Manager, American Window Glass Company; W. P. Clarke, President, American Flint Glass Workers' Union of North America; Harry Jenkins, Secretary, Glass Bottle Blowers Association; Professor William Haber; J. L. Harrison, Bureau of Public Roads, United States Department of Agriculture; and R. E. McCausland, Field Manager, Barber-Colman Company. Although we have not found it practicable to publish the reports on the several industries in as full a form as they were when examined by these gentlemen, their criticisms and suggestions have been helpful in preparing the more abbreviated statements finally incorporated. For these statements, they are, of course, in no way responsible.

I am deeply indebted to Dr. Edwin F. Gay and Dr. Wesley C. Mitchell, Directors of Research, for counsel and constructive

criticism throughout the conduct of this survey; to Professor Frederick C. Mills for preparation of the Introduction; and to other members of the staff of the National Bureau of Economic Research who have read portions of the manuscript and made helpful criticisms. Miss Martha Anderson rendered valuable service in editing the manuscript, a task made substantially more difficult by the fact that the manuscript was first prepared with separate chapters devoted to each of the several industries selected for special attention and then reduced to its present compass. The charts were made by Miss Dorothy Achilles. Valued help has been given by my wife in correcting and proofreading the manuscript at various stages.

Helpful suggestions were received from a number of the Directors of the National Bureau of Economic Research, particularly Mr. George O. May, Colonel Malcolm C. Rorty and Professor Joseph H. Willits. Professor John R. Commons, a director of the National Bureau when this study was inaugurated, gave helpful encouragement and counsel to the writer and various co-workers.

To all those who have contributed to the information upon which this study is based and to the many co-workers and others by whose suggestions I have sought to profit, I am sincerely grateful.

HARRY JEROME
