

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Politics and Economics in the Eighties

Volume Author/Editor: Alberto Alesina and Geoffrey Carliner, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-01280-8

Volume URL: <http://www.nber.org/books/ales91-1>

Conference Date: May 14-15, 1990

Publication Date: January 1991

Chapter Title: Contributors, Indices

Chapter Author: Alberto Alesina, Geoffrey Carliner

Chapter URL: <http://www.nber.org/chapters/c5421>

Chapter pages in book: (p. 285 - 298)

---

This Page Intentionally Left Blank

**I**s the federal budget deficit a result of congressional deadlocks, gross miscalculation of economic trends, or a Republican strategy to tie the budgetary hands of future Democratic leadership? To what extent does the partisan split between Congress and the executive branch constrain the president's agenda? In this volume, political scientists and economists tackle these and many other contentious issues, offering a variety of analytical perspectives.

Certain to provoke controversy, this interdisciplinary volume brings together policy experts to provide a coherent analysis of the most important economic policy changes of the 1980s. Through a detailed examination of voting patterns, monetary and fiscal policies, welfare spending, tax reform, minimum wage legislation, the savings and loan collapse, and international trade policy, the authors explore how politics can influence the direction of economic policymaking.

**Alberto Alesina** is the Paul Sack Associate Professor of Political Economy at Harvard University. **Geoffrey Carliner** is executive director of the National Bureau of Economic Research.
