

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Outlay and Income in the United States, 1921-1938

Volume Author/Editor: Harold Barger

Volume Publisher: NBER

Volume ISBN: 0-870-14159-0

Volume URL: <http://www.nber.org/books/barg42-2>

Publication Date: 1942

Chapter Title: Acknowledgments, tables of content

Chapter Author: Harold Barger

Chapter URL: <http://www.nber.org/chapters/c5477>

Chapter pages in book: (p. -11 - 0)

AUTHOR'S ACKNOWLEDGMENTS

THE opportunity to embark upon the present investigation occurred in 1936, when I was connected with the University of London, through my election to a traveling fellowship sponsored by the Sir Richard Garton Foundation. This fellowship enabled me to begin work at the National Bureau of Economic Research, to which institution I owe an obligation that is not easily discharged. The project could never have been carried out but for the generous measure in which, from the outset, all the facilities of the National Bureau were made available to me. My original decision to undertake a study of this sort was due in large degree to suggestion and encouragement from two English friends at a time when I had not yet set foot on American soil. My interest in the phenomena of the business cycle in the United States, and especially in the problem of devising comprehensive measures of its intensity, was first aroused by Noel F. Hall, then of University College, London, and now of the National Institute of Economic and Social Research; while I resolved upon the ground plan of the present inquiry, involving a synoptic view of outlay and income at quarterly intervals, as the result, if I recall correctly, of a conversation with Colin Clark at Oxford in the fall of 1936.

Numerous persons have supplied me with unpublished material, or with advice in the handling of particular problems. On one score or both I feel especially indebted to Moses Abramovitz, Rollin F. Bennett, Milton Friedman, Julius Shiskin and W. Allen Wallis of the National Bureau of Economic Research; to Martin R. Gainsbrugh of the National Industrial Conference Board; to D. R. Young of the National City Bank; to Thomas C. Atkeson and Edward

White of the Bureau of Internal Revenue; and to Amos E. Taylor of the Bureau of Foreign and Domestic Commerce.

Among those who read the manuscript and made valuable comments were Frederick M. Cone, Albert G. Hart, William H. Shaw and O. C. Stine, members of a committee appointed by the Conference on Research in National Income and Wealth to review the study; Chester I. Barnard, Harold M. Groves and George Soule, directors of the National Bureau of Economic Research; Oscar L. Altman, Raymond W. Goldsmith and Clark Warburton.

The estimates for consumers' services, and the quarterly estimates for consumers' commodities, have benefited greatly from the pertinacity and good judgment of Jacob M. Gould of the National Bureau of Economic Research, who was responsible for the revision and extension of tentative estimates in this field prepared by myself: Mr. Gould also checked many of the calculations in other parts of the study. In various ways I am also indebted to other members of the staff of the National Bureau. In developing methods of seasonal adjustment appropriate to different types of series I derived great advantage from discussions with Denis Volkenau. I have to thank Lillian Epstein and Elizabeth Jenks for their assistance in the detailed interpretation of the vast mass of data which forms the foundation for the Bureau's income estimates. No volume of this sort can make easy reading; that the pages which follow are not even more tedious is due in large measure to Bettina Sinclair, who edited the manuscript. I am indebted to H. Irving Forman for the preparation of the charts. My two most substantial obligations remain: to Simon Kuznets, who placed his entire range of worksheets at my disposal, and from whose extensive labors in the field I profited in numerous ways; and to Solomon Fabricant, whose critical interest and generous encouragement suggested the circumvention of several pitfalls and led to the improvement of the estimates in important respects.

CONTENTS

FOREWORD	ix
PREFACE	xi
AUTHOR'S ACKNOWLEDGMENTS	xvii

Chapter

I. THE NATIONAL PRODUCT AND ITS MEASUREMENT	(1-23)
1. The Definition of the Product	2
2. Outlay and Income as Measures of the Product	5
3. Quarterly Estimates of Outlay and Income	13
4. Character of the Estimates	21
II. ANNUAL ESTIMATES OF OUTLAY AND INCOME	(24-65)
1. The Two Sides of the Account	24
2. Concepts	25
3. Consumers' Outlay	39
4. The Derivation of Total Outlay	48
5. Income	57
III. THE LEVEL OF THE NATIONAL PRODUCT	(66-87)
1. Comparison of Outlay and Income	66
2. Precision of the Outlay Estimates	70
3. Precision of the Income Estimates	77
4. Precision of Estimates of the National Product	79

IV. QUARTERLY ESTIMATES: OUTLAY	(88-126)
1. Consumers' Outlay: Commodities	88
2. Consumers' Outlay: Services	92
3. Producers' Durable Goods	97
4. Construction	98
5. Inventories	99
6. Other Items	110
7. Seasonal Variation	111
8. The Outlay Totals	112

V. QUARTERLY ESTIMATES: INCOME	(127-187)
1. Residual Income	128
2. Short Term Income	147
3. Long Term Income	161
4. Income Originating in Private Industry	161
5. Income Distributed by Government	167
6. The Income Totals	167

VI. THE VARIABILITY OF THE NATIONAL PRODUCT	(188-219)
1. Agreement of the Annual Measures	188
2. Agreement of the Quarterly Measures	195
3. Conclusion	217

Appendix

A. CONSUMERS' SERVICES	223
B. QUARTERLY NET INCOME OF CORPORATIONS	235
C. INVENTORY STATISTICS	307
D. BASIC INCOME DATA AND SUBSIDIARY BREAKDOWNS	337

CONTENTS	xxi
E. INDUSTRIAL CLASSIFICATION	349
F. COMPARISON WITH OTHER ESTIMATES OF OUTLAY	355
G. NOTE ON STATISTICAL METHODS	369

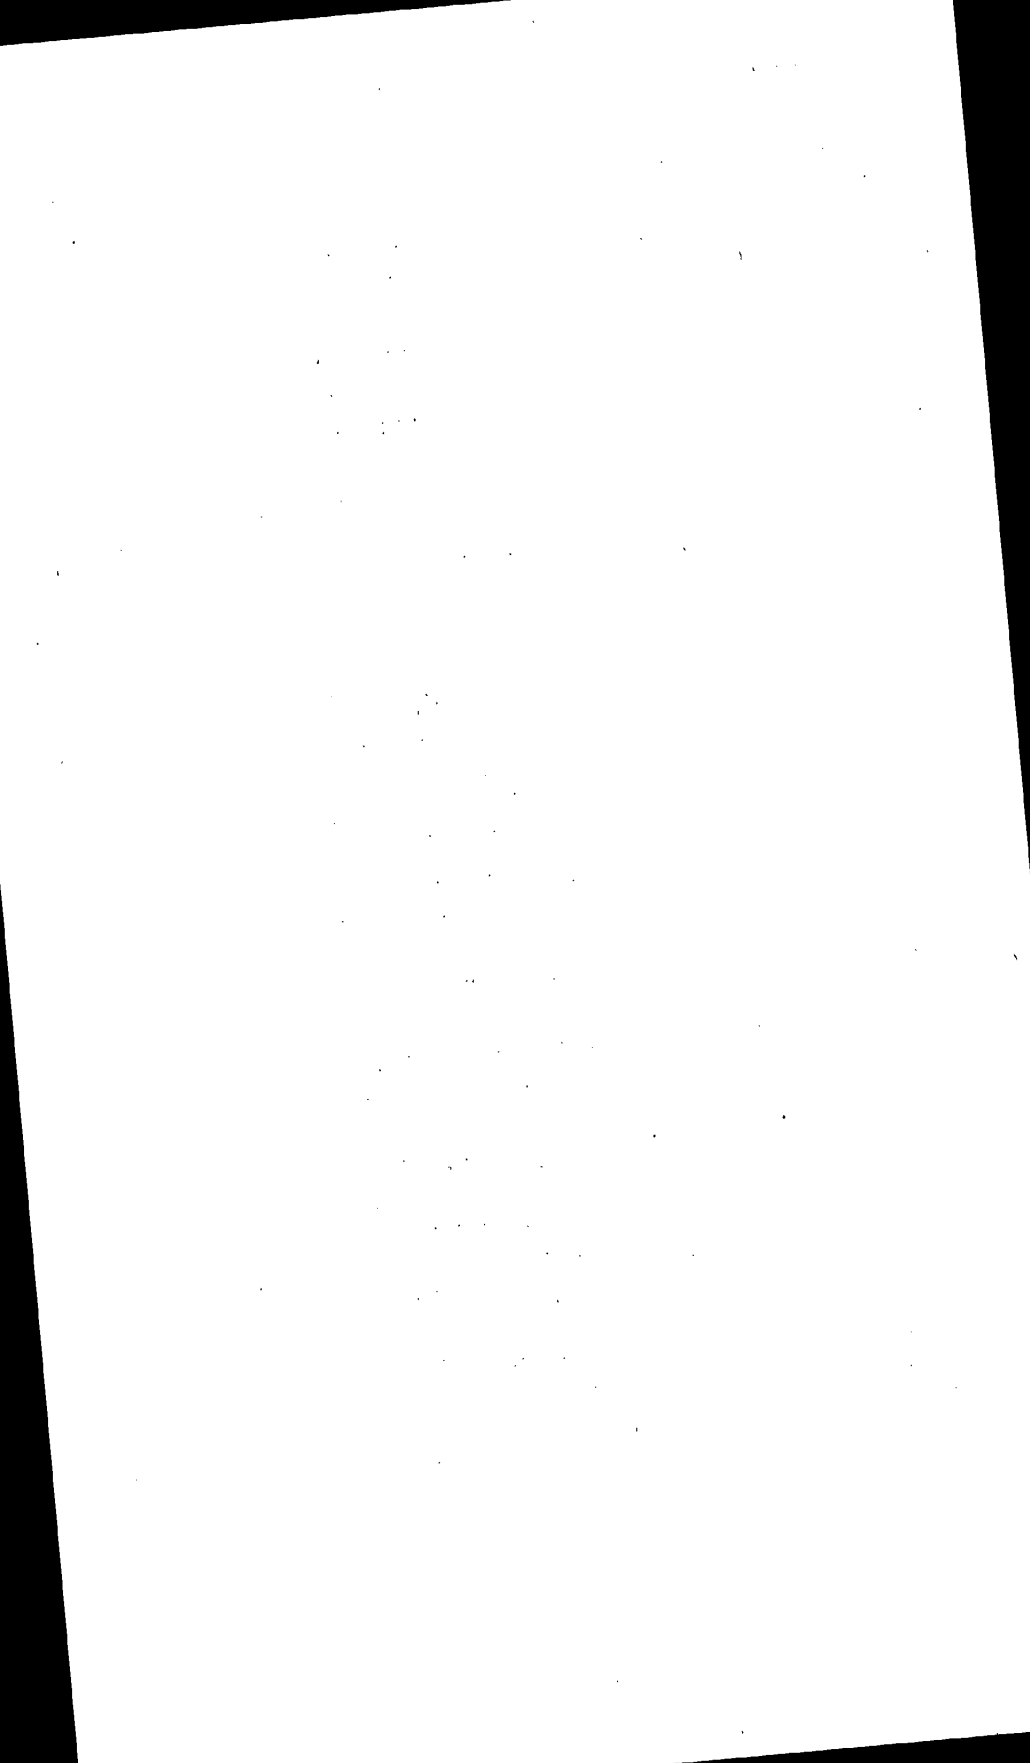

LIST OF TABLES

Table

1. Consumers' Outlay, Annually 1921-38	42
2. Percentage Composition of Consumers' Outlay, Annually 1921-38	42
3. Derivation of Total Outlay, Annually 1921-38	50
4. Income, Annually 1921-38	58
5. Adjustment of Income, Annually 1921-38	62
6. Comparison of Outlay and Income	67
7. Fraction of Outlay Estimated by Allocation between Consumer and Business Use, 1929	71
8. Analysis of Variance of Data in Table 6	83
9. Consumers' Outlay, Quarterly 1921-38	93
10. Components of Outlay, Before Adjustment for Seasonal Variation, Quarterly 1921-38	104
11. Derivation of Total Outlay, Seasonally Adjusted, Quarterly 1921-38	114
12. Residual Income, Seasonally Adjusted, Quarterly 1921-38	138
13. Short Term Income, Before Seasonal Adjustment, Quarterly 1921-38	148
14. Short Term Income, Seasonally Adjusted, Quarterly 1921-38	154
15. Long Term Income, Seasonally Adjusted, Quarterly 1921-38	162
16. Income Originating in Private Industry, Seasonally Adjusted, Quarterly 1921-38	168
17. Income Distributed by Government, Quarterly 1921-38	175
18. Derivation of Total Income, Seasonally Adjusted, Quarterly 1921-38	178
19. Year-to-Year Percentage Changes in the National Product	189
20. Comparison of Outlay, Income and Bank Debits, Seasonally Adjusted, Quarterly 1921-38	200

21. Measures of Agreement between Outlay and Income	206
22. Expenditure on Services Rendered Directly to Consumers, Annually 1921-38	226
23. Quarterly Net Income of Corporations: Distribution of Sample, All Groups Interpolated, by Number of Corporations	246
24. Quarterly Net Income of Corporations: Size of Sample by Percentage of Assets, Groups Interpolated by Discontinuous Sample	250
25. Quarterly Net Income of Corporations: Precision of the Estimates	260
26. Statutory Net Income after Taxes, All Corporations, Selected Industrial Groups, Showing Overlaps, Quarterly 1920-38	261
27. Statutory Net Income after Taxes, All Corporations, Selected Industrial Groups, Adjusted for Amplitude, Showing Overlaps, Quarterly 1920-38	289
28. Final Estimates of Corporate Net Profits, All Groups Interpolated, Seasonally Adjusted, Quarterly 1920-38	297
29. Quarterly Net Income of Corporations: Data Relating to Change of Classification in 1934	301
30. Results of Audit: Estimated Additions to Net Income after Taxes, All Corporations, Annually 1927-35	303
31. End-of-Quarter Inventories, 1929 Prices, Selected Manufacturing Groups, 1921-28	319
32. Manufacturing Inventories: Derivation of Net Change, Current Prices, Quarterly 1921-28	321
33. Manufacturing Inventories: Derivation of Net Change, Current Prices, Quarterly 1929-38	323
34. Distributive and Manufacturing Inventories: Derivation of Net Change, Current Prices, Quarterly 1921-38	325
35. Net Change in Inventories, All Groups, Annually 1921-38	328

36. Inventory Profits, and Residual Income after their Removal, Manufacturing, Seasonally Adjusted, Quarterly 1921-38	329
37. Inventory Profits, and Residual Income after their Removal, All Groups, Annually 1919-38	332
38. Residual Income, by Industrial Groups, Annually 1921-38	338
39. Short Term Income, by Industrial Groups, Annually 1921-38	340
40. Long Term Income, by Industrial Groups, Annually 1921-38	342
41. Income Distributed by Government, Annually 1921-38	342
42. Long Term Income, Seasonally Adjusted, Quarterly 1921-38: Finance, Service and Miscellaneous, Showing Imputed Rentals	344
43. Comparison of Estimates for Services in Table 22 with those given by Lough, 1921, 1927 and 1929	356
44. Comparison of Estimates for Consumers' Outlay in Table 1 with those given by Lough, Annually 1921-31	358
45. Comparison of Estimates for Services in Table 22 with those given by Warburton for 1929	359
46. Comparison of Estimates for Outlay in Table 3 with those given by Lough and Warburton for 1929	360
47. Comparison with Savings Estimate by Goldsmith, Annually 1933-38	360
48. Summary of National Resources Committee Estimates of Outlay and Income	362
49. Comparison with National Resources Committee Estimates	363
50. Comparison with National Resources Committee Estimate for Consumers' Outlay	364

LIST OF CHARTS

I. Gross Investment and Its Components	122-23
II. Composition of Outlay	124-25
III. Residual Income, Selected Industrial Groups	144-45
IV. Composition of Income	184-85
V. Comparison of Outlay and Income	196
VI. Net Income after Taxes, Manufacturing: Overlapping Data	293
VII. Net Income after Taxes, Mining and Other Nonmanufacturing: Overlapping Data	294
VIII. Net Income after Taxes, Final Estimates	295
IX. Residual Income, Manufacturing, Before and After Removal of Inventory Profit	315
