# Index

THE COMPREHENSIVE INDEX covers in detail materials in Chapters 1-3, 8, 9, 11, and 12. References to materials in other chapters are general.

The tabular index covers materials in tables and directly related notes and comments. It is arranged by the narrowest industrial divisions and the types of income distinguished under each. Column 2, 'Derivation of Absolute Total', contains references to the text of Part Four. For those industry type of income cells for which there is no entry in Column 2 the absolute totals are sums of components referred to elsewhere in the index. Column 5, 'Analytical Material', contains references to tables showing averages, indexes, and measures of change over the period and during business cycles.
