

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Studies of Supply and Demand in Higher Education

Volume Author/Editor: Charles T. Clotfelter and Michael Rothschild, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-11054-0

Volume URL: <http://www.nber.org/books/clot93-1>

Conference Date: May 17-19, 1991

Publication Date: January 1993

Chapter Title: List of Contributors, Indexes

Chapter Author: Charles T. Clotfelter, Michael Rothschild

Chapter URL: <http://www.nber.org/chapters/c6104>

Chapter pages in book: (p. 285 - 296)

# Subject Index

- Academic careers: alternative paths to, 161–68; progression by field of study to, 157–61, 169–72tt; relation of choice to academic performance, 154–57
- Administrators, university: in competitive pricing, 23; lack power and incentive, 38–41. *See also* Assets, university (endowment and nonendowment); Decision making; Endowment management; Endowment portfolio
- Admissions policies, 16–20, 129–30
- Alumni representatives, 38
- American Freshman Survey, 133
- Assets, university (endowment and nonendowment), 213–18, 219–20, 239–40
- Black students: as high school graduates, 65–66; trend in college entry for, 64–65, 69–70, 89–92
- Budget constraints, 15, 21
- Career choices: estimates of undergraduate, 148–54; uncertainty about, 146, 182. *See also* Academic careers
- Choice: factors influencing student, 23–27, 59–60; for quality of higher education, 250–61; relation of quality to, 129–30. *See also* Career choices; Feedback process; Preference function; Public choice model; Schooling choices
- COFHE. *See* Consortium on Financing Higher Education (COFHE) survey
- COFHE schools, 133n21
- Colleges/universities: brand-name, 24–25, 28, 34, 134; effect of concentration of elite in, 143; for-profit motivation, 39–40; importance of reputation for, 130–31, 134; intertemporal complementarity and substitutability of activity, 220–23, 240, 241; marketplace decisions of, 30–33; as monopolies, 33–34; prices of activities, 241; as profit maximizers, 20–22; resistance to technological change, 22–23. *See also* Competition; Endowment management; Endowment portfolio
- Competition: among different kinds of undergraduate education, 15–16; among universities, 20–34, 121–22; circumstances for loss in educational marketplace of, 143; effect of price discrimination on, 26–27; in higher education marketplace, 3–4, 38–39; in market for educational services, 23. *See also* Price system
- Consortium on Financing Higher Education (COFHE) survey, 147–48
- Costs: defining relevant marginal, 40–41; differentials in education, 27–28; incentive to reduce, 38; uncertainty of university activity, 216. *See also* Tuition levels
- CPS data. *See* Current Population Survey (CPS) data
- Cross-subsidization: among university activities, 12; arguments for and against, 13–15

- Current Population Survey (CPS) data, 64, 66–68, 105–7, 112, 116
- Dartmouth College case*, 245–46, 260
- Data sources: for analysis of college entry trends, 64, 66–68, 105–7, 112, 116; for analysis of educational selectivity, 113, 116; for choices in public higher education, 274–78; for estimates of FTSEG student financial support, 192–94; for estimates of school enrollment and graduation, 113; for estimates of top students in elite schools, 123, 126–28; Harvard Senior Survey as, 146–49
- Decision making: in colleges and universities, 38–39; factors influencing student, 129–39; under uncertainty, 58; for university asset allocation, 213–18
- Degrees: decline in Ph.D., 183–84; trend in doctorates granted, 183–84; value of elite school, 122–24
- Demand: for educated work force, 62; for educational credentials, 134; effect on public enrollment rate, 261–64, 267; for elite universities, 132–33; for faculty, 22, 145, 183; for nonendowment assets, 225–34; in public choice model, 264, 267; for university output, 22
- Duncan socioeconomic index for occupations, 79
- Economies of scope (in higher education), 15–16
- Education: differences in costs of undergraduate, 27; effect on economy of higher, 1; graduate and undergraduate as joint product, 14–16; reasons for better, 125
- Educational attainment, 64–65, 72–83
- Elite in society, 141
- Elite schools: quality of education at, 125; questioned definition of, 141–42; trend in concentration of top students in, 130–36; value of degree from, 122–24. *See also* Feedback process; Nonelite schools
- Employer recruiting, 136–39
- Endowment management: issues in, 217–18; objectives of, 237–39, 241–42; with other sources of income, 225–234; standard approach to, 213
- Endowment portfolio: investment selection for, 213–14; optimal asset allocation for, 215–18; wealth and substitution effects on, 214
- Endowment portfolio model: description of, 218–25; with other income sources, 225–34; review of, 239–40
- Enrollment: determinants of rate of, 261–71; of part-time science and engineering graduate students, 190, 191t
- Enrollment levels: comparison of public and private school, 243, 246–50; determinants of, 244–61; impact of state legislation on, 243
- Entry: of college/university into marketplace, 30–33; dependency and nondependency as variables in college, 92–95; equality of opportunity for college, 100–103; factors influencing college, 62–64, 72–88; influence of social background on college, 83–88; student trend in college, 89–92
- Ethnicity. *See* Black students; Hispanic students; White students
- Exit (of college/university from marketplace), 32–33
- Expectations: effect of misspecified, 54–55; measurement of, 46–47
- Expectations formation: assumptions about, 43–44; econometrics of, 45–46; theories of, 47. *See also* Human capital model
- Faculty: power of, 38; relative autonomy of, 2; shortages of, 2–3
- Feedback process, 129–30, 136
- Female students: trend in college entry for, 64, 69–71
- Financial support: effect on university of external, 184–85; shifting levels of external and institutional, 187–205, 207–9
- For-profit institutions, 39–40
- Full-time science and engineering graduate (FTSEG) students: determinants of support for, 197–200, 202–3tt; disaggregation by type of support, 200–202; sources of financial support for, 185–90; supported by institutional funds, 190–91
- Gourman index, 250–51
- Graduate students: effect of increased federal support for, 185; federal government support for FTSEG, 185–90
- Harvard Senior Survey: comparison of data with COFHE survey, 168, 173–74; description of and use for, 147–49

- Hedging (of university assets), 216–17, 237.  
*See also* Assets, university; Endowment management
- Higher education: contribution of, 42; historical development of private, 245–46; public and private choice for quality in, 250–61. *See also* Colleges/universities
- Higher education, public: factors influencing enrollment in, 243; historical development of, 245–46; model of public choices in, 261–71; public choice for, 244–45; variation in opportunities offered, 250–51; variations in state expenditures for, 269–71, 282–83
- High School and Beyond survey (1980), 180
- Hispanic students: as high school graduates, 65; trend in college entry for, 65, 69–70, 92
- Human capital: absence of good markets for, 21–22; education as investment in, 43
- Human capital model, 2, 48–54, 59
- Incentives: lack of, 38–42; to reduce costs, 38
- Income, realized, 50, 53–54
- Income returns to schooling, 54, 59–60
- Inputs: in higher education marketplace, 22–23; incoming students as, 13; to university production function, 241
- Investment: education as, 43; higher education as, 21–22. *See also* Endowment management; Endowment portfolio
- Legislation: for provision of public higher education, 244–46; reflecting public school enrollment, 243. *See also* Higher education, public; Spending, state; Subsidies; Tuition levels
- Minority groups. *See* Black students; Hispanic students
- Morrill Acts (1862, 1890), 245
- National Intern Matching Program (NIMP), 17–18
- National Longitudinal Study of High School Class of 1972, 123, 180, 182

## Books of Related Interest

### **Economic Challenges in Higher Education**

CHARLES T. CLOTFELTER, RONALD G. EHRENBURG, MALCOLM GETZ,  
and JOHN J. SIEGFRIED

This book analyzes three crucial issues: the growth and composition of undergraduate enrollments, the supply of faculty in the academic labor market, and the cost of operating colleges and universities. "Necessary reading for anyone who wants to understand the current state of higher education in this country today and be equipped to chart its future course."—Sharon P. Smith, *Journal of Economic Literature*

An NBER Monograph

### **The Almanac of Higher Education, 1993**

The Editors of *The Chronicle of Higher Education*

This unique professional resource offers an overview of national indicators of the health and financing of U.S. higher education, as well as state-by-state reports on demographics, political leadership, and key statistics about faculty, students, costs, and spending. This volume includes the November 1992 election results and an updated "Enrollment by Race" appendix.

### **Race and Schooling in the South, 1880-1950: An Economic History**

ROBERT A. MARGO

Margo explores the interrelation among race, schooling, and labor market outcomes within a particular historical and geographic context. "First-rate econometric history. Margo knows the schooling data better than anyone, and his scrupulous analysis of these data establishes a new standard."—Robert Higgs, author of *Competition and Coercion: Blacks in the American Economy, 1865-1914*
