

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: The Effects of U.S. Trade Protection and Promotion Policies

Volume Author/Editor: Robert C. Feenstra, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-23951-9

Volume URL: <http://www.nber.org/books/feen97-1>

Conference Date: October 6-7, 1995

Publication Date: January 1997

Chapter Title: List of Contributors, Indexes

Chapter Author: Robert C. Feenstra

Chapter URL: <http://www.nber.org/chapters/c6186>

Chapter pages in book: (p. 343 - 356)

## Books of Related Interest

### **The Political Economy of Trade Protection**

*Edited by ANNE O. KRUEGER*

In clear and concise language, this volume examines the level, form, and evolution of American trade protection. In case studies of trade barriers imposed during the 1980s to help the steel, semiconductor, automobile, lumber, wheat, and textile and apparel industries, the contributors trace the evolution of efforts to obtain protection, protectionist measures, and their results. This study will appeal to anyone interested in trade issues.

An NBER Project Report

### **The Political Economy of American Trade Policy**

*Edited by ANNE O. KRUEGER*

Eight analytical histories explore the political and economic determinants of trade protection, providing a wealth of information on key American industries to document the process of seeking and conferring protection. Also included is a cross-section study of the determinants of administered protection and a concluding essay that suggests that current protection practices fail to consider adequately economic efficiency, the public good, and a wide range of indirect negative economic effects. This in-depth study will appeal to specialists in the fields of economics, business, and public policy.

An NBER Project Report

### **Empirical Studies of Strategic Trade Policy**

*Edited by PAUL KRUGMAN AND ALASDAIR SMITH*

This volume looks at the experience of specific industries in order to determine the effectiveness of strategic trade policy in promoting economic growth. The nine papers cover the U.S. and European auto industries, the U.S. steel industry, the commercial aircraft industry, airline deregulation in Scandinavia, and labor and industrial policy in Korea and Taiwan. The authors refine the basic techniques for measuring policy effectiveness, extend them to encompass industry dynamics, and test the implications of new trade models.
