This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Rational Expectations and Economic Policy

Volume Author/Editor: Stanley Fischer, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-25134-9

Volume URL: http://www.nber.org/books/fisc80-1

Publication Date: 1980

Chapter Title: List of Participants, Index

Chapter Author: Stanley Fischer

Chapter URL: http://www.nber.org/chapters/c6268

Chapter pages in book: (p. 285 - 294)

List of Participants

Professor Costas Azariadis
Department of Economics
University of Pennsylvania
Philadelphia, PA 19174

Professor Robert Barro
Department of Economics
University of Rochester
Rochester, NY 14627

Professor Olivier Blanchard
Department of Economics
Harvard University
Cambridge, MA 02138

Professor Alan Blinder
Department of Economics
Princeton University
Princeton, NJ 08540

Professor Karl Brunner
Graduate School of Management
University of Rochester
Rochester, NY 14627

Professor Phillip Cagan
Department of Economics
Columbia University
New York, NY 10027

Professor Rudiger Dornbusch
Department of Economics
Massachusetts Institute of Technology
Cambridge, MA 02139

Professor Martin Feldstein
Department of Economics
Harvard University
Cambridge, MA 02138

Professor Stanley Fischer
Department of Economics
Massachusetts Institute of Technology
Cambridge, MA 02139

Professor Jacob Frenkel
Department of Economics
University of Chicago
Chicago, IL 60637

Professor Benjamin Friedman
Department of Economics
Harvard University
Cambridge, MA 02138

Professor Robert Gordon
Department of Economics
Northwestern University
Evanston, IL 60201

Professor Jerry Green
Department of Economics
Harvard University
Cambridge, MA 02138

Professor Herschel Grossman
Department of Economics
Brown University
Providence, RI 02912

Professor Robert Hall
Department of Economics
Stanford University
Stanford, CA 94305

Professor Peter Howitt
Department of Economics
University of Western Ontario
London, Ontario
Canada

Dr. John Kraft
National Science Foundation
Washington, DC 20550

Dr. David Lindsey
Board of Governors of the Federal Reserve System
Washington, DC 20551

Professor Robert Lucas
Department of Economics
University of Chicago
Chicago, IL 60637

Professor Bennett McCallum
Department of Economics
University of Virginia
Charlottesville, VA 22901

Dr. Charles McLure
National Bureau of Economic Research
Cambridge, MA 02139

Dr. Frank Morris
President, Federal Reserve Bank of Boston
Boston, MA 02106

Professor Charles Nelson
Department of Economics
University of Washington
Seattle, WA 98195

Dr. Dan Newlon
National Science Foundation
Washington, DC 20550

Professor Michael Parkin
Department of Economics
University of Western Ontario
London, Ontario
Canada

Professor Edmund Phelps
Department of Economics
New York University
New York, NY 10003

Professor James Pierce
Department of Economics
University of California, Berkeley
Berkeley, CA 94720

Professor William Poole
Department of Economics
Brown University
Providence, RI 02912

Professor Edward Prescott
Graduate School of Industrial Administration
Carnegie-Mellon University
Pittsburgh, PA 15213

Professor Michael Rothschild
Department of Economics
University of Wisconsin
Madison, WI 53706

Mr. Mark Rush
Department of Economics
University of Rochester
Rochester, NY 14627

Professor Robert Russell
Council on Wage and Price Stability
Washington, DC

Professor Paul Samuelson
Department of Economics
Massachusetts Institute of Technology
Cambridge, MA 02139

Dr. Frank Schiff
Committee for Economic Development
Washington, DC 20006

Professor Robert Shiller
Department of Economics
University of Pennsylvania
Philadelphia, PA 19174

Professor Robert Solow
Department of Economics
Massachusetts Institute of Technology
Cambridge, MA 02139

Professor John Taylor
Department of Economics
Columbia University
New York, NY 10027

Professor Neil Wallace
Department of Economics
University of Minnesota
Minneapolis, MN 55455

Dr. Robert Weintraub
House Banking Committee
Washington, DC 20515

Dr. Mark Willes
President, Federal Reserve Bank of Minneapolis
Minneapolis, MN 55480

Index

Adaptive expectations, 87
Aggregate demand, determinants of, 76–80, 254; dynamics of, 88
Aggregate supply, determinants of, 81–84, 105–6. *See also* Lucas supply function; Output equation; Supply function
Agricultural prices, 251
Anticipated inflation, 214–18; effect on investment, 217; and real balances, 216
Anticipated money shocks: defined, 82; effect on real output, 2, 213–18; effect on price level, 82–100; measured, 24
Arbitrage conditions, 80, 111, 165
Arrow-Debreu model, 264
Assets markets, 77, 79–81
Asymptotic sampling theory, 126

Backward induction, determining equilibrium, 182
Bagehot, W., 224
Bailey, S. K., 201
Barro, Robert, 1, 3, 8, 11–13, 15–19, 75, 78, 83n, 102, 149, 152–53, 157, 162, 172, 195, 206, 211, 213, 218, 220n, 221n, 223, 235, 254
Becker, G. S., 177, 222n
Bellman's principle of optimality, 170n, 181
Bicksler, J. L., 147
Blanchard, Olivier Jean, 2, 18–19, 50
Blinder, Alan A., 49–54, 57n, 63n, 90, 106, 114, 195, 243, 283
Box-Jenkins forecasting technique, 147–48
Brock, W. A., 216
Brookings Papers on Economic Activity, 249, 280n
Brunner, Karl, 244
Bryant, J., 215n
Buchanan, J. M., 209n, 244
Bulow, J., 22n
Burbidge, John B., 259n
Bureau of Labor and Statistics, 47n, 147

Cagan, Phillip, 82, 87, 157–60, 244, 283
Calvo, A. G., 114, 170, 232n, 236
Capital goods, price of, 79, 111, 173; Tobin's *q*, 9, 104, 112
Capital-output ratio, 175
Capital stock: and corporate tax rate, 173–75, 189; and investment credit rate, 173, 189; golden rule, 216
Carlson, J. A., 147–48
Census X-11 program, 126
Consumption, determinants of, 76–78
Consumption function, 104
Consumption loans model, 215
Cooper, J. P., 55n
Corrado, C., 87, 89
Council of Economic Advisors: established, 201; and benchmark unemployment rate, 256. *See also* Employment Act of 1946

Cross equation restrictions, 69–70, 100, 162; and unanticipated money growth hypothesis, 28–30

Darby, M. R., 124
Debreu, G., 185n
Demand for money equation, 84, 125–27, 130–31; elasticity of, 79
Diamond, P. A., 185n
Dillar, S., 140
Disequilibrium models, 14, 225, 236
Drazen, A., 216
Dynamic models: stability of, 85; of aggregate demand, 88

Eckstein, O., 228, 282
Econometric models: annual vs. quarterly data, 39–48; predictive ability and parameter invariance, 2, 5, 17, 102–3, 192–93, 222–29; simulations, 87–100
Economic Stabilization Agency, 174
Efficient taxation, 185
Elasticity: of labor supply, 3, 183; of demand for money, 79; of output supply, 27, 63, 79; of price level, 27
Employment Act of 1946, 200–203, 208
Equilibrium, definition of, 180–82
Expectations equilibria, 119, 135

Fair, Ray C., 51, 103n
Fama, E. F., 118, 120, 143–44, 146, 161
Federal expenditure, 24, 30, 33
Federal funds rate, 270
Federal Reserve system: the Accord of March 1951, 138; Act of 1913, 135; independence of, 9; as a lender of last resort, 231; performance of, 135–43; reaction function of, 51, 54, 67n, 70–71 112–13, 117, 125–28
Feldstein, Martin, 124, 146, 163–64, 169n, 187–89, 217n
Fiat money, 224
Fiscal policy: during 1971–74, 273; effectiveness of systematic policy, 15–16, 276; nonneutrality of, 2; rules for, 169–70, 186–87. *See also* Policy rules vs. discretionary rules
Fischer, Stanley, 14–15, 19, 50, 52–53, 55n, 63n, 66n, 81, 90, 106, 119
Fisher effect, 159, 162
Fisher, I., 214n
Fixed investment equation, 77–79
Fixed money growth rule, institutional framework for, 208–9. *See also* Policy rules vs. discretionary policy; Political process
Flexible accelerator mechanism, 193
Forward solutions, to dynamic processes, 86
Friedman, Benjamin, 71, 282
Friedman, Milton, 7, 47n, 132, 154, 159, 186, 199–202, 207, 212, 218n, 223, 224n, 227, 229, 232, 242
Friedman program, 199–200, 206–9
Froyen, Richard T., 52
Furstenberg, G. M. von, 84n, 104

General Maximum Price Regulation, 134
Germany, David, 219n
Ghez, G. R., 177, 222n
Gibson's Paradox, 144n
Glass, Carter, 136, 138
Gordon, D. F., 266
Gordon, Robert J., 3, 18, 55–63, 114, 211n, 244, 283
Government: behavior as solution to a maximum process, 8, 13, 16; and ability to control fluctuations, 6; ability of democratic process to control, 205; and reaction speed compared with private agents, 19, 212. *See also* Political process
Government bonds, as components of wealth, 77–78
Granger, C. W. J., 146
Granger-Sims causality, 149, 153, 155
Gray, J. M., 16
Great Depression, and monetary instability, 207, 227, 232. *See also* Monetary policy
Green, Jerry, 164, 187, 244
Grossman, Herschel I., 1, 27, 56, 165, 243–44, 254

Hall, Robert E., 20, 71, 114, 165, 175–76, 190–91, 195, 221n, 235–38, 282
Hanson, J., 15
Harberger, A., 185n
Hatanaka, M., 105
Hercowitz, Z., 2, 13, 15
Hess, P. J., 147
Hicks, J. R., 256
Hodrick, R. J., 192n

Howitt, Peter, 241–43
Human capital, as a component of wealth, 76
Hynes, A., 266
Hyperinflations, 122–23

Identification problems, 59–62, 100, 104–5, 126
Index bonds, 121–22, 124, 160
Inflation: effect on capital stock, 174, 217; cost-push, 69, 261–62; interaction with tax system, 217; repressed, and unemployment, 255; anticipated, 214–18
Inflationary expectations, 6–7, 11–12, 126; in steady state, 84–85; and real interest rates, 50, 67
Inflation tax, 217–18
Information: costs of acquiring, and price inflexibility, 10; and nonneutrality hypothesis, 12–15, 243–44
Interest rates: as predictors of inflation, 118–56; and interactions with tax rates, 163–64; seasonal fluctuations in, 135–43. *See also* Real interest rate
Intertemporal substitution of leisure, 2–3, 172, 177, 188–89, 195
Investment, in a static model, 76–79; in a dynamic framework, 176; effect of inflation on, 217
Investment credit rates, 2; as a stabilization tool, 185–89
IS curve, 107–10

Joines, D., 148
Joint estimation procedure, 24–32, 69
Jorgenson, D. W., 175

Keynes, J. M., 234
Keynesian theory, 5, 50, 52, 190, 262–63; and the Employment Act, 201, 209; and forecasting theory, 203; and nonneutrality of money, 221; based on price inflexibility–non-market-clearing models, 14–15, 221, 236; and IS-LM models, 237
King, Robert, 15
Kydland, Finn, 2, 19, 20, 232

Labor supply and interest rates, 215
Laffer curve, 204
Leiderman, L., 27n
Lessard, D., 217n
Lilien, D., 236
Lindsey, David E., 111–13
Liquidity effect, 132
LM curve, 107–10
Lucas, Robert E., Jr., 2–3, 11–12, 14–15, 17, 20, 27, 49–50, 53, 55, 75, 102, 118, 170, 172, 175, 177, 184, 188, 192, 218, 222, 226n, 228, 264, 266–67
Lucas-Sargent-Wallace hypothesis, 50, 53, 55–70, 118; and stabilization policy, 55–57
Lucas supply function, 51–53, 118, 221–22

McCallum, Bennett T., 14–15, 19, 50n, 102–6, 111
McCauley, F. R., 136
McFadden, D. L., 185n
Malinvaud, E., 253–55, 262
Mancke, Richard B., 274n
Markets: existence of, 266; clearing vs. nonclearing, 3, 7–8, 14–15, auction vs. customer, 56, 250
Marks, Robert E., 254n
Maximum likelihood criterion, 28, 33, 34, 182
Mayer, T., 176
Metzler, L., 76
Military personnel in unemployment equation, 2, 5, 30–32, 34–39, 54
Mill, J. S., 157
Minimum wage and unemployment, 25
Mirlees, J. A., 185n
Misallocation hypothesis: defined, 12–13; and nonneutrality hypothesis, 16–17; and variance hypothesis, 12–13
Modigliani, F., 171, 211n, 217n, 226n, 228
M1, 24, 64–66
Monetary policy: accommodating, 263, 274; countercyclical, justified, 224–26; during 1971–75, 228, 269–82; expansionary, 263, 276; as a feedback rule, 237; instability of, and Great Depression, 207, 227, 232; optimal feedback rules, 11–12, 15, 51–52; systematic effectiveness of, 15–16
Monetary transmission mechanism, 1–2, 50, 94–95, 216; via real balance effect or interest rates, 216
Money growth rates: equation for, 24, 32–33, 39–40, 64–66; fixed rule vs.

Money growth rates (*cont.*)
discretion, 211–48, 277–89; historical analysis of, 135–54; variance of, 12, 158. *See also* Policy rules vs. discretionary policy
Morris, Frank, 196, 244, 283
MPS model, 87–91
Mundell effect, 98

Natural level of output, 7, 11, 219
Natural rate hypothesis: defined, 6; based on clearing or non-market-clearing models, 7–8; estimates of, 53–54; and rational expectations hypothesis, 6–9. *See also* Natural rate of unemployment; Phillips curve
Natural rate of unemployment, 31–32, 54, 270
Nelson, Charles R., 71, 147, 160–62, 195
Neutrality hypothesis: defined, 10; and rational expectations, 10–17; consistency with nonneutrality hypothesis, 13–15
Newbold, P., 146
Noncooperative game, 265
Non-market-clearing model, 14–16; and risk shifting, 14. *See also* Keynesian theory; Price rigidity
Nonneutrality hypothesis: defined, 10–11; and rational expectations, 10–17; consistency with neutrality hypothesis, 13–15; and anticipated inflation, 214–18
Nordhaus, W. D., 55, 104

Observational equivalence, 52, 62
Okun, A. M., 250
OPEC: and oil price rises as exogenous supply shocks, 250–51, 259, 262–63, 270; and oil embargo, 274
Optimal linear forecasts, 187
Optimum fiscal policies: based on fiscal nonneutrality, 2; need for, 170–71, 186–87. *See also* Fiscal policy
Output equation, 25, 34
Outside money, as a component of wealth, 78

Parkin, Michael, 19, 107–11
Pashigian, P., 193
Perry, George L., 193
Phelps, Edmund S., 7, 14, 50, 114, 119, 185, 195, 236, 250
Phillips curve: and aims of the Federal Reserve, 232; in Keynesian model, 256, 262; and natural rate hypothesis, 6; due to price inflexibility, 221, 264; stability of, as a basis for policy, 204, 219, 271–72
Pierce, James L., 162–63, 279–82
Plosser, C. I., 25n
Polemarchakis, H., 222n

Rational Expectations and Economic Policy

Edited by

Stanley Fischer

"Several areas in economics today have unprecedented significance and vitality. Most people would agree that stabilization policy ranks with the highest of these. Continuing inflation and periodic serious acceleration of inflation combined with high and secularly rising unemployment combine to give the area high priority. This book brings us up to date on an extremely lively discussion involving the role of expectations, and more particularly rational expectations, in the conduct of stabilization policy. . . . Anyone interested in the role of government in economics should read this important book."
—C. Glyn Williams, *The Wall Street Review of Books*

"This is a most timely and valuable contribution. . . . The contributors and commentators are highly distinguished and the editor has usefully collated comments and the ensuing discussion. Unusually for a conference proceedings the book is well indexed and it is also replete with numerous and up-to-date references. . . . This is the first serious book to examine the rational expectations thesis in any depth, and it will prove invaluable to anyone involved with macroeconomic policy generally and with monetary economics in particular."—G. K. Shaw, *The Economic Journal*

"This volume represents an important contribution to the literature, if for no other reason than the quality of the debate and the interchange of ideas apparent in the comments on and discussions of the papers. Beyond this, the individual papers themselves make important contributions to our understanding of business cycle behavior and the extent to which government policy could, or should, attempt to alter the characteristics of these business cycle fluctuations. . . . *Rational Expectations and Economic Policy* is representative of the broadest spectrum of economic thinking with respect to weaknesses in current approaches to macroeconomic theory and policy."—Stephan A. McCafferty, *Journal of Money, Credit, and Banking*

STANLEY FISCHER, professor of economics at MIT, is coauthor, with Rudiger Dornbusch, of the textbook *Macroeconomics* and author of numerous journal articles.
