Author's Acknowledgments

THROUGHOUT the study helpful advice was given by a National Bureau staff committee consisting of Moses Abramovitz, A. F. Burns, N. I. Stone and Leo Wolman, with F. C. Mills as chairman. My obligations to Dr. Burns are especially heavy in this respect. To Dr. Mills I owe, further, the advantage of free use of his extensive unpublished and published work on manufacturing output. The manuscript was read and useful comments were made also by other members of the National Bureau staff, Harold Barger, W. H. Shaw and I. H. Siegel; by several Directors of the National Bureau; and by Witt Bowden of the U. S. Bureau of Labor Statistics and E. W. Browne of the U. S. Bureau of the Census.

T. J. Fitzgerald and H. H. McClure of the U. S. Bureau of the Census replied to many queries concerning the data in the Census of Manufactures; and David Weintraub and Harry Magdoff, of the National Research Project of the Work Projects Administration, permitted me to examine some of their work before publication.

My greatest debt is to my co-workers. Julius Shiskin took charge of most of the computations, helped prepare the text of the appendices, and made substantial suggestions leading to the improvement of the rest of the text. Corolynn L. Lee, Céleste N. Medlicott and Jacob Gould rendered valuable assistance throughout the study not only by participating in the laborious task of computation and preparation of the tables, but also by checking the text and making many helpful comments. I am deeply grateful, in addition, to Maude E. Remey and Mildred G. Uhrbrock, who were of great help in the early stages of the study, and to Hans Landsberg and

Sam H. Schurr, who assisted in many ways in the later stages. In the preparation of Appendix B, Mr. Shiskin was aided by Gerald Fischer, Grace Kastelansky, Fritz Lewy and Francis Pucciani, as well as by other members of our staff. The charts were carefully drawn by H. Irving Forman. The manuscript was edited by Bettina Sinclair, who brought genuine interest and skill to the arduous task of turning a work of the present character into a reasonably readable volume.
