

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Economic Aspects of Health

Volume Author/Editor: Victor R. Fuchs, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-26785-7

Volume URL: <http://www.nber.org/books/fuch82-1>

Publication Date: 1982

Chapter Title: List of Contributors, Indexes

Chapter Author: Victor R. Fuchs

Chapter URL: <http://www.nber.org/chapters/c6554>

Chapter pages in book: (p. 325 - 334)

List of Contributors

Drs. Lee and Alexandra Benham
Division of Health Care Research
Washington University School of
Medicine
4566 Scott Avenue, Box 8113
St. Louis, MO 63110

Professor Theodore Bergstrom
Department of Economics
University of Michigan
Ann Arbor, MI 48104

Professor Victor R. Fuchs
National Bureau of Economic
Research
204 Junipero Serra Boulevard
Stanford, CA 94305

Dr. Michael Grossman
National Bureau of Economic
Research
269 Mercer Street
New York, NY 10003

Jeffrey Harris, M.D.
7 Spruce Court
Boston, MA 02108

Dr. Will Manning
RAND Corporation
1700 Main Street
Santa Monica, CA 90406

Dr. Joseph Newhouse
RAND Corporation
1700 Main Street
Santa Monica, CA 90406

Professor Sherwin Rosen
Department of Economics
University of Chicago
1126 East 59th Street
Chicago, IL 60637

Dr. Mark Rosenzweig
Department of Economics
University of Minnesota
Minneapolis, MN 55455

Professor David Salkever
School of Hygiene and Public Health
Johns Hopkins University
615 North Wolfe
Baltimore, MD 21205

Professor T. Paul Schultz
Economic Growth Center
Box 1987 Yale Station
New Haven, CT 06520

Dr. Robert A. Shakotko
Department of Economics
Columbia University
810 International Affairs
New York, NY 10027

Professor Donald Shepard
Center for Analysis of Health
Practices
Harvard School of Public Health
677 Huntington Avenue
Boston, MA 02115

Professor Paul Taubman
Department of Economics
3718 Locust Walk CR
University of Pennsylvania
Philadelphia, PA 19104

Dr. John E. Ware, Jr.
Senior Social Psychologist
RAND Corporation
1700 Main Street
Santa Monica, CA 90406

Professor Richard Zeckhauser
Kennedy School of Government
Harvard University
Cambridge, MA 02138

Subject Index

- Age: and health, 125, 126; and maternal education, 26, regressions of health status on, 114
- Age-specific mortality: changes in, 290–93; rates for white males, 267
- American College of Obstetricians and Gynecologists, 17
- American Psychiatric Association, 206, 207
- Annuities, 306
- Bayesian sufficiency, 189
- Becker-Lewis-Tomes interactive model, 55
- Birth characteristics: and estimates of marginal products of inputs at sample means, 76; and socioeconomic variables and health programs, 78–81; production function estimates, 70–78; white population, 89–89
- Birth order and child health, 80
- Birthweight: adjusted for neonatal mortality rate, 40; and gestational age, 35; and health-related behavior of mothers, 81; and neonatal mortality, 38; and relation to neonatal mortality, 39; by gestation, 64; in relation to neonatal care and month of initiation, 42; normalized for gestation, 65; production function estimates for white population, 90–91; production function estimates normalized for gestation, 74–75; specific mortality and relation to prenatal care, 41
- Black mothers, 15; and gestation period, 78; and live births, 18; and termination of pregnancy, 26; sample characteristics of pregnancies, 24
- Catastrophic health insurance, 314
- CAT scanners, 279
- Center for Health Administration Studies, 144
- Central Limit Theorem, 156
- Certificate of Need, 275
- Child health: and birth order, 80; and delay in seeking prenatal care, 80; and parental behavior factors, 60; and smoking during pregnancy, 80
- Child health endowments and family consumption decisions, 224
- Child health input, demand equation estimates, 68–70
- Child health variables: effects on maternal labor supply and earnings, 234–35; effects on paternal labor supply and earnings, 237–39
- Children and chronic health conditions, 222
- Children's disabilities: and maternal labor, 223; and parental labor supply, 223
- Chronic health conditions and children, 220
- Cigarette smoking and socioeconomic variables, 112
- Cobb-Douglas case, 67, 68
- Coinurance, 166, 312
- Commission on the Cost of Medical Care, 275
- Cost-effectiveness paradigm and health intervention, 271

- Current Population Survey, 228
Cystic fibrosis, 223
- Demand-supply framework, 1
Deviant Children Grown Up, 203
Diagnostic and Statistical Manual, Mental Disorders, The, 205
Diet and health status, 95
Disabled families, characteristics of, 229–31
- Earnings: and children's health variables, 237–39; and educational choices, 200; and labor force, 203; and maternal work probability regressions, 227; and psychiatric diagnosis, 209, 212; and psychiatric diagnosis and IQ, 214; effects on children's health variables, 234–236
Education: effect on health, 121, 122, 185; and marital status, 123, 126, 127, 129, 135; and medical care, 135; and psychiatric diagnosis, 209; as sequential choice, 186
Educational choices and earnings, 200, 201
Education for All Handicapped Act, 246
Employment and psychiatric diagnosis, 209
Epidemiology, 264
Exercise and health status, 95
- Family consumption decisions and child health endowments, 224
Fetal growth rate and smoking levels, 77
Fetal selection and unobserved characteristics, 26–33
Fetal selection process, model of, 29–31
Fetal survival characteristics, 47
Food and Drug Administration, 282
- Gestation, length of and prenatal care, 22
Gestation period: and black mothers, 78; and white mothers, 78
Gestational age and mean birthweight, 35
Gompertz function, 264
Group Health Cooperative of Puget Sound, 153
- Harris, Patricia, 279
Health: and age, 125, 126–30; and education, 185; and medical expenditures, 126; and schooling, 3, 95; changes in, 136–37, 138; current and past utilization behavior, 144; effects of education on, 121, 122; effect of marital status on, 122; effect of spouse's education on, 122; married men's, 129; relation to education and marital status, 127
Health behavior and time preference, 113
Health care and health insurance model for analysis, 299–301
Health determinations functions, 124
Health insurance, application of plan, 312–15; model for, 305–12
Health Insurance Study, 143, 148, 153, 166
Health intervention: and cost-effectiveness paradigm, 272; and heterogeneity, 259; and policy choices, 276; and voluntary vs. involuntary behavior, 280–81; ethical problem of, 276; model for, 285–90
Health Interview Survey, 223
Health levels and previous health condition; 130–40, 132–33, 134
Health measures, model of, 162
Health policies, 281–85
Health production functions, 67; estimation of, 57–58; production of, 57
Health-related behavior variables, 110, 152; behavior of mothers and average birth weight, 81
Health status; and demand function, 145; and diet, 95; and exercise, 95; and medical care services, 143; and psychiatric diagnosis, 211; and schooling, 111; and smoking, 95; and time preference, 113; and utilization model of, 147; determinants of, 94; determinants of change in, model, 122–26; measures of, 143, 147–53; questionnaire items, 169–79; regressions of, 114
Health Status Measures, 150
Health status variables, 124; empirical results, 157–65
Healthy People, The Surgeon General's Report on Health, Promotion and Disease Prevention, 118n
Heterogeneity: and health interventions, 259–64; latent, 257, 264; and future health cost estimates, 265; observed, 257; and policy choice, 270–79
High-risk pregnancies, 18
High-risk group and sulfinpyrazone, 270
Hospitalizations and psychiatric diagnosis, 217
Household: economic model of, 81; production model, 223–26
- Income dynamics, Panel Study of, 223

- Infant health technology and the demand for infant health inputs, 67–68
- Infant mortality: and prenatal care, 16–19, 37; U.S. rate of, 38
- Inguinal hernia, 258
- Institute of Medicine, 19, 20
- Intrauterine growth, 33–37; and effect of trimester of initiation of care, 36
- Invalidism and nursing care, 315–19
- IQ: and psychiatric diagnosis, 209; earnings and psychiatric diagnosis, 214
- Investment behavior, 115
- Journal of Human Resources*, 1
- Kennedy-Mills, 314

Doctors and Their Workshops

Economic Models of Physician Behavior

Mark V. Pauly

This is the first comprehensive attempt to use economic analysis to understand some of the physician effects on nonphysician aspects of health care. The author investigates the effects of physician input on hospital productivity, explores the ways in which physicians can affect demand for their own and others' services by altering the advice they give patients, and examines the assumed relationship between the number of physicians in a hospital and the use of their own and other medical services—the "availability effect."

Modeling the Distribution and Intergenerational Transmission of Wealth

Edited by James D. Smith

This pioneering volume uses modern statistical and simulation techniques to explain the process of wealth transmission and the persistent problem of the unequal distribution of wealth. The papers attempt to model mathematically the actual process by which wealth is acquired and transmitted and so to answer such questions as What are the factors influencing saving? What decides ownership between spouses? What are the patterns of behavior in making gifts and bequests? And what is the effect of the relative ages of the persons involved?
