

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Individual and Social Responsibility: Child Care, Education, Medical Care, and Long-Term Care in America

Volume Author/Editor: Victor R. Fuchs, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-26786-5

Volume URL: <http://www.nber.org/books/fuch96-1>

Conference Date: October 7-8, 1994

Publication Date: January 1996

Chapter Title: List of Contributors, Indexes

Chapter Author: Victor R. Fuchs

Chapter URL: <http://www.nber.org/chapters/c6568>

Chapter pages in book: (p. 341 - 354)

Contributors

Henry J. Aaron
The Brookings Institution

Social Protection versus Economic Flexibility

Is There a Trade-off?

Edited by REBECCA M. BLANK

As the Clinton administration considers major overhauls in health insurance, welfare, and labor market regulation, it is important for economists and policy-makers to understand the impact of social welfare programs on employment rates. This volume explores how programs such as social security, income transfers, and child care in Western Europe, the United States, and Japan have affected labor market flexibility—the ability of workers to adjust to fast-growing segments of the economy.

NBER Comparative Labor Markets Series

Aging in the United States and Japan

Economic Trends

Edited by YUKIO NOGUCHI AND DAVID A. WISE

Japanese and American economists assess the current economic status of the elderly in the United States and Japan. With essays on labor-force participation and retirement, housing equity and the economic status of the elderly, budget implications of an aging population, and financing social security and health care in the 1990s, this volume covers a broad spectrum of issues related to the economics of aging.

An NBER Conference Report

Studies in the Economics of Aging

Edited by DAVID A. WISE

This volume examines issues related to population aging and the health and well-being of the elderly. Chapters cover population aging and government spending, life expectancy and health, saving for retirement and the role of 401(k) plans, demographic transition and housing values, aging in Germany and Taiwan, and the utilization of nursing homes and other long-term care.
