Acknowledgments

In addition to all the people who did the economic research, wrote the papers for the volume, commented on papers, participated in the discussion at the conference where the papers were presented, and worked behind the scenes at the National Bureau of Economic Research, I would like to express particular thanks to Martin Feldstein for suggesting that I organize a conference on monetary policy rules and for providing the encouragement and financial support to make sure it happened, to Monika Piazzesi for preparing a very useful summary of the fascinating discussion that took place at the conference, to Kirsten Foss Davis and Rob Shannon for the logistical support that made the conference enjoyable and productive, to Jean Koentop for managing the manuscript here at Stanford as the papers and the discussion summaries were reviewed, to Christina Romer for providing a helpful and timely review of the entire manuscript, and to the students in Economics 234 at Stanford University in the spring quarter of 1998, where many of the papers in the volume were analyzed and discussed in detail.

John B. Taylor
