Volume Editors' Acknowledgments

We are very much indebted to Kirsten Foss Davis for arranging the conference on which this volume is based. We would also like to thank two anonymous referees for their helpful comments. Special thanks are due also to Teresa A. Price of the Bureau of Economic Analysis, Randa Murphy of the

American Enterprise Institute, and Patricia A. O'Neal of the Bureau of Labor Statistics for assistance in preparing the manuscript.

We note with sadness and a deep sense of loss the death of Edward F. Denison on October 23, 1992. Best known for his pioneering work in growth accounting, Edward Denison made important contributions to the Conference on Research in Income and Wealth from the 1940s through the present volume.
