

---

# Subject Index

- Andean Pact: free trade agreement, 189–90; in regional trade bloc analysis, 193–204; used to achieve liberalization, 209
- Arbitrage: with differentiation in final goods prices, 4–5, 156–57
- Armington assumption, 10, 122
- Asia-Pacific Economic Cooperation (APEC): free trade area intended for, 261; as free trade association, 62; removal of trade barriers, 116
- Association of Southeast Asian Nations (ASEAN): proposed removal of trade barriers, 116, 190; in regional trade bloc analysis, 193–204
- Australia–New Zealand free trade agreement, 64, 233–34
- Canada-U.S. Free Trade Agreement (CUFTA): agreements prior to, 61; as prototype, 84–85; in regional trade bloc analysis, 192–204; tariff adjustment period, 234
- Comparative advantage: in Heckscher-Ohlin theory, 8; influence on trade flows, 60; welfare effects model, 132–43, 145–48
- Competition: to build political momentum for liberalization, 210–12; monopolistic competition model, 10–11, 99–103, 121–22, 145–47, 230
- Currencies, international: currency-block hypothesis, 198, 200, 215; influence on smaller currency values, 198, 200. *See also* Exchange rates
- CUSTA. *See* Canada-U.S. Free Trade Agreement (CUFTA)
- Customs unions: compared to free trade agreements, 206; country gains and losses under, 71; effect on interclub protection, 228; under GATT article XXIV, 228; incentives to protect, 206–7
- Data sources: gravity model of bilateral trade, 41–42, 94; for law of one price analysis, 168, 181–82; for regionalization pattern analysis, 190, 192–93
- Demand elasticities, regional, 154
- Equilibrium, frictionless trade, 8, 12
- European Coal and Steel Community, 34, 60–61
- European Community (EC), 259n2; in regional trade bloc analysis, 192–204; Western Europe intraregional trade bias compared to, 97–98
- European Economic Community (EEC), or Common Market, 259n2, 260; country objectives in creating, 71, 73; post–World War II trade initiatives, 49–52; trade liberalization impact, 49–56. *See also* European Community (EC); European Union (EU)
- European Free Trade Association (EFTA): free trade agreements among members, 259–60n2; in regional trade bloc analysis, 192–204; tariff adjustment period under, 233–34
- European Payments Union (EPU), 34, 52, 60
- European Union (EU), 259n2; integration as focus of, 260; new members of, 189

- Exchange rates: analysis of intrabloc bilateral, 198–204, 221; inconsistencies in Exchange Rate Mechanism, 198; model to estimate effect of volatility of, 200–204. *See also* Currencies, international
- Exchange rates, nominal: in gravity model of bilateral trade, 201; intraregional, 154; volatility within and across groups of countries, 198–99
- Exchange rates, real: in gravity model of bilateral trade, 201–4; variability among groups of countries, 198–99
- Factor price equalization (FPE), 8–12
- Factors of production: factor price equalization, 8–12; Heckscher-Ohlin theory, 2; trade based on factor endowment, 4, 207–8; welfare effects with different proportions of, 128–30
- Free trade, global: Pareto optimal, 262; regional bloc as step toward, 214–15
- Free trade agreements (FTAs): competitive liberalization, 210–12; customs unions compared to, 206; under GATT article XXIV, 6, 143, 206; incentives to protect, 206–7; prior trade pattern, 60; proposed Western Hemisphere-wide, 261; using rules of origin in negotiation, 208–9
- Free trade agreements (FTAs), regional: politics of multilateral liberalization with, 207–8; trade-creation and trade-diversion effects, 190
- Free trade areas: effect on interclub protection, 228; under GATT article XXIV, 228
- Game theory: competitive liberalization, 210–12
- General Agreement on Tariffs and Trade (GATT): Ancey Round (1949), 40, 232; article XXIV, 92, 103, 104, 109, 112, 119, 122, 143, 206, 211; article XXIV interpretation, 233; article XXIV intraclub free trade requirement, 230; article XXIV liberalization within an FTA, 6; article XXIV phase-outs, 232–33; article XXIV, proposal to amend, 212; Dillon Round (1961), 52, 56, 72, 232, 235; Geneva Round (1947), 40, 51, 232; Kennedy Round (1962–67), 72, 232, 234, 256; post-World War II trade initiatives, 49–52; reciprocity principle under, 253–57; regional trade agreements notified to, 64–66, 227; tariff phase-outs in multilateral agreements, 232; Tokyo Round (1973–79), 72, 232, 235, 256; Torquay Round (1950), 40, 232; trade liberalization impact, 49–56; Uruguay Round (1986–94), 74, 115, 116, 204, 232–34, 256
- Generalized System of Preferences (GSP), 238, 251, 261n6
- Generalized System of Trade Preferences (GSTP), 66
- Goods, final: arbitrage opportunities, 157–58; cost of, 157; effect of tariffs on prices of, 157
- Gravity equation: derivation assuming product differentiation, 10; function of, 7; with monopolistic competition model, 10–11; specialization in, 221; specification of standard, 9; theoretical foundations, 9–12
- Gravity model: to analyze bilateral trade, 2, 93–94, 268; analyzing historical factors in bilateral trade, 40–55, 57–58; to estimate effect of regional blocs, 191, 193–97; estimation of continental trade blocs, 95–97; specification, 40; theoretical foundations of, 221–22. *See also* Gravity equation
- Grubel-Lloyd indexes of intraindustry trade, Mexico-United States, 239–40
- Hatanaka's method, 43n13, 47–49
- Heckscher-Ohlin (HO) model: equilibria with impeded trade, 8; factor endowment differentiation, 2; with frictionless trade, homothetic and arbitrary preferences, 8, 12–16, 21, 24–25; with impeded trade, 16–20; interpretations like those of gravity equation, 2, 7–8. *See also* Gravity model
- Hysteresis in trade, 35, 37
- Integration: as focus of EU, 260, 273; objectives of regional, 256; price effect of incomplete market, 156; reciprocal agreements in force, 64–66
- Interest groups: manipulation related to regional trade blocs, 208–9, 224–25; Mexican and U.S., 252
- Israel-U.S. Free Trade Agreement, 89
- Law of one price: deviations from, 5; failures of, 153, 155–56; with incomplete market integration, 156; within regional groupings, 170–72; within regions, 154; related

- to distance, nominal exchange rate, and regional groupings, 174–76; related to distance and nominal exchange rate volatility, 172–74; related to distance and trade barriers, 176–78
- Markets: incomplete integration, 156; pricing to market, 155
- Mercosur (Mercado Común del Cono Sur): as customs union, 189; in regional trade bloc analysis, 192–204
- MFN. *See* Most favored nation (MFN)
- Monopolistic competition: deriving gravity equation from models of, 10–11; model of differentiated products, 99–103; model of trade under (Krugman), 121–22, 145–47, 230; theories of trade with, 37
- Most favored nation (MFN): exceptions to rule under GATT article XXIV, 143, 206, 211; tariffs related to status of, 255; U.S. policy, 259, 261n6
- Nash equilibria: computation of tariff rates, 75–77, 88
- Negotiations: to establish NAFTA, 236; reducing worldwide tariff rates through, 206–7; regional trade agreements, 70–74; scarce negotiator resources, 207; tariff reductions under GATT, 232–33. *See also* Reciprocity
- North American Free Trade Agreement (NAFTA): agreements prior to, 61; GATT article XXIV issues in, 236; locked in Mexican trade reforms, 209; tariff phase-outs under, 236–47, 251–52
- Organization for Economic Cooperation and Development (OECD), Code of Liberalization, 52
- Perroni-Whalley model of world trade and protection, 74–82, 84
- Political-economy model of regional blocs, 212–15, 223–26
- Preferences: British system of Commonwealth, 36n6; in frictionless trade, 12–16, 24–25, 30; in gravity equation, 221; for trade among developing countries, 66
- Preferential arrangements: advantages and disadvantages, 250–51; in multilateral framework, 254–56; in postwar period, 259–60; U.S. rejection of, 259
- Preferential trade agreements (PTAs): under GATT article XXIV, 122, 143, 233; intrabloc trading, 105; reciprocity in, 235; regional, 116–17; U.S. policy for, 261
- Prices: deviations from law of one price, 5; factors influencing sticky, 158–59; inter- and intraregional variability, 153–54, 156; price dispersion with formal trade barriers, 176–78; pricing to market in failure of law of one price, 155; within a region, 159–60. *See also* Law of one price
- Products: differentiation in derivation of gravity equation, 10; differentiation in monopolistic competition model, 99–103; in NAFTA tariff phase-out categories, 237–47
- Reciprocal Trade Agreements Act (1934), United States, 259
- Reciprocity: detecting in PTAs, 235; under GATT, 253–57; in U.S.-Mexican staging decisions under NAFTA, 254, 256–58
- Regionalization: competitive, 210; current pattern of, 215; defined, 227n1; extent of, 109–12, 119; growth of, 66–70; optimal degree of, 3
- Regions: with absence of price barriers, 154; gravity model of regional bloc effect, 192–93; law of one price within, 5, 154; with same distribution system, 159
- Rules of origin exploitation, 208–9
- South Asian Association for Regional Cooperation (SAARC), 210
- Tariff reductions: under Kennedy Round, 234; time frame for implementation under GATT, 232–33; of United States under Tokyo Round, 235
- Tariffs: between-club, 228; effect on prices of goods in different locations, 157; effect on trade (1930s), 39–40; empirical results of reform, 234–36; harmonizing, 242; in monopolistic competition model, 100–102; Nash equilibria in, 75–82, 86, 88; nondiscriminatory most-favored-nation, 255; phase-outs under GATT article XXIV, 232–33; reduction under GATT agreements, 40, 232–34; U.S.-Mexican phase-outs under NAFTA, 236–47, 251–52
- Trade: Armington assumption, 10, 122; based on imperfect substitution and factor endowment, 4, 207–8; effect of distance on,

Trade (*cont.*)

- 110; effect of regionalized currencies on, 198–204; HO model with frictionless, 12–16, 21, 24; HO model with impeded, 8, 16–20; hysteresis in, 35, 37; lagged as predictor of current, 47n16
- Trade, bilateral: determinants (1928, 1938), 42; determinants (1949, 1954, 1964), 42–45; determinants including lagged trade (1949, 1954, 1964), 45–49, 58; determinants with lagged trade and commercial and monetary initiatives, 52–53; determinants with lagged trade and other initiatives, 49–53, 58–59; European powers and former colonies, 52–55; gravity model to analyze, 7, 93–94; with imperfect substitution and transport costs, 99–103; model of effect of exchange rate volatility on, 200–204; using CES preferences, 10
- Trade, intraregional: bias toward and away from, 3, 93–97, 117–18, 193–97, 220–23; openness to extrabloc nations, 193–97; as percent of region's total trade, 93, 268; preferential agreements, 105–9
- Trade, regional: effect on domestic policy, 71–72; intraregional trade within, 93
- Trade agreements, regional: country objectives, 71–82, 84; differences in, 63–64, 66–70; effect of prior trade on, 60; Perroni-Whalley model of world trade and protection, 76; postwar development of (1947–95), 66–70; precursors of, 60–62. *See also* Free trade agreements (FTAs); Preferential trade agreements (PTAs)
- Trade barriers: APEC and ASEAN agreements to remove, 116; frictionless trade without, 8; under GATT article XXIV, 92, 116; impeded trade, 16–20
- Trade blocs: with competitive regionalization, 210–11; de facto and de jure, 191; estimating effects on trade pattern, 191; market power and protection incentives, 205–7; welfare effects of continental, 103–9
- Trade blocs, regional: in game of competitive liberalization, 210–12; under GATT article XXIV, 92; implications for multilateral trade liberalization, 205–12; natural, unnatural, and supernatural, 93, 104–9, 115, 118–19; political-economy model, 212–15, 223–26; in promotion of trade liberalization, 212–15
- Trade flows: effect of 1930s protectionism, 39–40, 43; effect of World Wars I and II, 38–40; explained by gravity equation, 9–10, 33–34; with frictionless trade, 8; HO model with impeded trade, 8, 20; influence of comparative advantage on, 60; influence of past patterns on current, 35–40; lagged effects, 3; under MFN tariffs, 255
- Trade liberalization: competitive, 210–12; impact of EEC and GATT initiatives, 49–52; model of regional trade bloc effect on, 212–15; political implications for multilateral and regional, 115, 205–12, 223–26; pre-NAFTA in Mexico, 252
- Trade models: Deardorff and Stern, 145–46; Frankel and Wei, 190; Haveman, 145–47, 205; Krugman (1991a), 3–4, 92, 103, 105, 116, 121, 145, 190, 205, 230; Krugman (1991b), 3, 92, 94, 110n21, 116, 121, 141, 143n20, 146, 206, 230; Spilimbergo and Stein, 146–48
- Trade patterns: effect of regional blocs on, 191–92; factors influencing, 37–40; intraregional bias in, 3, 93–97, 117–18, 193–97, 220–23; persistence of historical, 45–47, 59–60
- Trade patterns, bilateral: currency link analysis, 198; gravity equation to describe, 7–9
- Trade policy: implications of intervention, 255; political economy of, 262n10; theoretical work on reform of, 229–31
- Trade protection: incentive to protect, 205–7, 211; levels in Mexico, 238; by manipulating rules of origin, 208–9
- Trans-Atlantic Free Trade Area (TAFTA), 262
- Transport costs: intercontinental, 4, 104, 109–12; intrabloc preferential trading, 107–8; intracontinental, 104–9; in monopolistic competition model, 100–102; relation to welfare effects of free trade, 104–5; Samuelson's iceberg type, 18, 100, 118, 131, 157–58; shipping goods between locations, 156
- Treaty of Rome, 60–61
- United States: acceptance of PTAs, 261; free trade arrangements of, 261; MFN policy of, 259

- Welfare effects: continental trade blocs, 103–9; implications of trade agreements, 102–3; of intrabloc preference, 105–9; of trade agreements, 132–44
- Welfare effects model, world trade regionalization: closed economy, 123–26; different factor proportions, 128–30; with differing trade arrangements, 132–34; product variety and comparative advantage motives, 132–43, 145–48; relative prices, 130–31; tariffs allowed, 126–28; with transport costs, 131–32
- Western Hemisphere Free Trade Association, proposed, 261
- World trade and protection model: Nash equilibria in tariff rates, 75–82, 84
- World Trade Organization (WTO): establishment (1995), 227; on intraclub reform, 228. *See also* General Agreement on Tariffs and Trade (GATT)
- World Wars I and II: effect on European trade, 38–40
