- Accounting: on aggregate level for banks, 358–62; NIPAs framework for, 33. *See also* National accounting system
- Age: effect on inheritance analysis of, 761; and wealth reallocation, 620, 622–23, 626–30, 632, 636
- Age groups: estimates of relative mean net worth of, 653, 655; relation to income groups in assessing wealth, 669–70, 672, 675–79; wealth of, 655–58, 661–63, 665, 669
- Age-wealth estimates, 650–53
- Age-wealth profiles: bias using cross-sectional data, 600–601, 603, 605, 608–12, 614, 616, 618–20; construction of cohorts for, 567–68, 571, 579. *See also* 5-YEAR CRS; 15-YEAR CRS
- Aggregate household balance sheets. *See* National household balance sheets
- Arrow-Pratt measure of risk aversion, 338
- Assets, government: financial, 316–17, 342; intangible, 338; tangible, 298–304, 339–40, 342. *See also* Capital stocks, government; Land; Oil and gas rights
- Assets, private: FFAs accounting for, 138–41; tangible and intangible, 773–74
- Asset write-offs, 121–26, 148–49
- Balance of payments, 402, 404, 407–18, 426
- Balance sheets, national. *See* National household balance sheets
- Bank efficiency. *See* Banks
- Bank for International Settlements (BIS), 402, 411
- Bank imputation, 380; under Keynesian general equilibrium theory, 379–80; methods for and effect of, 359–61, 390–92, 393; under neoclassical general equilibrium model, 378–79
- Bank output, 361–62, 371–72, 376–80, 381, 385. *See also* Bank imputation
- Banks: asset write-off of commercial, 122–23; measuring output of private, 361, 376–80; pricing of services of, 362–70; regulation of, 362. *See also* Central banks
- Barter transactions, 385n. 1, 391, 395
- BEA. *See* U.S. Bureau of Economic Analysis (BEA)
- Benefit plans, defined, 690–95. *See also* Pension benefits
- Bequest motive, 738, 753
- BIS. *See* Bank for International Settlements (BIS)
- BLS. *See* U.S. Bureau of Labor Statistics (BLS)
