

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Productivity Growth in Japan and the United States

Volume Author/Editor: Charles R. Hulten, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-36059-8

Volume URL: <http://www.nber.org/books/hult91-1>

Conference Date: August 26-28, 1985

Publication Date: January 1991

Chapter Title: List of contributors, Indexes

Chapter Author: Charles R. Hulten

Chapter URL: <http://www.nber.org/chapters/c8456>

Chapter pages in book: (p. 437 - 448)

Contributors

Ernst R. Berndt
Sloan School of Management
Massachusetts Institute of Technology
50 Memorial Drive
Cambridge, MA 02139

Mary Jean Bowman
Department of Economics
University of Chicago
1126 East 59th Street
Chicago, IL 60637

Masako Darrough
Business School
Columbia University
International Affairs Building
New York, NY 10027

Edwin Dean
Bureau of Labor Statistics
U.S. Department of Labor
441 G Street, NW
Washington, DC 20212

W. Erwin Diewert
Department of Economics
University of British Columbia
Vancouver, British Columbia V6T 1W5
Canada

Romesh Diwan
Department of Economics
Rensselaer Polytechnic Institute
Troy, NY 12180

Melvyn Fuss
Department of Economics
University of Toronto
150 St. George Street
Toronto, Ontario M5S 1A1
Canada

Zvi Griliches
National Bureau of Economic Research
1050 Massachusetts Avenue
Cambridge, MA 02138

Fumio Hayashi
Department of Economics
The University of Pennsylvania
3718 Locust Walk
Philadelphia, PA 19104

Charles R. Hulten
Department of Economics
University of Maryland
College Park, MD 20742

Hajime Imamura
Department of Economics
Toyo University
28-20, 5 Chome, Hakusan
Bunkyo-ku, Tokyo 112,
Japan

Dale W. Jorgenson
Department of Economics
Harvard University
Littauer Center 122
Cambridge, MA 02138

Tatsuya Kikutani
Faculty of Business Administration
Kyoto Sangyo University
Motoyama, Kamigamo, Kita-ku
Kyoto 606, Japan

Masahiro Kuroda
Faculty of Business and Commerce
Keio University
15-45, Mita 2-chome
Minato-ku, Tokyo 108
Japan

Alice C. Lam
Suntory Toyota International Center
London School of Economics and Political
Science
London WC2A 2AE, United Kingdom

Jacques Mairese
Institut National de la Statistique et des
Etudes Economiques
18, Boulevard Adolphe-Pinard
75675 Paris Cedex 14
France

Edwin Mansfield
Department of Economics
Wharton School
University of Pennsylvania
Philadelphia, PA 19104

Shunseke Mori
Department of Economics
Science University of Tokyo
Tokyo, Japan

Catherine Morrison
Department of Economics
Tufts University
Medford, MA 02155

M. Ishaq Nadiri
National Bureau of Economic Research
269 Mercer Street, 8th floor
New York, NY 10003

Arthur Neef
Bureau of Labor Statistics
U.S. Department of Labor
441 G Street, NW
Washington, DC 20212

J. R. Norsworthy
Department of Economics
Rensselaer Polytechnic Institute
Troy, NY 12180

Walter Y. Oi
Department of Economics
University of Rochester
Rochester, NY 14627

Ingmar R. Prucha
Department of Economics
University of Maryland
College Park, MD 20742

Hikaru Sakuramoto
Faculty of Business and Commerce
Keio University
15-45, Mita 2-chome
Minato-ku, Tokyo 108
Japan

Takamitsu Sawa
Kyoto Institute of Economic Research
Kyoto University
Sakyo-ku
Kyoto 606, Japan

Robert M. Schwab
Department of Economics
University of Maryland
College Park, MD 20742

Toshiaki Tachibanaki
Kyoto Institute of Economic Research
Kyoto University
Sakyo-ku
Kyoto 606, Japan

Hong W. Tan
The Rand Corporation
1700 Main Street
P.O. Box 2138
Santa Monica, CA 90406

Leonard Waverman
Department of Economics
University of Toronto
150 St. George Street
Toronto, Ontario M5S 1A1
Canada

David O. Wood
Center for Energy Policy Research
Massachusetts Institute of Technology
One Amherst Street (E40-437)
Cambridge, MA 02139

Craig A. Zabala
School of Management
Rensselaer Polytechnic Institute
Troy, NY 12180

Kanji Yoshioka
Keio Economic Observatory
Keio University
15-45, Mita 2-chome
Minato-ku, Tokyo 108
Japan

Subject Index

- Annual Report on the Corporate Sector (ARCS) data series, 232–55
- Capacity utilization (CU), 141–43; elasticities of, 161–62; indexes for, 150
- Capital stock measurement, 229–31, 254–55, 265–66. *See also* Double benchmark method; Perpetual inventory method
- Catching up hypothesis, 21, 57
- Census of Manufactures (CM) data series, 232–55
- Cholesky factorization, 64, 75–76
- CM. *See* Census of Manufactures data series
- Competitiveness, international: defined measure of, 29–30, 39–41; index as measure of Japanese/U.S., 33. *See also* Price, relative; Purchasing power parity
- Constant elasticity of substitution (CES), 181
- Constant share elasticities (CSE), 61, 63–64
- Cost efficiency (CE) growth, 87; decomposition of growth sources for, 87–90. *See also* Törnqvist index
- Cost elasticities, 423
- Cost function model, translog, 421–23; to analyze cost and TFP growth rates, 86–90, 92–100, 104–7; estimation results of, 90–92, 423–29; minimum, 3; restricted form, 138–44, 167–68. *See also* Generalized Leontief cost function
- Cost of capital, 300–304
- CRTS. *See* Long-run constant returns to scale
- CU. *See* Capacity utilization
- Currency value fluctuations, 36–37
- Data sources: capital stock measurement, 232; electrical machinery industry analysis, 128–30; fixed input analysis, 145; Japanese-U.S. labor market analysis, 386–87, 391–92; labor disputes analysis, 419–20; labor input analysis, 359; measurement of tax-adjusted Q , 304–5; motor vehicle industry analysis, 100–103; productivity growth trends comparison, 324, 327; R&D expenditure comparison, 321, 323–24, 335; terms of trade and productivity, 213, 219, 221
- Depreciation allowances, 297, 306
- Double benchmark method, 230–31, 254–55, 265–66
- Economic growth, aggregate: analysis of, for individual industries, 4; analysis using competitive equilibrium approach, 3; analysis using decomposition techniques, 2–3; sources of, 3–8
- Economic performance: estimates in Japan and United States for, 50–51, 56–57; of Japan, 1, 4–6, 21; pre- and post-oil-price-shock period, 110–13, 123; of United States, 21
- Economic Planning Agency (EPA) data series, 232–55
- Elasticities of substitution, 157–61, 167, 423
- Elasticity. *See* Capacity utilization; Constant share elasticities; Cost elasticities; Output elasticities, Price elasticities, Scale

- elasticity; Shadow value elasticities;
 Share elasticities
 Energy crisis. *See* Oil price shock, Price, energy
 Enterprise tax, 297–300
 EPA. *See* Economic Planning Agency data series

 Factor demand model, 110, 113–15; estimates using, 115–19; system of equations for, 126–28

 Generalized Leontief (GL) cost function: alternative extensions of, 168–71; restricted, 138–44, 167–68
 Growth accounting, 55–56

 Horndal effect, 388

 Index-number approach, 21
 Industry classification, 41–42, 51–52, 60
 Inflation, 36–37
 Innovation process, 341–42
 Investment: comparison of Japan and United States, 175–79; response to oil price shocks of, 175–79; tax credit for, 297
 Investment data, Japan, 238–44

 Labor input measurement model, 351–59
 Labor market, Japan: research in dualism practices in, 389–91; sectoral performance of, 360
 Labor relations: developments in Japan for, 430; dispute-resolution mechanisms, 412–19
 Long-run constant returns to scale (CRTS), 138–43

 Multifactor productivity (MFP) growth model: if alternative method to estimate capital stocks is used, 233–36; to estimate capital stocks, 232–33, 265; related to oil price shock, 179–87

 National wealth surveys (NWS), Japan, 238, 244–45, 249–50, 305
 NEEDS data base (Nihon Keizai Shimbun), 321–24, 335–37

 Oil price shock, 1, 46–47, 50, 57, 135–37, 150, 173–74
 Output elasticities, electrical machinery industry, 118–19

 Perpetual inventory method, 229–30, 254–55
 Price, relative: comparisons of Japan and United States, 33–39; growth rate of input, 40–41; purchasing power parities as reflection of, 30
 Price elasticities, electrical machinery industry, 118–19
 Price indices, 32
 Prices, energy, 175–79; comparison of Japan and United States, 175–79; effect of changes in, 179–87; growth rates of, 40–41; purchasing power parity for inputs, 36
 Producer behavior: biases of technical change, 61; model of, 59–63; share elasticity with respect to quantity, 61
 Production process: analysis of, 22; flexibility of, 157–63; models of, 31–32, 51–53, 56–57, 59–70; translog cost model to represent, 421–23
 Production shift: factors contributing to outward, 201; general equilibrium approach to illustrate, 202–4
 Production theory approach, 204–5
 Productivity analysis: effect of worker attitudes on, 411–12; methodological advances for, 21–22. *See also* Total factor productivity
 Productivity growth, 50–51, 175–79; electrical machinery industry, 120–24; indexes of, 59; related to oil price shocks, 175–79
 Productivity indexes, United States, 222–23
 Productivity levels: measurement of relative, 31, 41–51; trend of differences in, 43, 46
 Purchasing power parity: estimates of, 30–31, 33–34; input/output, 34–36; to summarize relative prices, 30; between yen and dollar, 32

Q theory of investment, 295. *See also* Tax-adjusted *Q*

 RCIS. *See* Report on the Corporate Industry Investment Survey data series
 R&D expenditures, industrial: degree of government financing, Japan and United States, 321, 344; differences in innovation process of, 341–42; disaggregation for, 341; in electrical machinery industry, 112; for Japan and United States, 318–21

- Report on the Corporate Industry Investment Survey (RCIS) data series, 232–55
- Sales function analysis, 205–8
- Scale elasticity, 117, 119–20, 124–25
- Shadow-value elasticities, 161–62
- Share elasticities, 64, 66
- Substitutibility, 157–64
- Tax-adjusted Q , 295–96; measurement of, 304–11; relation to investment-capital ratio of, 300–312
- Tax-free reserves, 296–300
- Tax rates, effective: on capital income, Japan and United States, 288–89; defined, 236–38; estimation for capital income of marginal, 268, 292; estimations of, 278–80
- Tax system, Japan: corporate tax rate and enterprise tax, 270–72; Corporation Tax Law, 295–97; depreciation measures of, 272–75; evaluation of tax policy for, 280–89; for investment tax credit, 297; simulation of policy issues, 290–92; Special Taxation Measures Law, 296–97; tax-free reserves of, 275–76, 296–300. *See also* Depreciation allowances; Enterprise tax; Investment; Tax-free reserves
- Tax wedge, 236–37
- Technological change: bias in producer behavior of, 61–63; contribution to total factor productivity growth of, 124; in electrical machinery industry, 114–26; estimates using model of production for, 63–70; Japan's rate of, 9, 342–44; relation to investment in human capital of, 387–91, 403–4
- Technology differences, Japan and the United States, 61–70, 73
- Technology-specific skills: model of, 388–89, 403; testing hypothesis using wage model, 393–94
- TFP. *See* Total factor productivity
- Törnqvist index, 87, 104–7, 123
- Total factor productivity (TFP): decomposition of growth, 87–90, 123–24, 130–31; defined, 4; to explain trade patterns, 5; in Japan and United States, 6; measurement of growth of, 87; using cost function analysis, 92–100. *See also* Cost efficiency growth

Books of Related Interest

The Measurement of Durable Goods Prices

ROBERT J. GORDON

Drawing on *Consumer Reports*, the venerable Sears catalog, and industry sources, Gordon's detailed study of goods ranging from computers to compressors argues that official measures of inflation unfairly malign American business by failing to consider marked quality improvements in new goods.

An NBER Monograph

1990 xx, 723 pages Cloth ISBN: 0-226-30555-8

The Measurement of Saving, Investment, and Wealth

Edited by ROBERT E. LIPSEY *and* HELEN STONE TICE

Contributors to this volume investigate ways to improve aggregate and sectoral saving and investment estimates and analyze microdata from household wealth surveys

NBER Studies in Income and Wealth, Volume 52

1989 xii, 862 pages Cloth ISBN: 0-226-48468-8

R & D, Patents, and Productivity

Edited by ZVI GRILICHES

"These papers make use of sophisticated econometric techniques and present careful discussions of data construction, manipulation, and analysis. . . . An impressive collection. . . . Its usefulness will not diminish with time."

—Louis P. Cain, *Wall Street Review of Books*

An NBER Project Report

1984 ix, 512 pages Paper ISBN: 0-226-30884-7

The Total Incomes System of Accounts

ROBERT EISNER

In an effort to account for all contributions to economic well-being, Eisner offers systematic extensions and expansions for conventional measures of national income and product and its components.
