

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: The Economic Effects of Aging in the United States and Japan

Volume Author/Editor: Michael D. Hurd and Naohiro Yashiro, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-36100-4

Volume URL: <http://www.nber.org/books/hurd96-1>

Publication Date: January 1996

Chapter Title: List of Contributors, Indexes

Chapter Author: Michael D. Hurd, Naohiro Yashiro

Chapter URL: <http://www.nber.org/chapters/c8473>

Chapter pages in book: (p. 353 - 364)

Contributors

Tatsuo Hatta
Institute of Social and Economic
Research
Osaka University
6-1, Mihogaoka, Ibaraki
Osaka 567
Japan

Hilary W. Hoynes
National Bureau of Economic
Research

Subject Index

- Advisory Council on Social Security (1991), 47
- Age selectivity bias, Japan, 100–103, 106
- Aging, Japan: effects, 13, 59; factors influencing, 59–60, 90
- Aging population: under alternative definitions of the elderly, 67; effect on aggregate saving rate, 56; macroeconomic effects, 59; methods to project economic effects of, 62–64
- Aging population, Japan: economic effects, 60; effect on capital markets, 149–50; effect on national saving, 139; effect on social security funds, 143; factors to reduce, 81; model and simulations of economic effects, 72–80; rapidly increasing, 1–2, 13, 89–90, 241
- Aging population, United States: effect on housing wealth, 168; forecasts of effects, 40–56
- American Chamber of Commerce Researchers Association (ACCRA) data, 162–67, 169–70, 176–79, 181–83, 185–86, 188
- Annuity, lifetime. *See* Home equity conversion mortgages (HECMs), Japan
- Arbitrage, U.S. housing market, 157–60, 165–67
- Asset holdings: allocation of U.S. and Japanese pension funds, 144–48; with different levels of aging population, 54–55
- Asset holdings, Japan: by age group, 198–202; of elderly couples and singles, 243t, 247, 249–51; of elderly people, 198–202; housing assets as collateral, 195, 196; housing assets by age, 198–202; housing assets of elderly, 97, 195; housing assets of elderly couples and singles, 243t, 247, 249–50; monetary assets of elderly people, 247, 249; relation to elderly living arrangements, 104
- Asset holdings, United States: household financial assets with and without IRAs, 227–30; household financial assets with and without 401(k)s, 228–30; as percent of total household wealth, 175–76
- Baby-boom generation, United States: impact of, 39, 111–12; projections of Social Security benefits for, 112–14
- Basic Survey on People's Life, Japan, 3
- Benefits. *See* Disability benefits, Japan; Incentives to retire; Pension plans, defined-benefit; Pension plans, defined-contribution; Pension plans, Japan's public; Social Security system, U.S.
- Bequests, Japan, 98, 100, 104, 139. *See also* Children, Japan
- Birthrates: Japan, 11–12; U.S. baby-boom generation, 111
- Borrowing, Japan: against home equity conversion mortgage, 202–8; against housing assets, 195–98
- Capital gains: with arbitrage in housing market, 159–60, 167–68; effect on saving decisions, 168

- Capital markets, Japan and U.S., 59, 149–50
- Children, Japan: bequest motive of elderly, 98, 100, 104, 106, 139; elderly people living with, 90–92, 94, 100–6
- Consumption, Japan: by age group, 198–202; elderly couples and singles, 243t, 246–47, 249–51; estimates of consumption function, 256–57t; impact of pension benefits on, 252–54
- Consumption, United States: forecasts of elderly and nonelderly (1989–2020), 52–54; housing (1940–80), 160–61; life-cycle hypothesis of, 4, 55; pattern of the elderly in United States, 40; relation of demographics to housing consumption, 160–68
- Current Population Survey (CPS), 120
- Data sources: American Chamber of Commerce Researchers Association (ACCRA), 162–67, 169–70, 176–79, 181–83, 185–86, 188; analysis of retirement incentives, 261, 268; analysis of saving and asset accumulation in Japan, 134–35; analysis of savings among elderly households, 169–76, 181; analysis of severance payment wealth, 301; asset holdings of elderly in Japan, 198; economic status of Japanese elderly, 104, 242; household-level data in Japan, 3–4; housing and nonhousing wealth analysis, 161–63; Mutual Aid Associations, Japan, 22–23; option value model of retirement, 262, 268; Panel Study of Income Dynamics (PSID), 169–70, 172–76; projection of U.S. pension system, 120–21; relation of poverty to Social Security benefits, 321–22; to update U.S. wealth and income, 328; U.S. household-level, 4
- Deficit Reduction Act (1983), 119
- Dependency ratio, Japan, 60
- Disability benefits, Japan, 24
- Dissaving rate: with different levels of aging population, 54–55; of elderly in Japan, 98, 102, 247, 252; of elderly in United States, 39–40; estimates of elderly, 55; in projections of U.S. pension system, 123–27
- Dynasty model of saving, 134
- Earnings distribution, Japan: public-pension eligible and noneligible workers, 309–13; working pensioners, 312–14
- Earnings test, Japan: public pension system, 296, 308–13; revision of, 309–13
- Economic performance, Japan, 60
- Economic Recovery Tax Act (1981), 218
- Elderly people: consequences of aging, 2; definitions of, 65–69; dissaving rate, 39–40; economic behavior of, 39–40; forecast as ratio of total population, 52–53; income composition in Japan and United States, 2; oldest-old population, 39. *See also* Aging population
- Elderly people, Japan: after-retirement income, 202–8; asset holdings, 198–202; benefits and income of couples, 242–46; bequest motive, 100; economic position of women, 96–97; effect of changing definition, 67–68; employment of, 295–96, 313–14; factors influencing living arrangements, 104–6; financial wealth, 6; as household heads, 95, 242; households' economic position, 96; housing assets, 195–97; imputed income, 95–96, 100; income distribution and wealth, 95–97; income of men, 97; labor force participation, 3, 5, 66, 95, 99–100; living arrangements, 6, 90–94, 103–5, 242; medical care delivery to, 8; wealth accumulation, 132–39
- Elderly people, United States: income sources, 40–41; labor force participation, 5; pension income sources, 40; post-1979 poverty rate, 328–30; poverty rates among widows, 324–25; Social Security income of, 320
- Elderly population. *See* Aging population
- Employee Retirement Income Security Act (ERISA), 1974, 115–16
- Employers: contributions to 401(k) accounts, 218–19; as retirement plan sponsors, 114–16. *See also* Pension plans, employer-sponsored
- Employment, Japan: of elderly workers, 5, 66, 95–96, 99–100
- Equities: in employer-sponsored pension funds, 144–48
- Family Income and Expenditure Survey (FIES), Japan, 134, 136
- Family Savings Survey (FSS), Japan, 134–35
- Family structure, Japan, 90, 106
- Federal Hospital Insurance Fund (HI), United States: forecasts of spending (1991–2050), 46–47; Medicare part A, 44–45
- Federal Supplementary Medical Insurance

- Fund (SMI), United States: forecasts of premium, 50–51; Medicare part B, 44–45, 50
- Fertility rates: Japan, 1–2, 12–15, 60–61; worldwide, 1–2. *See also* Baby-boom generation, United States
- Fiscal sector, Japan: burden of public pension system, 342; effect of rapid population aging on, 59
- Flow of Funds (FOF), Federal Reserve, 233–34
- Flow of Funds/National Income and Product Accounts (FOF NIPA), 233–37
- 403(b) annuity plans, 220
- 401(k) plans: eligibility, 223–25, 231; employer-matched contributions, 219; features, 224; participants and contributions (1983–1991), 221, 223–26, 229–38; rules related to, 218–19
- Health Care Financing Administration (HCFA), United States, 47–48
- Health care services: costs for elderly in Japan, 30–31, 143, 247; costs in U.S. Social Security system, 7–8, 47–48
- Health care services, United States: rising costs of, 40
- Health insurance programs, Japan, 18–20; public, 17–18
- Home equity conversion mortgages (HECMs), Japan: after-retirement income in Japan with, 202–8; defined, 195; in Japan, 195–98; lump-sum payments or life-time annuity, 202–8
- Housing, Japan: costs for elderly, 247. *See also* Asset holdings, Japan; Living arrangements, elderly in Japan
- Housing, United States: arbitrage in market for, 157–60, 165–67; capital gains, 168–69, 176–89; consumption in United States, 160–68; effect of price rise, 168; role of demographics in market for, 154–68
- Housing assets, Japan. *See* Asset holdings, Japan
- Incentives to retire: in defined-benefit compared to defined-contribution, 289–90; in Japanese firm's severance payment, 306; for older worker retirement in Japan, 307; predictions of option value model, 262, 269–71; related to firm severance payments, 306; simulations of health insurance alternatives, 285, 287, 289; simulations of postretirement work, 289, 291; simulations of retirement alternatives, 272–92; in United States, 5; U.S. employer-sponsored pension plans, 261
- Income, Japan: by age group, 198–202; distribution among elderly, 96–97, 245–46; elderly couples and singles, 242–46, 249–51; elderly people, 95–96; imputed income of elderly, 95–96, 100; relation to elderly living arrangements, 104–6; using home equity conversion mortgage, 202–8
- Income, United States: comparison of SIPP and RHS levels, 328–32; employer contributions in IRAs and 401(k)s as, 234; relation to 401(k) eligibility and participation, 223; Social Security component, 320
- Indexation, proposed, 32–35
- Individual retirement accounts (IRAs): contributions (1980–1990), 220, 225, 229–38; creation (1981), 218; eligibility and participation, 223–24; median balances, 227; retirement saving in United States, 5
- Internal Revenue Service (IRS) rules, 115–16
- Investment, Japan: in model of aging population effects, 73–78; sources of, 131. *See also* Asset holdings, Japan; Pension plans, employer-sponsored
- Japan: decline in working-age population, 1; fertility rates, 1–2; income composition of elderly, 2–3; increase in elderly population, 1; living arrangements of elderly, 6; mandatory retirement, 6; medical care for elderly, 8; private pensions, 5; public pension system, 7; retirement incentives, 5; self-employment rates, 5; tax rate forecast for public pension system, 7
- Keogh plans, United States, 220
- Labor force, Japan: employment of elderly people, 295–96, 313–14; fewer working-age population, 1, 62; growth of, 69; pension tax burden of working, 30–31; productivity, 68–72; proposed policy changes, 80–81
- Labor force, United States: saving of working-age population, 39
- Labor force participation, Japan: 60–64- and 65–69-year-old males, 5, 66–67; conditions for higher female, 62; of elderly

- Labor force participation, Japan (continued)
 people, 3, 5–6, 65–66; growth rate projection, 62; impact of pension benefits, 308
- Labor force participation, United States: baby boomers, 112; of elderly people, 65; 65–69-year-old men, 5
- Labor market, Japan: differences from U.S., 5–6; effect of public pension on supply in, 306–9; effect of rapid population aging on, 59
- Labor market, United States: difference from Japanese, 5–6
- Life cycle: theory of consumption, 4, 55, 98, 134; variation of housing wealth over, 175–76
- Life-cycle model of saving. *See* Dynasty model of saving; Life cycle
- Life expectancy: Japan, 2, 6, 11–12, 60–61, 67, 90, 99; United States, 2, 6; in U.S. Social Security forecasts (1990–2040), 42–44
- Living arrangements, elderly in Japan, 6, 90–94, 103–5, 242
- MAA. *See* Mutual Aid Association (MAA), Japan
- Marriage rates, Japan, 15–16

Advances in the Economics of Aging

Edited by DAVID A. WISE

Innovative research on topics of importance to the well-being of older persons, including the effect of labor market rigidities on the employment of older workers, the effect on retirement of the availability of continuation coverage benefits, the influence of the prospective payment system on rising Medicare costs, the effects of health and wealth on living arrangement decisions, the incentive effects of employer-provided pension plans, and the extent to which housing wealth determines how much the elderly save and consume.

An NBER Project Report

Studies in the Economics of Aging

Edited by DAVID A. WISE

This volume provides a useful reference for understanding the demographic and economic trends that affect the elderly. Chapters cover population aging and government spending, life expectancy and health, saving for retirement and the role of 401(k) plans, demographic transition and housing values, aging in Germany and Taiwan, and the utilization of nursing homes and other long-term care.

An NBER Project Report

Aging in the United States and Japan

Economic Trends

Edited by YUKIO NOGUCHI and DAVID A. WISE

Japanese and American economists assess the current economic status of the elderly in the United States and Japan, and consider the impact of an aging population on the economies of the two countries. With essays on labor force participation and retirement, housing equity and the economic status of the elderly, budget implications of an aging population, and financing social security and health care in the 1990s, this volume covers a broad spectrum of issues related to the economics of aging.
