

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Annals of Economic and Social Measurement, Volume 1, number 1

Volume Author/Editor: NBER

Volume Publisher: NBER

Volume URL: <http://www.nber.org/books/aesm72-1>

Publication Date: 1972

Chapter Title: Front matter to "Annals of Economic and Social Measurement, Volume 1, number 1"

Chapter Author: NBER

Chapter URL: <http://www.nber.org/chapters/c9178>

Chapter pages in book: (p. -1 - 0)

7412

Annals of Economic and Social Measurement

Journal of computers, information retrieval,
and research methodology

Volume 1
Number 1
January 1972

Editorial Preface	i
Journal of Computers, Information Retrieval, and Research Methodology	i
Journal of Social Interaction Requirements and Public Policy Issues	7
Christopher A. Sims: Are There Exogenous Variables in Short-Run Production Relations?	17
Richard L. Anderson, Richard M. Jensen, and Robert M. Gordon: The Effect of Industry Aggregation in the Analysis of Diversification and Integration	37
John H. Garvey and Susan Jacob: REGEM—Computer Program to Generate Multivariate Observations for Linear Regression Equations	43
Robert J. Farney and Robert D. Goodman: Variable Tests for the Significance of Regression—Analytic and Empirical Considerations	59
Editorial Note	
Journal of Computers, The 1970 Census START Community	93
John H. Garvey: MEXCEL—An Interactive Computer System for Regression Analysis	95
Journal of Computers, Computers and the Communication of Research Information	97
Editorial Note	103

National Bureau of Economic Research

STATEMENT OF PURPOSE

The purpose of the *Annals of Economic and Social Measurement* is to promote the exchange of ideas in quantitative research. The journal will contain articles generated in the research program of the National Bureau of Economic Research or relevant to this program, mainly but not solely dealing with data generation, computer applications, and methodological problems. Participants in workshops held by the NBER's *Conference on the Computer in Economic and Social Research* and researchers affiliated with the NBER's *Computer Research Center for Economics and Management Science* will be encouraged to contribute papers.

We hope that the *Annals* will serve a catalytic role in improving techniques for economic and social measurement. Although research methodology will be stressed, descriptions of computer programs, information retrieval techniques, and data sets will also be published. Such an emphasis means that scientists can benefit from work in fields outside their immediate range of research. The objective is to provide rapid and wide dissemination of advances in the state of the art—resulting, it is hoped, in more effective use of the computer in quantitative analysis.
