Challenges to Globalization Analyzing the Economics

Edited by

**Robert E. Baldwin and
L. Alan Winters**

The University of Chicago Press

Chicago and London

ROBERT E. BALDWIN is professor emeritus of economics at the University of Wisconsin at Madison and a research associate of the National Bureau of Economic Research (NBER). He is the author or coeditor of many books including *Geography and Ownership As Bases for Economic Accounting*, *The Structure and Evolution of Recent U.S. Trade Policy*, *Political Economy of U.S.-Taiwan Trade*, and *Trade Policy in a Changing World Economy*. L. ALAN WINTERS is professor of economics at the University of Sussex. He is a research fellow of the Centre for Economic Policy Research (CEPR, London), and a senior visiting fellow of the Centre for Economic Performance at the London School of Economics. Among his books are: *An Econometric Model of the Export Sector*, *Europe's Domestic Market*, *Eastern Europe's International Trade*, *Trade Liberalisation and Poverty: A Handbook*, *Regional Integration and Development*, and *Liberalising Labour Mobility under the GATS*.

Relation of the Directors to the Work and Publications of the National Bureau of Economic Research

1. The object of the NBER is to ascertain and present to the economics profession, and to the public more generally, important economic facts and their interpretation in a scientific manner without policy recommendations. The Board of Directors is charged with the responsibility of ensuring that the work of the NBER is carried on in strict conformity with this object.

2. The President shall establish an internal review process to ensure that book manuscripts proposed for publication DO NOT contain policy recommendations. This shall apply both to the proceedings of conferences and to manuscripts by a single author or by one or more co-authors but shall not apply to authors of comments at NBER conferences who are not NBER affiliates.

3. No book manuscript reporting research shall be published by the NBER until the President has sent to each member of the Board a notice that a manuscript is recommended for publication and that in the President's opinion it is suitable for publication in accordance with the above principles of the NBER. Such notification will include a table of contents and an abstract or summary of the manuscript's content, a list of contributors if applicable, and a response form for use by Directors who desire a copy of the manuscript for review. Each manuscript shall contain a summary drawing attention to the nature and treatment of the problem studied and the main conclusions reached.

4. No volume shall be published until forty-five days have elapsed from the above notification of intention to publish it. During this period a copy shall be sent to any Director requesting it, and if any Director objects to publication on the grounds that the manuscript contains policy recommendations, the objection will be presented to the author(s) or editor(s). In case of dispute, all members of the Board shall be notified, and the President shall appoint an ad hoc committee of the Board to decide the matter; thirty days additional shall be granted for this purpose.

5. The President shall present annually to the Board a report describing the internal manuscript review process, any objections made by Directors before publication or by anyone after publication, any disputes about such matters, and how they were handled.

6. Publications of the NBER issued for informational purposes concerning the work of the Bureau, or issued to inform the public of the activities at the Bureau, including but not limited to the NBER Digest and Reporter, shall be consistent with the object stated in paragraph 1. They shall contain a specific disclaimer noting that they have not passed through the review procedures required in this resolution. The Executive Committee of the Board is charged with the review of all such publications from time to time.

7. NBER working papers and manuscripts distributed on the Bureau's web site are not deemed to be publications for the purpose of this resolution, but they shall be consistent with the object stated in paragraph 1. Working papers shall contain a specific disclaimer noting that they have not passed through the review procedures required in this resolution. The NBER's web site shall contain a similar disclaimer. The President shall establish an internal review process to ensure that the working papers and the web site do not contain policy recommendations, and shall report annually to the Board on this process and any concerns raised in connection with it.

8. Unless otherwise determined by the Board or exempted by the terms of paragraphs 6 and 7, a copy of this resolution shall be printed in each NBER publication as described in paragraph 2 above.

Centre for Economic Policy Research

The Centre for Economic Policy Research (CEPR) is a network of 600 research fellows and affiliates, based primarily in European universities. The Centre coordinates the research activities of its fellows and affiliates and communicates the results to the public and private sectors. The CEPR is an entrepreneur, developing research initiatives with the producers, consumers, and sponsors of research. Established in 1983, CEPR is a European economics-research organization with uniquely wide-ranging scope and activities.

The CEPR is a registered educational charity. The Centre is supported by the European Central Bank, the Bank for International Settlements, the European Investment Bank, twenty-three national central banks, and forty-one companies. None of these organizations gives prior review to the Centre's publications, nor do they necessarily endorse the views expressed therein.

The Centre is pluralist and nonpartisan, bringing economic research to bear on the analysis of medium- and long-run policy questions. CEPR research may include views on policy, but the Executive Committee of the Centre does not give prior review to its publications, and the Centre takes no institutional policy positions. The opinions expressed in this report are those of the authors and not those of the CEPR.

Guillermo de la Dehesa, *chair of the board*

Richard Portes, *president*

Hilary Beech, *chief executive officer*

Mathias Dewatripont, *research director*

Swedish Center for Business and Policy Studies

The Swedish Center for Business and Policy Studies (SNS) is an independent network of leading decision makers from the private and public sectors who share a commitment to social and economic development in Sweden. Its aim is to improve the basis for rational decisions on major social and economic issues by promoting social science research and stimulating public debate.

The SNS engages leading academics from universities in Sweden and other countries in its social science research. It has its own publishing house and organizes conferences, courses, and local branch meetings. A private, nonpartisan and nonprofit association, SNS is financed through membership fees, research grants, book sales, and conference fees, as well as annual subscriptions by companies, public bodies, and other organizations.

Acknowledgments

This volume contains the papers and discussants' comments presented at the seventh International Seminar in International Trade (ISIT). The seminar, jointly arranged by the Centre for Economic Policy Research, London (CEPR), the National Bureau of Economic Research, Cambridge, Massachusetts (NBER), and the Center for Business and Policy Studies, Stockholm (SNS), was held on May 24 and 25, 2002, in Stockholm. Financial support from the Jan Wallander and Tom Hedelius Foundation, NBER, and the U.K. Department for Trade and Industry is gratefully acknowledged.

The seminar, which is a biennial event, brings together economists from North America and Europe to discuss papers aimed at informing those concerned with current public policy matters about relevant empirical economic research on these issues.

We are grateful to Stefan Sandström of SNS who oversaw all the arrangements for the meeting; to Janet Seabrook of CEPR, who coordinated the program and logistics; to Helena Fitz-Patrick of NBER, who coordinated the preparation of the manuscript; and to Alex Schwartz of the University of Chicago Press, who coordinated the publication process.

The manuscript benefited greatly from the comments of referees at both NBER and the University of Chicago Press, to whom we are grateful.
