

OB-11 Record of Current Pregnancy

Form OB-11 was used to record the obstetrician's evaluation of positive items recorded on OB-3 (History Since Last Menstrual Period) and OB-8 (Return Prenatal History). It was used as a physician's worksheet only; no cards are included in the master file. This form was first used at the beginning of the study, revised once in July 1959, and replaced by form OB-46 in April 1962 (Physician's Clinic Record). Records are available on microfilm only.

RECORD OF CURRENT PREGNANCY
(For Form OB-11)

INSTRUCTIONS FOR PHYSICIAN

- Par. 1 This is the record of the obstetrician's evaluation of positive items obtained by the interviewer on OB-3, "History Since Last Menstrual Period", and OB-8, "Return Prenatal History". Each positive item must be discussed with the patient and described here. If any physical examination is done other than the routine obstetrical examination called for on the "Return Visit and Laboratory Record", the examination done and results should be recorded here. Start with first visit, summarizing antepartum course to date. Record any diagnosis made and indicate whether it is definite (DF), based on physical examination and/or laboratory findings at the time of this visit, or is probable (PA) or possible (PS), made purely in retrospect based on the patient's history.
- Par. 2 If the interviewer indicates that a physician has been seen, you must contact him and summarize his findings and diagnosis. List any non-routine laboratory examinations made and the results. Indicate any medication prescribed and any special instructions given. Always be sure to include Items 1, 2, 3, 4, 5 and 6 as indicated at the top of this sheet. It is important to date and sign each entry.
- Par. 3 If the patient is sent for a consultation, summarize the consultation report on this sheet or append a copy of the consultation, laboratory report, or other pertinent record.
- Par. 4 When you run out of space, start a new sheet, making sure that the patient is identified on the next sheet by name, hospital number, and KIDDB number, but remember to number each page in the lower right corner.

OB-46 Physician's Clinic Record, Record of Current Pregnancy

Form OB-46, Physician's Clinic Record, was used to record the physician's notes pertaining to the prenatal examination and each subsequent prenatal clinic visit. It was first used in April of 1962 as a replacement for OB-II and did not undergo revision. No cards containing this information were included in the master file; records are available on microfilm only.

OB-46

OB-44 RECORD OF CURRENT PREGNANCY

- I. Purpose of form** For physicians' information pertaining to the prenatal examination and at each subsequent prenatal clinic visit.
- II. General Instructions**
- A. Date each entry.**
 - B. Enter name and title of the physician whose findings are being reported, following each note.**
 - C. If more than one physician sees the patient at a particular visit, record the comments, diagnoses, impressions, etc. of all physicians.**
 - D. Report clearly the source of all data recorded which is not obtained at a prenatal visit, i.e., telephone conversation, perusal of records, etc.**
 - E. Summarize findings in sufficient detail to demonstrate the logic of any conclusions reached.**
 - F. Avoid repetition of facts adequately reported elsewhere, if they do not contribute to the commentary and evaluation that these notes should contain.**
- III. Initial note.** In addition to data recorded as on other visits (listed below), report the following in the initial note:
- A. Events noted in the past medical or obstetric histories which may influence the course of, or treatment during, the current pregnancy.**
 - B. The general health of the patient at the beginning of pregnancy.**
 - C. Description of the course of pregnancy to the time of the initial note.**
- IV. All prenatal notes**
- A. Elaboration of history.** Elaborate upon any suggestive or positive history of disorder obtained by the interviewer (OB-3, OB-5), or the physician (OB-42, OB-44). This should include onset, duration, and severity.
 - B. Elaboration of positive physical findings.** Describe in detail any abnormal physical findings noted on OB-43 or OB-44.
 - C. Interpretation of laboratory findings.** Interpret findings indicative or suggestive of pathological states, when laboratory reports are first available.
 - D. Diagnoses.** Record all diagnostic impressions arrived at as a result of interpretation of the history and physical findings.
 - E. Procedures or treatments.** Record any diagnostic, therapeutic, or prophylactic procedures or treatments initiated or ordered, including medication. Specify:
 1. All medications administered at prenatal visits (specify dosage, route).
 2. All medication given to or prescribed for the patient (specify daily dosage, manner of use, total amount provided or prescribed).
 3. All medication discontinued (specify date).
 4. Medication the physician knows the patient is taking, obtained from other sources. This will include medication routinely taken for chronic diseases such as epilepsy, diabetes, etc. (specify dosage, change in dosage).
 5. Medication given for research or prophylactic purposes only.
 - F. Duration of pregnancy**
 1. Record original EDC.
 2. Record any change in EDC as a result of:
 - a. Re-evaluation of menstrual history.
 - b. Interpretation of obstetrical examination findings.
 - G. Non-Study prenatal care (off-patient).** This will usually describe a positive mark in item #22, OB-44 Prenatal Observations.
 - H. Consultations.** Record the date of and diagnoses made by consultation. Procedures, treatments or changes in

Instruction Manual for Statistical Forms

OB-46 REG'20 OF CURRENT PREGNANCY (Continued)

- obstetrical management are handled as in IV. 2.
2. Study Hospital, non-Study facilities: Record as for consultations.
3. Outside Study hospital: Record the date, diagnoses, and treatment given as learned by patient history or direct communication with the facility which rendered care. Submit supporting data such as abstracts or photostats when obtained.

October 1962

OB-12 Summary of Hospitalization for Any Antepartum Condition

Form OB-12, first used at the beginning of the study, was intended for use when a study patient was admitted to the hospital for a reason other than delivery. It was replaced in April 1962 by form OB-47, Summary of Antepartum Hospitalization. Records for both forms are available on microfilm only.

February 1959

(For Forms in Use April 1961)

SUMMARY OF HOSPITALIZATION FOR ANY ANTEPARTUM CONDITION
(For Form OB-12, Revised 7-59)

INSTRUCTIONS FOR OBSTETRICIAN

This form is to be used for summarizing any antepartum admission, to any service of any hospital, terminating in the discharge of a patient who is either undelivered or delivered of a fetus of 400 gms. weight or less, or less than 26 weeks gestational age (based on IMP).

Item #2. "Summary By"

Insert your first and last name.

Item #3. "Title or Position"

Give your official title, such as "medical student", "intern", "resident", "project obstetrician", etc.

Item #4. "Date Admitted"

Record the date the patient was admitted to the hospital: month, day, and year.

Item #5. "Date Discharged"

Record the date the patient was discharged from the hospital: month, day, and year.

Item #6. "Reason for Admission"

Give as complete a description as possible of the condition for which the patient was hospitalized. This is important in the event that a specific diagnosis cannot be made. If admitted to another hospital, specify name of hospital.

Item #7. "Anesthesia Given During Hospitalization"

If the patient received anesthesia during this hospitalization for any reason, for either diagnostic or therapeutic procedures, check the box marked "Yes"; otherwise check "No". If the patient did receive anesthesia, the anesthesia record must be completed.

Item #8. "Diagnostic Procedures"

Include all common diagnostic procedures such as laboratory tests, x-ray examinations and any special procedures such as colpotomy or culdoscopy, etc. Specify kinds of physical examinations done.

Items #9-#10. "Diagnosis"

If a definite diagnosis based on observations during the hospital stay can be made, record the diagnosis here and indicate the approximate date

February 1959
(For Forms in Use April 1961)

SUMMARY OF HOSPITALIZATION FOR ANY ANTEPARTUM CONDITION (Con't)

Items #9-#10. "Diagnosis" (Con't)

of onset in the appropriate box.

Items #11-#13. "Therapy"

If therapy consists of observation or bed rest only, so indicate. Record in the appropriate space any medical therapy the patient received. List specific drugs, dosage, dates given, response to medication, untoward reactions etc. If a surgical therapeutic procedure is performed, describe it carefully and be sure to have the anesthesia record completed.

Item #14. "Status of Pregnancy on Discharge."

This is intended to distinguish between the status of the pregnancy on discharge and the status of the condition for which the patient was admitted. If the status of the pregnancy was unaltered by the condition for which the patient was admitted, or by therapy, check appropriate box. If for reason other than unchanged or terminated, specify the change in such terms as "aborted", "suspected fetal death", etc.

Item #15. "Condition on Discharge"

This refers to the patient's status on discharge as far as the condition for which she was admitted is concerned. Check the appropriate box to indicate whether in your opinion she is cured, improved, unchanged, worse, or deceased.

CHANGED 2-40

OB-47

I. Purpose of form

- A. To summarize any antepartum hospitalization or portion of a hospitalization.
- B. To record all maternal deaths prepartum or postpartum.

II. General Instructions

- A. This form may be completed by any member of the Project staff. In all cases, lay and medical editing are required procedures.
- B. When hospitalization has occurred in a non-Study hospital, supporting data in the form of abstracts, photostats, etc., are required.
- C. This form is required in all cases of maternal death whether delivered or undelivered.

III. Specific Instructions

Item Number

2. Date admitted. Record.
3. Date discharged. Record date discharged or transferred. If to another institution, state this fact.
4. Place hospitalized.
 - a. If in the Study institution, mark "this hospital"; if in another institution, mark "elsewhere" and record the name and address of the hospital, as well as the name of the private physician, if any.
 - b. If on a non-Study facility of the Study institution, note area; e.g., "medical ward."
5. Admission impression. Record. If unknown, record reason for admission.
6. Condition of fetus at discharge. Record the estimated condition of the fetus at discharge or transfer by marking the appropriate box. If the status of the fetus was in doubt at that time, mark "uncertain" and specify details. If there is no knowledge of the condition, mark "not evaluated."

Item Number

7-9. Condition of mother at discharge.

- a. Mark as appropriate. In the event the patient expired, complete items #8 and 9, specifying details regarding autopsy. If autopsy was not done in place hospitalized, specify the name and address of the institution at which the autopsy was performed. Submit autopsy findings.
- b. If reporting a maternal death which did not occur during a period of hospitalization, complete items #7, 8 and 9, reporting any other details known in item #15, and complete Items #12 and 14 if appropriate.

10-11. Surgical procedures. Record all, with dates. If none, mark "no."

DISCHARGE DIAGNOSES

- a. Record all discharge diagnoses, using standard nomenclature whenever possible. If information at discharge is insufficient to establish a firm diagnosis, probable and/or possible diagnoses are to be included and be so titled.
- b. Complete OB-47 based only on information known at the time of discharge. (Subsequent editors' comments may be based on later information, but editor must not delete any findings or conclusions originally noted.)
12. Obstetric diagnoses. Record all, such as "Pregnancy, viable, w/ delivered"; "Threatened abortion"; "Pre-eclampsia, mild"; "Possible placenta previa." For false labor (with or without other diagnoses), mark the box provided.
13. Approximate date of onset. Opposite any diagnosis for which it is appropriate record the approximate date of onset, especially of acute infectious processes and toxemia. This should be the date on which the condition is thought to have first occurred, rather than the date of diagnosis.

October 1967

Instruction Manual for Obstetric Forms

OB-47 SUMMARY OF ANTEPARTUM HOSPITALIZATION (Continued)

Item Number

14. Non-obstetric diagnoses. Record all, such as "Rheumatic heart disease, Class II," etc.
15. Comments. Use space provided here as appropriate.
EDITING. Report completion of the editing procedure by completing items #16-18.
16. Medical edit. Record whether editing is accomplished with or without the original hospitalization record.
- 17, 18. Medical edit by. Provides for the signature and position of the medical editor.
19. Anesthesia given. Indicate whether or not any anesthetic agent was administered during the hospitalization. If "yes," complete and attach form OB-57.
20. Radiation. Mark to indicate if there were any diagnostic x-rays or radiation therapy during the hospitalization. If "yes," report results or summarize therapy administered on form OB-45 and attach. Alternatively, attach photocopy of hospital record.

Item Number

21. Drug therapy. Indicate whether or not drug therapy was administered during the hospitalization. If "yes," record details (including, dosage, route of administration and dates of commencement and discontinuance) on form CP-5, unless previously recorded on OB-32 during observation for labor. Alternatively, attach photocopy of hospital record.

"Drug therapy" includes all medications prescribed for the treatment of the patient, other than aspirin, routine vitamins, and laxatives. Of especial importance are those drugs which may have an effect upon the fetus. Specifically to be reported would be: all antibiotics, chemotherapeutic agents, hormones, narcotics, sedatives, tranquilizers, oxytocics, or other medications given to inhibit or initiate labor.

22. Laboratory work. Indicate whether or not laboratory studies were done during the hospitalization. If "yes," record results on OB-45 and attach.

OB-15 Drugs in Pregnancy

Form OB-15, introduced in May 1963, served as an in-house worksheet for recording drugs taken during pregnancy. Data were recorded on card 0315 in the master file (Table OB-15.1).

Data on drugs were abstracted by nurses and medical students at the Perinatal Research Branch (NINCDS) from study forms submitted by the collaborating institutions. From the raw data on drugs, Dr. Dennis Sloane (co-director of the Drug Epidemiology Unit, Boston University Medical Center) created two drug files (see Volume IV of this user's guide). Researchers wishing to use drug data are directed to the drug work files.

DEFINITION OF CODES
DRUGS IN PREGNANCY
FORM OB-15 CARD 0315

<u>FIELD</u>	<u>CARD COLUMN</u>
1. <u>Card Number</u> Code: 0	1
2. <u>Form Number</u> Code: 315	2-4
3. <u>Revision Number</u> Code: 0 - Form Dated: 5/63	5
4. <u>HINDB Number</u> Nine-digit number for Patient Identification Code: As given	6-14
5. <u>IMP (OB-4)</u> Six-digit number for month (cols. 15-16), day (cols. 17-18), and year (cols. 19-20) Code: As given 99 - Month, day and/or year unknown	15-20
6. <u>Number of Antepartum Admissions</u> Code: 0 - None 1-7 - Number reported 8 - 8 or more reported 9 - Unknown	21
7. <u>Number of OB-12 Forms</u> Code: Same as in Field 6	22
8. <u>Number of OB-47 Forms</u> Code: Same as in Field 6	23
9. <u>No Drugs Taken</u> Code: 0 - Drugs taken 1 - No drugs taken	24
10. <u>X-Ray Pelvimetry</u> Code: 0 - No 1 - Yes	25

Revised March 1965

DEFINITION OF CODES (Continued)

FORM OB-15
Card 0315

<u>FIELD</u>	<u>CARD</u>
	<u>COLUMN</u>
11. <u>FIRST DRUG</u> Fourteen-digit code for: <u>Drug</u> (columns 26-29) Code: See Attachment "Drugs In Pregnancy" page OB 1-4 ~ 6	26-42
<u>Lunar Month of Pregnancy in Which Taken</u>	
<u>Four weeks prior to LMP</u>	(col. 30)
<u>First Month</u>	(col. 31)
<u>Second Month</u>	(col. 32)
<u>Third Month</u>	(col. 33)
<u>Fourth Month</u>	(col. 34)
<u>Fifth Month</u>	(col. 35)
<u>Sixth Month</u>	(col. 36)
<u>Seventh Month</u>	(col. 37)
<u>Eighth Month</u>	(col. 38)
<u>Ninth Month</u>	(col. 39)
<u>Tenth Month</u>	(col. 40)
<u>Eleventh month or more</u>	(col. 41)
<u>Unknown Month</u>	(col. 42)
Code for each column:	
F - Not taken	
A - Taken 1 day only	
B - Taken 1-7 days	
C - Taken more than 7 days	
D - Taken unknown time	

NOTE: If No Drugs are reported, card ends in column 25. If more than one drug reported, a card is punched for each drug with columns 1-42 same as above.

Revised March 1965
