Phone: 858-736-5218

Affiliation: Department of Economics, UC San Diego

Address: 7055 Charmant Dr, F87, San Diego, CA 92122

Course of Study

I am a 4th year PhD student in economics at UCSD. My primary fields are environmental and public economics. I am also interested in behavioral economics and its applications in my primary fields.

I have advanced to candidacy, and my dissertation committee members are Professor Mark Jacobsen, Josh Graff Zivin, and Julie Cullen. The expected date of completion is June 2018.

Research Interests

Currently, my main project examines behavioral issues in customers' decision to purchase solar panels. I am also working on other projects on the impacts of air pollution and weather shocks on labor market activities, beliefs in climate change and political participation.

Because digitization profoundly changes economics and other social activities, I am interested in understanding more about its impacts, as well as learning new tools and data sources from this literature.
