

SLOAN RESEARCH FELLOWSHIPS

chemistry

computer science

economics

mathematics

neuroscience

ocean sciences

physics

computational & evolutionary
molecular biology

DEADLINE

September 16, 2013

Selection Committees

Chemistry

Karen I. Goldberg, University of Washington

Scott J. Miller, Yale University

Mark A. Ratner, Northwestern University

Computational & Evolutionary Molecular Biology

Bonnie Berger, MIT

Andrew G. Clark, Cornell University

Stephen Mayo, CalTech

Computer Science

Jitendra Malik, UC Berkeley

Margo I. Seltzer, Harvard University

Éva Tardos, Cornell University

Economics

Esther Duflo, MIT

Jonathan Levin, Stanford University

Robert Shimer, University of Chicago

Mathematics

Tomasz S. Mrowka, MIT

Karl Rubin, UC Irvine

Margaret H. Wright, New York University

Neuroscience

Dora E. Angelaki, Baylor College of Medicine

Michael P. Stryker, UC San Francisco

Leslie B. Vosshall, Rockefeller University

Ocean Sciences

Barbara Block, Stanford University

Nancy Knowlton, UC San Diego

Mitchell Sogin, Brown University

Physics

Andrew G. Cohen, Boston University

Evelyn Hu, Harvard University

Ethan T. Vishniac, University of Saskatchewan

Sloan Research Fellowships

This year the Alfred P. Sloan Foundation will award \$50,000 fellowships to each of 126 early-career scientists for use in their research. Nominated by department chairs, senior researchers, and other leaders in the scientific community, the Sloan Research Fellows represent the next generation of top scholars in the sciences, economics, and mathematics. Since 1955, when the program began, 39 Sloan Research Fellows have gone on to win Nobel Prizes, 63 have been awarded the National Medal of Science, 17 have won the Fields Medal in mathematics, 12 have won the John Bates Clark Medal in economics and hundreds have received other prizes, recognitions, awards, and honors for their research accomplishments.

Funds from the Sloan Research Fellowships are awarded directly to the fellow's institution and may be used over a two-year period for any activity supportive of the fellow's research, including equipment, technical assistance, professional travel, or trainee support.

Fields

Sloan Research Fellowships are awarded for research in the following eight fields:

Chemistry (23)

Neuroscience (16)

Computer Science (16)

Ocean Sciences (8)

Economics (8)

Physics (23)

Mathematics (20)

Computational & Evolutionary Molecular Biology (12)

Numbers in parentheses represent annual fellowships awarded in each field. Candidates with appointments in other departments are eligible for nomination.

****Note:** The Committee may make exceptions for candidates who were awarded their Ph.D. prior to Sept. 2007 if their careers were disrupted due to military service, child-rearing, or a change of field. The Committee may also make exceptions for candidates who are currently serving in their first faculty position and who were appointed to that position on or after Sept. 2011.

Eligibility

- ▶ Candidates must hold a Ph.D. (or equivalent) in chemistry, computational or evolutionary molecular biology, computer science, economics, mathematics, neuroscience, ocean sciences (including marine biology), physics, or a related field;
- ▶ Candidates must be a member of the tenure track (or equivalent) teaching faculty at a college, university, or other degree-granting institution in the United States or Canada;
- ▶ Candidates must normally be no more than six years from completion of their most recent Ph.D. (or equivalent) as of the year of their nomination. (That is, a candidate's most recent Ph.D. must have been awarded on or after September 2007.) **

Nomination & Submission

Candidates must be nominated by a department head or other senior researcher. Submissions unaccompanied by a nomination from a senior researcher are not accepted. More than one candidate from a department may be nominated, but no more than three.

The following materials must be submitted for an eligible candidate to be considered for a Sloan Research Fellowship.

- ▶ A letter from a department head or other senior researcher officially nominating the candidate and describing his or her qualifications, initiative, and research;
- ▶ The candidate's curriculum vitae;
- ▶ A list of the candidate's scientific publications;
- ▶ Two representative articles by the candidate;
- ▶ A brief (one-page) statement by the candidate describing his or her significant scientific work and immediate research plans;
- ▶ Three letters from other researchers (preferably not all from the same institution) written in support of the candidate's nomination.

Nominated candidates are normally below the rank of associate professor and do not hold tenure, but these are not strict requirements.

In keeping with the Alfred P. Sloan Foundation's longstanding support of underrepresented minorities in the sciences, the Foundation strongly encourages the nomination of qualified women and minority candidates.

To begin the online nomination and submission process, visit www.sloan.org/fellowships.

Deadline

To be considered for a Sloan Research Fellowship, eligible candidates must complete the online nomination and submission process **no later than September 16, 2013**.

To begin the online nomination and submission process, visit www.sloan.org/fellowships

Selection

Candidates are reviewed and selected by a committee of distinguished scientists in each eligible field. The committees review more than 700 submissions each year. Fellows are selected on the basis of their independent research accomplishments, creativity, and potential to become leaders in the scientific community through their contributions to their field.

Notification

Selected candidates will be notified in February 2014.
