SECTION VI, Standard Metropolitan Statistical Areas . . . . .	212

# Geographic Reference Manual

## Introduction

This manual contains various listings of geographic codes contained in the computer tape for data years 1962 and 1963. These codes do not conform with codes contained in the punched cards for these years, but are recodes of the originally punched geographic codes to facilitate computer operations. Minor changes in geographic area boundaries between 1962 and 1963 which resulted in changes in codes are summarized on page 6.

The manual identifies and classifies incorporated urban places in the United States having populations of 2,500 or more according to the final 1960 Census, and unincorporated areas classified as urban under special rules by the U.S. Bureau of the Census. It also identifies municipalities (county equivalents) in Puerto Rico and the Virgin Islands and principal urban places in the Virgin Islands. The manual is divided into the following five sections:

SECTION I lists all areas arranged alphabetically by State, County, and City. The nine-digit code associated with each area is arranged as follows:

State codes (first and second digits) - The states and the District of Columbia are numbered in alphabetical sequence from 01 through 51. Puerto Rico and the Virgin Islands are assigned codes 52 and 53 respectively.

## Geographic Reference Manual

County codes (third, fourth and fifth digits) - Counties are numbered in alphabetical sequence within State.

City codes (sixth, seventh and eighth digits) - Cities with populations of 10,000 or more are numbered in alphabetical sequence within State. For rural areas, and for urban places with populations of 2,500 - 10,000 in 1960, which are not separately identified in tabulations of vital statistics data, this code is 999.

Population Size codes (ninth digit) - Areas are classified for population size as follows:

	<u>Code</u>
Places of 1,000,000 or more -----	0
Places of 500,000 to 1,000,000 -----	1
Places of 250,000 to 500,000 -----	2
Places of 100,000 to 250,000 -----	3
Places of 50,000 to 100,000 -----	4
Places of 25,000 to 50,000 -----	5
Places of 10,000 to 25,000 -----	6
Places of 2,500 to 10,000 -----	7
All other areas -----	9

## Geographic Reference Manual

SECTION II lists cities with populations of 10,000 or more, arranged alphabetically within State. The same codes described in Section I are shown in this listing in a different arrangement. The state and city codes which provide for the alphabetical arrangement of the cities are printed to the left of the city names. The county and population size codes are printed to the right of the city names.

SECTION III lists cities with populations of 100,000 or more arranged alphabetically. The nine-digit code described in Section I is printed to the left of the city names.

SECTION IV lists all independent and coextensive cities in the United States.

SECTION V lists the metropolitan counties arranged alphabetically within State. In addition to the State and county codes, the standard metropolitan statistical area codes (described in Section VI) in which counties are located are shown on this list.

## Geographic Reference Manual

SECTION VI lists the standard metropolitan statistical areas (SMSA's), standard consolidated areas, and their components with identifying codes. The SMSA's are numbered in alphabetical sequence from 001-204. Codes are not assigned to the two consolidated areas since they are combinations of SMSA's and additional counties and are handled in tabulations on the basis of the SMSA and County codes. This list has been adapted from the list of standard metropolitan statistical areas and standard consolidated areas (SCA's) established by the Bureau of the Budget<sup>1</sup> and used by the Bureau of the Census. The only differences between this list and that established by the Bureau of the Budget occur in the New England area. In the latter list, for New England, cities and towns (township equivalents), not counties are used to define the standard metropolitan statistical areas. However, since national vital statistics are tabulated by counties, not towns, the metropolitan State economic areas, (MSEA's) established by the Bureau of the Census<sup>2</sup> and composed of whole counties, are used for vital statistics purposes.

---

<sup>1</sup>Bureau of the Budget, Standard Metropolitan Statistical Areas, U.S. Government Printing Office, Washington 25, D.C. 1961.

<sup>2</sup>U.S. Bureau of the Census, U.S. Census of Population: 1960, Number of Inhabitants, United States Summary, Final Report PC(1)-1A, U.S. Government Printing Office, Washington 25, D.C., 1961; and State Economic Areas, U.S. Government Printing Office, Washington 25, D.C., 1951.

## Geographic Reference Manual

Standard metropolitan statistical areas. - Except in New England, a standard metropolitan statistical area (SMSA) as defined by the Bureau of the Budget is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more or two contiguous cities with a combined population of at least 50,000 inhabitants. These cities are designated as the central cities of SMSA's. In addition to the county, or counties, containing such a city or cities, contiguous counties are included in as SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city.

Standard consolidated areas. - For New York and Chicago, several contiguous SMSA's and additional counties have been combined into the New York-Northeastern New Jersey and the Chicago-Northwestern Indiana Consolidated Areas.

Whenever statistics are tabulated and published for the standard metropolitan statistical areas, the two standard consolidated areas (SCA's) will also be shown.

Geographic Reference Manual

Changes in geographic area boundaries  
between 1962 and 1963

Only two states, Tennessee and Virginia, were affected by these changes which are listed below.

Tennessee

Effective with 1963 data year Nashville city and Davidson County were merged as one geographic area. This manual reflects the 1963 definition of this area which is identified as Davidson Nashville County (Code 43 019 020). The two areas were identified separately in 1962 as follows:

	Davidson County	
43 019 020 3	Nashville	
43 019 999 7	Balance of County - Urban	
43 019 999 9	Balance of County - Rural	

Virginia

Two changes were made in areas in Virginia: (1) Norfolk County and the independent city of South Norfolk merged as one geographic area identified as Chesapeake City, (2) Princess Anne County and the independent City of Virginia Beach merged as one geographic area identified as Virginia Beach.

This manual reflects the 1963 definitions of the areas. The City of South Norfolk, Princess Anne and Norfolk County were deleted and the independent City of Chesapeake (code 47 307 013) was added. The city of Virginia Beach was already identified as an independent city in 1962. The 1962 codes for the areas deleted in 1963 are:

	Norfolk County	
47 192 999 9	Entire County	
	Princess Anne County	
47 228 999 9	Entire County	
	City of South Norfolk	
47 378 069 6
