

Nothing is better than a
good book.

MISSOURI, MICHIGAN, AND NEW YORK (C. H.)

A black and white photograph showing a row of five small, dark, irregularly shaped objects arranged horizontally. To the left of this row is a vertical black bar, and to the right is another vertical black bar.

(B) Types of independent variable used

- (a) The battery was initially charged
then gradually the voltage was
decreased until the time constant
became constant at the beginning
thereafter until it became finally
approximately equal to the time constant
of the load.
- (b) The battery was charged
gradually until the current
became constant.
- (c) The battery was charged until
the voltage became constant.

5) The title is Geometric Measure Theory by T. T. Wu.

This image shows three vertical columns of extremely faint, high-contrast text. The text is mostly illegible due to the low contrast, but some characters and symbols can be vaguely discerned. The first column on the left appears to have several short lines of text, possibly names. The middle column contains longer, more continuous text, which might be a single name or a series of related entries. The third column on the right also has several lines of text. The overall appearance is that of bleed-through from the other side of a document page.
