

COVER SHEET

2014 SSA SUPPLEMENT PUBLIC USE METADATA REPORT

Content Description

The universe for the SSA Supplement is the resident population of the United States, excluding persons living in institutions and military barracks that were included in the 2014 SIPP sample and completed a 2014 Wave 1 SIPP interview.

The file contains data from the SSA Supplement instrument that includes personal retirement accounts, main employment, retirement and pension plans from current main employment and previous employment, complete marital history, health status, work disability, adult disability, and child disability. The file also contains some identifier information, and basic demographic and social characteristics from the Wave 1 SIPP file.

The interview period is September 2, 2014 to November 23, 2014. The reference period for all sections, excluding Personal Retirement Accounts, is as of the interview date. The reference period for Personal Retirement Accounts is 2013.

Summary Statistic Variables

When top-coding the dollar amount questions, values at the top of the distribution are replaced by the mean of those values. Each variable has a set of corresponding summary statistic variables that display additional information about the distribution of top-coded values. These variables end in “**_MED**” (median) and “**_STD**” (standard deviation) and are only in universe for top-coded amount variables.

Matching the SSA Supplement File with 2014 Wave 1 SIPP File

Since the SSA Supplement and Wave 1 SIPP data are released as separate files, it may be necessary to merge the two files. The SSA Supplement uses the following identifier variables to uniquely identify individuals and provide a means of linking the same individuals from the SSA Supplement to Wave 1 SIPP.

SSUID	Sample unit identifier
PNUM	Person number

Both the SSA Supplement and SIPP Wave 1 files contain the following SIPP household and person-level information.

SPANEL	2014 Panel year
TST_INTV	State of residence for the SIPP Wave 1 interview address
TMETRO_INTV	Metropolitan status for the SIPP Wave 1 interview address
GHLFSAM	Half Sample Code
GVARSTR	Variance pseudo stratum code
ERACE	Race of this person (White only, Black only, Asian only, Residual)
EORIGIN	Spanish, Hispanic or Latino origin of this person
EEDUC	Highest degree received or grade completed
RFAMNUM	Family number at the time of the SIPP Wave 1 interview

ERELRPE	Household relationship at the time of the SIPP Wave 1 interview
EPNPAR1	Person number of parent 1 at the time of the SIPP Wave 1 interview
EPNPAR2	Person number of parent 2 at the time of the SIPP Wave 1 interview

Notes

1. Not in Universe (NIU) is represented in the data by "." for numeric variables and blank for character variables.

2. Definition of Status (Imputation) Flag values:

0. Not in universe
1. In universe; as reported
2. Statistical imputation (hot deck)
3. Logical imputation
4. Model-based imputation
5. Cold deck
6. Imputed from a range
7. Combination of 1 and 2/3/5/6
8. Combination of 2/3/5/6
9. Can be determined from the allocation flags for the components of this recode.

3. Although most universe statements reference public use variables, some universes contain variables that are not available for public use. These variables include:

EPPMIS_S: Respondent's eligibility status. Although not shown in the metadata for most variables, all universes assume that EPPMIS_S=1, which means the person was eligible for an interview and in universe for content edits. (EPPMIS_S=2 means the person was not eligible for an interview.)

EJOBCount: Total number of jobs and businesses at the time of the Supplement interview

4. If a SSUID is listed on 2014 Wave 1 SIPP public use files but NOT on the SSA Supplement file, it means the entire household was a non-interview in the Supplement; therefore, no data is available to link back to Wave 1.

**** SSUIDs on the SSA Supplement file contain the original SIPP household in its entirety.** This is different from previous SIPP files. No persons were added to the original Wave 1 roster. However, person-level non-interviews within the interviewed household are also included on the Supplement file. They are identified by the interview status variable **SSAINTSTAT = 3 or 4**. Refer to **SSAINTSTAT** for the reason of the non-interview. These records have no Supplement data but do have month and year of birth, age, sex, and copied SIPP wave 1 data. All non-interviewed persons had EPPMIS_S=2. Do NOT include these records when analyzing content data. **

5. The SSA Supplement age (**TAGE_S**) is calculated using the date of birth from the 2014 SIPP Wave 1 interview and the date of the SSA Supplement interview.

6. If **TAGE_S = 0**, this indicates the person is a **child under the age of 1 year (12 months) old**. Children under the age of 1 are asked by proxy some of the Child Disability questions.

7. The conditions questions in Work, Adult, and Child Disability (**COND[1-3]_WORK, MAIN_CONDW, COND[1-3], MAIN_CONDITION, COND[1-3]_FPHLTH, CHILD_COND[1-3]**) used an answer list based on over 400 ICD-10 (International Classification of Diseases – Version 10) categories. We edited the ICD-10 answers (ECONDW[1-3], EMAINCONDW, ECOND[1-3], EMAIN, ECONDPH[1-3], and ECHILD_COND[1-3] – not on this file) and then recoded them into the traditional pre-2014 disability topical module answer categories (plus some new categories) using the “T” variables (TCONDW[1-3], TMAINCONDW, TCOND[1-3], TMAIN, TCONDPH[1-3]), and (TCHILD_COND[1-3]).

For this survey, Adult (TCOND[1-3] and TCONDPH[1-3]) and Child (TCHILD_COND[1-3]) answers are not released under separate variable names, (like they were in previous SIPP topical modules), but are further collapsed into three variables - **TCONDP1, TCONDP2, and TCONDP3**.

8. The **Table of Contents** lists the edited/top-coded variable name, the corresponding tag name (or question name) found in the instrument, and the page number it is found in the Metadata Dictionary.

Topic	Pages
ID, SIPP Wave 1, and Status Variables	1 - 17, 22
Demographics	18 - 21
Personal Retirement Plans	23 - 41
Main Employment and I & O	42 - 72
Pensions	73 - 224
Marital History	225 - 243
Health Status	244
Work Disability	245 - 265
Adult Disability	266 - 361
Child Disability	362 - 396

Using the Metadata Dictionary

The Metadata Dictionary provides the name, description of field contents, universe description, universe, field size or length, values for open-ended questions or a categorical answer list, and the status (imputation) flag for each variable on the public-use file.

The Description is usually the question text from the instrument. It can also include any applicable notes. Answer lists contain categorical value codes and labels.

We display Metadata variables in two ways: minimum/maximum values for open-ended questions and defined categorical answer lists. An example of each is on the next page:

Variable with Open-Ended Answer:

TJOBHRS		Variable
Description:	How many hours per week does person usually work at his/her main job/business?	
Universe Description:	Eligible person age 15 or older who had a main job (employer) or owned a main business (self-employed).	
Universe:	TAGE_S ge 15 and ERMNJBBS = (1, 2)	
Length:	2	
Min:	0	
Max:	69	
Status Flag:	AJOBHRS	

Variable with Categorical Answer List:

EMS_S		Variable
Description:	Is person currently married, widowed, divorced, separated, or never married?	
Universe Description:	Eligible person age 15 or older.	
Universe:	TAGE_S ge 15	
Length:	1	
Answer List:

Description: Sample unit identifier. This identifier is created by scrambling together PSU, Sequence #1, Sequence #2, and the Frame Indicator for a case. It should be used, along with PNUM, to link the SSA Supplement data to 2014 SIPP Wave 1. (variable type = character)

Universe Description: All persons on the household roster.

Universe: All persons

Length: 12

Description: The following question is about the plan the person considers to be his/her only/first most important retirement plan on this job/business. There are several types of retirement plans:

In the first type, the person's benefit is defined by a formula usually involving his/her earnings and years on the job. This is called a defined benefit plan.

In the second type of plan, contributions made by person and/or his/her employer go into an individual account for him/her. This is called a defined contribution plan.

The third type of plan shares some characteristics with the above two plans. In this type of plan, the person's employer contributes a value equal to a percent of his/her earnings each year and there is a rate of return on that contribution. This is called a cash balance plan.

Which type of plan is person in?
