## 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE INTRODUCTION

The Internal Revenue Service 2000 Public Use Tax File, which contains 145,663 records, was selected as part of the Statistics of Income program that was designed to tabulate and present statistical information for the 130.3 million Form 1040, Form 1040A, and Form 1040EZ Federal Individual Income Tax Returns filed for Tax Year 2000. The Individual Tax File is designed for making national level estimates.

The Tax Files, which have been produced since 1960, consist of detailed information taken from SOI sample records. The public use versions of these sample files are sold in an unidentifiable form, with names, Social Security Numbers (SSN), and other similar information omitted. The primary uses made of these files have been to simulate the administrative and revenue impact of tax law changes, as well as to provide general statistical tabulations relating to sources of income and taxes paid by individuals.

The 2000 Tax File can be purchased through the Internal Revenue Service, Statistics of Income Division. Any questions concerning the cost and acquisition of the current Individual Tax File should be directed to:

Individual Public Use Tax Files for each of the Tax Years 1960, 1962, and 1966 through 1991 are available through the National Archives and Records Service. Questions concerning cost, acquisition, and delivery of these historical tax model files, should be addressed to:

Reference Services
Center for Electronic Records
National Archives and Records Administration
8601 Adelphi Road
College Park, MD 20740-6001
(301) 713-6630

The Archives order number for any of the above-mentioned historical Public Use Tax Model Files is $374-109-(A)$. In addition to the order number, the requester should also specify the tax year and version (Individual or State) of the file under consideration.

Please refer to the sections of this booklet titled "Individual Tax File Sample Description" for a more detailed discussion of the Tax File.

## 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE DISCLOSURE AVOIDANCE PROCEDURES

To preserve the character of the microdata file while also protecting the identity of individuals, we have made the following changes to the Individual Tax File.

First, to make sure that it will be impossible to know whether a given taxpayer is represented in the sample, we have subsampled our 100 percent sample ${ }^{1}$ at a 33 percent rate. In addition, certain records (123) with extreme values were exempt from inclusion in the public-use file. Each of these records would have had a 33 percent chance of selection for the file. Therefore, the actual subsampling rate is slightly less than one third.

Second, those records that remain in our file from the 100 percent sample have been combined with other high income returns (defined as returns with $\$ 200,000$ or more of AGI or records with a weight of ten or less) for the following processing changes:

- The State code has been removed.
- Alimony paid and alimony received have been removed.
- Marital status and the various exemptions for dependents have been modified (see section on Code Definitions for specific changes).
- Then, all of the high income returns have been sorted from largest to smallest for the field "State and local income taxes deductions". In this field, for every three records, in descending order, the average State and local income taxes deduction has been determined and that value has been placed in the State and local income taxes deduction field for each of the three records. This has been done over that part of the sample containing non-zero values in these fields. If the last group of records contains fewer than three, these records have been combined with the group of three immediately before it. This method of disguising data is called "blurring".
- High income returns were then separated into 65 different classes based on marital status, the number of children living at home, and the size of salaries and wages. Within each of these 65 classes, returns have been sorted on salaries and wages. This field has then been blurred over consecutive records as described above for State and local income tax deductions. However, records have only been averaged with other records in the same class. Therefore, records within one of the 65 classes have not been averaged with records in any of the other 64 classes. The file was then sorted on real estate tax deductions (again, within the 65 classes), and on Net Receipts, and the same blurring procedure was repeated on each field. ${ }^{2}$

[^0]
## 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE

Third, all lower income returns (records with an adjusted gross income of less than \$200,000 and not from our 100 percent sample) have been blurred, nationally, for alimony paid and alimony received. Then, all lower income returns were sorted by State and by a two level marital status variable (married/not married). After this sort, the records were blurred for salaries and wages, real estate tax deductions, Net Receipts, Medical and dental expenses, and State and local income taxes deduction (State of Wisconsin, only, for this last item) in the same manner as described above.

Fourth, for all records on the file, all fields on the file have been rounded to the four most significant digits (e.g., $\$ 14,371=\$ 14,370$ and $\$ 228,867=\$ 228,900$ ).

Since individual records in this file may or may not contain data from just one tax return--and never contain the full item content of any one tax return--we request that researchers make these facts clear in publishing their findings. In particular, they should refrain from using any language that would imply that they had access to individual taxpayers' records.

## EXPLANATION OF FIELDS NOT ABSTRACTED DIRECTLY FROM TAX FORMS

The following explanations define data fields contained in the 2000 Individual Tax File that have not been abstracted directly from a specific line on Forms 1040, 1040A, 1040EZ, or the accompanying schedules and forms. Field numbers not appearing in this section have been entered on the specific lines on the forms or schedules from which the data were abstracted. Refer to the " 2000 Federal Tax Forms" section of this booklet for further information.

## Field

Definition
P04470 DEDUCTIONS
This is either Total Standard Deduction or Total Itemized Deductions. Only one can appear on each return. (Note: If the taxpayer had no income, but still included the total itemized deductions for which he/she was eligible, this amount is shown in P04470; else the standard deduction for which he/she was eligible is shown.)

E05100 TAX ON TAXABLE INCOME
This is the amount shown on line 40 less special taxes from Form 4972 (Tax on Lump Sum Distributions).

E05200 COMPUTED REGULAR TAX
This is the amount arrived at by applying the Tax Rate Schedules to Taxable Income, without regard to the type of computation used by the taxpayer.

E06000 INCOME SUBJECT TO TAX
For taxpayers filing current year returns, "Income Subject to Tax" is identical to taxable income except for: those dependents paying "kiddie" tax from Form 8615; and those returns with long-term capital gains taxed at or below the 28 percent rate (TXST equals 6 or 7). For dependents filing Form 8615 (TXST $=4$ or 8), this is the income taxed at child's rate. For taxpayers with long-term capital gains, this is only the income taxed at the regular rates (not any capital gains that were taxed at the long-term capital gains rates of $10,20,25$ and 28 percent). For prior year returns, "income subject to tax" is computed by using the Tax Year tax rate schedule to impute a hypothetical taxable income amount necessary to yield the given amount of tax reported.

E06200 MARGINAL TAX BASE
This is the amount of income subject to tax at the marginal tax rate applicable to the return (TXRT), using the 2000 Tax Rate Schedules for all returns. (See Income Subject to Tax).

## 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE

E06300 TAX GENERATED
This is a computed amount arrived at by applying the Tax Rate Schedules to Income Subject to Tax.

P08000 OTHER TAX CREDITS (NOT INCLUDED IN THE OTHER CREDIT FIELDS) The sum of the amounts for Other Tax Credits on Form 1040 line 49 for which separate fields have not been listed.

E07150 TOTAL TAX CREDITS (SOI)
Total credits from Form 1040 (line 50) or 1040A (line 32) plus EARNED INCOME CREDIT USED TO OFFSET INCOME TAX BEFORE CREDITS (E59680).

E06500 TOTAL INCOME TAX
Income Tax After Credits (E08800) plus Form 4970 tax less EIC used to offset all other taxes (E59700), (but never less than zero).

E08800 INCOME TAX AFTER CREDITS (SOI)
Income Tax after Credits from Form 1040 (line 51) or 1040A (line 33) minus the amount of Earned Income Credit used to offset Income Tax Before Credits (E59680). For Form 1040EZ, which does not allow for any credits or any other taxes, this is the same as "Total Tax Liability."

E09700 RECAPTURE TAX FROM FORM 4255
Amount shown in Form 1040, line 57 margin for Recapture of Investment Credit from Form 4255

E10300 TOTAL TAX LIABILITY (SOI)
Total tax liability (Form 1040, line 57, Form 1040A, line 35, Form 1040-EZ, line 10) minus Advance Earned Income Credit payments (line 55, Form 1040) minus EIC USED TO OFFSET INCOME TAX BEFORE CREDITS (E59680) minus EIC USED TO OFFSET ALL OTHER TAXES (E59700) minus the additional child tax credit (E11070) (but never less than zero).

E59560 EARNED INCOME FOR EARNED INCOME CREDIT
The total of earned income (salaries and wages, earned business income, and nontaxable earned income) used in computing the earned income credit, as shown the EIC Worksheet (found in the Instructions for Form 1040). Note that this field is computed by SOI. Taxpayers are not required to file this worksheet with their return.

# 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE 

If Total Earned Income Credit (EIC) is greater than Income Tax Before Credits (reduced by all credits except the Earned Income Credit), the following fields are computed:

## E59700 - EARNED INCOME CREDIT USED TO OFFSET ALL OTHER TAXES EXCEPT ADVANCE EIC <br> The lesser of:

1. Total EIC minus Earned Income Credit used to offset Income Tax Before Credits (E05800); or
2. The sum of all other taxes (E09400 + E09700 + E09800 + E09900

+ E10050), plus the following tax item which is not shown separately: Advance EIC

E59720 - EARNED INCOME CREDIT, REFUNDABLE PORTION
EIC minus E59680 minus E59700 (see above for definitions and conditions).

E10605 TOTAL TAX PAYMENTS
Total payments shown on the tax form, minus the total Earned Income Credit (Form 1040 line 65 minus line 60a) minus the additional child tax credit (line 62). This is limited to zero if there is a refundable EIC or additional child tax credit.

E21040 ITEMIZED DEDUCTION LIMITATION
The amount used to reduce deductible itemized deductions, as shown on line 9 of the Itemized Deductions Worksheet in the Form 1040 Instructions.

P22250 SHORT-TERM GAIN/LOSSES NET OF CARRYOVER
All short-term capital gains less losses shown in column (f) except for the shortterm capital loss carryover.

P23250 LONG-TERM GAIN/LOSSES NET OF CARRYOVER
All long-term capital gains less losses shown in column (f) except for the longterm capital loss carryover

## 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE <br> TECHNICAL DESCRIPTION OF THE FILE

The Public Use file is available on CD-ROM in ASCII format. The record length is 2540 where the last byte is an end of record marker.

All codes are unsigned. The data fields are signed positive or negative, whichever is appropriate, in the first character position of the field.

Codes are 4 characters in length with leading zeros. The largest value is 99 . The fields in the file are 12 characters in length with leading zeros and with " + " or "-" leading signs.

# 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE SAMPLE DESCRIPTION 

This section describes the sample design and selection, the method of estimation, the sampling variability of the estimates, and the methodology of computing confidence intervals.

## Domain of Study

The data in this file are estimates from a probability sample of unaudited Individual Income Tax Returns, Forms 1040, 1040A, 1040EZ, 1040PC (including electronic returns) filed by U.S. citizens and residents during Calendar Year 2000.

All returns processed during 1999 were subjected to sampling except tentative and amended returns. Tentative returns were not subjected to sampling because the revised returns may have been sampled later, while amended returns were excluded because the original returns had already been subjected to sampling. A small percentage of returns were not identified as tentative or amended until after sampling. These returns, along with those that contained no income information, were excluded in calculating estimates. This resulted in a small difference between the population total ( $125,037,636$ returns) reported in Table A and the estimated total of all returns ( $124,770,764$ returns) generated using the Public Use Tax File. In addition, the perfection of money amounts during Statistics of Income processing, as well as the blurring techniques used in creation of the Public Use File, may have shifted some returns from one income class to another, making it impossible to replicate Table A exactly from the Public Use sample.

The records found in this file are intended to represent all returns filed for Tax Year 1999. While about 98 percent of the returns processed during Calendar Year 2000 were for Tax Year 1999, a few were for noncalendar years ending during 1999 and 2000, and some were returns for prior years. Returns for prior years were used in place of 1999 returns received and processed after December 31, 2000. This was done in the belief that the characteristics of returns due, but not yet processed, could best be represented by the returns for previous income years that were processed in 2000.

## Sample Design and Selection

The sample design is a stratified probability sample, in which the population of tax returns is classified into subpopulations, called strata, and a sample is selected independently from each stratum. Strata are defined by:

1. Nontaxable with adjusted gross income or expanded income of $\$ 200,000$ or over and no alternative minimum tax.
2. High combined business and farm total receipts of $\$ 50,000,000$ or more.

# 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE 

3. Presence or absence of special Forms or Schedules (Form 2555, Form 1116, Form 1040 Schedule C, and Form 1040 Schedule F).
4. Total gross positive or negative income. Sixty variables are used to derive positive and negative incomes. These positive and negative classes are deflated using the Gross Domestic Product Implicit Price Deflator to represent a base year of 1991.
5. Potential usefulness of the return for tax policy modeling. Thirty-two variables are used to determine how useful the return is for tax modeling purposes.

Table A shows the population and sample count for each stratum after collapsing some strata with the same sampling rates. The sampling rates range from 0.05 percent to 100 percent.

Tax data processed to the IRS Individual Master File at the Martinsburg Computing Center during Calendar Year 1999 were used to assign each taxpayer's record to the appropriate stratum and to determine whether or not the record should be included in the sample. Records are selected for the sample either if they possess certain combinations of the four ending digits of the social security number, or if their ending five digits of an eleven-digit number generated by a mathematical transformation of the SSN is less than or equal to the stratum sampling rate times 100,000.

## Data Capture and Cleaning

Data capture for the SOI sample begins with the designation of a sample of administrative records. While the sample was being selected, the process was continually monitored for sample selection and data collection errors. In addition, a small subsample of returns was selected and independently reviewed, analyzed, and processed for a quality evaluation.

The administrative data and controlling information for each record designated for this sample was loaded onto an online database at the Cincinnati Service Center. Computer data for the selected administrative records were then used to identify inconsistencies, questionable values, and missing values as well as any additional variables that an editor needed to extract for each record. The editors use a hardcopy of the taxpayer's return to enter the required information onto the online system. Data are also adjusted during editing in an attempt to achieve consistent statistical definitions. For example, a taxpayer may report director's fees on the other income line of the Form 1040 return. If this situation was detected during editing, the amount of director's fees were added to the salaries and wages field.

After the completion of service center review, data were further validated, tested, and balanced at the Detroit Computing Center. Adjustments and imputations for selected fields were

## 2000 STATISTICS OF INCOME PUBLIC USE TAX FILE

used to make each record internally consistent.
Some returns designated for the sample were not available for SOI processing because other areas of IRS needed the return at the same time. For Tax Year 1999, 0.08 percent of the sample returns were unavailable.

## Method of Estimation

Weights were obtained by dividing the population count of returns in a stratum by the number of sample returns for that stratum. The weights were adjusted to correct for misclassified returns.

TFORM $=2$ Department of the Treasury-Internal Revenue Service Form Income Tax Return for Single and FLPD YR / MO 1040 EZ Joint Filers With No Dependents 2000 омв No. 1545-0675

May the IRS discuss this return with the preparer shown on back (see page 21)? $\quad \square$ Yes $\square$ No

Use this form if

- Your filing status is single or married filing jointly.
- You do not claim any dependents.
- You do not claim a student loan interest deduction (see page 8) or an education credit
- You had only wages, salaries, tips, taxable scholarship or fellowship grants, unemployment compensation, qualified state tuition program earnings, or Alaska Permanent Fund dividends, and your taxable interest was not over $\$ 400$. But if you earned tips, including allocated tips, that are not included in box 5 and box 7 of your W-2, you may not be able to use Form 1040EZ. See page 13. If you are planning to use Form 1040EZ for a child who received Alaska Permanent Fund dividends, see page 14.
- You did not receive any advance earned income credit payments.

If you are not sure about your filing status, see page 11. If you have questions about dependents, use TeleTax topic 354 (see page 6). If you cannot use this form, use TeleTax topic 352 (see page 6).

## Filling in Enter your (and your spouse's if married) social security number on the front. Because this form is your return

For tips on how to avoid common mistakes, see page 30.

## $9876543210 \quad$ Do not type your numbes. Do not use ollaras signs.

If you received a scholarship or fellowship grant or tax-exempt interest income, such as on municipal bonds, see the booklet before filling in the form. Also, see the booklet if you received a Form 1099-INT showing Federal income tax withheld or if Federal income tax was withheld from your unemployment compensation or Alaska Permanent Fund dividends.
Remember, you must report all wages, salaries, and tips even if you do not get a W-2 form from your employer. You must also report all your taxable interest, including interest from banks, savings and loans, credit unions, etc., even if you do not get a Form 1099-INT.

## Worksheet Use this worksheet to figure the amount to enter on line 5 if someone can claim you (or your for dependents <br> spouse if married) as a dependent, even if that person chooses not to do so. To find out if someone can claim you as a dependent, use TeleTax topic 354 (see page 6).

## Who Must File Schedule SE

You must file Schedule SE if:

- You had net earnings from self-employment from other than church employee income (line 4 of Short Schedule SE or line 4c of Long Schedule SE) of $\$ 400$ or more or
- You had church employee income of $\$ 108.28$ or more. Income from services you performed as a minister or a member of a religious order is not church employee income. See page SE-1.
Note. Even if you had a loss or a small amount of income from self-employment, it may be to your benefit to file Schedule SE and use either "optional method" in Part II of Long Schedule SE. See page SE-3.
Exception. If your only self-employment income was from earnings as a minister, member of a religious order, or Christian Science practitioner and you filed Form 4361 and received IRS approval not to be taxed on those earnings, do not file Schedule SE. Instead, write "Exempt-Form 4361" on Form 1040, line 52.

## May I Use Short Schedule SE or Must I Use Long Schedule SE?

Section A-Short Schedule SE. Caution: Read above to see if you can use Short Schedule SE.
1 Net farm profit or (loss) from Schedule F, line 36, and farm partnerships, Schedule K-1 (Form 1065), line 15a

2 Net profit or (loss) from Schedule C, line 31; Schedule C-EZ, line 3; Schedule K-1 (Form 1065), line 15a (other than farming); and Schedule K-1 (Form 1065-B), box 9. Ministers and members of religious orders, see page SE-1 for amounts to report on this line. See page SE-2 for other income to report

## General Instructions

## Purpose of Form

Use Form 4952 to figure the amount of investment interest expense you can deduct for 2000 and the amount you can carry forward to future years. Your investment interest expense deduction is limited to your net investment income.

For additional information, see Pub. 550, Investment Income and Expenses.

## Who Must File

If you are an individual, estate, or a trust and you claim a deduction for investment interest expense, you must complete Form 4952 and attach it to your tax return unless all of the following apply.

- Your investment interest expense is not more than your investment income from interest and ordinary dividends.
- You have no other deductible investment expenses.
- You have no disallowed investment interest expense from 1999.

## Allocation of Interest Expense Under Temporary Regulations Section 1.163-8T

If you paid or accrued interest on a loan and used the loan proceeds for more than one purpose, you may have to allocate the interest. This is necessary because different rules apply to investment interest, personal interest, trade or business interest, home mortgage interest, and passive activity interest. See Pub. 535, Business Expenses.

## Specific Instructions

Part I-Total Investment Interest Expense

## Line 1

Enter the investment interest expense paid or accrued during the tax year, regardless of when you incurred the indebtedness. Investment interest expense is interest paid or accrued on a loan (or part of a loan) that is allocable to property held for investment (as defined later).

Include investment interest expense reported to you on Schedule K-1 from a partnership or an S corporation. Include
amortization of bond premium on taxable bonds purchased after October 22, 1986, but before J anuary 1,1988 , unless you elected to offset amortizable bond premium against the interest payments on the bond. A taxable bond is a bond on which the interest is includible in gross income.
Investment interest expense does not include any of the following.

- Home mortgage interest.
- Interest expense that is properly allocable to a passive activity. Generally, a passive activity is any business activity in which you do not materially participate and any rental activity. See the separate instructions for Form 8582, Passive Activity Loss Limitations, for details.
- Any interest expense that is capitalized, such as construction interest subject to section 263A.
- Interest expense related to tax-exempt interest income under section 265.
- Interest expense, disallowed under section 264, on indebtedness with respect to life insurance, endowment, or annuity contracts issued after J une 8, 1997, even if the proceeds were used to purchase any property held for investment.

[^2]:    This population includes an estimated 267,872 returns that were excluded from other tables in this report because they contained no income information or represented amended or tentative returns identified after sampling
    ${ }^{2}$ This population includes 172 Form 1040 returns that were misclassified because of bad data collected during revenue processing
    ${ }^{3}$ This population includes 787 Form 1040 returns that were filed and processed during Calendar Year 2002 as a result of legislation for taxpayers affected by the events of September 11 , 2001 .
    Each population member is assigned a degree of interest based on how useful it is for tax modeling purposes. Degree of interest ranges from one (1) to four (4), with a one being assigned to returns that are the least
    interesting, and a four being assigned to those that are the most interesting. 'All' refers to income classes for which returns with all four degrees of interest are assigned.
