## Introduction

The Individual Tax Model is primarily a research tool that will accurately test hypotheses regarding income, deductions, tax base, tax rates, or any combination of these factors. The Tax Mudel consistis of (1) a file of 86,610 records selected randomily from the Statistics of Income sample of 383,600 Form 1040 and 1040A returns (input file--this file is available to research organizations at cost); (2) a generalized manipulation program designed to select, compute, compare, arrange, and' recode data in the input file; and (3) a table generator program that will select, weight, and tabulate specified items in the manipulated input file, and provide for stub and column identification in a flexible format of 20 lines by 12 columns, in up to 10 tables per run.

The Model file (input file) can be partitioned into as many as 10 equal parts by use of the "select" code if it is desirable to replicate an experiment using several randomly selected sets of tax records.

The returns in the Model file are stratified by size of adjusted gross income, and type of return (presence or absence of Business or Farm Schedules). The Model file contains 81 data 1 tems, and 7 codes that provide identifying and characteristics information.

This general description indicates the codes and items that are included in the Tax Model file, the layout of the file, and the sampling rates for each class of return. Facsimiles of the tax return from which the information was abstracted are also included.

## Technical Description of File

Each Data Record in the file, representing one tax return, is composed of one hundred (100), 10 digit, fixed point, numeric words the first 81 of which contain data. Logical Tape Records are made up of 5 data records. Logical tape records are separated by a $3 / 4$ inch inter record gap (IRG). There is no special indication of the and of a logical tape record other than the IRG, and no indication of the end of a data record. Data are recorded at a density of 556 bits per inch on standard 2,400 foot, $1 / 2$ inch, 7 channel, mylar tape in Binary Coded Decimal (BCD) notation with both horizontal and vertical even parity. Each logical tape record is preceeded by a Delta (CB8 421 in BCD). Numeric words are 10 or fewer characters because zero suppression eliminates up to 5 non-significant high order zeroes per word. The end of a data word is recognized by the zone bits in the units positions.

Header and trailer labels are 80 alphameric characters in length. Alpha words are 5 characters in tape. No deltas precede tape labels. The last reel of the file carries an end-of-file (EOF) indication in the second, third and fourth characters of the trailer label. all other reels carry an end-of-reel indication (EOR) in the same positions. The file was created using IBM 729-V Tape Drives.

| Field | Item |
| :---: | :---: |
| 1,2 | Blank Code Fields -- the Tax Model manipulation program permits storage of up to 10 two-digit codes created during manipulation in these two fields. |
| 3 | Weight Word - contains the sample welght applicable to the return for making national estimates. |
| 4 | Taxpayer(s) Exemption -- lines 2 a and 2 b (Regular, page 1. |
| 5 | Age Exemption -- lines 2 a and 2 b ( 65 or over), page 1 |
| 6 | Blind Exemption -- lines 2 a and 2 b (Blind), page 1. |
| 7 | Dependent Exemption -- the sum of lines 3a and 3b, page 1. |
| 8 | Salarics and Wages -- line 5 |
| 9 | Total Income (AGI+) -- line 9 (line 7 on Form 1040A). |
| 10 | Total Loss (AGI-) -- line 9 (line 7 on Form 1040A). |
| 11 | Total Deductions -- in conjunction with the "Form of deduction" code (Field 0, col. 4) this figure is: line 11a of Form 1040 returns with adjusted gross income $\$ 5,000$ or more, or the amount computed, based on the tax reported, for all Forms 1040A and 1040 under $\$ 5,000$ where the taxpayer used the "Tax Table". The amount of total deductions on many nontaxable returns exceeds adjusted gross income reduced by the amount of exemption:. A few "separate returns" (marital status code 3) arc coded as itemized deduction returns yet they have no total deductions reported. In such cases it is assumed that the spouse itemized and claimed all of the deductions. |
| 12 | Taxable Income -- for itemized deduction returns, line 11d of Form 1040. For Form 1040 returns with income $\$ 5,000$ or more and with the standard deduction, line 11 d . For standard deduction Form 1040 returns with income under $\$ 5,000$, and for all Form 1040A returns, the taxable income was computed based on the appropriate marital status and form of deduction. |
| 13 | Tax Savings, Income Averaging -- a compruted amount which is the difference between the tax liability under income averaging and the tax liability if income averaging was not used. |

## Field

Item accepted without change. 1040A). year investment credit.

Self-Employment Tax -- line 15.

Excess FICA Withheld -- line 19. used in tax computation. if Form 2439 is attached. due on line 22.

Total Overpayment -- line 23.

Income Tax Before Credits -- Iine 12, Form 1040 (line 8, Form 1040A). For Forms 1040, the tax was the result of
(1) the regular tax computation (tax status code 1);
(2) the alternative tax computation (tax status code 2 );
(3) income averaging (income averaging field); or (4) application of rates in effect prior to 1966 on prior year delinquent returns (sample codes 09 and 19). The tax reported by the taxpayer computed under (1) and (2) above was accepted if within a +5 percent tolerance. If the reported tax was outside the tolerance, the tax was recomputed, and if necessary the tax status and/or marital status codes were changed. The tax reported by the taxpayer computed under (3) or (4) above was generally

Income Tax After Credits -- line 14a (line 8 on Form

Recomputcd Tax -- line 1.4 b , tax from recomputing prior-

Income Tax Withheld -- line 17 (line 9 on Form 1040A).
1966 Estimated Tax Payment -- line 18, this includes prior-year overpayment credited to 1966 taxes.

## The Sample

The sample for the Tax Model was designed to provide national level estimates. Since the Tax Model sample is approximately onc-fif'th the size of the Statistics of Income sample, it can be anticipated that the sampling variability of Tax Model estimates will be slightly more than twice that of similar estimates from the Statistics of Income sample. Measures of sampling variability for selected estimates are provided in Statistics of Income--1966, Individual Income Tax Returns.

Although it is possible to identify returns for each State by use of the IRS District code, we do not reconmend that the Tax Model file be used to provide : $u$ bnational data estimates. The number of returns for each State are inadequate to provide rellable estimates for moit data items, and therefore no sample weights were calculated for each State (or District).

The sample code identifies the stratum from which a return was selected and indicates the weight factor to be applied for that return. Because of the way returns are processed prior to sampling, there are a few cases where the adjusted gross income is outside the range for the sample code assigned. Similarly a few returns with business data (Schedule $C$ or $F$ ) are classified in nonbusiness sample codes and vice versa. However, in all cases, the sample code assigned to the return is governing and should not be changed.

"Maximum Limitations" below)...............................................

## MAXIMUM LIMITATIONS

A. The amount on line 11 may not exceed $\$ 5,000$ multiplied by the number of persons claimed as exemptions on the individual income tax return. (If taxpayer or wife is 65 or over and in addition is disabled, see "B.") The deduction is further limited by the following amounts:
(1) $\$ 10,000$ if the taxpayer is single and not a head of household or a widow or widower entitled to the special tax rates,
(2) $\$ 10,000$ if the taxpayer is married but files a separate return,
(3) $\$ 20,000$ if th - taxpayer files a joint return, is a head of household, or is a widow or widower entitled to ine special tax rates.
B. If the taxpayer (or his wite) is 65 years of aqe or over and in addition is disabled, he may qualify for an increased maximum limitation. For this purpose disabled means that any individual is unable to engage in any substantial qainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or to be of lona-continued and midefinite duration. For further iniormation, consult your marest Internal Re venue Service office.
