

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Monetary Policy under Very Low Inflation in the Pacific Rim, NBER-EASE, Volume 15

Volume Author/Editor: Takatoshi Ito and Andrew K. Rose, editors

Volume Publisher: The University of Chicago Press

Volume ISBN: 0-226-37897-7

Volume URL: http://www.nber.org/books/ito_06-1

Conference Dates: June 25-27, 2004

Publication Date: September 2006

Chapter Title: Subject Index

Chapter Author:

Chapter URL: <http://www.nber.org/chapters/c10151>

Chapter pages in book: (413 - 415)

Subject Index

Page numbers in italics refer to tables and figures.

- Asset-price bubbles, 51–54
Asset pricing, liquidity risk and, 320–21
Assets, open market purchase of as deflation cure, 184–85
- Ball-Svensson model, 45–50, 74–77
Banking risk, liquidity shocks and, 321–22
Bank of Japan (BOJ), 3; chronology of monetary policy decisions of (1999–2004), 236; independence of, 141–42; inflation targeting and, 163–67; macroeconomic policy of, 218–23; monetary policy of, 132–33; monetary policy of Fukui regime of, 151–52; monetary policy of Hayami regime (1998–2003) of, 140–51; ZIRP policy of, 143–51, 154, 164. *See also* Japan
Bank of Japan (BOJ) rule, 258–60
“Beggars thy neighbor” devaluations, 2
Bond-financed fiscal expansion, 290–93
Bubbles: affected by policy, 54–56; affect of policies on growth of, 61–64; affect of policies on probability of bursting, 64–67; asset-price, 51–54; Ball-Svensson model and, 45–48; bursting of, Japanese economy and, 133–40; case of rational, 77–79; different probabilities of bursting exogenous, 59–61; exogenous, 51–54; policymakers and, 48–50; recent literature on, 73–74; results for exogenous, 56–59; sensitivity to model parameters of, 67–69. *See also* Japan
- Cash-in-Advance (CIA) model, 94
Central Bank in Taiwan. *See* Central Bank of China (CBC)
Central Bank of China (CBC), response to deflation in Taiwan by, 387–94
Chile, 181–83
China, deflation in, 1
Chonsei system, 5, 342–43; arbitrage condition of, 347; financial vs. real asset prices and, 347–48; overview of, 344–46; price data for, 353–58; vs. purchase, 346–47; simple growth model for, 348–53
- Deflation, 3–4; bottom line on costs of, 162; cost of, for Japan, 158–62; cures for, 172–85; difficulties in conducting monetary policy and, 160–61; in East Asia, 1–2; financial instability and, 159–60; in Japan, 205–11; Japanese labor market and, 158–59; preventing, 162–72; productivity-driven, 161–62; in Taiwan, 5; wealth redistribution and, 159–60; zero bound for nominal interest rates and, 160–61. *See also* Japan; Taiwan

- East Asian crisis, 182
East Asian Seminar on Economics (EASE-15), overview of, 1–5
- Equity market liquidity. *See* Stock market liquidity
- Ever-greening, 138
- Exchange rate policies, 2; in Taiwan, 389–90
- Exogenous bubbles, 51–54; different probabilities of bursting, 59–61; results for, 56–59
- Financial instability, deflation and, 159–60
- Fiscal expansion: bond-financed, 290–93; money-financed, 293–97
- Fiscal policy: liquidity trap and, 236–37, 282–83; locally Ricardian, 241–42.
See also Monetary policy
- Foreign exchange interventions, as deflation cure, 179–94
- Fukui regime, at Bank of Japan, 151–52
- Hayami regime, at Bank of Japan, 140–51
 “Helicopter drop” policies, 35–36, 279
- Hong Kong, deflation in, 1
- House prices, growth of in Korea, 341–43.
See also *Chonsei* system
- Inadequate aggregate demand policy, 1
- Inflation, determining optimal level of, 167–69
- Inflation targeting, 163–67; for implementing commitment solution, 256–61; vs. price-level targeting, 170–72; problems of, 173–74
- Instability, financial, deflation and, 159–60
- Interest rate, neutral, 287–88
- Interest rate smoothing, 16–17
- Japan: assessing monetary policy of with Taylor rules, 152–58; bond-financed fiscal expansion for, 290–93; bubble period of, 133–40; collapse of equity prices in, 309–11; collapse of property and stock prices in, 43–44; cost of deflation for, 158–62; deflation and nonperforming loan problem of, 211–18; deflation in, 1, 3–4; economy of, 131–33, 203–5, 233–37, 281–82; estimating Phillips curve for, 209–10; fiscal policy in (1999–2004), 261–70; gradually accelerating deflation in, 205–11; history of monetary policy in, 3–4; liquidity trap of, 279–80; macroeconomic policy in, 218–23; model for economy of, 284–90; monetary policy in (1999–2004), 251–61; monetary policy of, 133–40; money-financed fiscal expansion for, 293–97; reluctance to use fiscal solutions in, 282–84; robustness of results for economic expansion for, 297–302; zero interest rate policy (ZIRP) of, 132. *See also* Bank of Japan (BOJ); Bubbles; Deflation
- Korea, growth in house prices in, 341–43.
See also *Chonsei* system
- Liquidity. *See* Stock market liquidity
- Liquidity risk, asset pricing and, 320–21
- Liquidity shocks, banking risk and, 321–22
- Liquidity trap, 1, 4, 9, 233; fiscal policy and, 236–37; optimal commitment policy in, 237–51; zero lower boundary and, 97–99
- Locally Ricardian fiscal policy, 241–42
- Macroeconomic policy, in Japan, 218–23
- Market liquidity. *See* Stock market liquidity
- MC rule, 20, 27–31
- Monetary Conditions Index (MCI), 181–82
- Monetary policy, 2; alternative experiments in, 10–14; analytical issues of, 32–34; calibration and, 22–27; common approaches to, 93–95; deflation and difficulties in conducting, 160–61; formation of, in Taiwan, 388–89; history of Japanese, 3–4; of Japan, 133–40; Japanese (1999–2004), 251–61; McCallum and Nelson model of, 17–22; nonconventional, 176–85; shaping term-structure of interest rates and, 91–93; simulation results of McCallum and Nelson model of, 27–32. *See also* Fiscal policy
- Money-financed fiscal expansion, 293–97
- National Bank of Hungary, 181
- Neutral interest rate, 287–88
- New Keynesian Phillips curve, 240–41
- New Zealand, 181–82
- Nonperforming loans, Japan and, 211–18
- Open market operations in long-term bonds, as deflation cure, 178–79
- Operation Twist, 3, 74, 178–79

- Phillips curve, 300–302; estimating, for
 Japan, 209–10; New Keynesian, 240–41
- Policymakers, bubbles and, 48–56
- Price-level targets: as deflation cures, 172–
 76; vs. inflation targeting, 170–72
- Productivity-driven deflation, 161–62
- Quantitative easing, 10, 177–78
- Rational bubbles, case of, 77–79
- Reserve Bank of Australia, 183
- Reserve Bank of New Zealand, 182
- Ricardian equivalence, 4
- Short-term interest rates: determination of,
 110–13; escape from zero, 113–14
- Stock market liquidity, 4–5; alternative
 measures for, 318–19; cross-sectional
 evidence on, 322–26; descriptive statis-
 tics for, 312–14; dissecting changes in
 market turnover and, 314–15; mea-
 suring, 310–12; measuring shocks to,
 319–20; properties of, 315–18; time-
 series evidence on, 326–31
- Taiwan: causes of deflation in, 383–85;
 causes of price divergence in, 385–87;
 deflation in, 1, 5, 371–73; global factors
 affecting prices in, 381–83; macro-
 price changes in, 378–80; recent politi-
 cal and economic environment in, 373–
 77; responses to deflation by Central
 Bank of Taiwan, 387–94
- Taylor rules, assessing Japanese monetary
 policy and, 152–58
- Term structure of interest rates, 3, 95–97;
 in Japan, 255–56
- Term-structure of interest rates: empirical
 analysis of, 99–108; monetary policy
 and, 91–93
- Time lags, 110
- Uncovered interest parity (UIP), 20; elimi-
 nation of, 32–33
- Wealth redistribution, deflation and, 159–60
- Zero interest rate policy (ZIRP), 132, 143–
 51, 154, 164, 179, 204
- Zero lower bound (ZLB) situation, 1, 9–10;
 deflation and, 160–61; liquidity trap
 and, 97–99; policymakers and, 50–56;
 rule for use at or away from, 14–17
- Zero short-term interest rate, escape from,
 113–14
