This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Annals of Economic and Social Measurement, Volume 3, number 4

Volume Author/Editor: Sanford V. Berg, editor

Volume Publisher: NBER

Volume URL: http://www.nber.org/books/aesm74-4

Publication Date: October 1974

Chapter Title: Announcements, volume contents, indexes

Chapter Author: NBER

Chapter URL: http://www.nber.org/chapters/c10209

Chapter pages in book: (p. 701 - 710)

ANNOUNCEMENT

Explorations in Economic Research

The National Bureau of Economic Research launched a new journal this summer entitled, *Explorations in Economic Research.* Designed to expedite publication and increase the exposure of research findings generated within the NBER's broad research program, *EER* provides a focal point for publication of research papers in such areas as economic growth; business cycles, including studies of inflation and inflationary expectations; industrial organization and location; transportation and regional development; corporate and public finance; human capital; housing; and natural resources and environmental concerns. While on occasion, all or a large portion of an issue may be focused on a particular subject area, in general the opportunity to assemble special issues will be relinquished in order to reduce delays between the completion and publication of research results.

In addition to major articles *EER* also features a summary of the ASA-NBER Business Outlook Survey. Released jointly by the American Statistical Association and the National Bureau of Economic Research on a quarterly basis since December 1968, the survey is designed to record forecasts for one to five quarters ahead. Participants constitute a panel of economists and economic statisticians who are members of the Business and Economics Statistics section of the ASA. They are asked to forecast short-term economic change using eleven major variables. The forecasts are collected and tabulated and a brief analysis with a set of summary tables is prepared by the National Bureau's staff. The reader is thus offered a systematic, analytical record of short-term economic forecasts.

Commencing with Volume 2, Number 1 (Winter 1975), *EER* will be published quarterly in Winter, Spring, Summer and Fall. Subscriptions are $15.00 per year ($16.00 outside USA). For further information contact:

The Eighth Annual Computer Science and Statistics: A Symposium on the Interface (February 13–14, 1975 at UCLA)

Under the joint sponsorship of the Southern California chapter American Statistical Association, the Statistical Computing Section of the American Statistical Association, and the Los Angeles chapters of Association for Computing Machinery and ACM Sigmetrics, this meeting provides a forum for persons interested in the interrelationship between computer science and statistics and encourages continuing dialogue among those working in these fields.

Professor Edwin Kuh of MIT, Director of National Bureau of Economic Research Project on Economics, Statistics and Computer Science at Cambridge,

Massachusetts, will deliver the keynote address. Seven in-depth concurrent workshops covering vital areas will be held during the two-day meeting. Chairmen of the workshops are: Donald Guthrie, *UCLA*—"Interactive Statistical Computing and Computer Networks"; Richard L. Anderson and D. Dal Kratzer, *University of Kentucky*—"Standards for User Evaluation of Statistical Software"; William J. Kennedy, *Iowa State University*—"Numerical Algorithms"; Leon Stucki, *McDonnell Douglas Corp.*—"Statistical Approaches for Programmers to Application Software Validation"; Michael Tarter, *U.C.-Berkeley*—"Model-free Data Exploration and Pattern Recognition"; Marshall Polsley, *Jet Propulsion Laboratory*—"Operating Systems Measurement and Evaluation"; Martin B. Wilk, *American Telephone & Telegraph* and Elizabeth S. King, *Pacific Telephone & Telegraph*—"Application of Statistical Programs to Business and Economics".

James W. Frane of the Health Science Computing Facility at UCLA is General Chairman of the Symposium. Contributed papers should be directed to the appropriate workshop chairman. Requests for program and registration forms should be made to Avis Williams, Department of Biomathematics, University of California, Los Angeles, California 90024. Registration commences Wednesday evening, February 12, 1975, at the Holiday Inn, Wilshire-Westwood.

Annals of Economic and Social Measurement

CONTENTS

Volume 3—Year 1974

Number 1—January 1974

Special Issue on Stochastic Control

Introduction to Selected Papers From the Second NBER Stochastic Control Conference	Gregory C. Chow and Michael Athans	1
Quantitative Analysis for Decisions at the Federal Reserve	James L. Pierce	11
Topics in Stochastic Control Theory		
Identification in Control and Econometrics; Similarities and Differences	R. K. Mehra	21
The Importance of Kalman Filtering Methods for Economic Systems	Michael Athans	49
Adaptive Dual Control Methods	Edison Tse	65
Some Basic Idea in Stochastic Stability	H. J. Kushner	85
	H. S. Witsenhausen	91
Preferences		
On Some Price Adjustment Schemes	Masanao Aoki	95
Towards Modeling Human Information Processing and Control in Economic Systems: An Approach Based on Manned Vehicle Systems Analysis	David L. Kleinman	117
Methods for Computing Optimal Control Solutions		
On the Solution of Optimal Control Problems as Maximization Problems	Ray C. Fair	135
A Practical Method for Controlling a Large Nonlinear Stochastic System	Robert S. Holbrook	155
Approximate Adaptive Control Solutions to U.S. Beef Trade Policy	Gordon C. Rausser and John W. Freebairn	177
A Method for Stochastic Control of Nonlinear Econometric Models and an Application	J. Phillip Cooper and Stanley Fischer	205
Studies of Economic Problems		
Optimal Policies for Monetary Control	Robert S. Pindyck and Steven M. Roberts	207

Predictive Control of a Stochastic Model of the U.K. Economy simulating present policy making practice by the U.K. Government	Jeremy Bray	239
Optimal Stable Policies for Unstable Instruments	Christopher A. Sims	257
Risky R & D With Rivalry	Morton I. Kamien and Nancy L. Schwartz	267
Uncertainty and the Stability of the Armaments Race	D. L. Brito and M. D. Intriligator	279
Searching for the Lowest Price When the Distribution of Prices is Unknown: A Summary	Michael Rothschild	293
NBER Computer Research Center Notes		295
Announcements		297

Number 2—April 1974

Special Issue on Surveys/Microdata

Consumer Expenditure and Price Data: An Overview	Robert Ferber	299
Incentives, Motives, and Response Bias	Charles Cannell and Ramon Henson	307
Effects of Compensation in Consumer Expenditure Studies	Robert Ferber and Seymore Sudman	319
Detecting Interviewers in Economic Survey Data: Multivariate vs. Univariate Procedures	Philip Musgrove	333
Data Matching and Merging: An Overview	Benjamin Okner	347
A Strategy for Merging and Matching Microdata Sets	Nancy and Richard Ruggles	353
Creation of a Synthetic Data Set by Linking Records of the Canadian Survey of Consumer Finances with the Family Expenditure Survey 1970	Horst Alter	373
Comment	Christopher A. Sims	395
Statistical Confidentiality: Some Theory and Applications to Data Dissemination	I. P. Fellegi and J. L. Phillips	399
The Canadian Experience with Recall and Diary Methods in Consumer Expenditure Surveys	Isabel McWhinney and Harold E. Champion	411

NBER Computer Research Center Notes 439
Announcements and Reports 433

Number 3—July 1974

Editor's Corner
A Life Cycle Model of the Household's Time Allocation — Malcolm S. Cohen and Frank P. Stafford — 447
Optimal Response Surface Design in Monte Carlo Sampling Experiments — John Conlisk — 463
A Microsimulation of the Macroeconomy with Explicitly Represented Money Flows — Barbara R. Bergmann — 475
Tests for Structural Change and Prediction Intervals for the Reduced Forms of Two Structural Models of the U.S.: The FRB-MIT and Michigan Quarterly Models — T. Muench, A. Rolnick, N. Wallace and W. Weiler — 491
Research Methodology Notes
A Simple Suggestion to Improve the Mincer–Zarnowitz Criterion for the Evaluation of Forecasts — Hatanka Michio — 521
Generating Submodels of a Simultaneous Equation Model: An Algorithm Using Fisher's Correspondence Principle — James Steuert — 525
Computer Center Notes
Toward Computer Networking: The Harvard Experience — Joe B. Wyatt — 541
NBER Computer Research Center Notes 551

Number 4—October 1974

Special Issue on Simultaneous System Estimation

Introduction — Edwin Kuh — i
Estimation of Systems of Simultaneous Equations, and Computational Specifications of GREMLIN — David A. Belsley — 551
Efficient Estimation of Nonlinear Simultaneous Equations with Additive Disturbances — Dale W. Jorgenson and Jean-Jacques Laffont — 615

Full Information Instrumental Variables Estimation of Simultaneous Equations Systems	Jerry A. Hausman	641
Estimation and Inference in Nonlinear Structural Models	E. K. Berndt, B. H. Hall, R. E. Hall and J. A. Hausman	653
On the Robust Estimation of Econometric Models	Ray C. Fair	667
The Relative Efficiency of Instrumental Estimators of Systems of Simultaneous Equations	James M. Brundy and Dale W. Jorgensen	679
Announcements		701
