## Acknowledgments

---

This volume contains revised versions of papers that were presented in Cambridge, Massachusetts on 11–12 May 2000 at an NBER conference. The idea of a conference and volume on this topic came from suggestions by Martin Feldstein and James Poterba, who were involved at all stages of the planning and who were active participants at the conference. Financial support was also generously provided by the Smith-Richardson Foundation.

Kirsten Foss Davis and Brett Maranjian assisted in the logistical and local arrangements, for which I am grateful. Helena Fitz-Patrick ably shepherded the papers through the revision process and on to final publication. Anonymous reviewers from the University of Chicago Press and the NBER improved the papers as well.

All those involved performed at a high level of professionalism and have helped make the final product as useful a volume as I hope it to be.
