

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Annals of Economic and Social Measurement, Volume 5, number 1

Volume Author/Editor: Sanford V. Berg, editor

Volume Publisher: NBER

Volume ISBN:

Volume URL: <http://www.nber.org/books/aesm76-1>

Conference Date:

Publication Date: January 1976

Chapter Title: Front matter, Annals of Economic and Social Measurement

Chapter Authors:

Chapter URL: <http://www.nber.org/chapters/c10424>

Chapter pages in book: (i - iv)

Annals of
**Economic and Social
Measurement**

journal of computers, information retrieval,
and research methodology

volume 5

number 1

winter 1976

contents

EDITOR'S CORNER	i
GARY FROMM AND LAWRENCE R. KLEIN: The NBER/NSF Model-Comparison Seminar: An Analysis of Results	1
CHARLES BEACH: Cyclical Impacts on the Personal Distribution of Income	29
KENT D. WALL: FIML Estimation of Rational Distributed Lag Structural Form Models	53
VITTORIO CORBO: Second Order Approximations for Estimating Production Functions	65
DENISE OSBORN: Maximum Likelihood Estimation of Moving Average Processes	75
ROBERT F. ENGLE: Interpreting Spectral Analyses in Terms of Time Domain Models	89
STEFANO FENOALTEA: Real Value Added and the Measurement of Industrial Production	111
<i>Programing Software Notes</i>	
WILLIAM D. HASEMAN AND ANDREW B. WHINSTON: Information Systems for Public Sector Management	139
NEIL W. HENRY, JOHN F. McDONALD, AND HOUSTAN H. STOKES: The Estimation of Dynamic Economic Relations from a Time Series of Cross Sections	153
<i>Research Methodology Notes</i>	
SUNG Y. KWACK: <i>A Data Base Improvement for Analysis of U.S. Imports and Exports: Price Indices by End-Use, 1958: 1-1974: 4</i>	157
W. A. JAYATISSA: <i>Criteria for Evaluation of Econometric Models: A Correction</i>	161
SAUL H. HYMANS: Reply	161
Computer Center Notes	163
Announcements	165

National Bureau of Economic Research

ANNALS OF ECONOMIC AND SOCIAL MEASUREMENT

MANAGING EDITOR

SANFORD V. BERG
University of Florida

ASSISTANT EDITOR

SYDNEY SHULMAN
National Bureau of Economic Research

COMPUTER CENTER EDITOR

JOHN KIRSCH
National Bureau of Economic Research

EDITORIAL BOARD

PHILLIP CAGAN, Columbia University
GREGORY CHOW, Princeton University
DONALD FARRAR, University of California at Los Angeles
GARY FROMM, National Bureau of Economic Research
EDWIN KUH, Massachusetts Institute of Technology
LEE LILLARD, National Bureau of Economic Research
JOHN MEYER, Harvard University
JACOB MINCER, Columbia University
M. ISHAQ NADIRI, New York University

The *Annals of Economic and Social Measurement* is published quarterly (Winter, Spring, Summer and Fall) at 71 Winterstoke Road, Bristol, England by the National Bureau of Economic Research, 261 Madison Avenue, New York, N.Y. 10016. The *Annals* has been exempted from the rules governing submission of manuscripts to, and critical review by, the Directors of the National Bureau. Each issue, however, is reviewed and accepted for publication by the members of the Editorial Board, all of whom are affiliated with the NBER.

Communications on editorial matters should be addressed to the Managing Editor, Dr. Sanford V. Berg, Department of Economics, University of Florida, Gainesville, Florida 32601. Applications for permission to quote from this journal should be addressed to Ms. Sydney Shulman, at the publisher's address, and will be freely granted. Reproduction of articles requires written permission from the Assistant Editor and the author. Communications on subscriptions, single copy requests and claims for missing issues should be addressed to Subscription Department, *Annals of Economic and Social Measurement*, at the publisher's address.

Institutional Subscription price: \$15.00 per year; \$16.00 outside U.S.A.
Individual Subscription price: \$10.00 per year; \$11.00 outside U.S.A.
Single and back issues: \$5.00

A perforated subscription form appears opposite the back cover.

Airfreighted to and mailed in the U.S.A. by Publications Expediting, Inc., 200 Meacham Ave., Elmont, N.Y. 11003.

Second-class postage paid at Jamaica, N.Y.

Printed in Bristol, England by J. W. Arrowsmith Ltd.

CODEN: AESMCM

EDITOR'S CORNER

The articles in this issue approach a number of problems primarily related to time series analysis. Fromm and Klein present comparisons of selected error characteristics from simulations within and beyond sample periods, (twenty variables) of eleven major econometric models of the U.S. economy. Also, comparisons are made of dynamic policy multipliers, and reasons for discrepancies between multiplier values across models are described. The NBER/NSF Model Comparison Seminar provided the format for the many simulation runs generating the data underlying these comparisons. Beach, in the next paper, suggests a new method for analyzing cyclical changes in inequality in the size distribution of income—a factor not taken into account by most macroeconomic models. Disaggregative income quantities spanning a distribution serves as the basis for analysis.

The next four articles present econometric techniques as applied to distributed econometric lag models, production functions, moving average processes, and spectral analysis. Wall uses nonlinear unconstrained optimization techniques for "FIML Estimation of Rational Distributed Lag Structural Form Models." A variant of the Fair short-term macroeconomic forecasting model is used to illustrate the application of the technique. Corbo shows that the CES and VES production functions have the same second order approximation. Numerical experiments are presented in support of the conclusion that the approximation is almost always better for the VES than the CES form.

Osborne and Engle both address issues in time series analysis. Osborne demonstrates the computational feasibility of the "Maximum Likelihood Estimation of Moving Average Processes" by non-linear optimization. The technique is particularly appropriate for the "numerical estimation of standard errors for the coefficients of a model near the boundary of the invertibility region." Engle provides a review of "Interpreting Spectral Analyses in Terms of Time Domain Models," with distributed lags and autoregressive processes given attention. He then discusses the estimation procedure in the context of the TROLL system, developed at NBER Computer Research Center.

Fenoaltea addresses the issue of "Real Value Added and the Measurement of Industrial Production." Given the contributions of NBER researchers to this area in the past, it is appropriate that we include this thought-provoking (and somewhat controversial) piece in the *Annals*. Several short notes follow. Haseman and Whinston present a framework for managing and analyzing large economic data bases. Their Generalized Planning System (GPLAN) is used to illustrate the approach. Henry, McDonald and Stokes then point out and correct a problem in Frieden's software package for estimating dynamic economic relations from a time series of errors section. In an extended announcement, Kwack describes "Data Base Improvement for Analysis of U.S. Imports and Exports: Price Indices by End Use, 1958 : 1-1974 : 4." In another correction, Jayatissa points out an error in a 1972 *Annals* article, "Criteria for Evaluation of Econometric Models," and Saul Hymans briefly responds to that comment. Computer Research Centre notes and Announcements follow. This issue repre-

sents the last multi-topic issue for a while, with the next two being special issues on Economic and Stochastic Control and on Discrete, Qualitative and Limited Dependent Models.

I am pleased to announce that Gary Fromm, National Bureau of Economic Research-Washington, D.C. and Lee Lillard, National Bureau of Economic Research-Palo Alto, Ca. have accepted our invitation to join the Editorial Board.

Finally, my apologies to those listed below for not including them in the list, which appeared in Volume 3, Number 3 of researchers who were kind enough to review papers during 1974 and 1975.
