This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Doctors and Their Workshops: Economic Models of Physician Behavior

Volume Author/Editor: Mark Pauly

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-65044-8

Volume URL: http://www.nber.org/books/paul80-1

Publication Date: 1980

Chapter Title: Index

Chapter Author: Mark Pauly

Chapter URL: http://www.nber.org/chapters/c11530

Chapter pages in book: (p. 129 - 134)

Index

Accuracy, physician: choice of, 48–55, 75; consumer estimate of, 56; effects on income, 55; influence on consumers, 43; number of physicians and, 56; physician competition and, 55; profit maximization and, 48–55; value of, 53
Accuracy quotation, 56
Acton, J. P., 70
Advertising, physician, 15, 114
Agency, concept of, 6–7, 113–17
Agent as a monopolist, 7
Aides: monitoring performance of, 13; physician use of, 12, 13
Ambulatory care: availability effect on, 80–90; insurance coverage and, 116; physician provision of, 1; physician time and, 2; price of, 61; substitution for hospitalization, 93
Ambulatory visit rate: availability effect and, 90; general practitioners vs. surgeons, 81
American Medical Association's Distribution of Physicians, 26
Annual Survey of Hospitals (AHA's), 26
Appendectomy, 65
Availability effect: for ambulatory care, 65–67, 70–77, 79–90; based on medical need, 65; differences between urban and rural areas, 71; educational groups and, 81, 90; employment status and, 87; for hospital care, 91–92, 95–96, 98, 106–10, 115; information manipulation and, 97; persons effected by, 116; for physician services, 115; sample division and, 79; target income theory and, 75–77, 84; theoretical explanations of, 67; in urban areas, 85; variables for, 85, 87

Bayes' rule, 46
Blue Shield, 71
Bunker, J. P., 97
Bureau of Labor Statistics, 79

Capitation system, 58–63
Casemix, hospital, 27
Censoring problem, 47–48
Coate, D., 13
Cobb-Douglas Function, 26, 27
Competition among physicians: effects on price, 10; level of accuracy, 53
Competitive market, 7
Consultation, charges for, 63
Consumer: demand for medical care, 44–45; health information, 43, 44; informed vs. ignorant, 47–48; knowledge of medical care, 14; response to physician information, 45
Convalescence, out of hospital, 36, 38
Cost: opportunity, 38; physician, and size principle, 21

Demand creation models, 54–55, 66, 68
Demand curve: effect of information on, 44–47; for individual physicians, 50; for medical care, 5; physician

Demand creation models (*cont.*)
control of, 5; physician price and, 5; for physician services, 48; stochastic, for hospital care, 96–97
Demand-for-admissions function, 93
Diagnostic information, as a physician product, 49
Doctor shortage, 72
Donations, hospital, 92
Drugs, generic: physician knowledge of, 12; vs. branded drugs, 14
Drugs, prescription, 11

Economic approach vs. medical need approach, 66
Economic Stabilization Program, 71
Education level: hospital availability effects and, 106; physician availability effects and, 79, 81–82; physician information and, 97–98
Efficiency in physician's practice, 13, 14
Effort, physician, 22
Emergency care and physician advice, 43
England, rate of surgery in, 97
Entrepreneur, 2
Evans, R., 7, 54, 77
Excess capacity in hospitals, 29–31
Excess demand: for hospital services, 92–96; for physicians' services, 71–74

Federal hospitals, 97
Fee: consumer knowledge of, 14; fixed, 114; length of hospital stay and, 94; physician net income and, 20
Fee for service system, 11, 57–58, 60–63, 113, 114
Feldman, R., 54, 76
Feldstein, M., 5, 22, 23, 25, 29, 33, 35, 72, 73, 93–94
Friedman, B., 87
Fuchs, V., 11, 27, 35, 65, 68, 69, 107

General Practitioners, 97, 98; and effects on hospital admissions, 42; output elasticities of, 31
Gittelsohn, A., 97
Governmental hospitals, 36, 38
Grossman, M., 44, 87
Guide Issue (AHA's), 27

Health care, incentive to create demand for, 53
Health Interview Survey of the National Center for Health Statistics (1970), 77
Health Maintenance Organizations (HMOs), 57, 60, 61
Health production function, 8, 9
Hernia repair, 65, 98
Hospital: administrators, 22, 96; control of quality, 31; costs, reductions in, 42; efficiency of, 17; excess capacity in, 29–31; financial condition, effects of, 95; labor input, measure of, 33; length of stay, 35, 94, 98, 101, 197; nonprofit, 28, 33, 36, 38; occupancy rate, 30; physician control of, 22; productivity, 28, 111–13; profits, use of, 95; reimbursement of, 112; services, demand creation for, 23, 91–92; size, 24; transfer of costs, 112
Hospital admissions: availability variables and, 101; education level and, 101, 103; effect of bed number on, 101, 110; effects of primary care physicians on, 42; equation for, 27; health status and, 106; occupancy rate, 30; overuse of, 11; physician production of, 35; urban areas and, 101
Hospital beds: demand for, 96; per capita, 68–69
Hospital output: changes in, 30; length of stay and, 35; measure of, 31; subspecialties and, 31
Hospitalization, benefits of, 61
House of Representatives Subcommittee on Oversight and Investigations, 43

Illich, Ivan, 43
Incentive neutrality, 59
Inventive reimbursement of hospitals, 111–13
Income effects on accuracy, 53
Income, physician, 19, 38, 42, 55, 59
Indemnity insurance, 20
Information: demand for and effects of, 43–48; measurement of manipulation of, 74–75; unequal, 14–15, 113–14
Information manipulation theory: available effect and, 65, 82; chronic illness and, 87; demand equation in, 74; hospital bed supply and, 95; influence of availability and, 79; information accuracy and, 116, 117; primary prediction of, 80; vs. target income theory, 76

Inputs, hospital: availability of, 91–92; effects of insurance on, 17–20; excess capacity in, 29–31; nonphysician labor, 28; overuse, 21–24, 36–40, 111–13; quantity of, 92
Inputs, physician: combination with aide time, 11–14, 42; effects of insurance on, 17–20; measure of, 22, 26, 38; reduction of under imperfect cooperation, 20–22; underuse of, in hospital, 21–24, 36–40, 111–13
Insurance coverage: effects on hospitalization, 107; indemnity, 20; for hospitalization, 11, 17–20, 75, 94, 101, 115; of physician services, 7, 8, 19–20, 62, 94, 116; welfare loss and, 7
Insurance reimbursement policy, 3
Inventories, 74

Kramer, M., 68, 69

Least cost combination of inputs, 11–14
Least cost techniques, 12
Length of stay, hospital, 35–36, 98, 101–3
Lewis, C., 97, 106

Marginal health products and physician behavior, 9
Marginal Net Real Income (MNRI), 61–63
Marginal revenue from physician input, 62–63
Market area, measurement of, 57
Master Provider File (Social Security Administration's), 26
Mathematica, Inc., 78–79, 87
Medicaid, 110
Medical Letter, 12
Medical need approach, 65–66
Medical schools, number per state, 69
Medicare, 26, 80, 98
Metropolitan areas: effects of physician accuracy and, 56; level of consumer information and, 57
Minimizing costs of medical care: departure from, 21; incentive for, 11, 114–15; in office based practices, 12; physician choice and, 6, 20
Monopolistic health market, 54
Monotechnic point of view, 65
Monsma, G., 62
Moral hazard, 18, 61

Newhouse, J., 22, 70, 76, 80
Nurses, 23

Office hours vs. hospital hours, 36
Oligopolistic features and effects on price, 51, 53
Opportunity cost, physician, 19, 52
Optometry, 13

Pauly, M., 54
Personnel, hospital use of, 36
Phelps, C., 70, 80
Physician-hospital input ratios, 22, 38
Physicians: as entrepreneurs, 2; as income maximizers, 4, 6, 9, 10, 14, 17, 50, 53, 58, 59, 60, 91, 113–15; as monopolists, 4; as providers of information, 2; as the patient's agent, 5–9, 11, 49, 58, 59; control over price of, 3; effects on medical inputs of, 1; fees of, 1; hospital employed, 23, 31; information, accuracy of, 46, 48, 55, 56–57; per capita, 48; profits and, 1; time spent in hospitals and, 2; work hours of, 38, 39, 42, 59, 72
Physician services: creation of demand for, 73; demand for, 4, 48, 71, 72, 75; hospital oriented, 93, 97; market for, 4; rationing of, 72–73
Physician visit rate: age of patient and, 81; chronic illness and, 81, 87; employment status and, 82, 87; female patients and, 82
Prepaid group practice, 11, 57, 60, 61, 113, 114
Price: below market clearing level, 4; consumer information about, 113; demand creation and, 53; demand curve, 5; demand for services and, 3–4; of hospital inputs, 17; limitations for medical care, 15; physician control over, 3, 4, 54; setting of, 2; shadow, of health, 8–10, 36, 45
Primary care physicians and hospital admissions, 42
Primary Sampling Units (PSUs), 77
Production functions, 23, 26–27
Professional Standards Review Organizations (PSROs), 116, 117
Profit Maximizing: behavior of physicians and, 74; physician choice of, 51
Proportional coinsurance, 20

Provider of Services Survey (Social Security Administration's), 39
Public policy and physician location, 26

Queues, physician maintenance of, 72, 74

Rand, E., 87
Rationing: of hospital beds, 96; of physician services, 72–73
Reinhardt, U., 3, 26, 27, 39, 42, 54, 115
Roemer's Law, 106
Rural areas and consumer information, 57

Satterthwaite, M., 54
Shadow price of health, 8–10, 36, 45
Shortage of physicians, 84
Size Principle and physician costs, 20–22
Sloan, F., 54, 76
Smallwood, D., 6
Smith, Adam, 6
Smith, K., 6
South Dakota, physician demand in, 69
Specialists: hospital based, 31; surgical, 2, 81, 103
Stochastic demand for hospital care, 96–97
Supply and Demand curves, 4–5
Surgeons: cost of training, 42; general, availability of, 97; income of, 63; marginal output of, 31
Surgery: consumption of hospital episodes of, 103–6; effects on hospital admissions, 98; excessive, 61; rates, 107, 110
Surgical fees and MNRI, 63
Surgical services, demand for, 69

Target income model, 54; theory, 75–77, 84
Technological imperative, 66
Therapeutic care: as a physician product, 49, 50; demand for, 50; selling price of, 55
Third party reimbursement, 58, 114
Time cost and availability effect, 71
Tobit regression, 80, 81, 85, 98
Tonsilitis, treatment for, 48
Treatment procedures, costliness of, 21

United Kingdom, hospitals in, 23, 29, 33, 35
United States: hospitals in, 23–25, 35; rate of surgery in, 97
United States House of Representatives Subcommittee on Oversight and Investigations, 43

Variables for availability effect, 85, 87
Veteran's Administration hospitals, 68

be of particular interest to economists, sociologists, health-services researchers, health-care providers, and planners of health-care programs and insurance policies.

MARK V. PAULY is professor of economics at Northwestern University.

Books of Related Interest

The Limits of Professional Power
National Health Care in the Federal Republic of Germany
DEBORAH A. STONE

Focusing on the political power of the medical profession, the author analyzes the public-health system of West Germany and compares it with alternative policies employed in other national systems.
1980
Cloth ISBN: 0–226–77553–4

Doctoring Together
A Study of Professional Social Control
ELIOT FREIDSON

This study examines a large prepaid medical group and how it carried out its activities, with particular attention to professional self-regulation of the quality of physician performance.
1975 312 pages
Paper P911 ISBN: 0–226–26222–7

The Value of Life
An Economic Analysis
M. W. JONES-LEE

This study aims to pose the question of the value of life and safety improvement in a form that makes public-investment decisions in the health and transport fields amenable to analysis using the conceptual apparatus of economic theory.
1976 184 pages
Cloth ISBN: 0–226–40794–2
