## Differences and Changes in Wage Structures

*Edited by* Richard B. Freeman and Lawrence F. Katz

These twelve essays compare patterns of earnings inequality and pay differentials in the United States, Australia, Korea, Japan, Western Europe, and Eastern Europe, examining issues such as managerial compensation, gender differences in earnings, and the relationship of pay to regional unemployment.

## Social Protection versus Economic Flexibility

*Is There a Trade-off?*

*Edited by* Rebecca M. Blank

As the United States considers major overhauls in health insurance, welfare, and labor market regulation, economists and policy makers need to understand the impact of social welfare programs on employment rates. This volume explores how programs such as social security, income transfers, and child care in Western Europe, the United States, and Japan have affected the ability of workers to adjust to fast-growing segments of the economy.

## Training and the Private Sector

*International Comparisons*

*Edited by* Lisa M. Lynch

This volume compares new evidence on the returns to worker training in the United States, Germany, France, Britain, Japan, Norway, and the Netherlands. The authors focus on Germany's formal apprenticeship programs; the U.S. system of learning-by-doing; Japan's low employee turnover and extensive company training; and Britain's government-led and school-based training schemes.

## Small Differences That Matter

*Labor Markets and Income Maintenance in Canada and the United States*

*Edited by* David Card and Richard B. Freeman

In a revealing examination of social and labor market policies in Canada and the United States during the 1980s, these essays show that subtle differences in unemployment compensation, unionization, immigration policies, and income maintenance programs have significantly affected the levels of poverty, unemployment, and income inequality in the two countries.
